Skill Center students . . . . .	1.198

(4) CLASSIFIED STAFF ALLOCATIONS

Allocations for classified staff units providing school building-level and district-wide support services for the 2023-24 and 2024-25 school years are determined using the formula-generated staff units provided in RCW 28A.150.260 and pursuant to this subsection, and adjusted based on each district's annual average full-time equivalent student enrollment in each grade.

These factors are intended to adjust allocations so that, for the purpose of distributing insurance benefits, full-time equivalent employees may be calculated on the basis of 630 hours of work per year, with no individual employee counted as more than one full-time equivalent. The number of benefit units is determined as follows:

(a) The number of certificated staff units determined in subsections (2), (3), and (5) of this section multiplied by 1.02; and

**Sec. 701.** 2023 c 475 s 701 (uncodified) is amended to read as follows:

**FOR THE OFFICE OF FINANCIAL MANAGEMENT—INFORMATION TECHNOLOGY INVESTMENT POOL**

General Fund—State Appropriation (FY 2024) . . . . .	(( <del>\$26,470,000</del> ))
	\$27,023,000
General Fund—State Appropriation (FY 2025) . . . . .	(( <del>\$9,022,000</del> ))

	\$18,508,000
TOTAL APPROPRIATION.....	(((\$42,051,000))
	<u>\$68,524,000</u>

The appropriations in this section are subject to the following conditions and limitations:

(1) The appropriations are provided solely for expenditure into the information technology investment revolving account created in RCW 43.41.433. Amounts in the account are provided solely for the information technology projects shown in LEAP omnibus documents IT-2023, dated April 22, 2023, and IT-2024, dated February 18, 2024, which ~~((is))~~are hereby incorporated by reference. To facilitate the transfer of moneys from other funds and accounts that are associated with projects contained in LEAP omnibus documents IT-2023, dated April 22, 2023, and IT-2024, dated February 18, 2024, the state treasurer is directed to transfer moneys from other funds and accounts to the information technology investment revolving account in accordance with schedules provided by the office of financial management. Restricted federal funds may be transferred only to the extent permitted by law, and will otherwise remain outside the information technology investment account. The projects affected remain subject to the other provisions of this section.

(2) Agencies must apply to the office of the chief information officer for certification and release of funding for each gate of the project. When the office of the chief information officer certifies the key deliverables of the gate have been met, a current technology budget is approved; and if applicable to the stage or gate of the project, that the project is putting functioning software into production that addresses user needs, is in compliance with the quality assurance plan, and meets a defined set of industry best practices for code quality that the office of the chief information officer will post to their website by July 1, 2023, it must notify the office of financial management and the fiscal committees of the legislature. The office of financial management may not approve funding for the certified project gate any earlier than ten business days from the date of notification to the fiscal committees of the legislature.

(3)(a) Allocations and allotments of information technology investment revolving account must be made for discrete stages of projects as determined by the technology budget approved by the office of the chief information officer and the office of financial management.

(b) Fifteen percent of total funding allocated by the office of financial management, or another amount as defined jointly by the office of financial management and the office of the chief information officer, will be retained in the account, but remain allocated to that project. The retained funding will be released to the agency only after successful completion of that stage of the project and only after the office of the chief information officer certifies the stage as required in subsection (2) of this section. For the one Washington project, the amount retained is increased to at least twenty percent of total funding allocated for any stage of that project. If there is no significant risk to the project, the holdback does not apply to the final gate during a biennial close.

(4)(a) Each project must have a technology budget. The technology budget must have the detail by fiscal month for the 2023-2025 fiscal biennium. The technology budget must use a method similar to the state capital budget, identifying project costs, each fund source, and anticipated deliverables through each stage of the entire project investment and across fiscal periods and biennia from project onset through implementation and close out, as well as at least five years of maintenance and operations costs.

(b) As part of the development of a technology budget and at each request for funding, the agency shall submit an updated technology budget, if changes occurred, to include detailed financial information to the office of financial management and the office of the chief information officer. The technology budget must describe the total cost of the project, as well as maintenance and operations costs, to include and identify at least:

(i) Fund sources:

(A) If the project is funded from the information technology revolving account, the technology budget must include a worksheet that provides the fund sources that were transferred into the account by fiscal year;

(B) If the project is by a central service agency, and funds are driven out by the central service model, the technology budget must provide a statewide impact by agency by fund as a worksheet in the technology budget file;

(ii) Full time equivalent staffing level to include job classification assumptions. This is to assure that the project has adequate state staffing and agency support to ensure success, ensure user acceptance, and adequately test the functionality being delivered in each sprint before it is accepted by the agency's contracting officer or their representative. Key project functions that are deemed "critical" must be retained by state personnel and not outsourced, to ensure that knowledge is retained within state government and that the state can self-sufficiently support the system and make improvements without long-term dependence on a vendor;

(iii) Discrete financial budget codes to include at least the appropriation index and program index;

(iv) Object and subobject codes of expenditures;

(v) Anticipated deliverables to include software demonstration dates;

(vi) Historical budget and expenditure detail by fiscal year; and

(vii) Maintenance and operations costs by fiscal year for at least five years as a separate worksheet.

(c) If a project technology budget changes and a revised technology budget is completed, a comparison of the revised technology budget to the last approved technology budget must be

posted to the dashboard, to include a narrative rationale on what changed, why, and how that impacts the project in scope, budget, and schedule.

(5) (a) Each project must have a project charter. The charter must include:

(i) An organizational chart of the project management team that identifies team members and their roles and responsibilities, and shows that the project is adequately staffed by state personnel in key functions to ensure success;

(ii) The office of the chief information officer staff assigned to the project;

(iii) A project roadmap that includes the problems the team is solving and the sequence in which the team intends to take on those problems, updated periodically to reflect what has been learned;

(iv) Metrics to support the project strategy and vision, to determine that the project is incrementally meeting user needs;

(v) An implementation schedule covering activities, critical milestones, and deliverables at each stage of the project for the life of the project at each agency affected by the project;

(vi) Performance measures used to determine that the project is on time, within budget, and meeting expectations for quality of work product;

(vii) Ongoing maintenance and operations cost of the project post implementation and close out delineated by agency staffing, contracted staffing, and service level agreements; and

(viii) Financial budget coding to include at least discrete financial coding for the project.

(b) If required by the office of the chief information officer, a project may also need to have an investment plan. The office of the chief information officer must:

(i) Base the requirement of an agency needing to have an investment plan on the complexity and risk of the project;

(ii) Establish requirements by project risk level in statewide technology policy, and publish the requirements by September 30, 2023; and

(iii) In collaboration with the department of enterprise services, define the circumstances under which the vendor will be terminated or replaced and establish the process by which the agency will transition to a new vendor with a minimal reduction in project productivity.

(6) (a) Projects with estimated costs greater than \$100,000,000 from initiation to completion and implementation may be divided into discrete subprojects as determined by the office of the chief information officer, except for the one Washington project which must be divided into the following discrete subprojects: Core financials, expanding financials and procurement, budget, and human resources. Each subproject must have a technology budget as provided in this section.

(b) If the project affects more than one agency:

(i) A separate technology budget and investment plan must be prepared by each agency; and

(ii) There must be a budget roll up that includes each affected agency at the subproject level.

(7) The office of the chief information officer shall maintain a statewide information technology project dashboard that provides updated information each fiscal month on projects subject to this section. The statewide dashboard must meet the requirements in section 155 of this act.

(8) For any project that exceeds \$2,000,000 in total funds to complete, requires more than one biennium to complete, or is financed through financial contracts, bonds, or other indebtedness:

(a) Independent quality assurance services for the project must report independently to the office of the chief information officer;

(b) The office of the chief information officer, based on project risk assessments, may require additional quality assurance services and independent verification and validation services;

(c) The office of the chief information officer must review, and, if necessary, revise the proposed project to ensure it is flexible and adaptable to advances in technology;

(d) The technology budget must specifically identify the uses of any financing proceeds. No more than thirty percent of the financing proceeds may be used for payroll-related costs for state employees assigned to project management, installation, testing, or training;

(e) The agency must consult with the office of the state treasurer during the competitive procurement process to evaluate early in the process whether products and services to be solicited and the responsive bids from a solicitation may be financed;

(f) The agency must consult with the contracting division of the department of enterprise services for a review of all contracts and agreements related to the project's information technology procurements;

(g) The agency and project must use an agile development model holding live demonstrations of functioning software, developed using incremental user research, held at the end of every two-week sprint, except for:

(i) Hardware or infrastructure projects; and

(ii) Projects that have implemented all phases and are now in maintenance and operations;

(h) The project solution must be capable of being continually updated, as necessary; and

(i) The agency and project must deploy usable functionality into production for users within 180 days from the date of an executed procurement contract in response to a competitive request for proposal.

(9) The office of the chief information officer must evaluate the project at each stage and certify whether the project is putting functioning software into production that

addresses user needs, is projected to be completed within budget, is in compliance with the quality assurance plan, and meets a defined set of industry best practices for code quality, and whether the project is planned, managed, and meeting deliverable targets as defined in the project's approved technology budget and investment plan.

(10) The office of the chief information officer may suspend or terminate a project at any time if it determines that the project is not meeting or not expected to meet anticipated performance and technology outcomes. Once suspension or termination occurs, the agency shall unallot any unused funding and shall not make any expenditure for the project without the approval of the office of financial management. The office of the chief information officer must report on December 1 each calendar year any suspension or termination of a project in the previous 12-month period to the legislative fiscal committees.

(11) The office of the chief information officer, in consultation with the office of financial management, may identify additional projects to be subject to this section, including projects that are not separately identified within an agency budget. The office of the chief information officer must report on December 1 each calendar year any additional projects to be subjected to this section that were identified in the previous 12-month period to the legislative fiscal committees.

(12) Any cost to administer or implement this section for projects listed in subsection (1) of this section, must be paid from the information technology investment revolving account. For any other information technology project made subject to the conditions, limitations, and review of this section, the cost to implement this section must be paid from the funds for that project.

(13) The following information technology projects are subject to the conditions, limitations, and review of this section:

(a) The state network firewall replacement of the consolidated technology services agency;

(b) The resident portal of the consolidated technology services agency; and

(c) The resident identity and access management modernization project of the consolidated technology services agency.

(b) By December 1, 2024, the commission must report to the appropriate committees of the legislature on the use of grant funds and criteria used to determine grant awards established in (a) of this subsection and uses of funds distributed to the commission for operating expenses.

(c) It is the intent of the legislature to continue the provisions of (a) of this subsection in subsequent fiscal biennia.

(1) The department shall prepare, post on the department website, and submit to the appropriate committees of the legislature an annual report that identifies all distributions of moneys from the accounts created in RCW 70A.65.240 through 70A.65.280.

(2) The report must identify, at a minimum, the recipient of the funding, the amount of the funding, the purpose of the funding, the actual end result or use of the funding, whether the project that received the funding produced any verifiable reduction in greenhouse gas emissions or other long-term impact to emissions, and if so, the quantity of reduced greenhouse gas emissions, the cost per carbon dioxide equivalent metric ton of reduced greenhouse gas emissions, and a comparison to other greenhouse gas emissions reduction projects in order to facilitate the development of cost-benefit ratios for greenhouse gas emissions reduction projects.

(3) The department shall require by rule that recipients of funds from the accounts created in RCW 70A.65.240 through 70A.65.280 report to the department, in a form and manner prescribed by the department, the information required for the department to carry out the department's duties established in this section.

(4) The department shall update its website with the information described in subsection (2) of this section as appropriate but no less frequently than once per calendar year.

(5) The department shall submit its report to the appropriate committees of the legislature with the information described in subsection (2) of this section no later than September 30 of each year. For fiscal year 2025, the report must be submitted no later than November 30, 2024.
