The department shall utilize these standards to assess program effectiveness. The courts shall also utilize these standards in determining their continued use of these alternatives. The courts shall not continue to use programs that do not comply with these standards.

This limitation includes any credits carried forward under subsection (2)(b) of this section from prior years.

(2)(a) No person is eligible for tax credits under section 2 of this act in excess of the amount of tax that would otherwise be due under chapter 82.04 or 82.16 RCW.

Trust Land Transfer Program (04-2-851)

The state building construction account appropriation in this section is subject to the following conditions and limitations:

(1) The total appropriation is provided to the department solely to transfer from trust status or enter into thirty-year timber harvest restrictive easements/leases for certain trust lands of state-wide significance deemed appropriate for state park, fish and wildlife habitat, natural area preserve, natural resources conservation area, open space, or recreation purposes.

(2) Property transferred under this section shall be appraised and transferred at fair market value. The value of the timber transferred shall be deposited by the department to the common school construction account in the same manner as timber revenues from other common school trust lands. No deduction shall be made for the resource management cost account under RCW 79.64.040. The value of the land transferred shall be deposited in the natural resources real property replacement account. These funds shall be expended by the department for the exclusive purpose of acquiring real property of equal value to be managed as common school trust land.

(3) Property subject to easement/lease agreements under this section shall be appraised at fair market value both with and without the imposition of the easement/lease. The entire difference in appraised value shall be deposited by the department to the common school construction fund in the same manner as lease revenues from other common school trust lands. No deduction shall be made for the resource management cost account under RCW 79.64.040.

(4) All reasonable costs incurred by the department to implement this section are authorized to be paid out of this appropriation. Authorized costs include the actual cost of appraisals, staff time, environmental reviews, surveys, and other similar costs.

(5) Intergrant exchanges between common school and other trust lands of equal value may occur if the exchange is in the interest of each trust, as determined by the board of natural resources.

(6) Prior to or concurrent with conveyance of these properties, the department, with full cooperation of the receiving agencies, shall execute and record a real property instrument that dedicates the transferred properties to the purposes identified in subsection (1) of this section for a minimum period of thirty years. The department of natural resources, in consultation with the receiving state agencies, shall develop policy to address requests to replace transferred properties subject to the recorded property instrument that are no longer deemed appropriate for the purposes identified in subsection (1) of this section.

(7) The department and receiving agencies shall work in good faith to carry out the intent of this section. However, the department or receiving agencies may remove a property from the transfer list based on new, substantive information, if it is determined that transfer of the property is not in the statewide interest of either the common school trust or the receiving agency.

(8) The department shall execute trust land transfers and easements/leases such that, after the deduction of reasonable costs as provided in subsection (4) of this section, eighty percent of the appropriation in this section is deposited in the common school construction fund. To achieve the 80:20 ratio, the department may offset transfers of property with low timber-to-land ratios with easements/leases on other properties.

(9) On June 30, 2005, the state treasurer shall transfer all remaining uncommitted funds from this appropriation to the common school construction fund and the appropriation in this section shall be reduced by an equivalent amount.

(10) The appropriation in this section is provided for a list of projects in LEAP capital document No. 2003-24, as developed on April 14, 2003.

MISCELLANEOUS**

**NEW SECTION. Sec. 901.** The estimated debt service costs impacting future general fund expenditures related solely to new capital appropriations within this act are \$18,827,417 during the 2003-2005 fiscal period; \$111,194,423 during the 2005-2007 fiscal period; \$155,435,444 during the 2007-2009 fiscal period; \$155,435,444 during the 2009-2011 fiscal period; and \$155,435,444 during the 2011-2013 period.

**NEW SECTION. Sec. 902.** Allotments for appropriations in this act shall be provided in accordance with the capital project review requirements adopted by the office of financial management. The office of financial management shall notify the house of representatives capital budget committee and the senate ways and means committee of allotment releases based on review by the office of financial management. No expenditure may be incurred or obligation entered into for appropriations in this act until the office of financial management has given final approval to the allotment of the funds to be expended or encumbered. For allotments under this act, the allotment process includes, in addition to the statement of proposed expenditures for the current biennium, a category or categories for any reserve amounts and amounts expected to be expended in future biennia. Projects that will be employing alternative public works construction procedures under chapter 39.10 RCW are subject to the allotment procedures defined in this section and RCW 43.88.110. Contracts shall not be executed that call for expenditures in excess of the approved allotment, and the total amount shown in such contracts for the cost of future work that has not been appropriated shall not exceed the amount identified for such work in the level of funding approved by the office of financial management at the completion of predesign.

**NEW SECTION. Sec. 903.** To ensure that major construction projects are carried out in accordance with legislative and executive intent, appropriations in this act in excess of \$5,000,000 shall not be expended or encumbered until the office of financial management has reviewed and approved the agency's predesign and other documents, and approved an allotment for the project that includes specific authorization to enter into a contract to expend or encumber funds. The predesign document shall include but not be limited to program, site, and cost analysis in accordance with the predesign manual adopted by the office of financial management. To improve monitoring of major construction projects, progress reports shall be submitted by the agency administering the project to the office of financial management and to the fiscal committees of the house of representatives and senate. Reports will be submitted on July 1st and December 31st each year in a format to be developed by the office of financial management.

**NEW SECTION. Sec. 904.** Appropriations in this act for design and construction of facilities on higher education campuses shall be expended only after funds are allotted to institutions of higher education on the basis of: (1) Comparable unit cost standards, as determined by the office of financial management in consultation with the higher education coordinating board; (2) costs consistent with other higher education teaching facilities in the state; and (3) student full-time equivalent enrollment levels as established by the office of financial management in consultation with the higher education coordinating board.

**NEW SECTION. Sec. 905.** To ensure that minor works appropriations are carried out in accordance with legislative intent, funds appropriated in this act shall not be allotted until project lists are on file at the office of financial management. Minor works appropriations shall not be used for studies unless expressly authorized elsewhere in this act. The office of financial management shall forward copies of these project lists to the house of representatives capital budget committee and the senate ways and means committee. No expenditure may be incurred or obligation entered into for minor works appropriations until the office of financial management has

approved the allotment of the funds to be expended. The office of financial management shall encourage state agencies to incorporate accessibility planning and improvements into the normal and customary capital program.

**NEW SECTION. Sec. 906.** (1) The legislature expects projects to be ready to proceed in a timely manner depending on the type or phase of the project or program that is the subject of the appropriation in this act. Except for major projects that customarily may take more than two biennia to complete from predesign to the end of construction, or large infrastructure grant or loan programs supporting projects that often take more than two biennia to complete, the legislature generally does not intend to reappropriate funds more than once, particularly for smaller grant programs, local/community projects, and minor works.

(2) Agencies shall expedite the expenditure of reappropriations and appropriations in this act in order to: (a) Rehabilitate infrastructure resources; (b) accelerate environmental rehabilitation and restoration projects for the improvement of the state's natural environment; (c) reduce additional costs associated with acquisition and construction inflationary pressures; and (d) provide additional employment opportunities associated with capital expenditures.

(3) To the extent feasible, agencies are directed to accelerate expenditure rates at their current level of permanent employees and shall use contracted design and construction services wherever necessary to meet the goals of this section.

(4) The office of financial management shall report the following to the appropriate fiscal committees of the legislature by January 30, 2005: (a) A listing of reappropriations in the governor's 2005-2007 capital budget recommendation that will be reappropriated more than once and have ten percent or more of the original appropriation unexpended; and (b) an explanation of why the appropriation remains unexpended.

**NEW SECTION. Sec. 907. The building shall be constructed and financed so that agency occupancy costs will not exceed comparable private market rental rates. The comparable general office space rate shall be calculated based on the three latest Thurston county leases of new space of at least 100,000 rentable square feet adjusted for inflation as determined by the department of general administration. The department of general administration shall coordinate with potential state agency tenants whose current lease expire near the time of occupancy so that buyout of current leases do not add to state expense. **NEW SECTION. Sec. 908. FOR THE ARTS COMMISSION--ART WORK ALLOWANCE POOLING.** (1) One-half of one percent of moneys appropriated in this act for original construction of school plant facilities is provided solely for the purposes of RCW 28A.335.210. The Washington state arts commission may combine the proceeds from individual projects in order to fund larger works of art or mobile art displays in consultation with the superintendent of public instruction and representatives of school district boards.

(2) One-half of one percent of moneys appropriated in this act for original construction or any major renovation or remodel work exceeding two hundred thousand dollars by colleges or universities is provided solely for the purposes of RCW 28B.10.027. The Washington state arts commission may combine the proceeds from individual projects in order to fund larger works of art or mobile art displays in consultation with the board of regents or trustees.

(3) One-half of one percent of moneys appropriated in this act for original construction of any public building by a state agency as defined in RCW 43.17.020 is provided solely for the purposes of RCW 43.17.200. The Washington state arts commission may combine the proceeds from individual projects in order to fund larger works of art or mobile art displays in consultation with the state agency.

(4) At least eighty-five percent of the moneys spent by the Washington state arts commission during the 2003-2005 biennium for the purposes of RCW 28A.335.210, 28B.10.027, and 43.17.200 must be expended solely for direct acquisition of works of art.

**NEW SECTION. Sec. 909.** The amounts shown under the headings "Prior Biennia," "Future Biennia," and "Total" in this act are for informational purposes only and do not constitute legislative approval of these amounts. "Prior biennia" typically refers to the immediate prior biennium for reappropriations, but may refer to multiple biennia in the case of specific projects. A "future biennia" amount is an estimate of what may be appropriated for the project or program in the 2005-07 biennium and the following four biennia; and amount of zero does not necessarily constitute legislative intent to not provide funding for the project or program in the future.

**NEW SECTION. Sec. 910.** "Reappropriations" in this act are appropriations and, unless the context clearly provides otherwise, are subject to the relevant conditions and limitations applicable to appropriations. Reappropriations shall be limited to the unexpended balances remaining on June 30, 2003, from the 2001-2003 biennial appropriations for each project.

**NEW SECTION. Sec. 911.** To carry out the provisions of this act, the governor may assign responsibility for predesign, design, construction, and other related activities to any appropriate agency.

**NEW SECTION. Sec. 912.** If any federal moneys appropriated by this act for capital projects are not received by the state, the department or agency to which the moneys were appropriated may replace the federal moneys with funds available from private or local sources. No replacement may occur under this section without the prior approval of the director of financial management in consultation with the senate ways and means committee and the house of representatives capital budget committee.

**NEW SECTION. Sec. 913.** (1) Unless otherwise stated, for all appropriations under this act that require a match of nonstate money or in-kind contributions, the following requirement, consistent with RCW 43.88.150, shall apply: Expenditures of state money shall be timed so that the state share of project expenditures never exceeds the intended state share of total project costs.

(2) Provision of the full amount of required matching funds is not required to permit the expenditure of capital budget appropriations for phased projects if a proportional amount of the required matching funds is provided for each distinct, identifiable phase of the project.

**NEW SECTION. Sec. 914.** Any capital improvements or capital projects involving construction or major expansion of a state office facility, including, but not limited to, district headquarters, detachment offices, and off-campus faculty offices, must be reviewed by the department of general administration for possible consolidation, collocation, and compliance with state office standards before allotment of funds. The intent of the requirement imposed by this section is to eliminate duplication and reduce total office space requirements where feasible, while ensuring proper service to the public.

**NEW SECTION. Sec. 915.** (1) The governor, through the office of financial management, may authorize a transfer of appropriation authority provided for a capital project that is in excess of the amount required for the completion of such project to another capital project for which the appropriation is insufficient. No such transfer may be used to expand the capacity of any facility beyond that intended by the legislature in making the appropriation. Such transfers may be effected only between capital appropriations to a specific department, commission, agency, or institution of higher education and only between capital projects that are funded from the same fund or account. No transfers may occur between projects to local government agencies except where the grants are provided within a single omnibus appropriation and where such transfers are specifically authorized by the implementing statutes that govern the grants.

(2) For purposes of this section, the governor may find that an amount is in excess of the amount required for the completion of a project only if: (a) The project as defined in the notes to the budget document is substantially complete and there are funds remaining; or (b) bids have been let on a project and it appears to a substantial certainty that the project as defined in the notes to the budget document can be completed within the biennium for less than the amount appropriated in this act.

(3) For the purposes of this section, the legislature intends that each project be defined as proposed to the legislature in the governor's budget document, unless it clearly appears from the legislative history that the legislature intended to define the scope of a project in a different way.

(4) Transfers of funds to an agency's infrastructure savings appropriation are subject to review and approval by the office of financial management. Expenditures from an infrastructure savings appropriation are limited to projects that have a primary purpose to correct infrastructure deficiencies or conditions that: (a) Adversely affect the ability to utilize the infrastructure for its current programmatic use; (b) reduce the life expectancy of the infrastructure; or (c) increase the operating costs of the infrastructure for its current programmatic use. Eligible infrastructure projects may include structures and surface improvements, site amenities, utility systems outside building footprints and natural environmental changes or requirements as part of an environmental regulation, a declaration of emergency for an infrastructure issue in conformance with RCW 43.88.250, or infrastructure planning as part of a facility master plan.

(5) A report of any transfer effected under this section, except emergency projects or any transfer under \$250,000, shall be filed with the legislative fiscal committees of the senate and house of representatives by the office of financial management at least thirty days before the date the transfer is effected. The office of financial management shall report all emergency or smaller transfers within thirty days from the date of transfer.

**NEW SECTION. Sec. 916. NONTAXABLE AND TAXABLE BOND PROCEEDS.** Portions of the appropriation authority granted by this act from the state building construction account may be transferred to the state taxable building construction account as deemed necessary by the state finance committee to comply with the federal internal revenue service rules and regulations pertaining to the use of nontaxable bond proceeds. The state treasurer shall submit written notification to the director of financial management if it is determined that a shift of appropriation authority from the state building construction account to the state taxable building construction account is necessary.

**NEW SECTION. Sec. 917.** The office of financial management, in consultation with the department of general administration, shall identify capital projects that may benefit from an energy analysis to determine whether there are alternate, more economical, and energy efficient means of completing the work. The office of financial management shall hold appropriations in allotment reserve on the following types of capital projects until this analysis can be completed: Heating, ventilation, and air conditioning modifications, chiller plants, steam plants, boilers, chilled water or steam lines, building control systems, lighting improvements, or other major energy using systems that may warrant additional analysis. Agencies receiving appropriations for such projects are encouraged to utilize energy performance contracts or alternative financing for equipment in lieu of

state appropriated funds. The office of financial management may transfer funds remaining in allotment reserve to infrastructure savings projects within the agency that has realized savings from energy efficiency alternatives.

**Sec. 918.** RCW 43.135.045 and 2002 c 33 s 2 are each amended to read as follows:

(1) The emergency reserve fund is established in the state treasury. During each fiscal year, the state treasurer shall deposit in the emergency reserve fund all general fund--state revenues in excess of the state expenditure limit for that fiscal year. Deposits shall be made at the end of each fiscal quarter based on projections of state revenues and the state expenditure limit. The treasurer shall make transfers between these accounts as necessary to reconcile actual annual revenues and the expenditure limit for fiscal year 2000 and thereafter.

(2) The legislature may appropriate moneys from the emergency reserve fund only with approval of at least two-thirds of the members of each house of the legislature, and then only if the appropriation does not cause total expenditures to exceed the state expenditure limit under this chapter. However, during the 2001-2003 biennium, the legislature may transfer moneys from the emergency reserve fund to the general fund only with approval of a majority of the members of each house of the legislature, and then only if the appropriation does not cause total expenditures to exceed the state expenditure limit under this chapter.

(3) The emergency reserve fund balance shall not exceed five percent of annual general fund--state revenues as projected by the official state revenue forecast. Any balance in excess of five percent shall be transferred on a quarterly basis by the state treasurer as follows: Seventy-five percent to the student achievement fund hereby created in the state treasury and twenty-five percent to the general fund balance. The treasurer shall make transfers between these accounts as necessary to reconcile actual annual revenues for fiscal year 2000 and thereafter. When per-student state funding for the maintenance and operation of K-12 education meets a level of no less than ninety percent of the national average of total funding from all sources per student as determined by the most recent published data from the national center for education statistics of the United States department of education, as calculated by the office of financial management, further deposits to the student achievement fund shall be required only to the extent necessary to maintain the ninety-percent level. Remaining funds are part of the general fund balance and these funds are subject to the expenditure limits of this chapter.

(4) The education construction fund is hereby created in the state treasury.

(a) Funds may be appropriated from the education construction fund exclusively for common school construction or higher education construction. During the fiscal years beginning July 1, 2003, and ending June 30, 2005, funds may also be used for higher education facilities preservation and maintenance.

(b) Funds may be appropriated for any other purpose only if approved by a two-thirds vote of each house of the legislature and if approved by a vote of the people at the next general election. An appropriation approved by the people under this subsection shall result in an adjustment to the state expenditure limit only for the fiscal period for which the appropriation is made and shall not affect any subsequent fiscal period.

(5) Funds from the student achievement fund shall be appropriated to the superintendent of public instruction strictly for distribution to school districts to meet the provisions set out in the student achievement act. Allocations shall be made on an equal per full-time equivalent student basis to each school district.

(6) Earnings of the emergency reserve fund under RCW 43.84.092(4)(a) shall be transferred quarterly to the multimodal transportation account, except for those earnings that are in excess of thirty-five million dollars each fiscal year. Within thirty days following any fiscal year in which earnings transferred to the multimodal transportation account under this subsection did not total thirty-five million dollars, the state treasurer shall transfer from the emergency reserve fund an amount necessary to bring the total deposited in the multimodal transportation account under this subsection to thirty-five million dollars. The revenues to the multimodal transportation account reflected in this subsection provide ongoing support for the transportation programs of the state. However, it is the intent of the legislature that any new long-term financial support that may be subsequently provided for transportation programs will be used to replace and supplant the revenues reflected in this subsection, thereby allowing those revenues to be returned to the purposes to which they were previously dedicated.

**Sec. 919.** RCW 43.135.045 and 2001 c 3 s 9, 2000 2nd sp.s. c 5 s 1, and 2000 2nd sp.s. c 2 s 3 are each reenacted and amended to read as follows:

However, it is the intent of the legislature that any new long-term financial support that may be subsequently provided for transportation programs will be used to replace and supplant the revenues reflected in this subsection, thereby allowing those revenues to be returned to the purposes to which they were previously dedicated.

**"NEW SECTION. Sec. 1.** The legislature finds that the welfare of the people of the state of Washington is positively impacted through the encouragement and expansion of family wage employment in the state's manufacturing industries. The legislature further finds that targeting tax incentives to focus on key industry clusters is an important business climate strategy. The Washington competitiveness council has recognized the semiconductor industry, which includes the design and manufacture of semiconductor materials, as one of the state's existing key industry clusters. Businesses in this cluster in the state of Washington are facing increasing pressure to expand elsewhere. The sales and use tax exemptions for manufacturing machinery and equipment enacted by the 1995 legislature improved Washington's ability to compete with other states for manufacturing investment. However, additional incentives for the semiconductor cluster need to be put in place in recognition of the unique forces and global issues involved in business decisions that key businesses in this cluster face.

Therefore, the legislature intends to enact comprehensive tax incentives for the semiconductor cluster that address activities of the lead product industry and its suppliers and customers. Tax incentives for the semiconductor cluster are important in both retention and expansion of existing business and attraction of new businesses, all of which will strengthen this cluster. The legislature also recognizes that the semiconductor industry involves major investment that results in significant construction projects, which will create jobs and bring many indirect benefits to the state during the construction phase.

(1) The director shall furnish to all persons making satisfactory application for vehicle license as provided by law, two identical vehicle license number plates each containing the vehicle license number to be displayed on such vehicle as by law required: PROVIDED, That if the vehicle to be licensed is a trailer, semitrailer or motorcycle only one vehicle license number plate shall be issued for each thereof. The number and plate shall be of such size and color and shall contain such symbols indicative of the registration period for which

the same is issued and of the state of Washington, as shall be determined and prescribed by the director. Any vehicle license number plate or plates issued to a dealer shall contain thereon a sufficient and satisfactory indication that such plates have been issued to a dealer in vehicles. All vehicle license number plates ~~((may))~~ shall be obtained by the director from the metal working plant of a state correctional facility ~~((or from any source in accordance with existing state of Washington purchasing procedures))~~.

(2) Notwithstanding the foregoing provisions of this section, the director may, in his discretion and under such rules and regulations as he may prescribe, adopt a type of vehicle license number plates whereby the same shall be used as long as legible on the vehicle for which issued, with provision for tabs or emblems to be attached thereto or elsewhere on the vehicle to signify renewals, in which event the term "vehicle license number plate" as used in any enactment shall be deemed to include in addition to such plate the tab or emblem signifying renewal except when such plate contains the designation of the current year without reference to any tab or emblem. Renewals shall be effected by the issuance and display of such tab or emblem.

(3) The department shall implement a flat, digitally printed license plate system. This system must be in place and operational by July 1, 2004, and must be used to produce all license plates issued by the department by no later than January 1, 2007. The department must phase in the production of flat, digitally printed license plates by first issuing special and personalized plates using this system. Before January 1, 2007, the department may issue all license plates as flat, digitally printed license plates, if the department determines that production of all license plates by the digital printing system is economically viable.

**Sec. 2.** RCW 46.16.233 and 2000 c 37 s 1 are each amended to read as follows:

(1) Except for those license plates issued under RCW 46.16.305(1) before January 1, 1987, under RCW 46.16.305(3), and to commercial vehicles with a gross weight in excess of twenty-six thousand pounds, effective with vehicle registrations due or to become due on January 1, 2001, the appearance of all vehicle license plates must be ((issued on a standard background)) legible and clearly identifiable as a Washington state license plate, as designated by the department.

(2) Additionally, to ensure maximum legibility and reflectivity, the department shall periodically provide for the replacement of license plates, except for commercial vehicles with a gross weight in excess of twenty-six thousand pounds. Frequency of replacement shall be established in accordance with empirical studies documenting the longevity of the reflective materials used to make license plates.

(3) In providing for the periodic replacement of license plates, the department shall offer to vehicle owners the option of retaining their current license plate numbers. The department shall charge a retention fee of twenty dollars if this option is exercised. Revenue generated from the retention fee must be deposited into the license plate technology account created under section 4 of this act until such time as the financing necessary to implement a digital license plate system has been paid in full. After the financing has been paid in full, the revenue collected under this section shall be deposited into the multimodal transportation account.

**Sec. 3.** RCW 46.01.140 and 2001 c 331 s 1 are each amended to read as follows:

(1) The county auditor, if appointed by the director of licensing shall carry out the provisions of this title relating to the licensing of vehicles and the issuance of vehicle license number plates under the direction and supervision of the director and may with the approval of the director appoint assistants as special deputies and recommend subagents to accept applications and collect fees for vehicle licenses and transfers and to deliver vehicle license number plates.

(2) A county auditor appointed by the director may request that the director appoint subagencies within the county.

(a) Upon authorization of the director, the auditor shall use an open competitive process including, but not limited to, a written business proposal and oral interview to determine the qualifications of all interested applicants.

(b) A subagent may recommend a successor who is either the subagent's sibling, spouse, or child, or a subagency employee, as long as the recommended successor participates in the open, competitive process used to select an applicant. In making successor recommendation and appointment determinations, the following provisions apply:

(i) If a subagency is held by a partnership or corporate entity, the nomination must be submitted on behalf of, and agreed to by, all partners or corporate officers.

(ii) No subagent may receive any direct or indirect compensation or remuneration from any party or entity in recognition of a successor nomination. A subagent may not receive any financial benefit from the transfer or termination of an appointment.

(iii) (a) and (b) of this subsection are intended to assist in the efficient transfer of appointments in order to minimize public inconvenience. They do not create a proprietary or property interest in the appointment.

(c) The auditor shall submit all proposals to the director, and shall recommend the appointment of one or more subagents who have applied through the open competitive process. The auditor shall include in his or her recommendation to the director, not only the name of the successor who is a relative or employee, if applicable and if otherwise qualified, but also the name of one other applicant who is qualified and was chosen through the open competitive process. The director has final appointment authority.

(3)(a) A county auditor who is appointed as an agent by the department shall enter into a standard contract provided by the director, developed with the advice of the title and registration advisory committee.

(c) The contracts provided for in (a) and (b) of this subsection must contain at a minimum provisions that:

(d) The department shall develop procedures that will standardize and prescribe allowable costs that may be assigned to vehicle licensing and vessel registration and title activities performed by county auditors.

(e) The contracts may include any provision that the director deems necessary to ensure acceptable service and the full collection of vehicle and vessel tax revenues.

(f) The director may waive any provisions of the contract deemed necessary in order to ensure that readily accessible service is provided to the citizens of the state.

(4)(a) At any time any application is made to the director, the county auditor, or other agent pursuant to any law dealing with licenses, registration, or the right to operate any vehicle or vessel upon the public highways or waters of this state, excluding applicants already paying such fee under RCW 46.16.070 or 46.16.085, the applicant shall pay to the director, county auditor, or other agent a fee of three dollars for each application in addition to any other fees required by law.

(b) Counties that do not cover the expenses of vehicle licensing and vessel registration and title activities may submit to the department a request for cost-coverage moneys. The request must be submitted on a form developed by the department. The department shall develop procedures to verify whether a request is reasonable. Payment shall be made on requests found to be allowable from the licensing services account.

(c) Applicants for certificates of ownership, including applicants paying fees under RCW 46.16.070 or 46.16.085, shall pay to the director, county auditor, or other agent a fee of four dollars in addition to any other fees required by law.

(d) The fees under (a) and (c) of this subsection, if paid to the county auditor as agent of the director, or if paid to a subagent of the county auditor, shall be paid to the county treasurer in the same manner as other fees collected by the county auditor and credited to the county current expense fund. If the fee is paid to another agent of the director, the fee shall be used by the agent to defray his or her expenses in handling the application.

(i) ~~Fifty cents must be deposited into the department of licensing services account of the motor vehicle fund((Revenue deposited into this account))~~ and must be used for agent and subagent support, which is to include but not be limited to the replacement of department-owned equipment in the possession of agents and subagents.

(ii) Twenty-five cents must be deposited into the license plate technology account created under section 4 of this act.

(5) A subagent shall collect a service fee of (a) eight dollars and fifty cents for changes in a certificate of ownership, with or without registration renewal, or verification of record and preparation of an affidavit of lost title other than at the time of the title application or transfer and (b) three dollars and fifty cents for registration renewal only, issuing a transit permit, or any other service under this section.

(6) If the fee is collected by the state patrol as agent for the director, the fee so collected shall be certified to the state treasurer and deposited to the credit of the state patrol highway account. If the fee is collected by the department of transportation as agent for the director, the fee shall be certified to the state treasurer and deposited to the credit of the motor vehicle fund. All such fees collected by the director or branches of his office shall be certified to the state treasurer and deposited to the credit of the highway safety fund.

(7) Any county revenues that exceed the cost of providing vehicle licensing and vessel registration and title activities in a county, calculated in accordance with the procedures in subsection (3)(d) of this section, shall be expended as determined by the county legislative authority during the process established by law for adoption of county budgets.

(8) The director may adopt rules to implement this section.

Expenditures from this account must support current and future license plate technology and systems integration upgrades for both the department and correctional industries. Moneys in the account may be spent only after appropriation. Additionally, the moneys in this account may be used to reimburse the motor vehicle account for any appropriation made to implement the digital license plate system.

April 26, 2003

Mr. Speaker:

The Senate receded from its amendment to ENGROSSED SUBSTITUTE HOUSE BILL NO. 1033, and under suspension of the rules returned the bill to second reading for purpose of amendment. The Senate further adopted the following amendment and passed the measure as amended:

Strike everything after the enacting clause and insert the following:

"Sec. 1. RCW 46.20.391 and 1999 c 274 s 4 and 1999 c 272 s 1 are each reenacted and amended to read as follows:

(1) Any person licensed under this chapter who is convicted of an offense relating to motor vehicles for which suspension or revocation of the driver's license is mandatory, other than vehicular homicide or vehicular assault, or who has had his or her license suspended under RCW 46.20.3101 (2)(a) or (3)(a), may submit to the department an application for an occupational driver's license. The department, upon receipt of the prescribed fee and upon determining that the petitioner is engaged in an occupation or trade that makes it essential that the petitioner operate a motor vehicle, may issue an occupational driver's license and may set definite restrictions as provided in RCW 46.20.394. No person may petition for, and the department shall not issue, an occupational driver's license that is effective during the first thirty days of any suspension or revocation imposed either for a violation of RCW 46.61.502 or 46.61.504 or under RCW 46.20.3101 (2)(a) or (3)(a), or for both a violation of RCW 46.61.502 or 46.61.504 and under RCW 46.20.3101 (2)(a) or (3)(a) where the action arises from the same incident. A person aggrieved by the decision of the department on the application for an occupational driver's license may request a hearing as provided by rule of the department.

(2)(a) A person licensed under this chapter whose driver's license is suspended administratively due to failure to appear or pay a traffic ticket under RCW 46.20.289; a violation of the financial responsibility laws under chapter 46.29 RCW; or for multiple violations within a specified period of time under RCW 46.20.291, may apply to the department for an occupational driver's license if the applicant demonstrates to the satisfaction of the department that one of the following additional conditions are met:

(i) The applicant is in an apprenticeship program ((~~or~~), an on- the-job training program ((~~for which~~)), or is gainfully employed and a driver's license is required;

(ii) The applicant presents evidence that he or she has applied for a position in an apprenticeship or on-the-job training program and the program has certified that a driver's license is required to begin the program, provided that a license granted under this provision shall be in effect no longer than fourteen days;

(iii) The applicant is in a program that assists persons who are enrolled in a WorkFirst program pursuant to chapter 74.08A RCW to become gainfully employed and the program requires a driver's license; or

(iv) The applicant is undergoing substance abuse treatment or is participating in meetings of a twelve-step group such as alcoholics anonymous.

(b) If the suspension is for failure to respond, pay, or comply with a notice of traffic infraction or conviction, ~~((the))~~ applicants must be offered the opportunity to enter into a payment plan with the court, subject to the court's discretion as to the individual applicant.

(c) An occupational driver's license issued to an applicant described in (a) of this subsection shall be valid for the period of the suspension or revocation but not more than two years. The suspension or revocation of the regular driver's license shall not be affected by the issuance of an occupational license. The two-year period is to provide an opportunity for the applicant to work in order to satisfy any penalties or other sanctions imposed by the court which are the causes of the suspension or revocation of his or her regular driver's license.

(d) Upon receipt of evidence that a holder of an occupational driver's license granted under this subsection is no longer enrolled in an apprenticeship ~~((or))~~ program, on-the-job training program, or is no longer gainfully employed, the director shall give written notice by first class mail to the driver that the occupational driver's license shall be canceled. The effective date of cancellation shall be fifteen days from the date of mailing the notice. If at any time before the cancellation goes into effect the driver submits evidence of continued enrollment in the program or continued employment, the cancellation shall be stayed. If the cancellation becomes effective, the driver may obtain, at no additional charge, a new occupational driver's license upon submittal of evidence of enrollment in another program that meets the criteria set forth in this subsection.

(e) The department shall not issue an occupational driver's license under (a)(iv) of this subsection if the applicant is able to receive transit services sufficient to allow for the applicant's participation in the programs referenced under (a)(iv) of this subsection.

(3) An applicant for an occupational driver's license is eligible to receive such license only if:

(a) Within one year immediately preceding the date of the offense that gave rise to the present conviction, the applicant has not committed any offense relating to motor vehicles for which suspension or revocation of a driver's license is mandatory; and

(b) Within seven years immediately preceding the date of the offense that gave rise to the present conviction or incident, the applicant has not committed any of the following offenses: (i) Driving or being in actual physical control of a motor vehicle while under the influence of intoxicating liquor; (ii) vehicular homicide under RCW 46.61.520; or (iii) vehicular assault under RCW 46.61.522; and

(c) The applicant is engaged in an occupation or trade that makes it essential that he or she operate a motor vehicle, except as allowed under subsection (2)(a) of this section; and

(d) The applicant files satisfactory proof of financial responsibility under chapter 46.29 RCW; and

(e) The applicant, if the suspension or revocation is a result of a conviction of RCW 46.61.502 or 46.61.504 or administrative action under RCW 46.20.3101, submits written verification of installation of an ignition interlock or other biological or technical device on the vehicle he or she intends to operate.

(4) The director shall cancel an occupational driver's license upon receipt of notice that the holder thereof has been convicted of operating a motor vehicle in violation of its restrictions, or of a separate offense that under chapter 46.20 RCW would warrant suspension or revocation of a regular driver's license. The cancellation is effective as of the date of the conviction, and continues with the same force and effect as any suspension or revocation under this title.

(5) No person may petition for, and the department shall not issue, an occupational driver's license to any person if the person previously entered into a payment plan under subsection (2)(b) of this section and the person has failed to satisfy payment of all obligations included in the payment plan.

(6) Any person issued an occupational driver's license whose license suspension or revocation is a result of a conviction of RCW 46.61.502 or 46.61.504 or administrative action under RCW 46.20.3101 may drive only a motor vehicle equipped with a functioning ignition interlock or other biological or technical device for the duration of the period for which the occupational driver's license is valid.

**Sec. 2.** RCW 46.63.110 and 2002 c 279 s 15 and 2002 c 175 s 36 are each reenacted and amended to read as follows:

(1) A person found to have committed a traffic infraction shall be assessed a monetary penalty. No penalty may exceed two hundred and fifty dollars for each offense unless authorized by this chapter or title.

(2) The monetary penalty for a violation of RCW 46.55.105(2) is two hundred fifty dollars for each offense. No penalty assessed under this subsection (2) may be reduced.

(3) The supreme court shall prescribe by rule a schedule of monetary penalties for designated traffic infractions. This rule shall also specify the conditions under which local courts may exercise discretion in assessing fines and penalties for traffic infractions. The legislature respectfully requests the supreme court to adjust this schedule every two years for inflation.

(4) There shall be a penalty of twenty-five dollars for failure to respond to a notice of traffic infraction except where the infraction relates to parking as defined by local law, ordinance, regulation, or resolution or failure to pay a monetary penalty imposed pursuant to this chapter. A local legislative body may set a monetary penalty not to exceed twenty-five dollars for failure to respond to a notice of traffic infraction relating to parking as defined by local law, ordinance, regulation, or resolution. The local court, whether a municipal, police, or district court, shall impose the monetary penalty set by the local legislative body.

(5) Monetary penalties provided for in chapter 46.70 RCW which are civil in nature and penalties which may be assessed for violations of chapter 46.44 RCW relating to size, weight, and load of motor vehicles are not subject to the limitation on the amount of monetary penalties which may be imposed pursuant to this chapter.

(6)(a) Whenever a monetary penalty is imposed by a court under this chapter it is immediately payable. ~~((If the person is unable to pay at that time the court may, in its discretion, grant an extension of the period in which the penalty may be paid. If the penalty is not paid on or before the time established for payment))~~ The court shall have available the option of a payment plan by which the penalty is to be paid within eighteen months. However, it is in the court's discretion whether to allow a person, under this section, to enter into a payment plan with the court. The court may allow a person to enter into a payment plan if the person (i) is not able to pay a monetary penalty in full when it is imposed; (ii) has had a monetary penalty imposed within the previous twelve months and the penalty has not been paid in full; or (iii) is currently in a payment plan for a previously imposed penalty and a new monetary penalty is imposed by a court. The court may, but need not, rearrange the earlier payment plan to include the new penalty or may enter into a separate payment plan. In the event that a payment plan is requested by a person owing a monetary penalty and the court, under RCW 3.02.045, has sent the person's existing debt to a collection agency due to the person's failure to satisfy his or her obligations, the court may, but need not, remove the account from the collection agency in order to create a payment plan. Nothing in this act requires the court to remove an account from collection.

(b) If a payment required to be made under the payment plan is delinquent by thirty days, the court shall notify the department of the failure to pay the penalty, and the department shall suspend the person's driver's license or driving privilege until the penalty has been paid ((and)), including the penalty provided in subsection (4) of this section ((has been paid)).

(c) If the court requires a person to enter into a payment plan and he or she does not do so or has entered into a payment plan but has not paid the penalty in full within not more than eighteen months of the initial payment, the court shall notify the department of the delinquency, and the department shall suspend the person's driver's license or driving privilege until the penalty has been paid, including the penalty provided in subsection (3) of this section.

(d) "Payment plan," as used in this subsection, means a plan that requires a person to pay an initial payment, followed by reasonable payments in an amount established by the court. The person may voluntarily pay any amount at any time in addition to these payments.

(7) In addition to any other penalties imposed under this section and not subject to the limitation of subsection (1) of this section, a person found to have committed a traffic infraction shall be assessed a fee of five dollars per infraction. Under no circumstances shall this fee be reduced or waived. Revenue from this fee shall be forwarded to the state treasurer for deposit in the emergency medical services and trauma care system trust account under RCW 70.168.040.

(8)(a) In addition to any other penalties imposed under this section and not subject to the limitation of subsection (1) of this section, a person found to have committed a traffic infraction other than of RCW 46.61.527 shall be assessed an additional penalty of ten dollars. The court may not reduce, waive, or suspend the additional penalty unless the court finds the offender to be indigent. If a community restitution program for offenders is available in the jurisdiction, the court shall allow offenders to offset all or a part of the penalty due under this subsection (8) by participation in the community restitution program.

(b) Revenue from the additional penalty must be remitted under chapters 2.08, 3.46, 3.50, 3.62, 10.82, and 35.20 RCW. Money remitted under this subsection to the state treasurer must be deposited as provided in RCW 43.08.250. The balance of the revenue received by the county or city treasurer under this subsection must be deposited into the county or city current expense fund. Moneys retained by the city or county under this subsection shall constitute reimbursement for any liabilities under RCW 43.135.060.

**Sec. 3.** RCW 46.64.025 and 1999 c 86 s 7 are each amended to read as follows:

(1) Whenever any person violates his or her written promise to appear in court, ((or)) fails to appear for a scheduled court hearing, or fails to comply with the terms of a citation, the court in which the defendant failed to appear or comply shall promptly give notice of such fact to the department of licensing. Whenever thereafter the case in which the defendant failed to appear or comply is adjudicated, the court hearing the case shall promptly file with the department a certificate showing that the case has been adjudicated.

(2)(a) Where compliance with the terms of a misdemeanor citation is limited to the payment of a monetary penalty, and a person is not able to pay the monetary penalty in full, the court may enter into a payment plan with the person. The court shall have available the option of a payment plan. However, it is in the court's discretion whether to allow a person, under this section, to enter into a payment plan with the court. If a person has entered into a payment plan under this subsection, the court shall not notify the department of licensing that the person has failed to comply with the terms of a citation as it applies to payment of the monetary penalty unless a payment required to be made under the payment plan is delinquent by thirty days or the penalty is not paid in full within not more than eighteen months of the initial payment.

(b) "Payment plan," as used in this subsection, means a plan that requires a person to pay an initial payment, followed by reasonable payments in an amount established by the court. The person may voluntarily pay any amount at any time in addition to these payments."

On page 1, line 1 of the title, after "Relating to" strike the remainder of the title and insert "driver's licenses; amending RCW 46.64.025; and reenacting and amending RCW 46.20.391 and 46.63.110."

## **Creating a competitive grant program for nonprofit youth organizations.**

Representative Dunshee moved the adoption of amendment (575):

Strike everything after the enacting clause and insert the following:

**"NEW SECTION. Sec. 1.** The legislature finds that nonprofit youth organizations provide a variety of services for the youth of Washington state, including many services that enable young people, especially those facing challenging and disadvantaged circumstances, to realize their full potential as productive, responsible, and caring citizens. The legislature also finds that the efficiency and quality of these services may be enhanced by the provision of safe, reliable, and sound facilities, and that, in certain cases, it may be appropriate for the state to assist in the development of these facilities.

**NEW SECTION. Sec. 2.** A new section is added to chapter 43.63A RCW to read as follows:

(1) The department of community, trade, and economic development must establish a competitive process to solicit proposals for and prioritize projects whose primary objective is to assist nonprofit youth organizations in acquiring, constructing, or rehabilitating facilities used for the delivery of nonresidential services, excluding outdoor athletic fields.

(2) The department of community, trade, and economic development must establish a competitive process to prioritize applications for the assistance as follows:

(a) The department of community, trade, and economic development must conduct a statewide solicitation of project applications from local governments, nonprofit organizations, and other entities, as determined by the department of community, trade, and economic development. The department of community, trade, and economic development must evaluate and rank applications in consultation with a citizen advisory committee using objective criteria. Projects must have a major recreational component, and must have either an educational or social service component. At a minimum, applicants must demonstrate that the requested assistance will increase the efficiency or quality of the services it provides to youth. The evaluation and ranking process must also include an examination of existing assets that applicants may apply to projects. Grant assistance under this section may not exceed twenty-five percent of the total cost of the project. The nonstate portion of the total project cost may include cash, the value of real property when acquired solely for the purpose of the project, and in-kind contributions.

(b) The department of community, trade, and economic development must submit a prioritized list of recommended projects to the governor and the legislature in the department of community, trade, and economic development's biennial capital budget request beginning with the 2005-2007 biennium and thereafter. The list must include a description of each project, the amount of recommended state funding, and documentation of nonstate funds to be used for the project. The total amount of recommended state funding for projects on a biennial project list must not exceed two million dollars. The department of community, trade, and economic development may provide an additional alternate project list that must not exceed five hundred thousand dollars. The department of community, trade, and economic development may not sign contracts or otherwise financially obligate funds under this section until the legislature has approved a specific list of projects.

(c) In contracts for grants authorized under this section the department of community, trade, and economic development must include provisions that require that capital improvements be held by the grantee for a specified period of time appropriate to the amount of the grant and that facilities be used for the express purpose of the grant. If the grantee is found to be out of compliance with provisions of the contract, the grantee must repay to the state general fund the principal amount of the grant plus interest calculated at the rate of interest on state of Washington general obligation bonds issued most closely to the date of authorization of the grant."

## SECOND READING

**ENGROSSED SUBSTITUTE HOUSE BILL NO. 2151, By House Committee on Capital Budget (originally sponsored by Representatives Alexander, Dunshee, Sommers, Cox and Sehlin)**

**Prioritizing proposed higher education capital projects.**

Representative Alexander moved the adoption of the following amendment (576):

Strike everything after the enacting clause and insert the following:

**"NEW SECTION. Sec. 1.** (1) The legislature finds that a capital investment in higher education facilities is needed over the next several biennia to adequately preserve, modernize, and expand the capacity of the state's public two-year and four-year colleges and universities. This investment is needed to responsibly preserve and restore existing facilities and to provide additional space for new students. Further, the legislature finds that capital appropriations will need to respond to each of these areas of need in a planned, balanced, and prioritized manner so that access to a quality system of higher education is ensured.

(2) It is the intent of the legislature that a methodology be developed that will guide capital appropriation decisions by rating and individually ranking, in sequential, priority order, all major capital projects proposed by the two-year and four-year public universities and colleges. Further, it is the intent of the legislature that this rating, ranking, and prioritization of capital needs will reflect the state's higher education policies and goals including the comprehensive master plan for higher education as submitted by the higher education coordinating board and as adopted by the legislature.

**NEW SECTION. Sec. 2.** A new section is added to chapter 28B.80 RCW to read as follows:

(1) Beginning with the 2005-2007 biennial capital budget submittal, the public four-year institutions, in consultation with the council of presidents and the higher education coordinating board, shall prepare a single prioritized individual ranking of the individual projects proposed by the four-year institutions as provided in subsection (2) of this section. The public four-year institutions may aggregate minor works project requests into priority categories without separately ranking each minor project, provided that these aggregated minor works requests are ranked within the overall list. For repairs and improvements to existing facilities and systems, the rating and ranking of individual projects must be based on criteria or factors that include, but are not limited to, the age and condition of buildings or systems, the programmatic suitability of the building or system, and the activity/occupancy level supported by the building or system. For projects creating new space or capacity, the ratings and rankings of projects must be based upon criteria or factors that include, but are not limited to, measuring existing capacity and progress toward meeting increased space utilization levels as determined by the higher education coordinating board.

(2) The single prioritized four-year project list shall be approved by the governing boards of each public four-year institution and shall be submitted to the office of financial management and the higher education coordinating board concurrent with the institution's submittal of their biennial capital budget requests.

(3)(a) The higher education coordinating board, in consultation with the office of financial management and the joint legislative audit and review committee, shall develop common definitions that public four-year institutions and the state board for community and technical colleges shall use in developing their project lists under this section.

(b) As part of its duties under RCW 28B.80.330(4), the higher education coordinating board shall, as part of its biennial budget guidelines, disseminate, by December 1st of each odd-numbered year, the criteria framework, including general definitions, categories, and rating system, to be used by the public four-year institutions in the development of the prioritized four-year project list. The criteria framework shall specify the general priority order of project types based on criteria determined by the board, in consultation with the public four-year institutions.

(c) Under RCW 28B.80.330(4), the public four-year institutions shall submit a preliminary prioritized four-year project list to the higher education coordinating board by August 1st of each even-numbered year.

(d) The state board for community and technical colleges shall, as part of its biennial capital budget request, submit a single prioritized ranking of the individual projects proposed for the community and technical colleges. The state board for community and technical colleges shall submit an outline of the prioritized community and technical college project list to the higher education coordinating board under RCW 28B.80.330(4) by August 1st of each even-numbered year.

(4) The higher education coordinating board, in consultation with the public four-year institutions, shall resolve any disputes or disagreements arising among the four-year institutions concerning the ranking of particular projects. Further, should one or more governing boards of the public four-year institutions fail to approve the prioritized four-year project list as required in this section, or should a prioritized project list not be submitted by the public four-year institutions concurrent with the submittal of their respective biennial capital budget requests as provided in subsection (2) of this section, the higher education coordinating board shall prepare the prioritized four-year institution project list itself.

(5) In developing any rating and ranking of capital projects proposed by the two-year and four-year public universities and colleges, the board:

(a) Shall be provided with available information by the public two-year and four-year institutions as deemed necessary by the board;

(b) May utilize independent services to verify, sample, or evaluate information provided to the board by the two-year and four-year institutions; and

(c) Shall have full access to all data maintained by the office of financial management and the joint legislative audit and review committee concerning the condition of higher education facilities.

(6) Beginning with the 2005-2007 biennial capital budget submittal, the higher education coordinating board shall, in consultation with the state board for community and technical colleges and four-year colleges and universities, submit its capital budget recommendations and the separate two-year and four-year prioritized project lists."

**HOUSE BILL NO. 2269, By Representative Gombosky**

**Relating to increasing revenue.**

The bill was read the second time.

Representative McIntire moved the adoption of the following amendment (577):

Strike everything after the enacting clause and insert the following:

**"Sec. 1.** RCW 63.29.020 and 1992 c 122 s 1 are each amended to read as follows:

(1) Except as otherwise provided by this chapter, all intangible property, including any income or increment derived therefrom, less any lawful charges, that is held, issued, or owing in the ordinary course of the holder's business and has remained unclaimed by the owner for more than ~~((five))~~ three years after it became payable or distributable is presumed abandoned.

(2) Property, with the exception of unredeemed Washington state lottery tickets and unrepresented winning parimutuel tickets, is payable and distributable for the purpose of this chapter notwithstanding the owner's failure to make demand or to present any instrument or document required to receive payment.

(3) This chapter does not apply to claims drafts issued by insurance companies representing offers to settle claims unliquidated in amount or settled by subsequent drafts or other means.

(4) This chapter does not apply to property covered by chapter 63.26 RCW.

(5) This chapter does not apply to used clothing, umbrellas, bags, luggage, or other used personal effects if such property is disposed of by the holder as follows:

(a) In the case of personal effects of negligible value, the property is destroyed; or

(b) The property is donated to a bona fide charity.

**Sec. 2.** RCW 63.29.050 and 1983 c 179 s 5 are each amended to read as follows:

(1) Any sum payable on a check, draft, or similar instrument, except those subject to RCW 63.29.040, on which a banking or financial organization is directly liable, including a cashier's check and a certified check, which has been outstanding for more than ~~((five))~~ three years after it was payable or after its issuance if payable on demand, is presumed abandoned, unless the owner, within ~~((five))~~ three years, has communicated in writing with the banking or financial organization concerning it or otherwise indicated an interest as evidenced by a memorandum or other record on file prepared by an employee thereof.

(2) A holder may not deduct from the amount of any instrument subject to this section any charge imposed by reason of the failure to present the instrument for payment unless there is a valid and enforceable written contract between the holder and the owner of the instrument pursuant to which the holder may impose a charge, and the holder regularly imposes such charges and does not regularly reverse or otherwise cancel them.

**Sec. 3.** RCW 63.29.060 and 1983 c 179 s 6 are each amended to read as follows:

(1) Any demand, savings, or matured time deposit with a banking or financial organization, including a deposit that is automatically renewable, and any funds paid toward the purchase of a share, a mutual investment certificate, or any other interest in a banking or financial organization is presumed abandoned unless the owner, within ~~((five))~~ three years, has:

(a) In the case of a deposit, increased or decreased its amount or presented the passbook or other similar evidence of the deposit for the crediting of interest;

(b) Communicated in writing with the banking or financial organization concerning the property;

(c) Otherwise indicated an interest in the property as evidenced by a memorandum or other record on file prepared by an employee of the banking or financial organization;

(d) Owned other property to which subsection (1)(a), (b), or (c) of this section applies and if the banking or financial organization communicates in writing with the owner with regard to the property that would otherwise be presumed abandoned under this subsection at the address to which communications regarding the other property regularly are sent; or

(e) Had another relationship with the banking or financial organization concerning which the owner has:

(i) In the case of a deposit, increased or decreased the amount of the deposit or presented the passbook or other similar evidence of the deposit for the crediting of interest;

(ii) Communicated in writing with the banking or financial organization; or

(iii) Otherwise indicated an interest as evidenced by a memorandum or other record on file prepared by an employee of the banking or financial organization and if the banking or financial organization communicates in writing with the owner with regard to the property that would otherwise be abandoned under this subsection at the address to which communications regarding the other relationship regularly are sent.

(2) For purposes of subsection (1) of this section property includes interest and dividends.

(3) This chapter shall not apply to deposits made by a guardian or decedent's personal representative with a banking organization when the deposit is subject to withdrawal only upon the order of the court in the guardianship or estate proceeding.

(4) A holder may not impose with respect to property described in subsection (1) of this section any charge due to dormancy or inactivity or cease payment of interest unless:

(a) There is an enforceable written contract between the holder and the owner of the property pursuant to which the holder may impose a charge or cease payment of interest;

(b) For property in excess of ten dollars, the holder, no more than three months before the initial imposition of those charges or cessation of interest, has given written notice to the owner of the amount of those charges at the last known address of the owner stating that those charges will be imposed or that interest will

cease, but the notice provided in this section need not be given with respect to charges imposed or interest ceased before June 30, 1983; and

(c) The holder regularly imposes such charges or ceases payment of interest and does not regularly reverse or otherwise cancel them or retroactively credit interest with respect to the property.

(5) Any property described in subsection (1) of this section that is automatically renewable is matured for purposes of subsection (1) of this section upon the expiration of its initial time period, or after one year if the initial period is less than one year, but in the case of any renewal to which the owner consents at or about the time of renewal by communicating in writing with the banking or financial organization or otherwise indicating consent as evidenced by a memorandum or other record on file prepared by an employee of the organization, the property is matured upon the expiration of the last time period for which consent was given. If, at the time provided for delivery in RCW 63.29.190, a penalty or forfeiture in the payment of interest would result from the delivery of the property, the time for delivery is extended until the time when no penalty or forfeiture would result.

**Sec. 4.** RCW 63.29.070 and 1983 c 179 s 7 are each amended to read as follows:

(1) Funds held or owing under any life or endowment insurance policy or annuity contract that has matured or terminated are presumed abandoned if unclaimed for more than ~~((five))~~ three years after the funds became due and payable as established from the records of the insurance company holding or owing the funds, but property described in subsection (3)(b) of this section is presumed abandoned if unclaimed for more than two years.

(2) If a person other than the insured or annuitant is entitled to the funds and an address of the person is not known to the company or it is not definite and certain from the records of the company who is entitled to the funds, it is presumed that the last known address of the person entitled to the funds is the same as the last known address of the insured or annuitant according to the records of the company.

(3) For purposes of this chapter, a life or endowment insurance policy or annuity contract not matured by actual proof of the death of the insured or annuitant according to the records of the company is matured and the proceeds due and payable if:

(a) The company knows that the insured or annuitant has died; or

(b)(i) The insured has attained, or would have attained if he were living, the limiting age under the mortality table on which the reserve is based;

(ii) The policy was in force at the time the insured attained, or would have attained, the limiting age specified in subparagraph (i) of this subsection; and

(iii) Neither the insured nor any other person appearing to have an interest in the policy within the preceding two years, according to the records of the company, has assigned, readjusted, or paid premiums on the policy, subjected the policy to a loan, corresponded in writing with the company concerning the policy, or otherwise indicated an interest as evidenced by a memorandum or other record on file prepared by an employee of the company.

(4) For purposes of this chapter, the application of an automatic premium loan provision or other nonforfeiture provision contained in an insurance policy does not prevent a policy from being matured or terminated under subsection (1) of this section if the insured has died or the insured or the beneficiaries of the policy otherwise have become entitled to the proceeds thereof before the depletion of the cash surrender value of a policy by the application of those provisions.

(5) If the laws of this state or the terms of the life insurance policy require the company to give notice to the insured or owner that an automatic premium loan provision or other nonforfeiture provision has been exercised and the notice, given to an insured or owner whose last known address according to the records of the company is in this state, is undeliverable, the company shall make a reasonable search to ascertain the policyholder's correct address to which the notice must be mailed.

(6) Notwithstanding any other provision of law, if the company learns of the death of the insured or annuitant and the beneficiary has not communicated with the insurer within four months after the death, the company shall take reasonable steps to pay the proceeds to the beneficiary.

(7) Commencing two years after June 30, 1983, every change of beneficiary form issued by an insurance company under any life or endowment insurance policy or annuity contract to an insured or owner who is a resident of this state must request the following information:

(a) The name of each beneficiary, or if a class of beneficiaries is named, the name of each current beneficiary in the class;

(b) The address of each beneficiary; and

(c) The relationship of each beneficiary to the insured.

**Sec. 5.** RCW 63.29.100 and 1996 c 45 s 1 are each amended to read as follows:

(1) Except as provided in subsections (2) and (5) of this section, stock or other intangible ownership interest in a business association, the existence of which is evidenced by records available to the association, is presumed abandoned and, with respect to the interest, the association is the holder, if a dividend, distribution, or

other sum payable as a result of the interest has remained unclaimed by the owner for ~~((five))~~ three years and the owner within ~~((five))~~ three years has not:

(a) Communicated in writing with the association regarding the interest or a dividend, distribution, or other sum payable as a result of the interest; or

(b) Otherwise communicated with the association regarding the interest or a dividend, distribution, or other sum payable as a result of the interest, as evidenced by a memorandum or other record on file with the association prepared by an employee of the association.

(2) At the expiration of a ~~((five-year))~~ three-year period following the failure of the owner to claim a dividend, distribution, or other sum payable to the owner as a result of the interest, the interest is not presumed abandoned unless there have been at least five dividends, distributions, or other sums paid during the period, none of which has been claimed by the owner. If five dividends, distributions, or other sums are paid during the ~~((five-year))~~ three-year period, the period leading to a presumption of abandonment commences on the date payment of the first such unclaimed dividend, distribution, or other sum became due and payable. If five dividends, distributions, or other sums are not paid during the presumptive period, the period continues to run until there have been five dividends, distributions, or other sums that have not been claimed by the owner.

(3) The running of the ~~((five-year))~~ three-year period of abandonment ceases immediately upon the occurrence of a communication referred to in subsection (1) of this section. If any future dividend, distribution, or other sum payable to the owner as a result of the interest is subsequently not claimed by the owner, a new period of abandonment commences and relates back to the time a subsequent dividend, distribution, or other sum became due and payable.

(4) At the time any interest is presumed abandoned under this section, any dividend, distribution, or other sum then held for or owing to the owner as a result of the interest, and not previously presumed abandoned, is presumed abandoned.

(5) This chapter shall not apply to any stock or other intangible ownership interest enrolled in a plan that provides for the automatic reinvestment of dividends, distributions, or other sums payable as a result of the interest unless:

(a) The records available to the administrator of the plan show, with respect to any intangible ownership interest not enrolled in the reinvestment plan, that the owner has not within ~~((five))~~ three years communicated in any manner described in subsection (1) of this section; or

(b) ~~((Five))~~ Three years have elapsed since the location of the owner became unknown to the association, as evidenced by the return of official shareholder notifications or communications by the postal service as undeliverable, and the owner has not within those ~~((five))~~ three years communicated in any manner described in subsection (1) of this section. The ~~((five-year))~~ three-year period from the return of official shareholder notifications or communications shall commence from the earlier of the return of the second such mailing or the date the holder discontinues mailings to the shareholder.

**Sec. 6.** RCW 63.29.120 and 1983 c 179 s 12 are each amended to read as follows:

(1) Intangible property and any income or increment derived therefrom held in a fiduciary capacity for the benefit of another person is presumed abandoned unless the owner, within ~~((five))~~ three years after it has become payable or distributable, has increased or decreased the principal, accepted payment of principal or income, communicated concerning the property, or otherwise indicated an interest as evidenced by a memorandum or other record on file prepared by the fiduciary.

(2) Funds in an individual retirement account or a retirement plan for self-employed individuals or similar account or plan established pursuant to the internal revenue laws of the United States are not payable or distributable within the meaning of subsection (1) of this section unless, under the terms of the account or plan, distribution of all or part of the funds would then be mandatory.

(3) For the purpose of this section, a person who holds property as an agent for a business association is deemed to hold the property in a fiduciary capacity for that business association alone, unless the agreement between him and the business association provides otherwise.

(4) For the purposes of this chapter, a person who is deemed to hold property in a fiduciary capacity for a business association alone is the holder of the property only insofar as the interest of the business association in the property is concerned, and the business association is the holder of the property insofar as the interest of any other person in the property is concerned.

**Sec. 7.** RCW 63.29.140 and 1983 c 179 s 14 are each amended to read as follows:

(1) A gift certificate or a credit memo issued in the ordinary course of an issuer's business which remains unclaimed by the owner for more than ~~((five))~~ three years after becoming payable or distributable is presumed abandoned.

(2) In the case of a gift certificate, the amount presumed abandoned is the price paid by the purchaser for the gift certificate. In the case of a credit memo, the amount presumed abandoned is the amount credited to the recipient of the memo.

**Sec. 8.** RCW 82.32.045 and 1999 c 357 s 1 are each amended to read as follows:

(1) Except as otherwise provided in this chapter, payments of the taxes imposed under chapters 82.04, 82.08, 82.12, 82.14, and 82.16 RCW, along with reports and returns on forms prescribed by the department, are due monthly within ~~((twenty-five))~~ twenty days after the end of the month in which the taxable activities occur.

(2) The department of revenue may relieve any taxpayer or class of taxpayers from the obligation of remitting monthly and may require the return to cover other longer reporting periods, but in no event may returns be filed for a period greater than one year. For these taxpayers, tax payments are due on or before the last day of the month next succeeding the end of the period covered by the return.

(3) The department of revenue may also require verified annual returns from any taxpayer, setting forth such additional information as it may deem necessary to correctly determine tax liability.

(4) Notwithstanding subsections (1) and (2) of this section, the department may relieve any person of the requirement to file returns if the following conditions are met:

(a) The person's value of products, gross proceeds of sales, or gross income of the business, from all business activities taxable under chapter 82.04 RCW, is less than twenty-eight thousand dollars per year;

(b) The person's gross income of the business from all activities taxable under chapter 82.16 RCW is less than twenty-four thousand dollars per year; and

(c) The person is not required to collect or pay to the department of revenue any other tax or fee which the department is authorized to collect.

**Sec. 9.** RCW 82.23B.020 and 2000 c 69 s 25 are each amended to read as follows:

(1) An oil spill response tax is imposed on the privilege of receiving crude oil or petroleum products at a marine terminal within this state from a waterborne vessel or barge operating on the navigable waters of this state. The tax imposed in this section is levied upon the owner of the crude oil or petroleum products immediately after receipt of the same into the storage tanks of a marine terminal from a waterborne vessel or barge at the rate of one cent per barrel of crude oil or petroleum product received.

(2) In addition to the tax imposed in subsection (1) of this section, an oil spill administration tax is imposed on the privilege of receiving crude oil or petroleum products at a marine terminal within this state from a waterborne vessel or barge operating on the navigable waters of this state. The tax imposed in this section is levied upon the owner of the crude oil or petroleum products immediately after receipt of the same into the storage tanks of a marine terminal from a waterborne vessel or barge at the rate of four cents per barrel of crude oil or petroleum product.

(3) The taxes imposed by this chapter shall be collected by the marine terminal operator from the taxpayer. If any person charged with collecting the taxes fails to bill the taxpayer for the taxes, or in the alternative has not notified the taxpayer in writing of the imposition of the taxes, or having collected the taxes, fails to pay them to the department in the manner prescribed by this chapter, whether such failure is the result of the person's own acts or the result of acts or conditions beyond the person's control, he or she shall, nevertheless, be personally liable to the state for the amount of the taxes. Payment of the taxes by the owner to a marine terminal operator shall relieve the owner from further liability for the taxes.

(4) Taxes collected under this chapter shall be held in trust until paid to the department. Any person collecting the taxes who appropriates or converts the taxes collected shall be guilty of a gross misdemeanor if the money required to be collected is not available for payment on the date payment is due. The taxes required by this chapter to be collected shall be stated separately from other charges made by the marine terminal operator in any invoice or other statement of account provided to the taxpayer.

(5) If a taxpayer fails to pay the taxes imposed by this chapter to the person charged with collection of the taxes and the person charged with collection fails to pay the taxes to the department, the department may, in its discretion, proceed directly against the taxpayer for collection of the taxes.

(6) The taxes shall be due from the marine terminal operator, along with reports and returns on forms prescribed by the department, within ~~((twenty-five))~~ twenty days after the end of the month in which the taxable activity occurs.

(7) The amount of taxes, until paid by the taxpayer to the marine terminal operator or to the department, shall constitute a debt from the taxpayer to the marine terminal operator. Any person required to collect the taxes under this chapter who, with intent to violate the provisions of this chapter, fails or refuses to do so as required and any taxpayer who refuses to pay any taxes due under this chapter, shall be guilty of a misdemeanor as provided in chapter 9A.20 RCW.

(8) Upon prior approval of the department, the taxpayer may pay the taxes imposed by this chapter directly to the department. The department shall give its approval for direct payment under this section whenever it appears, in the department's judgment, that direct payment will enhance the administration of the taxes imposed under this chapter. The department shall provide by rule for the issuance of a direct payment certificate to any taxpayer qualifying for direct payment of the taxes. Good faith acceptance of a direct payment certificate by a terminal operator shall relieve the marine terminal operator from any liability for the collection or payment of the taxes imposed under this chapter.

(9) All receipts from the tax imposed in subsection (1) of this section shall be deposited into the state oil spill response account. All receipts from the tax imposed in subsection (2) of this section shall be deposited into the oil spill prevention account.

(10) Within forty-five days after the end of each calendar quarter, the office of financial management shall determine the balance of the oil spill response account as of the last day of that calendar quarter. Balance determinations by the office of financial management under this section are final and shall not be used to challenge the validity of any tax imposed under this chapter. The office of financial management shall promptly notify the departments of revenue and ecology of the account balance once a determination is made. For each subsequent calendar quarter, the tax imposed by subsection (1) of this section shall be imposed during the entire calendar quarter unless:

(a) Tax was imposed under subsection (1) of this section during the immediately preceding calendar quarter, and the most recent quarterly balance is more than nine million dollars; or

(b) Tax was not imposed under subsection (1) of this section during the immediately preceding calendar quarter, and the most recent quarterly balance is more than eight million dollars.

**Sec. 10.** RCW 82.27.060 and 1990 c 214 s 1 are each amended to read as follows:

The taxes levied by this chapter shall be due for payment monthly and remittance therefor shall be made within ~~((twenty-five))~~ twenty days after the end of the month in which the taxable activity occurs. The taxpayer on or before the due date shall make out a signed return, setting out such information as the department of revenue may require, including the gross measure of the tax, any deductions, credits, or exemptions claimed, and the amount of tax due for the preceding monthly period, which amount shall be transmitted to the department along with the return.

The department may relieve any taxpayer from the obligation of filing a monthly return and may require the return to cover other periods, but in no event may periodic returns be filed for a period greater than one year. In such cases tax payments are due on or before the last day of the month next succeeding the end of the period covered by the return.

**Sec. 11.** RCW 82.04.180 and 1985 c 414 s 6 are each amended to read as follows:

(1) "Successor" means:

(a) Any person to whom a taxpayer quitting, selling out, exchanging, or disposing of a business sells or otherwise conveys, directly or indirectly, in bulk and not in the ordinary course of the taxpayer's business, ~~((a major part of the materials, supplies, merchandise, inventory, fixtures, or equipment))~~ more than fifty percent of the fair market value of either the (i) tangible assets or (ii) intangible assets of the taxpayer; or

(b) A surviving corporation of a statutory merger.

(2) Any person obligated to fulfill the terms of a contract shall be deemed a successor to any contractor defaulting in the performance of any contract as to which such person is a surety or guarantor.

**Sec. 12.** RCW 82.32.140 and 1985 c 414 s 7 are each amended to read as follows:

(1) Whenever any taxpayer quits business, or sells out, exchanges, or otherwise disposes of ~~((his business or his stock of goods))~~ more than fifty percent of the fair market value of either its tangible or intangible assets, any tax payable hereunder shall become immediately due and payable, and such taxpayer shall, within ten days thereafter, make a return and pay the tax due(~~(-and)~~).

(2) Any person who becomes a successor shall ~~((become liable for the full amount of the tax and))~~ withhold from the purchase price a sum sufficient to pay any tax due from the taxpayer until such time as the taxpayer shall produce a receipt from the department of revenue showing payment in full of any tax due or a certificate that no tax is due ~~((and, if such))~~. If any tax is not paid by the taxpayer within ten days from the date of such sale, exchange, or disposal, the successor shall become liable for the payment of the full amount of tax(~~(-and the payment thereof by such))~~. If the fair market value of the assets acquired by a successor is less than fifty thousand dollars, the successor's liability for payment of the unpaid tax is limited to the fair market value of the assets acquired from the taxpayer. The burden of establishing the fair market value of the assets acquired is on the successor.

(3) The payment of any tax by a successor shall, to the extent thereof, be deemed a payment upon the purchase price(~~(-))~~; and if such payment is greater in amount than the purchase price the amount of the difference shall become a debt due ~~((such))~~ the successor from the taxpayer.

(4) No successor shall be liable for any tax due from the person from whom ~~((he))~~ the successor has acquired a business or stock of goods if ~~((he))~~ the successor gives written notice to the department of revenue of such acquisition and no assessment is issued by the department of revenue within six months of receipt of such notice against the former operator of the business and a copy thereof mailed to ~~((such))~~ the successor.

**Sec. 13.** RCW 82.32.090 and 2000 c 229 s 7 are each amended to read as follows:

(1) If payment of any tax due on a return to be filed by a taxpayer is not received by the department of revenue by the due date, there shall be assessed a penalty of five percent of the amount of the tax; and if the tax is not received on or before the last day of the month following the due date, there shall be assessed a total penalty of ~~((ten))~~ fifteen percent of the amount of the tax under this subsection; and if the tax is not received on or before the last day of the second month following the due date, there shall be assessed a total penalty of ~~((twenty))~~

twenty-five percent of the amount of the tax under this subsection. No penalty so added shall be less than five dollars.

(2) If the department of revenue determines that any tax is due, there shall be assessed a penalty of five percent of the amount of the tax determined by the department to be due; and if payment of any tax ((assessed) determined by the department ((of revenue)) to be due is not received by the department by the due date specified in the notice, or any extension thereof, ((the department shall add a penalty of ten percent of the amount of the additional tax found due)) there shall be assessed a total penalty of fifteen percent of the amount of the tax under this subsection; and if the tax is not received on or before the thirtieth day following the due date specified in the notice of tax due, or any extension thereof, there shall be assessed a total penalty of twenty-five percent of the amount of the tax under this subsection. No penalty so added shall be less than five dollars.

(3) If a warrant be issued by the department of revenue for the collection of taxes, increases, and penalties, there shall be added thereto a penalty of ~~((five))~~ ten percent of the amount of the tax, but not less than ten dollars.

(4) If the department finds that a person has engaged in any business or performed any act upon which a tax is imposed under this title and that person has not obtained from the department a registration certificate as required by RCW 82.32.030, the department shall impose a penalty of five percent of the amount of tax due from that person for the period that the person was not registered as required by RCW 82.32.030. The department shall not impose the penalty under this subsection (4) if a person who has engaged in business taxable under this title without first having registered as required by RCW 82.32.030, prior to any notification by the department of the need to register, obtains a registration certificate from the department.

(5) If the department finds that all or any part of a deficiency resulted from the disregard of specific written instructions as to reporting or tax liabilities, the department shall add a penalty of ten percent of the amount of the additional tax found due because of the failure to follow the instructions. A taxpayer disregards specific written instructions when the department of revenue has informed the taxpayer in writing of the taxpayer's tax obligations and the taxpayer fails to act in accordance with those instructions unless the department has not issued final instructions because the matter is under appeal pursuant to this chapter or departmental regulations. The department shall not assess the penalty under this section upon any taxpayer who has made a good faith effort to comply with the specific written instructions provided by the department to that taxpayer. Specific written instructions may be given as a part of a tax assessment, audit, determination, or closing agreement, provided that such specific written instructions shall apply only to the taxpayer addressed or referenced on such documents. Any specific written instructions by the department of revenue shall be clearly identified as such and shall inform the taxpayer that failure to follow the instructions may subject the taxpayer to the penalties imposed by this subsection.

~~((5))~~ (6) If the department finds that all or any part of the deficiency resulted from an intent to evade the tax payable hereunder, a further penalty of fifty percent of the additional tax found to be due shall be added.

~~((6))~~ (7) ~~The ((aggregate of)) penalties imposed under subsections (1)((, (2), and (3))) through (4) of this section ((shall not exceed thirty five percent of the tax due, or twenty dollars, whichever is greater)) can each be imposed on the same tax found to be due.~~ This subsection does not prohibit or restrict the application of other penalties authorized by law.

~~((7))~~ (8) The department of revenue may not impose both the evasion penalty and the penalty for disregarding specific written instructions on the same tax found to be due.

~~((8))~~ (9) For the purposes of this section, "return" means any document a person is required by the state of Washington to file to satisfy or establish a tax or fee obligation that is administered or collected by the department of revenue, and that has a statutorily defined due date.

**NEW SECTION. Sec. 14.** Except as otherwise provided in this section, section 13 of this act applies to all penalties imposed after June 30, 2003. The five percent penalty imposed in section 13(2) of this act applies to all assessments originally issued after June 30, 2003.

**NEW SECTION. Sec. 15.** A new section is added to chapter 82.32 RCW to read as follows:

(1) A promoter of a special event within the state of Washington shall not permit a vendor to make or solicit retail sales of tangible personal property or services at the special event unless the promoter obtains verification that the vendor has obtained a certificate of registration from the department.

(2) A promoter of a special event shall:

(a) Keep, in addition to the records required under RCW 82.32.070, a record of the dates and place of each special event, and the name, address, and registration certificate number of vendors permitted to make or solicit retail sales of tangible personal property or services at the special event; and

(b) Provide to the department, within twenty days of receipt of a written request from the department, a list of vendors permitted to make or solicit retail sales of tangible personal property or services. The list shall be in a form and contain such information as the department may require, and shall include the date and place of the event, and the name, address, and registration certificate number of each vendor.

(3) If a promoter fails to comply with the provisions of this section, the promoter is liable for the penalties provided in this subsection (3).

(a) If a promoter fails to comply with the provisions of subsection (1) of this section, the department shall impose a penalty of one hundred dollars for each vendor permitted to make or solicit retail sales of tangible personal property or services at the special event.

(b) If a promoter fails to comply with the provisions of subsection (2)(b) of this section, the department shall impose a penalty of:

(i) Two hundred fifty dollars if the information requested is not received by the department within twenty days of the department's written request; and

(ii) One hundred dollars for each vendor for whom the information as required by subsection (2)(b) of this section is not provided to the department.

(4) The aggregate of penalties imposed under subsection (3) of this section may not exceed two thousand five hundred dollars for a special event if the promoter has not previously been penalized under this section. Under no circumstances is a promoter liable for sales tax or business and occupation tax not remitted to the department by a vendor at a special event.

(5) The department shall notify a promoter by mail of any penalty imposed under this section, and the penalty shall be due within thirty days from the date of the notice. If any penalty imposed under this section is not received by the department by the due date, there shall be assessed interest on the unpaid amount beginning the day following the due date until the penalty is paid in full. The rate of interest shall be computed on a daily basis on the amount of outstanding penalty at the rate as computed under RCW 82.32.050(2). The rate computed shall be adjusted annually in the same manner as provided in RCW 82.32.050(1)(c).

(6) For purposes of this section:

(a) "Promoter" means a person who organizes, operates, or sponsors a special event and who contracts with vendors for participation in the special event.

(b) "Special event" means an entertainment, amusement, recreational, educational, or marketing event, whether held on a regular or irregular basis, at which more than one vendor makes or solicits retail sales of tangible personal property or services. The term includes, but is not limited to: Auto shows, recreational vehicle shows, boat shows, home shows, garden shows, hunting and fishing shows, stamp shows, comic book shows, sports memorabilia shows, craft shows, art shows, antique shows, flea markets, exhibitions, festivals, concerts, swap meets, bazaars, carnivals, athletic contests, circuses, fairs, or other similar activities. "Special event" does not include an event that is organized for the exclusive benefit of any nonprofit organization as defined in RCW 82.04.3651. An event is organized for the exclusive benefit of a nonprofit organization if all of the gross proceeds of retail sales of all vendors at the event inure to the benefit of the nonprofit organization on whose behalf the event is being held. "Special event" does not include athletic contests that involve competition between teams, when such competition consists of more than five contests in a calendar year by at least one team at the same facility or site.

(c) "Vendor" means a person who, at a special event, makes or solicits retail sales of tangible personal property or services.

(7) This section does not apply to:

(a) A special event whose promoter does not charge more than two hundred dollars for a vendor to participate in a special event;

(b) A special event whose promoter charges a percentage of sales instead of, or in addition to, a flat charge for a vendor to participate in a special event if the promoter, in good faith, believes that no vendor will pay more than two hundred dollars to participate in the special event; or

(c) A person who does not organize, operate, or sponsor a special event, but only provides a venue, supplies, furnishings, fixtures, equipment, or services to a promoter of a special event.

**Sec. 16.** RCW 82.32.020 and 1983 c 3 s 220 are each amended to read as follows:

General Fund--State Appropriation (FY 2005) \$211,317,000

General Fund--Federal Appropriation \$384,801,000

General Fund--Local Appropriation \$1,970,000

**TOTAL APPROPRIATION \$807,906,000**

The appropriations in this subsection are subject to the following conditions and limitations:

(a) Regional support networks shall use portions of the general fund--state appropriation for implementation of working agreements with the vocational rehabilitation program that will maximize the use of federal funding for vocational programs.

(b) From the general fund--state appropriations in this subsection, the secretary of social and health services shall assure that regional support networks reimburse the aging and disability services administration for the general fund--state cost of medicaid personal care services that enrolled regional support network consumers use because of their psychiatric disability.

(c) \$4,222,000 of the general fund--state appropriation for fiscal year 2004, \$4,222,000 of the general fund--state appropriation for fiscal year 2005, and \$8,444,000 of the general fund--federal appropriation are provided solely for the continued operation of community residential and support services for persons whose treatment needs constitute substantial barriers to community placement and who no longer require active psychiatric treatment at an inpatient hospital level of care, no longer meet the criteria for inpatient involuntary commitment, and have been discharged from a state psychiatric hospital. Primary responsibility and accountability for provision of appropriate community support for persons placed with these funds shall reside with the mental health program and the regional support networks, with partnership and active support from the alcohol and substance abuse division and from the aging and disability services administration. The department shall continue performance-based incentive contracts to provide appropriate community support services for individuals leaving the state hospitals under this subsection. The department shall first seek to contract with regional support networks before offering a contract to any other party. The funds appropriated in this subsection

shall not be considered "available resources" as defined in RCW 71.24.025 and are not subject to the standard allocation formula applied in accordance with RCW 71.24.035(13)(a).

(d) At least \$902,000 of the federal block grant funding appropriated in this subsection shall be used for the continued operation of the mentally ill offender pilot program.

(e) The department is authorized to implement a new formula for allocating available resources among the regional support networks. The distribution formula shall use the number of persons eligible for the state medical programs funded under chapter 74.09 RCW as the measure of the requirement for the number of acutely mentally ill, chronically mentally ill, severely emotionally disturbed children, and seriously disturbed in accordance with RCW 71.24.035(13)(a). The new formula shall be phased in over a period of no less than six years. Furthermore, the department shall increase the medicaid capitation rates which a regional support network would otherwise receive under the formula by an amount sufficient to maximize available federal funding, provided that the nonfederal share of the higher medicaid payment rate is provided by the regional support network from local funds. The department shall first provide the higher payment to those RSNs whose allocations under the funding formula would otherwise increase the least from the previous year's level in fiscal year 2004 and fiscal year 2005.

(f) Within funds appropriated in this subsection, the department shall contract with the Clark county regional support network for development and operation of a project demonstrating collaborative methods for providing intensive mental health services in the school setting for severely emotionally disturbed children who are medicaid eligible. Project services are to be delivered by teachers and teaching assistants who qualify as, or who are under the supervision of, mental health professionals meeting the requirements of chapter 275-57 WAC. The department shall increase medicaid payments to the regional support network by the amount necessary to cover the necessary and allowable costs of the demonstration, not to exceed the upper payment limit specified for the regional support network in the department's medicaid waiver agreement with the federal government after meeting all other medicaid spending requirements assumed in this subsection. The regional support network shall provide the department with (i) periodic reports on project service levels, methods, and outcomes; and (ii) an intergovernmental transfer equal to the state share of the increased medicaid payment provided for operation of this project.

(g) The department shall assure that each regional support network increases spending on direct client services in fiscal years 2004 and 2005 by at least the same percentage as the total state, federal, and local funds allocated to the regional support network in those years exceed the amounts allocated to it in fiscal year 2003.

(h) The department shall reduce state funding otherwise payable to a regional support network in fiscal year 2005 by the amount by which the regional support network's total administrative expenditures as of December 31, 2002, exceed 10 percent of total funding.

TOTAL APPROPRIATION \$7,256,903,000

The appropriations in this section are subject to the following conditions and limitations:

(1) Based on quarterly expenditure reports and caseload forecasts, if the department estimates that expenditures for the medical assistance program will exceed the appropriations, the department shall take steps including but not limited to reduction of rates or elimination of optional services to reduce expenditures so that total program costs do not exceed the annual appropriation authority.

(2) The department shall continue to extend medicaid eligibility to children through age 18 residing in households with incomes below 200 percent of the federal poverty level.

(3) In determining financial eligibility for medicaid-funded services, the department is authorized to disregard recoveries by Holocaust survivors of insurance proceeds or other assets, as defined in RCW 48.104.030.

(4) \$999,000 of the health services account appropriation for fiscal year 2004, \$1,519,000 of the health services account appropriation for fiscal year 2005, and \$2,142,000 of the general fund--federal appropriation are provided solely for implementation of a "ticket to work" medicaid buy-in program for working persons with disabilities, operated in accordance with the following conditions:

(5) Sufficient funds are appropriated in this section for the department to continue podiatry services for medicaid-eligible adults.

(6) Sufficient funds are appropriated in this section for the department to provide an adult dental benefit equivalent to approximately 75 percent of the dental benefit provided during the 2001-03 biennium. The department shall establish the scope of services to be provided within the available funds in consultation with dental providers and consumer representatives.

(7) The legislature reaffirms that it is in the state's interest for Harborview medical center to remain an economically viable component of the state's health care system.

(8) In accordance with RCW 74.46.625, \$52,057,000 of the fiscal year 2004 health services account appropriation, \$35,016,000 of the fiscal year 2005 health services account appropriation, and \$87,074,000 of the general fund--federal appropriation are provided solely for supplemental payments to nursing homes operated by rural public hospital districts. The payments shall be conditioned upon a contractual commitment by the participating public hospitals to make an intergovernmental transfer to the health services account equal to at least 91 percent of the additional payments. The state's teaching hospitals shall retain at least 28 percent of the amounts retained by hospitals under these programs, or the maximum allowable under the teaching hospitals' limits as established under federal rule, whichever is less.

(10) \$3,100,000 of the health services account appropriation, \$8,416,000 of the general fund--local appropriation, and \$11,516,000 of the general fund--federal appropriation are provided solely for grants to rural hospitals. The department shall distribute the funds under a formula that provides a relatively larger share of the available funding to hospitals that (a) serve a disproportionate share of low-income and medically indigent patients and (b) have relatively smaller net financial margins, to the extent allowed by the federal medicaid program.

(11) \$26,080,000 of the health services account appropriation and \$26,080,000 of the general fund--federal appropriation are provided solely for grants to nonrural hospitals. The department shall distribute the funds under a formula that provides a relatively larger share of the available funding to hospitals that (a) serve a disproportionate share of low-income and medically indigent patients and (b) have relatively smaller net financial margins, to the extent allowed by the federal medicaid program.

(12) The department shall separately track the total amount of any rebates obtained from drug manufacturers that are supplemental to the amounts required by federal law. The department shall report to the fiscal committees of the house of representatives and senate by January 15, 2004, and by January 15, 2005, on supplemental rebates negotiated to date, and their projected value through the end of the current and the next succeeding fiscal year. The report shall include options for using any rebate amounts in excess of those assumed in this budget to increase pharmacy reimbursement rates.

(13) \$156,000 of the general fund--state appropriation for fiscal year 2004 and \$1,403,000 of the general fund--federal appropriation are provided solely for a study to assess alternatives for replacing the existing medicaid management information system. The department shall report to the information services board and to the fiscal committees of the legislature by December 1, 2003, on the anticipated costs and benefits of the major alternative approaches.

In designing strategies, the primary strategy considered shall be selective or direct contracting with durable medical equipment and supplies vendors or manufacturers.

(15) The department shall, within available resources, design and implement a medical care services care management pilot project for clients receiving general assistance benefits. The pilot project shall be operated in at least two of the counties with the highest concentration of general assistance clients, and may use a full or partial capitation model. In designing the project, the department shall consult with the mental health division and its managed care contractors that include community and migrant health centers in their provider network. The pilot project shall be designed to maximize care coordination, high-risk medical management, and chronic care management to achieve better health outcomes. The pilot project shall begin enrollment on July 1, 2004.

(16) Within available resources and to the extent possible, the department shall evaluate and pilot a nurse consultant services program to assist fee-for-service clients in accessing medical information, with the goal of reducing administrative burdens on physicians and unnecessary emergency room utilization.

(17) The department shall include in any pending medicaid reform section 1115 waiver application, or in any existing section 1115 waiver, a request for authorization to provide optional medicaid services that have been eliminated in this act to American Indian and Alaska Native persons as defined in relevant federal law who are eligible for medicaid only to the extent that such services are provided through the American Indian health system and are financed with one hundred percent federal medicaid matching funds.

(18) The department shall establish managed care rates within available funds, giving specific consideration to each plan's programmatic and financial performance, and ability to assure access in under-served areas.

(19) The department of social and health services, the office of the superintendent of public instruction, and the department of health should jointly identify opportunities for early intervention and prevention activities

that can help prevent disease and reduce oral health issues among children. Disease prevention among infants at the age of one year and among children entering the K-12 education system provides cost-effective ways to avoid higher health care spending later in life.

(20) The department shall secure a federal waiver, effective no later than September 1, 2003, which will enable it to charge co-premiums for medical and dental coverage of children whose family incomes exceed the federal poverty level.

(21) For purposes of RCW 74.09.800(2), \$9,549,000 of the general fund--state appropriation for fiscal year 2004, \$10,779,000 of the general fund--state appropriation for fiscal year 2005, and \$37,753,000 of the general fund--federal appropriation are provided solely to provide prenatal care services to low-income women who are not eligible to receive such services under the medical assistance program, Title XIX of the federal social security act. If the department is unable to secure federal matching funds under Title XXI of the social security act, the department shall take all actions necessary to manage the program within these appropriated levels.

(18) The department shall implement an academic detailing program that educates prescribers on the availability of generic versions of off-patent brand drugs. General Fund--State Appropriation (FY 2005) \$3,977,209,000

TOTAL APPROPRIATION \$7,946,616,000

(2) Allocations for certificated staff salaries for the 2003-04 and 2004-05 school years shall be determined using formula-generated staff units calculated pursuant to this subsection. Staff allocations for small school enrollments in (d) through (f) of this subsection shall be reduced for vocational full-time equivalent enrollments. Staff allocations for small school enrollments in grades K-6 shall be the greater of that generated under (a) of this subsection, or under (d) and (e) of this subsection. Certificated staffing allocations shall be as follows:

(a) On the basis of each 1,000 average annual full-time equivalent enrollments, excluding full-time equivalent enrollment otherwise recognized for certificated staff unit allocations under (c) through (f) of this subsection:

(i) Four certificated administrative staff units per thousand full-time equivalent students in grades K-12;

The allocation may be used for reducing class sizes in grades K-4 or to provide additional classroom contact hours for kindergarten, before-and-after-school programs, weekend school programs, summer school programs, and intercession opportunities to assist elementary school students in meeting the essential academic learning requirements and student assessment performance standards. For purposes of this subsection, additional classroom contact hours provided by teachers beyond the normal school day under a supplemental contract shall be converted to a certificated full-time equivalent by dividing the classroom contact hours by 900.

(A) Funds provided under this subsection (2)(a)(iv) and (v) in excess of the amount required to maintain the statutory minimum ratio established under RCW 28A.150.260(2)(b) shall be allocated only if the district documents an actual ratio in grades K-4 equal to or greater than 54.0 certificated instructional staff per thousand full-time equivalent students in the 2003-04 school year and 53.2 certificated instructional staff per thousand full-

time equivalent students in the 2004-05 school year. For any school district documenting a lower certificated instructional staff ratio, the allocation shall be based on the district's actual grades K-4 certificated instructional staff ratio achieved in that school year, or the statutory minimum ratio established under RCW 28A.150.260(2)(b), if greater;

Additional classified instructional assistants, for the purposes of this subsection, shall be determined using the 1989-90 school year as the base year;

(C) Any district maintaining a ratio in grades K-4 equal to or greater than 54.0 certificated instructional staff per thousand full-time equivalent students in the 2003-04 school year and 53.2 certificated instructional staff per thousand full-time equivalent students in the 2004-05 school year may use allocations generated under this subsection (2)(a)(iv) and (v) in excess of that required to maintain the minimum ratio established under RCW 28A.150.260(2)(b) to employ additional basic education certificated instructional staff or classified instructional assistants in grades 5-6. Funds allocated under this subsection (2)(a)(iv) and (v) shall only be expended to reduce class size in grades K-6. No more than 1.3 of the certificated instructional funding ratio amount may be expended for provision of classified instructional assistants;

(b) For school districts with a minimum enrollment of 250 full-time equivalent students whose full-time equivalent student enrollment count in a given month exceeds the first of the month full-time equivalent enrollment count by 5 percent, an additional state allocation of 110 percent of the share that such increased enrollment would have generated had such additional full-time equivalent students been included in the normal enrollment count for that particular month;

(c)(i) On the basis of full-time equivalent enrollment in:

(iii) Indirect cost charges by a school district to vocational-secondary programs shall not exceed 15 percent of the combined basic education and vocational enhancement allocations of state funds;

Units calculated under (f)(ii) of this subsection shall be reduced by certificated staff units at the rate of forty-six certificated instructional staff units and four certificated administrative staff units per thousand vocational full-time equivalent students;

(g) For each nonhigh school district having an enrollment of more than seventy annual average full-time equivalent students and less than one hundred eighty students, operating a grades K-8 program or a grades 1-8 program, an additional one-half of a certificated instructional staff unit; and

(h) For each nonhigh school district having an enrollment of more than fifty annual average full-time equivalent students and less than one hundred eighty students, operating a grades K-6 program or a grades 1-6 program, an additional one-half of a certificated instructional staff unit.

(5) Insurance benefit allocations shall be calculated at the maintenance rate specified in section 504(2) of this act, based on the number of benefit units determined as follows:

(a) The number of certificated staff units determined in subsection (2) of this section; and

(b) The number of classified staff units determined in subsection (3) of this section multiplied by 1.152. This factor is intended to adjust allocations so that, for the purposes of distributing insurance benefits, full-time equivalent classified employees may be calculated on the basis of 1440 hours of work per year, with no individual employee counted as more than one full-time equivalent.

(6)(a) For nonemployee-related costs associated with each certificated staff unit allocated under subsection (2)(a), (b), and (d) through (h) of this section, there shall be provided a maximum of \$8,785 per certificated staff unit in the 2003-04 school year and a maximum of \$8,952 per certificated staff unit in the 2004-05 school year.

(7) Allocations for substitute costs for classroom teachers shall be distributed at a maintenance rate of \$531.09 for the 2003-04 and 2004-05 school years per allocated classroom teachers exclusive of salary increase amounts provided in section 504 of this act. Solely for the purposes of this subsection, allocated classroom teachers shall be equal to the number of certificated instructional staff units allocated under subsection (2) of this section, multiplied by the ratio between the number of actual basic education certificated teachers and the number of actual basic education certificated instructional staff reported statewide for the prior school year.

(8) Any school district board of directors may petition the superintendent of public instruction by submission of a resolution adopted in a public meeting to reduce or delay any portion of its basic education allocation for any school year. The superintendent of public instruction shall approve such reduction or delay if it does not impair the district's financial condition. Any delay shall not be for more than two school years. Any reduction or delay shall have no impact on levy authority pursuant to RCW 84.52.0531 and local effort assistance pursuant to chapter 28A.500 RCW.

(9) The superintendent may distribute a maximum of \$6,392,000 outside the basic education formula during fiscal years 2004 and 2005 as follows:

(b) As used in this subsection, the column headings "BA+ (N)" refer to the number of credits earned since receiving the baccalaureate degree.

(c) For credits earned after the baccalaureate degree but before the masters degree, any credits in excess of forty-five credits may be counted after the masters degree. Thus, as used in this subsection, the column headings "MA+ (N)" refer to the total of:

(i) Credits earned since receiving the masters degree; and

(ii) Any credits in excess of forty-five credits that were earned after the baccalaureate degree but before the masters degree.

(5) For the purposes of this section:

(a) "BA" means a baccalaureate degree.

(b) "MA" means a masters degree.

(c) "PHD" means a doctorate degree.

(d) "Years of service" shall be calculated under the same rules adopted by the superintendent of public instruction.

(e) "Credits" means college quarter hour credits and equivalent in-service credits computed in accordance with RCW 28A.415.020 and 28A.415.023.

(6) No more than ninety college quarter-hour credits received by any employee after the baccalaureate degree may be used to determine compensation allocations under the state salary allocation schedule and LEAP documents referenced in this act, or any replacement schedules and documents, unless:

(a) The employee has a masters degree; or

(b) The credits were used in generating state salary allocations before January 1, 1992.

(7) The certificated instructional staff base salary specified for each district in LEAP Document 12E and the salary schedules in subsection (4)(a) of this section include two learning improvement days. A school district is eligible for the learning improvement day funds only if the learning improvement days have been added to the 180-day contract year. If fewer days are added, the additional learning improvement allocation shall be adjusted accordingly. The additional days shall be for activities related to improving student learning consistent with education reform implementation, and shall not be considered part of basic education. The length of a learning improvement day shall not be less than the length of a full day under the base contract. The superintendent of public instruction shall ensure that school districts adhere to the intent and purposes of this subsection.

(8) The salary allocation schedules established in this section are for allocation purposes only except as provided in RCW 28A.400.200(2), subsection (7) of this section, and section 504(1) of this act.

**NEW SECTION. Sec. 504. FOR THE SUPERINTENDENT OF PUBLIC INSTRUCTION--FOR SCHOOL EMPLOYEE COMPENSATION ADJUSTMENTS**  
SUPERINTENDENT OF PUBLIC INSTRUCTION - SCHOOL EMPLOYEE COMPENSATION ADJUSTMENTS

General Fund--State Appropriation (FY 2004) \$28,511,000

General Fund--State Appropriation (FY 2005) \$116,670,000

General Fund--Federal Appropriation \$559,000

TOTAL APPROPRIATION \$145,740,000

The appropriations in this section are subject to the following conditions and limitations:

(1) \$8,913,000 of the general fund--state appropriation for fiscal year 2004 and \$20,238,000 of the general fund--state appropriation for fiscal year 2005 are provided solely to provide a salary adjustment for state formula certificated instructional staff units in their first seven years of service. Consistent with the statewide certificated instructional staff salary allocation schedule in section 503 of this act, sufficient funding is provided to increase the salary of certificated instructional staff units in the 2003-04 school year and the 2004-05 school year by the following percentages: Three percent for certificated instructional staff in their first and second years of service; two and one-half percent for certificated instructional staff in their third year of service; one and one-half percent for certificated instructional staff in their fourth year of service; one percent for certificated instructional staff in their fifth year of service; and one-half of a percent for certificated instructional staff in their sixth and seventh years of service. These increases will take effect September 1, 2003 and September 1, 2004.

(a) In order to receive funding provided in this subsection, school districts shall certify to the office of superintendent of public instruction that they will provide the percentage increases in the amounts specified in this subsection. In cases where a school district providing the increases in the amounts specified in this subsection would cause that school district to be out of compliance with RCW 28A.400.200, they may provide salary increases in different amounts but only to the extent necessary to come into compliance with RCW 28A.400.200. Funds provided in this subsection shall be used exclusively for providing the percentage increases specified in this subsection to the certificated staff units in their first seven years of service and shall not be used to supplant any other state or local funding for compensation for these staff.

(b) The appropriations include associated incremental fringe benefit allocations at rates of 9.04 percent for school year 2003-04 and 9.04 percent for school year 2004-05 for certificated staff. Increases for general apportionment (basic education) are based on the salary allocation schedules and methodology in sections 502 and 503 of this act. Increases for special education result from increases in each district's basic education allocation per student. Increases for educational service districts and institutional education programs are determined by the superintendent of public instruction using the methodology for general apportionment salaries and benefits in sections 502 and 503 of this act.

(2) The appropriations in this section provide salary adjustments and incremental fringe benefit allocations based on formula adjustments as follows:

	School Year	
	2003-04	2004-05
Highly Capable (per formula student)	\$0.93	\$1.89
Transitional Bilingual Education (per eligible bilingual student)	\$2.45	\$4.97
Learning Assistance (per entitlement unit)	\$0.69	\$1.40

(3) \$116,483,000 is provided for adjustments to insurance benefit allocations. The maintenance rate for insurance benefit allocations is \$457.07 per month for the 2003-04 and 2004-05 school years. The appropriations in this section provide for a rate increase to \$481.31 per month for the 2003-04 school year and \$570.74 per month for the 2004-05 school year at the following rates:

	School Year	
	2003-04	2004-05
Pupil Transportation (per weighted pupil mile)	\$0.22	\$1.03
Highly Capable (per formula student)	\$1.52	\$7.00
Transitional Bilingual Education (per eligible bilingual student)	\$3.92	\$18.40
Learning Assistance (per entitlement unit)	\$3.08	\$14.46

(4) The rates specified in this section are subject to revision each year by the legislature.

(2) A maximum of \$768,000 of this fiscal year 2004 appropriation and a maximum of \$782,000 of the fiscal year 2005 appropriation may be expended for regional transportation coordinators and related activities. Allocations for transportation of students transported more than one radius mile shall be based on weighted miles as determined by superintendent of public instruction multiplied by the per mile reimbursement rates for the school year pursuant to the formulas adopted by the superintendent of public instruction. Allocations for transportation of students living within one radius mile shall be based on the number of enrolled students in grades kindergarten through five living within one radius mile of their assigned school multiplied by the per mile reimbursement rate for the school year multiplied by 1.29.

(5) Beginning with busses purchased on or after July 1, 2003, the office of superintendent of public instruction shall provide reimbursement funding to a school district only after the superintendent of public instruction determines that the school bus was purchased from the list established pursuant to RCW 28A.160.195(2) or a comparable competitive bid process based on the lowest price quote based on similar bus categories to those used to establish the list pursuant to RCW 28A.160.195. **NEW SECTION. Sec. 507. FOR THE SUPERINTENDENT OF PUBLIC INSTRUCTION--FOR SPECIAL EDUCATION PROGRAMS**

**SUPERINTENDENT OF PUBLIC INSTRUCTION - SPECIAL EDUCATION PROGRAMS**

General Fund--State Appropriation (FY 2004) \$433,984,000

General Fund--State Appropriation (FY 2005) \$427,214,000

General Fund--Federal Appropriation \$409,637,000

**TOTAL APPROPRIATION \$1,270,835,000**

The appropriations in this section are subject to the following conditions and limitations:

(1) Funding for special education programs is provided on an excess cost basis, pursuant to RCW 28A.150.390. School districts shall ensure that special education students as a class receive their full share of the general apportionment allocation accruing through sections 502 and 504 of this act. To the extent a school district cannot provide an appropriate education for special education students under chapter 28A.155 RCW through the general apportionment allocation, it shall provide services through the special education excess cost allocation funded in this section.

(2)(a) The superintendent of public instruction shall use the excess cost methodology developed and implemented for the 2001-02 school year using the S-275 personnel reporting system and all related accounting requirements to ensure that:

(i) Special education students are basic education students first;

(ii) As a class, special education students are entitled to the full basic education allocation; and

(iii) Special education students are basic education students for the entire school day.

(b) The S-275 and accounting changes in effect since the 2001-02 school year shall supercede any prior excess cost methodologies and shall be required of all school districts.

(3) Each fiscal year appropriation includes such funds as are necessary to complete the school year ending in the fiscal year and for prior fiscal year adjustments.

(4) The superintendent of public instruction shall distribute state and federal funds to school districts based on two categories: The optional birth through age two program for special education eligible developmentally delayed infants and toddlers, and the mandatory special education program for special education eligible students ages three to twenty-one. A "special education eligible student" means a student receiving specially designed instruction in accordance with a properly formulated individualized education program.

(5)(a) For the 2003-04 and 2004-05 school years, the superintendent shall make allocations to each district based on the sum of:

(i) A district's annual average headcount enrollment of developmentally delayed infants and toddlers ages birth through two, multiplied by the district's average basic education allocation per full-time equivalent student, multiplied by 1.15; and

(ii) A district's annual average full-time equivalent basic education enrollment multiplied by the funded enrollment percent determined pursuant to subsection (6)(b) of this section, multiplied by the district's average basic education allocation per full-time equivalent student multiplied by 0.9309.

(b) For purposes of this subsection, "average basic education allocation per full-time equivalent student" for a district shall be based on the staffing ratios required by RCW 28A.150.260 and shall not include enhancements, secondary vocational education, or small schools.

(6) The definitions in this subsection apply throughout this section.

(a) "Annual average full-time equivalent basic education enrollment" means the resident enrollment including students enrolled through choice (RCW 28A.225.225) and students from nonhigh districts (RCW

28A.225.210) and excluding students residing in another district enrolled as part of an interdistrict cooperative program (RCW 28A.225.250).

(b) "Enrollment percent" means the district's resident special education annual average enrollment, excluding the birth through age two enrollment, as a percent of the district's annual average full-time equivalent basic education enrollment.

Each district's general fund--state funded special education enrollment shall be the lesser of the district's actual enrollment percent or 12.7 percent. Increases in enrollment percent from 12.7 percent to 13.0 percent shall be funded from the general fund--federal appropriation.

(7) At the request of any interdistrict cooperative of at least 15 districts in which all excess cost services for special education students of the districts are provided by the cooperative, the maximum enrollment percent shall be calculated in accordance with subsection (6)(b) of this section, and shall be calculated in the aggregate rather than individual district units. For purposes of this subsection, the average basic education allocation per full-time equivalent student shall be calculated in the aggregate rather than individual district units.

(8) To the extent necessary, \$25,746,000 of the general fund--federal appropriation is provided for safety net awards for districts with demonstrated needs for state special education funding beyond the amounts provided in subsection (5) of this section. If safety net awards exceed the amount appropriated in this subsection (8), the superintendent shall expend all available federal discretionary funds necessary to meet this need. Safety net funds shall be awarded by the state safety net oversight committee subject to the following conditions and limitations:

(a) The committee shall consider unmet needs for districts that can convincingly demonstrate that all legitimate expenditures for special education exceed all available revenues from state funding formulas. In the determination of need, the committee shall also consider additional available revenues from federal and local sources. Differences in program costs attributable to district philosophy, service delivery choice, or accounting practices are not a legitimate basis for safety net awards.

(b) The committee shall then consider the extraordinary high cost needs of one or more individual special education students. Differences in costs attributable to district philosophy, service delivery choice, or accounting practices are not a legitimate basis for safety net awards.

(c) The maximum allowable indirect cost for calculating safety net eligibility may not exceed the federal restricted indirect cost rate for the district plus one percent.

(d) Safety net awards shall be adjusted based on the percent of potential medicaid eligible students billed as calculated by the superintendent in accordance with chapter 318, Laws of 1999.

(e) Safety net awards must be adjusted for any audit findings or exceptions related to special education funding.

(9) The superintendent of public instruction may adopt such rules and procedures as are necessary to administer the special education funding and safety net award process. Prior to revising any standards, procedures, or rules, the superintendent shall consult with the office of financial management and the fiscal committees of the legislature.

(10) The safety net oversight committee appointed by the superintendent of public instruction shall consist of:

(a) One staff from the office of superintendent of public instruction;

(b) Staff of the office of the state auditor; and

(c) One or more representatives from school districts or educational service districts knowledgeable of special education programs and funding.

(11) A maximum of \$678,000 may be expended from the general fund--state appropriations to fund 5.43 full-time equivalent teachers and 2.1 full-time equivalent aides at children's orthopedic hospital and medical center. This amount is in lieu of money provided through the home and hospital allocation and the special education program.

(12) \$1,000,000 of the general fund--federal appropriation is provided for projects to provide special education students with appropriate job and independent living skills, including work experience where possible, to facilitate their successful transition out of the public school system. The funds provided by this subsection shall be from federal discretionary grants.

(13) The superintendent shall maintain the percentage of federal flow-through to school districts at 85 percent. In addition to other purposes, school districts may use increased federal funds for high-cost students, for purchasing regional special education services from educational service districts, and for staff development activities particularly relating to inclusion issues.

(14) A maximum of \$1,200,000 of the general fund--federal appropriation may be expended by the superintendent for projects related to use of inclusion strategies by school districts for provision of special education services. The superintendent shall prepare an information database on laws, best practices, examples of programs, and recommended resources. The information may be disseminated in a variety of ways, including workshops and other staff development activities.

(15) A school district may carry over from one year to the next year up to 10 percent of general fund--state funds allocated under this program; however, carry over funds shall be expended in the special education program.

**NEW SECTION. Sec. 902. INFORMATION SYSTEMS PROJECTS.**  
**INFORMATION SYSTEMS PROJECTS**

Agencies shall comply with the following requirements regarding information systems projects when specifically directed to do so by this act.

(1) Agency planning and decisions concerning information technology shall be made in the context of its information technology portfolio. "Information technology portfolio" means a strategic management approach in which the relationships between agency missions and information technology investments can be seen and understood, such that: Technology efforts are linked to agency objectives and business plans; the impact of new investments on existing infrastructure and business functions are assessed and understood before implementation; and agency activities are consistent with the development of an integrated, nonduplicative statewide infrastructure.

(2) Agencies shall use their information technology portfolios in making decisions on matters related to the following:

- (a) System refurbishment, acquisitions, and development efforts;
- (b) Setting goals and objectives for using information technology in meeting legislatively-mandated missions and business needs;
- (c) Assessment of overall information processing performance, resources, and capabilities;
- (d) Ensuring appropriate transfer of technological expertise for the operation of any new systems developed using external resources; and

(e) Progress toward enabling electronic access to public information.

(3) Each project will be planned and designed to take optimal advantage of Internet technologies and protocols. Agencies shall ensure that the project is in compliance with the architecture, infrastructure, principles, policies, and standards of digital government as maintained by the information services board.

(4) The agency shall produce a feasibility study for information technology projects at the direction of the information services board and in accordance with published department of information services policies and guidelines. At a minimum, such studies shall include a statement of: (a) The purpose or impetus for change; (b) the business value to the agency, including an examination and evaluation of benefits, advantages, and cost; (c) a comprehensive risk assessment based on the proposed project's impact on both citizens and state operations, its visibility, and the consequences of doing nothing; (d) the impact on agency and statewide information infrastructure; and (e) the impact of the proposed enhancements to an agency's information technology capabilities on meeting service delivery demands.

(5) The agency shall produce a comprehensive management plan for each project. The plan or plans shall address all factors critical to successful completion of each project. The plan(s) shall include, but is not limited to, the following elements: A description of the problem or opportunity that the information technology project is intended to address; a statement of project objectives and assumptions; a definition and schedule of phases, tasks, and activities to be accomplished; and the estimated cost of each phase. The planning for the phased approach shall be such that the business case justification for a project needs to demonstrate how the project recovers cost or adds measurable value or positive cost benefit to the agency's business functions within each development cycle.

(6) The agency shall produce quality assurance plans for information technology projects. Consistent with the direction of the information services board and the published policies and guidelines of the department of information services, the quality assurance plan shall address all factors critical to successful completion of the project and successful integration with the agency and state information technology infrastructure. At a minimum, quality assurance plans shall provide time and budget benchmarks against which project progress can be measured, a specification of quality assurance responsibilities, and a statement of reporting requirements. The quality assurance plans shall set out the functionality requirements for each phase of a project.

(7) A copy of each feasibility study, project management plan, and quality assurance plan shall be provided to the department of information services, the office of financial management, and legislative fiscal committees. The plans and studies shall demonstrate a sound business case that justifies the investment of taxpayer funds on any new project, an assessment of the impact of the proposed system on the existing information technology infrastructure, the disciplined use of preventative measures to mitigate risk, and the leveraging of private-sector expertise as needed. Authority to expend any funds for individual information systems projects is conditioned on the approval of the relevant feasibility study, project management plan, and quality assurance plan by the department of information services and the office of financial management.

(8) Quality assurance status reports shall be submitted to the department of information services, the office of financial management, and legislative fiscal committees at intervals specified in the project's quality assurance plan.

Into this account shall be placed a portion of all motor vehicle excise tax receipts as provided in RCW 82.44.110. Funds in this account shall be allocated by the state treasurer according to the following procedure:

(1) Prior to April 1st of each year the director of revenue shall inform the state treasurer of the total and the per capita levels of revenues for the unincorporated area of each county and the statewide weighted average per capita level of revenues for the unincorporated areas of all counties imposing the sales and use tax authorized under RCW 82.14.030(1) for the previous calendar year.

(2) At such times as distributions are made under RCW 82.44.150, the state treasurer shall apportion to each county imposing the sales and use tax under RCW 82.14.030(1) at the maximum rate and receiving less than one hundred fifty thousand dollars from the tax for the previous calendar year, an amount from the county sales and use tax equalization account sufficient, when added to the amount of revenues received the previous calendar year by the county, to equal one hundred fifty thousand dollars.

The department of revenue shall establish a governmental price index as provided in this subsection. The base year for the index shall be the end of the third quarter of 1982. Prior to November 1, 1983, and prior to each November 1st thereafter, the department of revenue shall establish another index figure for the third quarter of that year. The department of revenue may use the implicit price deflators for state and local government purchases of goods and services calculated by the United States department of commerce to establish the governmental price index. Beginning on January 1, 1984, and each January 1st thereafter, the one hundred fifty thousand dollar base figure in this subsection shall be adjusted in direct proportion to the percentage change in the governmental price index from 1982 until the year before the adjustment. Distributions made under this subsection for 1984 and thereafter shall use this adjusted base amount figure.

(3) Subsequent to the distributions under subsection (2) of this section and at such times as distributions are made under RCW 82.44.150, the state treasurer shall apportion to each county imposing the sales and use tax under RCW 82.14.030(1) at the maximum rate and receiving less than seventy percent of the statewide weighted average per capita level of revenues for the unincorporated areas of all counties as determined by the department of revenue under subsection (1) of this section, an amount from the county sales and use tax equalization account

sufficient, when added to the per capita level of revenues for the unincorporated area received the previous calendar year by the county, to equal seventy percent of the statewide weighted average per capita level of revenues for the unincorporated areas of all counties determined under subsection (1) of this section, subject to reduction under subsections (6) and (7) of this section. When computing distributions under this section, any distribution under subsection (2) of this section shall be considered revenues received from the tax imposed under RCW 82.14.030(1) for the previous calendar year.

(4) Subsequent to the distributions under subsection (3) of this section and at such times as distributions are made under RCW 82.44.150, the state treasurer shall apportion to each county imposing the sales and use tax under RCW 82.14.030(2) at the maximum rate and receiving a distribution under subsection (2) of this section, a third distribution from the county sales and use tax equalization account. The distribution to each qualifying county shall be equal to the distribution to the county under subsection (2) of this section, subject to the reduction under subsections (6) and (7) of this section. To qualify for the total distribution under this subsection, the county must impose the tax under RCW 82.14.030(2) for the entire calendar year. Counties imposing the tax for less than the full year shall qualify for prorated allocations under this subsection proportionate to the number of months of the year during which the tax is imposed.

(5) Subsequent to the distributions under subsection (4) of this section and at such times as distributions are made under RCW 82.44.150, the state treasurer shall apportion to each county imposing the sales and use tax under RCW 82.14.030(2) at the maximum rate and receiving a distribution under subsection (3) of this section, a fourth distribution from the county sales and use tax equalization account. The distribution to each qualifying county shall be equal to the distribution to the county under subsection (3) of this section, subject to the reduction under subsections (6) and (7) of this section. To qualify for the distributions under this subsection, the county must impose the tax under RCW 82.14.030(2) for the entire calendar year. Counties imposing the tax for less than the full year shall qualify for prorated allocations under this subsection proportionate to the number of months of the year during which the tax is imposed.

(6) Revenues distributed under subsections (2) through (5) of this section in any calendar year shall not exceed an amount equal to seventy percent of the statewide weighted average per capita level of revenues for the unincorporated areas of all counties during the previous calendar year. If distributions under subsections (3) through (5) of this section cannot be made because of this limitation, then distributions under subsections (3) through (5) of this section shall be reduced ratably among the qualifying counties.

(7) If inadequate revenues exist in the county sales and use tax equalization account to make the distributions under subsections (3) through (5) of this section, then the distributions under subsections (3) through (5) of this section shall be reduced ratably among the qualifying counties. At such time during the year as additional funds accrue to the county sales and use tax equalization account, additional distributions shall be made under subsections (3) through (5) of this section to the counties.

(8) If the level of revenues in the county sales and use tax equalization account exceeds the amount necessary to make the distributions under subsections (2) through (5) of this section, at such times as distributions are made under RCW 82.44.150, the state treasurer shall apportion an amount to the county public health account created in RCW 70.05.125 equal to the adjustment under RCW 70.05.125(2)(b).

(9) If the level of revenues in the county sales and use tax equalization account exceeds the amount necessary to make the distributions under subsections (2) through (5) and (8) of this section, then the additional revenues shall be credited and transferred as follows:

(a) Fifty percent to the public facilities construction loan revolving account under RCW 43.160.080; and  
(b) Fifty percent to the distressed county public facilities construction loan account under RCW 43.160.220, or so much thereof as will not cause the balance in the account to exceed twenty-five million dollars. Any remaining funds shall be deposited into the public facilities construction loan revolving account.

(10) During the 2003-2005 fiscal biennium, the legislature may transfer from the county sales and use tax equalization account to the state general fund such amounts as reflect the excess fund balance of the account.

**Sec. 942.** RCW 82.14.210 and 1996 c 64 s 1 are each amended to read as follows:

There is created in the state treasury a special account to be known as the "municipal sales and use tax equalization account." Into this account shall be placed such revenues as are provided under RCW 82.44.110(1)(e). Funds in this account shall be allocated by the state treasurer according to the following procedure:

(1) Prior to January 1st of each year the department of revenue shall determine the total and the per capita levels of revenues for each city and the statewide weighted average per capita level of revenues for all cities imposing the sales and use tax authorized under RCW 82.14.030(1) for the previous calendar year.

(2) At such times as distributions are made under RCW 82.44.150, the state treasurer shall apportion to each city not imposing the sales and use tax under RCW 82.14.030(2) an amount from the municipal sales and use tax equalization account equal to the amount distributed to the city under RCW 82.44.155, multiplied by forty-five fifty-fifths.

(3) Subsequent to the distributions under subsection (2) of this section, and at such times as distributions are made under RCW 82.44.150, the state treasurer shall apportion to each city imposing the sales and use tax under RCW 82.14.030(1) at the maximum rate and receiving less than seventy percent of the statewide weighted

average per capita level of revenues for all cities as determined by the department of revenue under subsection (1) of this section, an amount from the municipal sales and use tax equalization account sufficient, when added to the per capita level of revenues received the previous calendar year by the city, to equal seventy percent of the statewide weighted average per capita level of revenues for all cities determined under subsection (1) of this section, subject to reduction under subsection (6) of this section.

(4) Subsequent to the distributions under subsection (3) of this section, and at such times as distributions are made under RCW 82.44.150, the state treasurer shall apportion to each city imposing the sales and use tax under RCW 82.14.030(2) at the maximum rate and receiving a distribution under subsection (3) of this section, a third distribution from the municipal sales and use tax equalization account. The distribution to each qualifying city shall be equal to the distribution to the city under subsection (3) of this section, subject to the reduction under subsection (6) of this section. To qualify for the distributions under this subsection, the city must impose the tax under RCW 82.14.030(2) for the entire calendar year. Cities imposing the tax for less than the full year shall qualify for prorated allocations under this subsection proportionate to the number of months of the year during which the tax is imposed.

(5) For a city with an official incorporation date after January 1, 1990, municipal sales and use tax equalization distributions shall be made according to the procedures in this subsection. Municipal sales and use tax equalization distributions to eligible new cities shall be made at the same time as distributions are made under subsections (3) and (4) of this section. The department of revenue shall follow the estimating procedures outlined in this subsection until the new city has received a full year's worth of revenues under RCW 82.14.030(1) as of the January municipal sales and use tax equalization distribution.

(a) Whether a newly incorporated city determined to receive funds under this subsection receives its first equalization payment at the January, April, July, or October municipal sales and use tax equalization distribution shall depend on the date the city first imposes the tax authorized under RCW 82.14.030(1).

(i) A newly incorporated city imposing the tax authorized under RCW 82.14.030(1) effective as of January 1st shall be eligible to receive funds under this subsection beginning with the April municipal sales and use tax equalization distribution of that year.

(ii) A newly incorporated city imposing the tax authorized under RCW 82.14.030(1) effective as of February 1st, March 1st, or April 1st shall be eligible to receive funds under this subsection beginning with the July municipal sales and use tax equalization distribution of that year.

(iii) A newly incorporated city imposing the tax authorized under RCW 82.14.030(1) effective as of May 1st, June 1st, or July 1st shall be eligible to receive funds under this subsection beginning with the October municipal sales and use tax equalization distribution of that year.

(iv) A newly incorporated city imposing the tax authorized under RCW 82.14.030(1) effective as of August 1st, September 1st, or October 1st shall be eligible to receive funds under this subsection beginning with the January municipal sales and use tax equalization distribution of the next year.

(v) A newly incorporated city imposing the tax authorized under RCW 82.14.030(1) effective as of November 1st or December 1st shall be eligible to receive funds under this subsection beginning with the April municipal sales and use tax equalization distribution of the next year.

(b) For purposes of calculating the amount of funds the new city should receive under this subsection, the department of revenue shall:

(i) Estimate the per capita amount of revenues from the tax authorized under RCW 82.14.030(1) that the new city would have received had the city received revenues from the tax the entire calendar year;

(ii) Calculate the amount provided under subsection (3) of this section based on the per capita revenues determined under (b)(i) of this subsection;

(iii) Prorate the amount determined under (b)(ii) of this subsection by the number of months the tax authorized under RCW 82.14.030(1) is imposed.

(c) A new city imposing the tax under RCW 82.14.030(2) at the maximum rate and receiving a distribution calculated under (b) of this subsection shall receive another distribution from the municipal sales and use tax equalization account. This distribution shall be equal to the calculation made under (b)(ii) of this subsection, prorated by the number of months the city imposes the tax authorized under RCW 82.14.030(2) at the full rate.

(d) The department of revenue shall advise the state treasurer of the amounts calculated under (b) and (c) of this subsection and the state treasurer shall distribute these amounts to the new city from the municipal sales and use tax equalization account subject to the limitations imposed in subsection (6) of this section.

(e) Revenues estimated under this subsection shall not affect the calculation of the statewide weighted average per capita level of revenues for all cities made under subsection (1) of this section.

(6) If inadequate revenues exist in the municipal sales and use tax equalization account to make the distributions under subsection (3), (4), or (5) of this section, then the distributions under subsections (3), (4), and (5) of this section shall be reduced ratably among the qualifying cities. At such time during the year as additional funds accrue to the municipal sales and use tax equalization account, additional distributions shall be made under subsections (3), (4), and (5) of this section to the cities.

(7) If the level of revenues in the municipal sales and use tax equalization account exceeds the amount necessary to make the distributions under subsections (2) through (5) of this section, then the additional revenues

shall be apportioned among the several cities within the state ratably on the basis of population as last determined by the office of financial management: PROVIDED, That no such distribution shall be made to those cities receiving a distribution under subsection (2) of this section.

(8) During the 2003-2005 fiscal biennium, the legislature may transfer from the municipal sales and use tax equalization account to the state general fund such amounts as reflect the excess fund balance in the account.

**Sec. 943.** RCW 86.26.007 and 1997 c 149 s 914 are each amended to read as follows:

The flood control assistance account is hereby established in the state treasury. At the beginning of the 1997-99 fiscal biennium and each biennium thereafter the state treasurer shall transfer four million dollars from the general fund to the flood control assistance account. Moneys in the flood control assistance account may be spent only after appropriation for purposes specified under this chapter (~~or, during the 1997-99 fiscal biennium, for transfer to the disaster response account~~). During the 2003-2005 fiscal biennium, the legislature may transfer from the flood control assistance account to the state general fund such amounts as reflect the excess fund balance of the account.

### SECOND READING

**ENGROSSED SECOND SUBSTITUTE HOUSE BILL NO. 1336, By House Committee on Appropriations (originally sponsored by Representatives Linville, Kirby, Grant, Rockefeller, Quall, Hunt, Shabro, Jarrett, Delvin, Morris and Conway; by request of Governor Locke)**

#### **Concerning watershed planning.**

Representative Linville moved the adoption of the following amendment (579):

Strike everything after the enacting clause and insert the following:

"NEW SECTION. **Sec. 1.** The legislature declares and reaffirms that a core principle embodied in chapter 90.82 RCW is that state agencies must work cooperatively with local citizens in a process of planning for future uses of water by giving local citizens and the governments closest to them the ability to determine the management of water in the WRIA or WRIs being planned.

The legislature further finds that this process of local planning must have all the tools necessary to accomplish this task and that it is essential for the legislature to provide a clear statutory process for implementation so that the locally developed plan will be the adopted and implemented plan to the greatest extent possible.

**Sec. 2.** RCW 90.82.040 and 2001 c 237 s 2 are each amended to read as follows:

(1) Once a WRIA planning unit has been initiated under RCW 90.82.060 and a lead agency has been designated, it shall notify the department and may apply to the department for funding assistance for conducting the planning and implementation. Funds shall be provided from and to the extent of appropriations made by the legislature to the department expressly for this purpose.

(2)(a) Each planning unit that has complied with subsection (1) of this section is eligible to receive watershed planning grants in the following amounts for the first three phases of watershed planning and phase four watershed plan implementation:

(i) Initiating governments may apply for an initial organizing grant of up to fifty thousand dollars for a single WRIA or up to seventy-five thousand dollars for a multi-WRIA management area in accordance with RCW 90.82.060(4);

(ii)(A) A planning unit may apply for up to two hundred thousand dollars for each WRIA in the management area for conducting watershed assessments in accordance with RCW 90.82.070, except that a planning unit that chooses to conduct a detailed assessment or studies under (a)(ii)(B) of this subsection or whose initiating governments choose or have chosen to include an instream flow or water quality component in accordance with RCW 90.82.080 or 90.82.090 may apply for up to one hundred thousand additional dollars for each instream flow and up to one hundred thousand additional dollars for each water quality component included for each WRIA to conduct an assessment on that optional component and for each WRIA in which the assessments or studies under (a)(ii)(B) of this subsection are conducted.

(B) A planning unit may elect to apply for up to one hundred thousand additional dollars to conduct a detailed assessment of multipurpose water storage opportunities or for studies of specific multipurpose storage projects which opportunities or projects are consistent with and support the other elements of the planning unit's watershed plan developed under this chapter; and

(iii) A planning unit may apply for up to two hundred fifty thousand dollars for each WRIA in the management area for developing a watershed plan and making recommendations for actions by local, state, and federal agencies, tribes, private property owners, private organizations, and individual citizens, including a recommended list of strategies and projects that would further the purpose of the plan in accordance with RCW 90.82.060 through 90.82.100.

(b) A planning unit may request a different amount for phase two or phase three of watershed planning than is specified in (a) of this subsection, provided that the total amount of funds awarded do not exceed the maximum amount the planning unit is eligible for under (a) of this subsection. The department shall approve such an alternative allocation of funds if the planning unit identifies how the proposed alternative will meet the goals of this chapter and provides a proposed timeline for the completion of planning. However, the up to one hundred thousand additional dollars in funding for instream flow and water quality components and for water storage assessments or studies that a planning unit may apply for under (a)(ii)(A) of this subsection may be used only for those instream flow, water quality, and water storage purposes.

(c) By December 1, 2001, or within one year of initiating phase one of watershed planning, whichever occurs later, the initiating governments for each planning unit must inform the department whether they intend to have the planning unit establish or amend instream flows as part of its planning process. If they elect to have the planning unit establish or amend instream flows, the planning unit is eligible to receive one hundred thousand dollars for that purpose in accordance with (a)(ii) of this subsection. If the initiating governments for a planning unit elect not to establish or amend instream flows as part of the unit's planning process, the department shall retain one hundred thousand dollars to carry out an assessment to support establishment of instream flows and to establish such flows in accordance with RCW 90.54.020(3)(a) and chapter 90.22 RCW. The department shall not use these funds to amend an existing instream flow unless requested to do so by the initiating governments for a planning unit.

(d) In administering funds appropriated for supplemental funding for optional plan components under (a)(ii) of this subsection, the department shall give priority in granting the available funds to proposals for setting or amending instream flows.

(e) A planning unit may apply for a matching grant for phase four watershed plan implementation following approval under the provisions of RCW 90.82.130. A match of ten percent is required and may include financial contributions or in-kind goods and services directly related to coordination and oversight functions. The match can be provided by the planning unit or by the combined commitments from federal agencies, tribal governments, local governments, special districts, or other local organizations. The phase four grant may be up to one hundred thousand dollars for each planning unit for each of the first three years of implementation. At the end of the three-year period, a two-year extension may be available for up to fifty thousand dollars each year. For planning units that cover more than one WRIA, additional matching funds of up to twenty-five thousand dollars may be available for each additional WRIA per year for the first three years of implementation, and up to twelve thousand five hundred dollars per WRIA per year for each of the fourth and fifth years.

(3)(a) The department shall use the eligibility criteria in this subsection (3) instead of rules, policies, or guidelines when evaluating grant applications at each stage of the grants program.

(b) In reviewing grant applications under this subsection (3), the department shall evaluate whether:

(i) The planning unit meets all of the requirements of this chapter;

- (ii) The application demonstrates a need for state planning funds to accomplish the objectives of the planning process; and
- (iii) The application and supporting information evidences a readiness to proceed.
- (c) In ranking grant applications submitted at each stage of the grants program, the department shall give preference to applications in the following order of priority:
  - (i) Applications from existing planning groups that have been in existence for at least one year;
  - (ii) Applications that address protection and enhancement of fish habitat in watersheds that have aquatic fish species listed or proposed to be listed as endangered or threatened under the federal endangered species act, 16 U.S.C. Sec. 1531 et seq. and for which there is evidence of an inability to supply adequate water for population and economic growth from:
    - (A) First, multi-WRIA planning; and
    - (B) Second, single WRIA planning;
  - (iii) Applications that address protection and enhancement of fish habitat in watersheds or for which there is evidence of an inability to supply adequate water for population and economic growth from:
    - (A) First, multi-WRIA planning; and
    - (B) Second, single WRIA planning.
  - (d) Except for phase four watershed plan implementation, the department may not impose any local matching fund requirement as a condition for grant eligibility or as a preference for receiving a grant.
- (4) The department may retain up to one percent of funds allocated under this section to defray administrative costs.
- (5) Planning under this chapter should be completed as expeditiously as possible, with the focus being on local stakeholders cooperating to meet local needs.
- (6) Funding provided under this section shall be considered a contractual obligation against the moneys appropriated for this purpose.

**NEW SECTION. Sec. 3.** A new section is added to chapter 90.82 RCW to read as follows:

- (1) Within one year of accepting funding under RCW 90.82.040(2)(e), the planning unit must complete a detailed implementation plan. Submittal of a detailed implementation plan to the department is a condition of receiving grants for the second and all subsequent years of the phase four grant.
- (2) Each implementation plan must contain strategies to provide sufficient water for: (a) Production agriculture; (b) commercial, industrial, and residential use; and (c) instream flows. Each implementation plan must contain timelines to achieve these strategies and interim milestones to measure progress.
- (3) The implementation plan must clearly define coordination and oversight responsibilities; any needed interlocal agreements, rules, or ordinances; any needed state or local administrative approvals and permits that must be secured; and specific funding mechanisms.
- (4) In developing the implementation plan, the planning unit must consult with other entities planning in the watershed management area and identify and seek to eliminate any activities or policies that are duplicative or inconsistent.
- (5) By December 1, 2003, and by December 1st of each subsequent year, the director of the department shall report to the appropriate legislative standing committees regarding statutory changes necessary to enable state agency approval or permit decision making needed to implement a plan approved under this chapter.

**Sec. 4.** RCW 90.82.080 and 1998 c 247 s 4 are each amended to read as follows:

- (1)(a) If the initiating governments choose, by majority vote, to include an instream flow component, it shall be accomplished in the following manner:
  - (i) If minimum instream flows have already been adopted by rule for a stream within the management area, unless the members of the local governments and tribes on the planning unit by a recorded unanimous vote request the department to modify those flows, the minimum instream flows shall not be modified under this chapter. If the members of local governments and tribes request the planning unit to modify instream flows and unanimous approval of the decision to modify such flow is not achieved, then the instream flows shall not be modified under this section;
  - (ii) If minimum stream flows have not been adopted by rule for a stream within the management area, setting the minimum instream flows shall be a collaborative effort between the department and members of the planning unit. The department must attempt to achieve consensus and approval among the members of the planning unit regarding the minimum flows to be adopted by the department. Approval is achieved if all government members and tribes that have been invited and accepted on the planning unit present for a recorded vote unanimously vote to support the proposed minimum instream flows, and all nongovernmental members of the planning unit present for the recorded vote, by a majority, vote to support the proposed minimum instream flows.
- (b) The department shall undertake rule making to adopt flows under (a) of this subsection. The department may adopt the rules either by the regular rules adoption process provided in chapter 34.05 RCW, the expedited rules adoption process as set forth in RCW (~~34.05.230~~) 34.05.353, or through a rules adoption process that uses public hearings and notice provided by the county legislative authority to the greatest extent

possible. Such rules do not constitute significant legislative rules as defined in RCW 34.05.328, and do not require the preparation of small business economic impact statements.

(c) If approval is not achieved within four years of the date the planning unit first receives funds from the department for conducting watershed assessments under RCW 90.82.040, the department may promptly initiate rule making under chapter 34.05 RCW to establish flows for those streams and shall have two additional years to establish the instream flows for those streams for which approval is not achieved.

(2)(a) Notwithstanding RCW 90.03.345, minimum instream flows set under this section for rivers or streams that do not have existing minimum instream flow levels set by rule of the department shall have a priority date of two years after funding is first received from the department under RCW 90.82.040, unless determined otherwise by a unanimous vote of the members of the planning unit but in no instance may it be later than the effective date of the rule adopting such flow.

(b) Any increase to an existing minimum instream flow set by rule of the department shall have a priority date of two years after funding is first received for planning in the WRIA or multi-WRIA area from the department under RCW 90.82.040 and the priority date of the portion of the minimum instream flow previously established by rule shall retain its priority date as established under RCW 90.03.345.

(c) Any existing minimum instream flow set by rule of the department that is reduced shall retain its original date of priority as established by RCW 90.03.345 for the revised amount of the minimum instream flow level.

(3) Before setting minimum instream flows under this section, the department shall engage in government-to-government consultation with affected tribes in the management area regarding the setting of such flows.

(4) Nothing in this chapter either: (a) Affects the department's authority to establish flow requirements or other conditions under RCW 90.48.260 or the federal clean water act (33 U.S.C. Sec. 1251 et seq.) for the licensing or relicensing of a hydroelectric power project under the federal power act (16 U.S.C. Sec. 791 et seq.); or (b) affects or impairs existing instream flow requirements and other conditions in a current license for a hydroelectric power project licensed under the federal power act.

(5) If the planning unit is unable to obtain unanimity under subsection (1) of this section, the department may adopt rules setting such flows.

(6) The department shall report annually to the appropriate legislative standing committees on the progress of instream flows being set under this chapter, as well as progress toward setting instream flows in those watersheds not being planned under this chapter. The report shall be made by December 1, 2003, and by December 1st of each subsequent year.

**Sec. 5.** RCW 90.82.130 and 2001 c 237 s 4 are each amended to read as follows:

(1)(a) Upon completing its proposed watershed plan, the planning unit may approve the proposal by consensus of all of the members of the planning unit or by consensus among the members of the planning unit appointed to represent units of government and a majority vote of the nongovernmental members of the planning unit.

(b) If the proposal is approved by the planning unit, the unit shall submit the proposal to the counties with territory within the management area. If the planning unit has received funding beyond the initial organizing grant under RCW 90.82.040, such a proposal approved by the planning unit shall be submitted to the counties within four years of the date that funds beyond the initial funding are first drawn upon by the planning unit.

(c) If the watershed plan is not approved by the planning unit, the planning unit may submit the components of the plan for which agreement is achieved using the procedure under (a) of this subsection, or the planning unit may terminate the planning process.

(2)(a) With the exception of a county legislative authority that chooses to opt out of watershed planning as provided in (c) of this subsection, the legislative authority of each of the counties with territory in the management area shall provide public notice of and conduct at least one public hearing on the proposed watershed plan submitted under this section. After the public hearings, the legislative authorities of these counties shall convene in joint session to consider the proposal. The counties may approve or reject the proposed watershed plan for the management area, but may not amend it. Approval of such a proposal shall be made by a majority vote of the members of each of the counties with territory in the management area.

(b) If a proposed watershed plan is not approved, it shall be returned to the planning unit with recommendations for revisions. Approval of such a revised proposal by the planning unit and the counties shall be made in the same manner provided for the original watershed plan. If approval of the revised plan is not achieved, the process shall terminate.

(c) A county legislative authority may choose to opt out of watershed planning under this chapter and the public hearing processes under (a) and (b) of this subsection if the county's affected territory within a particular management area is: (i) Less than five percent of the total territory within the management area; or (ii) five percent or more of the total territory within the management area and all other initiating governments within the management area consent. A county meeting these conditions and choosing to opt out shall notify the department and the other initiating governments of that choice prior to commencement of plan adoption under the provisions of (a) of this subsection. A county choosing to opt out under the provisions of this section shall not be bound by

obligations contained in the watershed plan adopted for that management area under this chapter. Even if a county chooses to opt out under the provisions of this section, the other counties within a management area may adopt a proposed watershed plan as provided in this chapter.

(3) The planning unit shall not add an element to its watershed plan that creates an obligation unless each of the governments to be obligated has at least one representative on the planning unit and the respective members appointed to represent those governments agree to adding the element that creates the obligation. A member's agreeing to add an element shall be evidenced by a recorded vote of all members of the planning unit in which the members record support for adding the element. If the watershed plan is approved under subsections (1) and (2) of this section and the plan creates obligations: (a) For agencies of state government, the agencies shall adopt by rule the obligations of both state and county governments and rules implementing the state obligations, or, with the consent of the planning unit, may adopt policies, procedures, or agreements related to the obligations or implementation of the obligations in addition to or in lieu of rules. The obligations on state agencies are binding upon adoption of the obligations (~~into rule~~), and the agencies shall take other actions to fulfill their obligations as soon as possible, and should annually review implementation needs with respect to budget and staffing; (~~or~~) (b) for counties, the obligations are binding on the counties and the counties shall adopt any necessary implementing ordinances and take other actions to fulfill their obligations as soon as possible, and should annually review implementation needs with respect to budget and staffing; or (c) for an organization voluntarily accepting an obligation, the organization must adopt policies, procedures, agreements, rules, or ordinances to implement the plan, and should annually review implementation needs with respect to budget and staffing.

(4) After a plan is adopted in accordance with subsection (3) of this section, and if the department participated in the planning process, the plan shall be deemed to satisfy the watershed planning authority of the department with respect to the components included under the provisions of RCW 90.82.070 through 90.82.100 for the watershed or watersheds included in the plan. The department shall use the plan as the framework for making future water resource decisions for the planned watershed or watersheds. Additionally, the department shall rely upon the plan as a primary consideration in determining the public interest related to such decisions.

(5) Once a WRIA plan has been approved under subsection (2) of this section for a watershed, the department may develop and adopt modifications to the plan or obligations imposed by the plan only through a form of negotiated rule making that uses the same processes that applied in that watershed for developing the plan.

(6) As used in this section, "obligation" means any action required as a result of this chapter that imposes upon a tribal government, county government, or state government, either: A fiscal impact; a redeployment of resources; or a change of existing policy."

On page 1, line 1 of the title, after "planning;" strike the remainder of the title and insert "amending RCW 90.82.040, 90.82.080, and 90.82.130; adding a new section to chapter 90.82 RCW; and creating a new section."

**Providing additional certainty for municipal water rights.**

Representative Linville moved the adoption of the following amendment (578):

Strike everything after the enacting clause and insert the following:

"**Sec. 1.** RCW 90.03.015 and 1987 c 109 s 65 are each amended to read as follows:

((As used in this chapter:)) The definitions in this section apply throughout this chapter unless the context clearly requires otherwise.

(1) "Department" means the department of ecology((;)).

(2) "Director" means the director of ecology((; and)).

(3) "Municipal water supplier" means an entity that supplies water for municipal water supply purposes.

(4) "Municipal water supply purposes" means a beneficial use of water: (a) For residential purposes through fifteen or more residential service connections or for providing residential use of water for a nonresidential population that is, on average, at least twenty-five people for at least sixty days a year; (b) for

governmental or governmental proprietary purposes by a city, town, public utility district, county, sewer district, or water district; or (c) indirectly for the purposes in (a) or (b) of this subsection through the delivery of treated or raw water to a public water system for such use. If water is beneficially used under a water right for the purposes listed in (a), (b), or (c) of this subsection, any other beneficial use of water under the right generally associated with the use of water within a municipality is also for "municipal water supply purposes," including, but not limited to, beneficial use for commercial, industrial, irrigation of parks and open spaces, institutional, landscaping, fire flow, water system maintenance and repair, or related purposes. If a governmental entity holds a water right that is for the purposes listed in (a), (b), or (c) of this subsection, its use of water or its delivery of water for any other beneficial use generally associated with the use of water within a municipality is also for "municipal water supply purposes," including, but not limited to, beneficial use for commercial, industrial, irrigation of parks and open spaces, institutional, landscaping, fire flow, water system maintenance and repair, or related purposes.

(5) "Person" means any firm, association, water users' association, corporation, irrigation district, or municipal corporation, as well as an individual.

**NEW SECTION. Sec. 2.** A new section is added to chapter 90.03 RCW to read as follows:  
Beneficial uses of water under a municipal water supply purposes water right may include water withdrawn or diverted under such a right and used for:

- (1) Uses that benefit fish and wildlife, water quality, or other instream resources or related habitat values; or
- (2) Uses that are needed to implement environmental obligations called for by a watershed plan approved under chapter 90.82 RCW, or a comprehensive watershed plan adopted under RCW 90.54.040(1) after the effective date of this section, a federally approved habitat conservation plan prepared in response to the listing of a species as being endangered or threatened under the federal endangered species act, 16 U.S.C. Sec. 1531 et seq., a hydropower license of the federal energy regulatory commission, or a comprehensive irrigation district management plan.

**NEW SECTION. Sec. 3.** A new section is added to chapter 90.03 RCW to read as follows:

When requested by a municipal water supplier or when processing a change or amendment to the right, the department shall amend the water right documents and related records to ensure that water rights that are for municipal water supply purposes, as defined in RCW 90.03.015, are correctly identified as being for municipal water supply purposes. This section authorizes a water right or portion of a water right held or acquired by a municipal water supplier that is for municipal water supply purposes as defined in RCW 90.03.015 to be identified as being a water right for municipal water supply purposes. However, it does not authorize any other water right or other portion of a right held or acquired by a municipal water supplier to be so identified without the approval of a change or transfer of the right or portion of the right for such a purpose.

**Sec. 4.** RCW 90.03.260 and 1987 c 109 s 84 are each amended to read as follows:

(1) Each application for permit to appropriate water shall set forth the name and post office address of the applicant, the source of water supply, the nature and amount of the proposed use, the time during which water will be required each year, the location and description of the proposed ditch, canal, or other work, the time within which the completion of the construction and the time for the complete application of the water to the proposed use.

(2) If for agricultural purposes, ((#)) the application shall give the legal subdivision of the land and the acreage to be irrigated, as near as may be, and the amount of water expressed in acre feet to be supplied per season. If for power purposes, it shall give the nature of the works by means of which the power is to be developed, the head and amount of water to be utilized, and the uses to which the power is to be applied.

(3) If for construction of a reservoir, ((#)) the application shall give the height of the dam, the capacity of the reservoir, and the uses to be made of the impounded waters.

(4) If for community or multiple domestic water supply, the application shall give the projected number of service connections sought to be served. However, for a municipal water supplier that has an approved water system plan under chapter 43.20 RCW or an approval from the department of health to serve a specified number of service connections, the service connection figure in the application or any subsequent water right document is not an attribute limiting exercise of the water right as long as the number of service connections to be served under the right is consistent with the approved water system plan or specified number.

(5) If for municipal water supply, ((#)) the application shall give the present population to be served, and, as near as may be estimated, the future requirement of the municipality. However, for a municipal water supplier that has an approved water system plan under chapter 43.20 RCW or an approval from the department of health to serve a specified number of service connections, the population figures in the application or any subsequent water right document are not an attribute limiting exercise of the water right as long as the population to be provided water under the right is consistent with the approved water system plan or specified number.

(6) If for mining purposes, ((#)) the application shall give the nature of the mines to be served and the method of supplying and utilizing the water; also their location by legal subdivisions.

(7) All applications shall be accompanied by such maps and drawings, in duplicate, and such other data, as may be required by the department, and such accompanying data shall be considered as a part of the application.

**Sec. 5.** RCW 90.03.386 and 1991 c 350 s 2 are each amended to read as follows:

(1) Within service areas established pursuant to chapter ~~(§)~~ 43.20 ~~((and))~~ or 70.116 RCW, the department of ecology and the department of health shall coordinate approval procedures to ensure compliance and consistency with the approved water system plan or small water system management program.

(2) The effect of the department of health's approval of a planning or engineering document that describes a municipal water supplier's service area under chapter 43.20 RCW, or the local legislative authority's approval of service area boundaries in accordance with procedures adopted pursuant to chapter 70.116 RCW, is that the place of use of a surface water right or ground water right used by the supplier includes any portion of the approved service area that was not previously within the place of use for the water right if the supplier is in compliance with the terms of the water system plan or small water system management program, including those regarding water conservation, and the alteration of the place of use is not inconsistent, regarding an area added to the place of use, with: Any comprehensive plans or development regulations adopted under chapter 36.70A RCW; any other applicable comprehensive plan, land use plan, or development regulation adopted by a city, town, or county; or any watershed plan approved under chapter 90.82 RCW, or a comprehensive watershed plan adopted under RCW 90.54.040(1) after the effective date of this section, if such a watershed plan has been approved for the area.

(3) A municipal water supplier must implement cost-effective water conservation in accordance with the requirements of section 7 of this act as part of its approved water system plan or small water system management program. In preparing its regular water system plan update, a municipal water supplier with one thousand or more service connections must describe: (a) The projects, technologies, and other cost-effective measures that comprise its water conservation program; (b) improvements in the efficiency of water system use resulting from implementation of its conservation program over the previous six years; and (c) projected effects of delaying the use of existing inchoate rights over the next six years through the addition of further cost-effective water conservation measures before it may divert or withdraw further amounts of its inchoate right for beneficial use. When establishing or extending a surface or ground water right construction schedule under RCW 90.03.320, the department must take into consideration the public water system's use of conserved water.

**Sec. 6.** RCW 90.03.330 and 1987 c 109 s 89 are each amended to read as follows:

(1) Upon a showing satisfactory to the department that any appropriation has been perfected in accordance with the provisions of this chapter, it shall be the duty of the department to issue to the applicant a certificate stating such facts in a form to be prescribed by ~~((him))~~ the director, and such certificate shall thereupon be recorded with the department. Any original water right certificate issued, as provided by this chapter, shall be recorded with the department and thereafter, at the expense of the party receiving the same, be transmitted by the department ~~((transmitted))~~ to the county auditor of the county or counties where the distributing system or any part thereof is located, and be recorded in the office of such county auditor, and thereafter be transmitted to the owner thereof.

(2) Except as provided for the issuance of certificates under RCW 90.03.240 and for the issuance of certificates following the approval of a change, transfer, or amendment under RCW 90.03.380 or 90.44.100, the department shall not revoke or diminish a certificate for a surface or ground water right for municipal water supply purposes as defined in RCW 90.03.015 unless the certificate was issued with ministerial errors or was obtained through misrepresentation. The department may adjust such a certificate under this subsection if ministerial errors are discovered, but only to the extent necessary to correct the ministerial errors. The department may diminish the right represented by such a certificate if the certificate was obtained through a misrepresentation on the part of the applicant or permit holder, but only to the extent of the misrepresentation. The authority provided by this subsection does not include revoking, diminishing, or adjusting a certificate based on any change in policy regarding the issuance of such certificates that has occurred since the certificate was issued. This subsection may not be construed as providing any authority to the department to revoke, diminish, or adjust any other water right.

(3) This subsection applies to the water right represented by a water right certificate issued prior to the effective date of this section for municipal water supply purposes as defined in RCW 90.03.015 where the certificate was issued based on an administrative policy for issuing such certificates once works for diverting or withdrawing and distributing water for municipal supply purposes were constructed rather than after the water had been placed to actual beneficial use. Such a water right is a right in good standing.

(4) After the effective date of this section, the department must issue a new certificate under subsection (1) of this section for a water right represented by a water right permit only for the perfected portion of a water right as demonstrated through actual beneficial use of water.

**NEW SECTION. Sec. 7.** A new section is added to chapter 70.119A RCW to read as follows:

(1) It is the intent of the legislature that the department establish water use efficiency requirements designed to ensure efficient use of water while maintaining water system financial viability, improving affordability of supplies, and enhancing system reliability.

(2) The requirements of this section shall apply to all municipal water suppliers and shall be tailored to be appropriate to system size, forecasted system demand, and system supply characteristics.

(3) For the purposes of this section:

(a) Water use efficiency includes conservation planning requirements, water distribution system leakage standards, and water conservation performance reporting requirements; and

(b) "Municipal water supplier" and "municipal water supply purposes" have the meanings provided by RCW 90.03.015.

(4) To accomplish the purposes of this section, the department shall adopt rules necessary to implement this section by December 31, 2005. The department shall:

(a) Develop conservation planning requirements that ensure municipal water suppliers are: (i) Implementing programs to integrate conservation with water system operation and management; and (ii) identifying how to appropriately fund and implement conservation activities. Requirements shall apply to the conservation element of water system plans and small water system management programs developed pursuant to chapter 43.20 RCW. In establishing the conservation planning requirements the department shall review the current department conservation planning guidelines and include those elements that are appropriate for rule. Conservation planning requirements shall include but not be limited to:

(A) Selection of cost-effective measures to achieve a system's water conservation objectives. Requirements shall allow the municipal water supplier to select and schedule implementation of the best methods for achieving its conservation objectives;

(B) Evaluation of the feasibility of adopting and implementing water delivery rate structures that encourage water conservation;

(C) Evaluation of each system's water distribution system leakage and, if necessary, identification of steps necessary for achieving water distribution system leakage standards developed under (b) of this subsection;

(D) Collection and reporting of water consumption and source production and/or water purchase data. Data collection and reporting requirements shall be sufficient to identify water use patterns among utility customer classes, where applicable, and evaluate the effectiveness of each system's conservation program. Requirements, including reporting frequency, shall be appropriate to system size and complexity. Reports shall be available to the public; and

(E) Establishment of minimum requirements for water demand forecast methodologies such that demand forecasts prepared by municipal water suppliers are sufficient for use in determining reasonably anticipated future water needs;

(b) Develop water distribution system leakage standards to ensure that municipal water suppliers are taking appropriate steps to reduce water system leakage rates or are maintaining their water distribution systems in a condition that results in leakage rates in compliance with the standards. Limits shall be developed in terms of percentage of total water produced and/or purchased and shall not be lower than ten percent. The department may consider alternatives to the percentage of total water supplied where alternatives provide a better evaluation of the water system's leakage performance. The department shall institute a graduated system of requirements based on levels of water system leakage. A municipal water supplier shall select one or more control methods appropriate for addressing leakage in its water system;

(c) Establish minimum requirements for water conservation performance reporting to assure that municipal water suppliers are regularly evaluating and reporting their water conservation performance. The objective of setting conservation goals is to enhance the efficient use of water by the water system customers. Performance reporting shall include:

(i) Requirements that municipal water suppliers adopt and achieve water conservation goals. The elected governing board or governing body of the water system shall set water conservation goals for the system. In setting water conservation goals the water supplier may consider historic conservation performance and conservation investment, customer base demographics, regional climate variations, forecasted demand and system supply characteristics, system financial viability, system reliability, and affordability of water rates. Conservation goals shall be established by the municipal water supplier in an open public forum;

(ii) Requirements that the municipal water supplier adopt schedules for implementing conservation program elements and achieving conservation goals to ensure that progress is being made toward adopted conservation goals;

(iii) A reporting system for regular reviews of conservation performance against adopted goals. Performance reports shall be available to customers and the public. Requirements, including reporting frequency, shall be appropriate to system size and complexity;

(iv) Requirements that any system not meeting its water conservation goals shall develop a plan for modifying its conservation program to achieve its goals along with procedures for reporting performance to the department;

(v) If a municipal water supplier determines that further reductions in consumption are not reasonably achievable, it shall identify how current consumption levels will be maintained;

(d) Adopt rules that, to the maximum extent practical, utilize existing mechanisms and simplified procedures in order to minimize the cost and complexity of implementation and to avoid placing unreasonable financial burden on smaller municipal systems.

(5) The department shall establish an advisory committee to assist the department in developing rules for water use efficiency. The advisory committee shall include representatives from public water system customers, environmental interest groups, business interest groups, a representative cross-section of municipal water suppliers, a water utility conservation professional, tribal governments, the department of ecology, and any other members determined necessary by the department. The department may use the water supply advisory committee created pursuant to RCW 70.119A.160 augmented with additional participants as necessary to comply with this subsection to assist the department in developing rules.

(6) The department shall provide technical assistance upon request to municipal water suppliers and local governments regarding water conservation, which may include development of best management practices for water conservation programs, conservation landscape ordinances, conservation rate structures for public water systems, and general public education programs on water conservation.

(7) To ensure compliance with this section, the department shall establish a compliance process that incorporates a graduated approach employing the full range of compliance mechanisms available to the department.

(8) Prior to completion of rule making required in subsection (4) of this section, municipal water suppliers shall continue to meet the existing conservation requirements of the department and shall continue to implement their current water conservation programs.

**NEW SECTION. Sec. 8.** A new section is added to chapter 43.20 RCW to read as follows:

In approving the water system plan of a public water system, the department shall ensure that water service to be provided by the system under the plan for any new industrial, commercial, or residential use is consistent with the requirements of any comprehensive plans or development regulations adopted under chapter 36.70A RCW or any other applicable comprehensive plan, land use plan, or development regulation adopted by a city, town, or county for the service area. A municipal water supplier, as defined in RCW 90.03.015, has a duty to provide retail water service within its retail service area if: (1) Its service can be available in a timely and reasonable manner; (2) the municipal water supplier has sufficient water rights to provide the service; (3) the municipal water supplier has sufficient capacity to serve the water in a safe and reliable manner as determined by the department of health; and (4) it is consistent with the requirements of any comprehensive plans or development regulations adopted under chapter 36.70A RCW or any other applicable comprehensive plan, land use plan, or development regulation adopted by a city, town, or county for the service area and, for water service by the water utility of a city or town, with the utility service extension ordinances of the city or town.

**NEW SECTION. Sec. 9.** A new section is added to chapter 90.82 RCW to read as follows:

(1) The timelines and interim milestones in a detailed implementation plan required by section 3, chapter . . . (Engrossed Second Substitute House Bill No. 1336), Laws of 2003 must address the planned future use of existing water rights for municipal water supply purposes, as defined in RCW 90.03.015, that are inchoate, including how these rights will be used to meet the projected future needs identified in the watershed plan, and how the use of these rights will be addressed when implementing instream flow strategies identified in the watershed plan.

(2) The watershed planning unit or other authorized lead agency shall ensure that holders of water rights for municipal water supply purposes not currently in use are asked to participate in defining the timelines and interim milestones to be included in the detailed implementation plan.

(3) The department of health shall annually compile a list of water system plans and plan updates to be reviewed by the department during the coming year and shall consult with the departments of community, trade, and economic development, ecology, and fish and wildlife to: (a) Identify watersheds where further coordination is needed between water system planning and local watershed planning under this chapter; and (b) develop a work plan for conducting the necessary coordination.

**NEW SECTION. Sec. 10.** A new section is added to chapter 90.54 RCW to read as follows:

The department shall prioritize the expenditure of funds and other resources for programs related to streamflow restoration in watersheds where the exercise of inchoate water rights may have a larger effect on streamflows and other water uses.

**Sec. 11.** RCW 90.48.495 and 1989 c 348 s 10 are each amended to read as follows:

The department of ecology shall require sewer plans to include a discussion of water conservation measures considered or underway that would reduce flows to the sewerage system and an analysis of their anticipated impact on public sewer service and treatment capacity.

**Sec. 12.** RCW 90.48.112 and 1997 c 444 s 9 are each amended to read as follows:

The evaluation of any plans submitted under RCW 90.48.110 must include consideration of opportunities for the use of reclaimed water as defined in RCW 90.46.010. Wastewater plans submitted under RCW 90.48.110 must include a statement describing how applicable reclamation and reuse elements will be coordinated as required under RCW 90.46.120(2).

**Sec. 13.** RCW 90.46.120 and 1997 c 444 s 1 are each amended to read as follows:

(1) The owner of a wastewater treatment facility that is reclaiming water with a permit issued under this chapter has the exclusive right to any reclaimed water generated by the wastewater treatment facility. Use and distribution of the reclaimed water by the owner of the wastewater treatment facility is exempt from the permit requirements of RCW 90.03.250 and 90.44.060. Revenues derived from the reclaimed water facility shall be used only to offset the cost of operation of the wastewater utility fund or other applicable source of system-wide funding.

(2) If the proposed use or uses of reclaimed water are intended to augment or replace potable water supplies or create the potential for the development of additional potable water supplies, such use or uses shall be considered in the development of the regional water supply plan or plans addressing potable water supply service by multiple water purveyors. The owner of a wastewater treatment facility that proposes to reclaim water shall be included as a participant in the development of such regional water supply plan or plans.

(3) Where opportunities for the use of reclaimed water exist within the period of time addressed by a water supply plan or coordinated water system plan developed under chapter 43.20 or 70.116 RCW, these plans must be developed and coordinated to ensure that opportunities for reclaimed water are evaluated. The requirements of this subsection (3) do not apply to water system plans developed under chapter 43.20 RCW for utilities serving less than one thousand service connections.

**NEW SECTION. Sec. 14.** A new section is added to chapter 90.03 RCW to read as follows:

(1) An unperfected surface water right for municipal water supply purposes or a portion thereof held by a municipal water supplier may be changed or transferred in the same manner as provided by RCW 90.03.380 for any purpose if:

(a) The supplier is in compliance with the terms of an approved water system plan or small water system management program under chapter 43.20 or 70.116 RCW that applies to the supplier, including those regarding water conservation;

(b) Instream flows have been established by rule for the water resource inventory area, as established in chapter 173-500 WAC as it exists on the effective date of this section, that is the source of the water for the transfer or change;

(c) A watershed plan has been approved for the water resource inventory area referred to in (b) of this subsection under chapter 90.82 RCW and a detailed implementation plan has been completed that satisfies the requirements of section 3, chapter . . ., Laws of 2003 (section 3, Engrossed Second Substitute House Bill No. 1336) or a watershed plan has been adopted after the effective date of this section for that water resource inventory area under RCW 90.54.040(1) and a detailed implementation plan has been completed that satisfies the requirements of section 3, chapter . . ., Laws of 2003 (section 3, Engrossed Second Substitute House Bill No. 1336); and

(d) Stream flows that satisfy the instream flows referred to in (b) of this subsection are met or the milestones for satisfying those instream flows required under (c) of this subsection are being met.

(2) If the criteria listed in subsection (1)(a) through (d) of this section are not satisfied, an unperfected surface water right for municipal water supply purposes or a portion thereof held by a municipal water supplier may nonetheless be changed or transferred in the same manner as provided by RCW 90.03.380 if the change or transfer is:

(a) To provide water for an instream flow requirement that has been established by the department by rule;

(b) Subject to stream flow protection or restoration requirements contained in: A federally approved habitat conservation plan under the federal endangered species act, 16 U.S.C. Sec. 1531 et seq., a hydropower license of the federal energy regulatory commission, or a watershed agreement established under section 16 of this act;

(c) For a water right that is subject to instream flow requirements or agreements with the department and the change or transfer is also subject to those instream flow requirements or agreements; or

(d) For resolving or alleviating a public health or safety emergency caused by a failing public water supply system currently providing potable water to existing users, as such a system is described in section 15 of this act, and if the change, transfer, or amendment is for correcting the actual or anticipated cause or causes of the public water system failure. Inadequate water rights for a public water system to serve existing hookups or to accommodate future population growth or other future uses do not constitute a public health or safety emergency.

(3) If the recipient of water under a change or transfer authorized by subsection (1) of this section is a water supply system, the receiving system must also be in compliance with the terms of an approved water system plan or small water system management program under chapter 43.20 or 70.116 RCW that applies to the system, including those regarding water conservation.

(4) The department must provide notice to affected tribes of any transfer or change proposed under this section.

**NEW SECTION. Sec. 15.** A new section is added to chapter 90.03 RCW to read as follows:

To be considered a failing public water system for the purposes of section 14 of this act, the department of health, in consultation with the department and the local health authority, must make a determination that the system meets one or more of the following conditions:

(1) A public water system has failed, or is in danger of failing within two years, to meet state board of health standards for the delivery of potable water to existing users in adequate quantity or quality to meet basic human drinking, cooking, and sanitation needs or to provide adequate fire protection flows;

(2) The current water source has failed or will fail so that the public water system is or will become incapable of exercising its existing water rights to meet existing needs for drinking, cooking, and sanitation purposes after all reasonable conservation efforts have been implemented; or

(3) A change in source is required to meet drinking water quality standards and avoid unreasonable treatment costs, or the state department of health determines that the existing source of supply is unacceptable for human use.

**NEW SECTION. Sec. 16.** A new section is added to chapter 90.03 RCW to read as follows:

(1) On a pilot project basis, the department may enter into a watershed agreement with one or more municipal water suppliers in water resource inventory area number one to meet the objectives established in a water resource management program approved or being developed under chapter 90.82 RCW with the consent of the initiating governments of the water resource inventory area. The term of an agreement may not exceed ten years, but the agreement may be renewed or amended upon agreement of the parties.

(2) A watershed agreement must be consistent with:

(a) Growth management plans developed under chapter 36.70A RCW where these plans are adopted and in effect;

(b) Water supply plans and small water system management programs approved under chapter 43.20 or 70.116 RCW;

(c) Coordinated water supply plans approved under chapter 70.116 RCW; and

(d) Water use efficiency and conservation requirements and standards established by the state department of health or such requirements and standards as are provided in an approved watershed plan, whichever are the more stringent.

(3) A watershed agreement must:

(a) Require the public water system operated by the participating municipal water supplier to meet obligations under the watershed plan;

(b) Establish performance measures and timelines for measures to be completed;

(c) Provide for monitoring of stream flows and metering of water use as needed to ensure that the terms of the agreement are met; and

(d) Require annual reports from the water users regarding performance under the agreement.

(4) As needed to implement watershed agreement activities, the department may provide or receive funding, or both, under its existing authorities.

(5) The department must provide opportunity for public review of a proposed agreement before it is executed. The department must make proposed and executed watershed agreements and annual reports available on the department's internet web site.

(6) The department must consult with affected local governments and the state departments of health and fish and wildlife before executing an agreement.

(7) Before executing a watershed agreement, the department must conduct a government-to-government consultation with affected tribal governments. The municipal water suppliers operating the public water systems that are proposing to enter into the agreements must be invited to participate in the consultations. During these consultations, the department and the municipal water suppliers shall explore the potential interest of the tribal governments or governments in participating in the agreement.

(8) Any person aggrieved by the department's failure to satisfy the requirements in subsection (3) of this section as embodied in the department's decision to enter into a watershed agreement under this section may, within thirty days of the execution of such an agreement, appeal the department's decision to the pollution control hearings board under chapter 43.21B RCW.

(9) Any projects implemented by a municipal water system under the terms of an agreement reached under this section may be continued and maintained by the municipal water system after the agreement expires or is terminated as long as the conditions of the agreement under which they were implemented continue to be met.

(10) Before December 31, 2003, and December 31, 2004, the department must report to the appropriate committees of the legislature the results of the pilot project provided for in this section. Based on the experience of the pilot project, the department must offer any suggested changes in law that would improve, facilitate, and maximize the implementation of watershed plans adopted under this chapter.

NEW SECTION. **Sec. 17.** A new section is added to chapter 90.03 RCW to read as follows:

The department may not enter into new watershed agreements under section 16 of this act after July 1, 2008. This section does not apply to the renewal of agreements in effect prior to that date.

**Sec. 18.** RCW 70.119A.110 and 1991 c 304 s 5 are each amended to read as follows:

(1) No person may operate a group A public water system unless the person first submits an application to the department and receives an operating permit as provided in this section. A new application must be submitted upon any change in ownership of the system. Any person operating a public water system on July 28, 1991, may continue to operate the system until the department takes final action, including any time necessary for a hearing under subsection (3) of this section, on a permit application submitted by the person operating the system under the rules adopted by the department to implement this section.

(2) The department may require that each application include the information that is reasonable and necessary to determine that the system complies with applicable standards and requirements of the federal safe drinking water act, state law, and rules adopted by the department or by the state board of health.

(3) Following its review of the application, its supporting material, and any information received by the department in its investigation of the application, the department shall issue or deny the operating permit. The department shall act on initial permit applications as expeditiously as possible, and shall in all cases either grant or deny the application within one hundred twenty days of receipt of the application or of any supplemental information required to complete the application. The applicant for a permit shall be entitled to file an appeal in accordance with chapter 34.05 RCW if the department denies the initial or subsequent applications or imposes conditions or requirements upon the operator. Any operator of a public water system that requests a hearing may continue to operate the system until a decision is issued after the hearing.

(4) At the time of initial permit application or at the time of permit renewal the department may impose such permit conditions, requirements for system improvements, and compliance schedules as it determines are reasonable and necessary to ensure that the system will provide a safe and reliable water supply to its users.

(5) Operating permits shall be issued for a term of one year, and shall be renewed annually, unless the operator fails to apply for a new permit or the department finds good cause to deny the application for renewal.

(6) Each application shall be accompanied by an annual fee as follows:

(a) The annual fee for public water supply systems serving fifteen to forty-nine service connections shall be twenty-five dollars.

(b) The annual fee for public water supply systems serving fifty to three thousand three hundred thirty-three service connections shall be based on a uniform per service connection fee of one dollar and fifty cents per service connection.

(c) The annual fee for public water supply systems serving three thousand three hundred thirty-four to fifty-three thousand three hundred thirty-three service connections shall be based on a uniform per service connection fee of one dollar and fifty cents per service connection plus ten cents for each service connection in excess of three thousand three hundred thirty-three service connections.

(d) The annual fee for public water supply systems serving fifty-three thousand three hundred thirty-four or more service connections shall be ten thousand dollars.

(e) In addition to the fees under (a) through (d) of this subsection, the department may charge an additional one-time fee of five dollars for each service connection in a new water system.

(f) Until June 30, 2007, in addition to the fees under (a) through (e) of this subsection, the department may charge municipal water suppliers, as defined in RCW 90.03.015, an additional annual fee equivalent to twenty-five cents for each residential service connection for the purpose of funding the water conservation activities in section 7 of this act.

(7) The department may phase-in the implementation for any group of systems provided the schedule for implementation is established by rule. Prior to implementing the operating permit requirement on water systems having less than five hundred service connections, the department shall form a committee composed of persons operating these systems. The committee shall be composed of the department of health, two operators of water systems having under one hundred connections, two operators of water systems having between one hundred and two hundred service connections, two operators of water systems having between two hundred and three hundred service connections, two operators of water systems having between three hundred and four hundred service connections, two operators of water systems having between four hundred and five hundred service connections, and two county public health officials. The members shall be chosen from different geographic regions of the state. This committee shall develop draft rules to implement this section. The draft rules will then be subject to the rule-making procedures in accordance with chapter 34.05 RCW.

(8) The department shall notify existing public water systems of the requirements of RCW 70.119A.030, 70.119A.060, and this section at least one hundred twenty days prior to the date that an application for a permit is required pursuant to RCW 70.119A.030, 70.119A.060, and this section.

(9) The department shall issue one operating permit to any approved satellite system management agency. Operating permit fees for approved satellite system management agencies shall be one dollar per connection per year for the total number of connections under the management of the approved satellite agency. The department shall define by rule the meaning of the term "satellite system management agency." If a statutory

definition of this term exists, then the department shall adopt by rule a definition consistent with the statutory definition.

(10) For purposes of this section, "group A public water system" and "system" mean those water systems with fifteen or more service connections, regardless of the number of people; or a system serving an average of twenty-five or more people per day for sixty or more days within a calendar year, regardless of the number of service connections.

**NEW SECTION. Sec. 19.** If any provision of this act or its application to any person or circumstance is held invalid, the remainder of the act or the application of the provision to other persons or circumstances is not affected."

#### **"PART 1 CERTIFICATE OF ACADEMIC ACHIEVEMENT**

**NEW SECTION. Sec. 101.** A new section is added to chapter 28A.655 RCW to read as follows:  
**CERTIFICATE REQUIREMENTS.** (1) The high school assessment system shall include but need not be limited to the Washington assessment of student learning, opportunities for a student to retake the content areas of the assessment in which the student was not successful, and one or more alternative means for a student to demonstrate achievement of state academic standards. The alternative means for each content area shall be comparable in rigor to the Washington assessment of student learning for each content area.

(2) Subject to the conditions in this section, beginning with the graduating class of 2008, successful completion of the reading, writing, and mathematics content areas of the high school Washington assessment of student learning, or of an approved alternative means in those content areas as provided in subsection (10) of this section, shall lead to a certificate of academic achievement. The certificate of academic achievement shall be obtained by most students at about the age of sixteen, and is evidence that the students have successfully met the state standard in the content areas included in the certificate. The certificate of academic achievement is required for graduation from a public high school but is not the only requirement for graduation.

(3) Beginning with the graduating class of 2010, successful completion of the reading, writing, mathematics, and science content areas of the high school Washington assessment of student learning, or of an approved alternative means in those content areas, is required for graduation from a public high school in the state of Washington and shall lead to a certificate of academic achievement.

(4) The state board of education may not require the acquisition of the certificate of academic achievement for students in home-based instruction under chapter 28A.200 RCW or for students enrolled in private schools under chapter 28A.195 RCW.

(5) A student may retain and use the highest result from each successfully completed content area of the high school assessment.

(6) Beginning with the graduating class of 2008, the highest level achieved in each content area on the high school Washington assessment of student learning shall be displayed on a student's transcript. In addition, beginning with the graduating class of 2008, each student shall receive a scholar's designation on his or her transcript for each content area in which the student achieves level four.

(7) Beginning with the graduating class of 2008, if a student takes the high school assessment but is not successful in one or more content areas required for the certificate of academic achievement, the student may retake the assessment in that content area one or more times at no cost to the student and may choose one or more of the following options:

(a) To retake the assessment in that content area at least once in the spring and once in the fall or winter if the student is enrolled in a public school;

(b) To retake the assessment in that content area if the student is enrolled in a high school completion program. The superintendent of public instruction and the state board for community and technical colleges shall jointly identify means by which students in these programs can be assessed; or

(c) To use an alternative means developed and approved by the superintendent of public instruction to demonstrate achievement of the standards for that content area if the student has retaken the assessment in that content area at least once.

(8) Students who achieve the standard in a content area of the high school assessment of student learning but who wish to improve their results shall pay for retaking the assessment, using a uniform cost determined by the superintendent of public instruction.

(9) Subject to available funding, the superintendent shall pilot both opportunities for retaking the high school assessment and alternative means beginning in the 2005-06 school year. Beginning no later than September 2006, opportunities to retake the assessment at least once in the fall or winter and once in the spring shall be available in each school district.

(10) Beginning no later than spring 2007, subject to formal legislative approval of the alternative means, alternative means shall be in place in each school district to demonstrate achievement of the state standards in a content area in which the student was unsuccessful on the Washington assessment of student learning. Through the omnibus appropriations act, or by statute or concurrent resolution, the legislature shall formally approve the use of any alternative means, including any appeals process, before its implementation as part of the high school assessment system.

(11) Beginning no later than September 1, 2006, each school district shall prepare a plan for each eighth grade through twelfth grade student who was not successful in one or more content areas of the Washington assessment of student learning. The plan shall include, but need not be limited to, the courses, competencies, and other steps needed to be taken by the student to meet state academic standards and stay on track for graduation. Progress on the plan shall be reported to the student and the student's parents or guardian. In addition, through a parent conference, schools must notify the parent or guardian of each eighth grade student about the student's results on the assessment of student learning, identify actions the school intends to take to improve the student's skills in any content area in which the student was unsuccessful, and provide the parents or guardian with strategies to help them improve their student's skills in that content area.

**NEW SECTION. Sec. 102. CERTIFICATE REPORTS REQUIRED ON THE APPROPRIATE APPLICATION OF THE CERTIFICATE REQUIREMENT TO SPECIAL EDUCATION AND STUDENTS WITH LIMITED ENGLISH PROFICIENCY, THE CUT SCORES REQUIRED TO ACHIEVE THE CERTIFICATE, ALTERNATIVE MEANS, AND ISSUES RELATED TO VALIDITY AND RELIABILITY.**

(1) By November 30, 2003, subject to available funding, the office of the superintendent of public instruction shall report recommendations to the governor, the state board of education, and the house of representatives and senate education committees on the appropriate application of the certificate of academic achievement to special education students and limited English proficiency students and recommendations on the best practices that may be used with students who need additional assistance to meet the certificate requirements. In the superintendent's deliberations, the superintendent shall consult with practicing teachers and principals, practicing special education practitioners including educational staff associates, parents, education organizations, and other interested parties.

(2) Before the results of the 2004 high school assessment of student learning are reported to school districts, the academic achievement and accountability commission shall review and adjust, if necessary, the performance standards needed to meet the high school standards and obtain a certificate of academic achievement as provided in section 101 of this act. The commission shall include in its review consideration of the use of the standard error of measurement into the decision regarding the award of the certificate of academic achievement. To assist in its deliberations, the commission shall seek advice from a committee that includes parents, practicing classroom teachers and principals, administrators, staff, and other interested parties.

(3) The office of the superintendent of public instruction shall develop alternative means for students to demonstrate achievement of the state academic standards. The alternative means shall be comparable in rigor to the Washington assessment of student learning and shall include procedures and criteria to help determine whether students who were not successful in one or more of the content areas of the high school assessment can demonstrate that they meet state standards through another objectively evaluated means. In its deliberations, the office of the superintendent of public instruction shall consult with parents, administrators, practicing classroom teachers including teachers in career and technical education, practicing principals, appropriate agencies, professional organizations, assessment experts, and other interested parties.

(a) By July 1, 2004, the office of the superintendent of public instruction shall report its recommendations for alternative means, including possible options and a possible appeals process, to the governor, the state board of education, and the house of representatives and senate education committees.

(b) By July 1, 2005, subject to available funding, alternative means shall be available for pilot testing by school districts.

(c) By December 1, 2006, the superintendent shall report to the governor, the state board of education, and the house of representatives and senate education committees on information obtained through the pilots of the alternative means. The report shall include an analysis of the comparative rigor of the alternative means to the Washington assessment of student learning for that content area.

(d) Through the omnibus appropriations act, or by statute or concurrent resolution, the legislature shall formally approve the use of any alternative means, including any appeals process, before its implementation as a part of the high school assessment system.

(4) By November 30, 2004, the superintendent of public instruction and the state board of education shall provide to the house of representatives and senate education committees all available pertinent studies, information, and independent third-party analyses on the validity and reliability of the high school assessment system, especially as it pertains to the use of the system for individual student decisions.

(2) The superintendent of public instruction shall:

(a) Periodically revise the essential academic learning requirements, as needed, based on the student learning goals in RCW 28A.150.210. Goals one and two shall be considered primary. To the maximum extent possible, the superintendent shall integrate goal four and the knowledge and skill areas in the other goals in the essential academic learning requirements; and

(b) Review and prioritize the essential academic learning requirements and identify, with clear and concise descriptions, the grade level content expectations to be assessed on the Washington assessment of student learning and used for state or federal accountability purposes. The review, prioritization, and identification shall result in more focus and targeting with an emphasis on depth over breadth in the number of grade level content expectations assessed at each grade level. Grade level content expectations shall be articulated over the grades as a sequence of expectations and performances that are logical, build with increasing depth after foundational knowledge and skills are acquired, and reflect, where appropriate, the sequential nature of the discipline. The office of the superintendent of public instruction, within seven working days, shall post on its web site any grade level content expectations provided to an assessment vendor for use in constructing the Washington assessment of student learning.

(3) In consultation with the academic achievement and accountability commission, the superintendent of public instruction shall maintain and continue to develop and revise a statewide academic assessment system in the content areas of reading, writing, mathematics, and science for use in the elementary, middle, and high school years designed to determine if each student has mastered the essential academic learning requirements identified in subsection (1) of this section. School districts shall administer the assessments under guidelines adopted by the superintendent of public instruction. The academic assessment system shall include a variety of assessment methods, including criterion-referenced and performance-based measures.

(4) If the superintendent proposes any modification to the essential academic learning requirements or the statewide assessments, then the superintendent shall, upon request, provide opportunities for the education committees of the house of representatives and the senate to review the assessments and proposed modifications to the essential academic learning requirements before the modifications are adopted.

(5)(a) The assessment system shall be designed so that the results under the assessment system are used by educators as tools to evaluate instructional practices, and to initiate appropriate educational support for students who have not mastered the essential academic learning requirements at the appropriate periods in the student's educational development.

~~((5))~~ (b) Assessments measuring the essential academic learning requirements in the content area of science shall be available for mandatory use in middle schools and high schools by the 2003-04 school year and for mandatory use in elementary schools by the 2004-05 school year unless the legislature takes action to delay or prevent implementation of the assessment.

(6) By September 2006, the results for reading and mathematics shall be reported in a format that will allow parents and teachers to determine the academic gain a student has acquired in those content areas from one school year to the next.

(7) In order to assist parents and teachers in their efforts to provide educational support to individual students, the superintendent of public instruction shall provide as much individual student performance information as possible within the constraints of the assessment system's item bank. The superintendent shall also provide to school districts information on classroom-based and other assessments that may provide additional achievement information for individual students.

(8) To the maximum extent possible, the superintendent shall integrate knowledge and skill areas in development of the assessments.

~~((6))~~ (9) Assessments for goals three and four of RCW 28A.150.210 shall be integrated in the essential academic learning requirements and assessments for goals one and two.

~~((7))~~ (10) The superintendent shall develop assessments that are directly related to the essential academic learning requirements, and are not biased toward persons with different learning styles, racial or ethnic backgrounds, or on the basis of gender.

~~((8))~~ (11) The superintendent shall consider methods to address the unique needs of special education students when developing the assessments under this section.

~~((9))~~ (12) The superintendent shall consider methods to address the unique needs of highly capable students when developing the assessments under this section.

**Sec. 205.** RCW 28A.655.030 and 2002 c 37 s 1 are each amended to read as follows:

**ESSENTIAL ACADEMIC LEARNING REQUIREMENTS AND ASSESSMENTS - DUTIES OF THE ACADEMIC ACHIEVEMENT AND ACCOUNTABILITY COMMISSION.** The powers and duties of the academic achievement and accountability commission shall include, but are not limited to the following:

(1) For purposes of statewide accountability, the commission shall:

(a) Adopt and revise performance improvement goals in reading, writing, science, and mathematics by subject and grade level as the commission deems appropriate to improve student learning, once assessments in these subjects are required statewide. The goals shall be consistent with student privacy protection provisions of RCW 28A.655.090(7) and shall not conflict with requirements contained in Title I of the federal elementary and secondary education act of 1965, as amended. The goals may be established for all students, economically disadvantaged students, limited English proficient students, students with disabilities, and students from disproportionately academically underachieving racial and ethnic backgrounds. The commission may establish school and school district goals addressing high school graduation rates and dropout reduction goals for students in grades seven through twelve. ~~((The goals shall be in addition to any goals adopted in RCW 28A.655.050. The commission may also revise any goal adopted in RCW 28A.655.050.))~~ The commission shall adopt the goals by rule. However, before each goal is implemented, the commission shall present the goal to the education committees of the house of representatives and the senate for the committees' review and comment in a time frame that will permit the legislature to take statutory action on the goal if such action is deemed warranted by the legislature;

(b) Identify the scores students must achieve in order to meet the standard on the Washington assessment of student learning and, for high school students, obtain a certificate of academic achievement. The commission shall also determine student scores that identify levels of student performance below and beyond the standard. The commission shall consider the incorporation of the standard error of measurement into the decision regarding the award of the certificate of academic achievement. The commission shall set such performance standards and levels in consultation with the superintendent of public instruction and after consideration of any recommendations that may be developed by any advisory committees that may be established for this purpose. Beginning in 2004, if the commission makes any adjustment of the student performance standards, then the commission shall present the recommended performance standard to the education committees of the house of representatives and the senate by November 30th of the year before the school year in which the changes will take place in order to permit the legislature to take statutory action before the changes are implemented if such action is deemed warranted by the legislature. Any new or revised performance standard the commission plans to use for 2004 assessments shall be presented to the legislature by January 1, 2004;

(c) Adopt objective, systematic criteria to identify successful schools and school districts and recommend to the superintendent of public instruction schools and districts to be recognized for two types of accomplishments, student achievement and improvements in student achievement. Recognition for improvements in student achievement shall include consideration of one or more of the following accomplishments:

(i) An increase in the percent of students meeting standards. The level of achievement required for recognition may be based on the achievement goals established by the legislature ~~((under RCW 28A.655.050))~~ and by the commission under (a) of this subsection;

(ii) Positive progress on an improvement index that measures improvement in all levels of the assessment; and

(iii) Improvements despite challenges such as high levels of mobility, poverty, English as a second language learners, and large numbers of students in special populations as measured by either the percent of students meeting the standard, or the improvement index.

When determining the baseline year or years for recognizing individual schools, the commission may use the assessment results from the initial years the assessments were administered, if doing so with individual schools would be appropriate;

(d) Adopt objective, systematic criteria to identify schools and school districts in need of assistance and those in which significant numbers of students persistently fail to meet state standards. In its deliberations, the commission shall consider the use of all statewide mandated criterion-referenced and norm-referenced standardized tests;

(e) Identify schools and school districts in which state intervention measures will be needed and a range of appropriate intervention strategies, beginning no earlier than June 30, 2001, and after the legislature has authorized a set of intervention strategies. Beginning no earlier than June 30, 2001, and after the legislature has authorized a set of intervention strategies, at the request of the commission, the superintendent shall intervene in the school or school district and take corrective actions. This chapter does not provide additional authority for the commission or the superintendent of public instruction to intervene in a school or school district;

(f) Identify performance incentive systems that have improved or have the potential to improve student achievement;

(g) Annually review the assessment reporting system to ensure fairness, accuracy, timeliness, and equity of opportunity, especially with regard to schools with special circumstances and unique populations of students, and a recommendation to the superintendent of public instruction of any improvements needed to the system;

(h) Annually report by December 1st to the legislature, the governor, the superintendent of public instruction, and the state board of education on the progress, findings, and recommendations of the commission. The report may include recommendations of actions to help improve student achievement;

(i) By December 1, 2000, and by December 1st annually thereafter, report to the education committees of the house of representatives and the senate on the progress that has been made in achieving ~~((the reading goal under RCW 28A.655.050 and any additional))~~ goals adopted by the commission;

(j) Coordinate its activities with the state board of education and the office of the superintendent of public instruction;

(k) Seek advice from the public and all interested educational organizations in the conduct of its work; and

(1) Establish advisory committees, which may include persons who are not members of the commission;

(2) Holding meetings and public hearings, which may include regional meetings and hearings;

(3) Hiring necessary staff and determining the staff's duties and compensation. However, the office of the superintendent of public instruction shall provide staff support to the commission until the commission has hired its own staff, and shall provide most of the technical assistance and logistical support needed by the commission thereafter. The office of the superintendent of public instruction shall be the fiscal agent for the commission. The commission may direct the office of the superintendent of public instruction to enter into subcontracts, within the commission's resources, with school districts, teachers, higher education faculty, state agencies, business organizations, and other individuals and organizations to assist the commission in its deliberations; and

(4) Receiving per diem and travel allowances as permitted under RCW 43.03.050 and 43.03.060.

Trust Land Transfer Program (04-2-010)

The state building construction account appropriation in this section is subject to the following conditions and limitations:

(1) The total appropriation is provided to the department solely to transfer from trust status or enter into thirty-year timber harvest restrictive easements/leases for certain trust lands of state-wide significance deemed appropriate for state park, fish and wildlife habitat, natural area preserve, natural resources conservation area, open space, or recreation purposes.

(2) Property transferred under this section shall be appraised and transferred at fair market value. The value of the timber transferred shall be deposited by the department to the common school construction account in the same manner as timber revenues from other common school trust lands. No deduction shall be made for the resource management cost account under RCW 79.64.040. The value of the land transferred shall be deposited in the natural resources real property replacement account. These funds shall be expended by the department for the exclusive purpose of acquiring commercial real property of equal value to be managed as common school trust land.

(3) Property subject to easement/lease agreements under this section shall be appraised at fair market value both with and without the imposition of the easement/lease. The entire difference in appraised value shall be deposited by the department to the common school construction fund in the same manner as lease revenues

from other common school trust lands. No deduction shall be made for the resource management cost account under RCW 79.64.040.

(4) All reasonable costs incurred by the department to implement this section are authorized to be paid out of this appropriation. Authorized costs include the actual cost of appraisals, staff time, environmental reviews, surveys, and other similar costs.

(5) Intergrant exchanges between common school and other trust lands of equal value may occur if the exchange is in the interest of each trust, as determined by the board of natural resources.

(6) Prior to or concurrent with conveyance of these properties, the department, with full cooperation of the receiving agencies, shall execute and record a real property instrument that dedicates the transferred properties to the purposes identified in subsection (1) of this section for a minimum period of thirty years. The department of natural resources, in consultation with the receiving state agencies, shall develop policy to address requests to replace transferred properties subject to the recorded property instrument that are no longer deemed appropriate for the purposes identified in subsection (1) of this section.

(7) The department and receiving agencies shall work in good faith to carry out the intent of this section. However, the department or receiving agencies may remove a property from the transfer list based on new, substantive information, if it is determined that transfer of the property is not in the statewide interest of either the common school trust or the receiving agency.

(8) The department shall execute trust land transfers and easements/leases such that, after the deduction of reasonable costs as provided in subsection (4) of this section, eighty percent of the appropriation in this section is deposited in the common school construction fund. To achieve the 80:20 ratio, the department may offset transfers of property with low timber-to-land ratios with easements/leases on other properties.

(9) On June 30, 2005, the state treasurer shall transfer all remaining uncommitted funds from this appropriation to the common school construction fund and the appropriation in this section shall be reduced by an equivalent amount.

(10) The appropriation in this section is provided for a list of projects in LEAP capital document No. 2003-17, as developed on June 4, 2003.

(11) The department of natural resources shall manage lands acquired as "Bone river natural area preserve" as a natural resources conservation area under chapter 79.71 RCW.

**NEW SECTION. Sec. 902.** Allotments for appropriations in this act shall be provided in accordance with the capital project review requirements adopted by the office of financial management. The office of financial management shall notify the house of representatives capital budget committee and the senate ways and means committee of allotment releases based on review by the office of financial management. No expenditure may be incurred or obligation entered into for appropriations in this act until the office of financial management has given final approval to the allotment of the funds to be expended or encumbered. For allotments under this act, the allotment process includes, in addition to the statement of proposed expenditures for the current biennium, a category or categories for any reserve amounts and amounts expected to be expended in future biennia. Projects that will be employing alternative public works construction procedures under chapter 39.10 RCW are subject to the allotment procedures defined in this section and RCW 43.88.110. Contracts shall not be executed that call for expenditures in excess of the approved allotment, and the total amount shown in such contracts for the cost of future work that has not been appropriated shall not exceed the amount identified for such work in the level of funding approved by the office of financial management at the completion of predesign.

**NEW SECTION. Sec. 903.** To ensure that major construction projects are carried out in accordance with legislative and executive intent, appropriations in this act in excess of \$5,000,000 shall not be expended or encumbered until the office of financial management has reviewed and approved the agency's predesign and other documents, and approved an allotment for the project that includes specific authorization to enter into a contract to expend or encumber funds. The predesign document shall include but not be limited to program, site, and cost analysis in accordance with the predesign manual adopted by the office of financial management. To improve monitoring of major construction projects, progress reports shall be submitted by the agency administering the project to the office of financial management and to the fiscal committees of the house of representatives and senate. Reports will be submitted on July 1st and December 31st each year in a format to be developed by the office of financial management.

**NEW SECTION. Sec. 904.** Appropriations in this act for design and construction of facilities on higher education campuses shall be expended only after funds are allotted to institutions of higher education on the basis

of: (1) Comparable unit cost standards, as determined by the office of financial management in consultation with the higher education coordinating board; (2) costs consistent with other higher education teaching facilities in the state; and (3) student full-time equivalent enrollment levels as established by the office of financial management in consultation with the higher education coordinating board.

**NEW SECTION. Sec. 905.** To ensure that minor works appropriations are carried out in accordance with legislative intent, funds appropriated in this act shall not be allotted until project lists are on file at the office of financial management. Minor works appropriations shall not be used for studies unless expressly authorized elsewhere in this act. The office of financial management shall forward copies of these project lists to the house of representatives capital budget committee and the senate ways and means committee. No expenditure may be incurred or obligation entered into for minor works appropriations until the office of financial management has approved the allotment of the funds to be expended. The office of financial management shall encourage state agencies to incorporate accessibility planning and improvements into the normal and customary capital program.

**NEW SECTION. Sec. 906.** (1) The legislature expects projects to be ready to proceed in a timely manner depending on the type or phase of the project or program that is the subject of the appropriation in this act. Except for major projects that customarily may take more than two biennia to complete from predesign to the end of construction, or large infrastructure grant or loan programs supporting projects that often take more than two biennia to complete, the legislature generally does not intend to reappropriate funds more than once, particularly for smaller grant programs, local/community projects, and minor works.

(3) To the extent feasible, agencies are directed to accelerate expenditure rates at their current level of permanent employees and shall use contracted design and construction services wherever necessary to meet the goals of this section.

(4) The office of financial management shall report the following to the appropriate fiscal committees of the legislature by January 30, 2005: (a) A listing of reappropriations in the governor's 2005-2007 capital budget recommendation that will be reappropriated more than once and have ten percent or more of the original appropriation unexpended; and (b) an explanation of why the appropriation remains unexpended.

**NEW SECTION. Sec. 907. The building shall be constructed and financed so that agency occupancy costs will not exceed comparable private market rental rates. The comparable general office space rate shall be calculated based on the three latest Thurston county leases of new space of at least 100,000 rentable square feet adjusted for inflation as determined by the department of general administration. The department of general administration shall coordinate with potential state agency tenants whose current lease expire near the time of occupancy so that buyout of current leases do not add to state expense. **NEW SECTION. Sec. 908. FOR THE ARTS COMMISSION--ART WORK ALLOWANCE POOLING.** (1) One-half of one percent of moneys appropriated in this act for original construction of school plant facilities is provided solely for the purposes of RCW 28A.335.210. The Washington state arts commission may combine the proceeds from individual projects in order to fund larger works of art or mobile art displays in consultation with the superintendent of public instruction and representatives of school district boards.

(2) One-half of one percent of moneys appropriated in this act for original construction or any major renovation or remodel work exceeding two hundred thousand dollars by colleges or universities is provided solely for the purposes of RCW 28B.10.027. The Washington state arts commission may combine the proceeds from individual projects in order to fund larger works of art or mobile art displays in consultation with the board of regents or trustees.

(3) One-half of one percent of moneys appropriated in this act for original construction of any public building by a state agency as defined in RCW 43.17.020 is provided solely for the purposes of RCW 43.17.200. The Washington state arts commission may combine the proceeds from individual projects in order to fund larger works of art or mobile art displays in consultation with the state agency.

(4) At least eighty-five percent of the moneys spent by the Washington state arts commission during the 2003-2005 biennium for the purposes of RCW 28A.335.210, 28B.10.027, and 43.17.200 must be expended solely for direct acquisition of works of art.

**NEW SECTION. Sec. 909.** The amounts shown under the headings "Prior Biennia," "Future Biennia," and "Total" in this act are for informational purposes only and do not constitute legislative approval of these amounts. "Prior biennia" typically refers to the immediate prior biennium for reappropriations, but may refer to multiple biennia in the case of specific projects. A "future biennia" amount is an estimate of what may be appropriated for the project or program in the 2005-07 biennium and the following four biennia; an amount of zero does not necessarily constitute legislative intent to not provide funding for the project or program in the future.

**NEW SECTION. Sec. 910.** "Reappropriations" in this act are appropriations and, unless the context clearly provides otherwise, are subject to the relevant conditions and limitations applicable to appropriations. Reappropriations shall be limited to the unexpended balances remaining on June 30, 2003, from the 2001-2003 biennial appropriations for each project.

**NEW SECTION. Sec. 911.** To carry out the provisions of this act, the governor may assign responsibility for predesign, design, construction, and other related activities to any appropriate agency.

**NEW SECTION. Sec. 912.** If any federal moneys appropriated by this act for capital projects are not received by the state, the department or agency to which the moneys were appropriated may replace the federal moneys with funds available from private or local sources. No replacement may occur under this section without the prior approval of the director of financial management in consultation with the senate ways and means committee and the house of representatives capital budget committee.

**NEW SECTION. Sec. 913.** (1) Unless otherwise stated, for all appropriations under this act that require a match of nonstate money or in-kind contributions, the following requirement, consistent with RCW 43.88.150, shall apply: Expenditures of state money shall be timed so that the state share of project expenditures never exceeds the intended state share of total project costs.

(2) Provision of the full amount of required matching funds is not required to permit the expenditure of capital budget appropriations for phased projects if a proportional amount of the required matching funds is provided for each distinct, identifiable phase of the project.

**NEW SECTION. Sec. 914.** Any capital improvements or capital projects involving construction or major expansion of a state office facility, including, but not limited to, district headquarters, detachment offices, and off-campus faculty offices, must be reviewed by the department of general administration for possible consolidation, colocation, and compliance with state office standards before allotment of funds. The intent of the requirement imposed by this section is to eliminate duplication and reduce total office space requirements where feasible, while ensuring proper service to the public.

**NEW SECTION. Sec. 915.** (1) The governor, through the office of financial management, may authorize a transfer of appropriation authority provided for a capital project that is in excess of the amount required for the completion of such project to another capital project for which the appropriation is insufficient. No such transfer may be used to expand the capacity of any facility beyond that intended by the legislature in making the appropriation. Such transfers may be effected only between capital appropriations to a specific department, commission, agency, or institution of higher education and only between capital projects that are funded from the same fund or account. No transfers may occur between projects to local government agencies except where the grants are provided within a single omnibus appropriation and where such transfers are specifically authorized by the implementing statutes that govern the grants.

(2) For purposes of this section, the governor may find that an amount is in excess of the amount required for the completion of a project only if: (a) The project as defined in the notes to the budget document is substantially complete and there are funds remaining; or (b) bids have been let on a project and it appears to a substantial certainty that the project as defined in the notes to the budget document can be completed within the biennium for less than the amount appropriated in this act.

(3) For the purposes of this section, the legislature intends that each project be defined as proposed to the legislature in the governor's budget document, unless it clearly appears from the legislative history that the legislature intended to define the scope of a project in a different way.

(4) Transfers of funds to an agency's infrastructure savings appropriation are subject to review and approval by the office of financial management. Expenditures from an infrastructure savings appropriation are limited to projects that have a primary purpose to correct infrastructure deficiencies or conditions that: (a) Adversely affect the ability to utilize the infrastructure for its current programmatic use; (b) reduce the life expectancy of the infrastructure; or (c) increase the operating costs of the infrastructure for its current programmatic use. Eligible infrastructure projects may include structures and surface improvements, site amenities, utility systems outside building footprints and natural environmental changes or requirements as part of an environmental regulation, a declaration of emergency for an infrastructure issue in conformance with RCW 43.88.250, or infrastructure planning as part of a facility master plan.

(5) A report of any transfer effected under this section, except emergency projects or any transfer under \$250,000, shall be filed with the legislative fiscal committees of the senate and house of representatives by the office of financial management at least thirty days before the date the transfer is effected. The office of financial management shall report all emergency or smaller transfers within thirty days from the date of transfer.

**NEW SECTION. Sec. 916.** NONTAXABLE AND TAXABLE BOND PROCEEDS.

Portions of the appropriation authority granted by this act from the state building construction account may be transferred to the state taxable building construction account as deemed necessary by the state finance committee to comply with the federal internal revenue service rules and regulations pertaining to the use of nontaxable bond proceeds. The state treasurer shall submit written notification to the director of financial management if it is determined that a shift of appropriation authority from the state building construction account to the state taxable building construction account is necessary.

**NEW SECTION. Sec. 917.** The office of financial management, in consultation with the department of general administration, shall identify capital projects that may benefit from an energy analysis to determine whether there are alternate, more economical, and energy efficient means of completing the work. The office of financial management shall hold appropriations in allotment reserve on the following types of capital projects until this analysis can be completed: Heating, ventilation, and air conditioning modifications, chiller plants, steam plants, boilers, chilled water or steam lines, building control systems, lighting improvements, or other major energy using systems that may warrant additional analysis. Agencies receiving appropriations for such projects are encouraged to utilize energy performance contracts or alternative financing for equipment in lieu of state appropriated funds. The office of financial management may transfer funds remaining in allotment reserve to infrastructure savings projects within the agency that has realized savings from energy efficiency alternatives.

**Sec. 918.** RCW 43.135.045 and 2002 c 33 s 2 are each amended to read as follows:

(1) The emergency reserve fund is established in the state treasury. During each fiscal year, the state treasurer shall deposit in the emergency reserve fund all general fund--state revenues in excess of the state expenditure limit for that fiscal year. Deposits shall be made at the end of each fiscal quarter based on projections of state revenues and the state expenditure limit. The treasurer shall make transfers between these accounts as necessary to reconcile actual annual revenues and the expenditure limit for fiscal year 2000 and thereafter.

(2) The legislature may appropriate moneys from the emergency reserve fund only with approval of at least two-thirds of the members of each house of the legislature, and then only if the appropriation does not cause total expenditures to exceed the state expenditure limit under this chapter. However, during the 2001-2003 biennium, the legislature may transfer moneys from the emergency reserve fund to the general fund only with approval of a majority of the members of each house of the legislature, and then only if the appropriation does not cause total expenditures to exceed the state expenditure limit under this chapter.

(3) The emergency reserve fund balance shall not exceed five percent of annual general fund--state revenues as projected by the official state revenue forecast. Any balance in excess of five percent shall be transferred on a quarterly basis by the state treasurer as follows: Seventy-five percent to the student achievement fund hereby created in the state treasury and twenty-five percent to the general fund balance. The treasurer shall make transfers between these accounts as necessary to reconcile actual annual revenues for fiscal year 2000 and thereafter. When per-student state funding for the maintenance and operation of K-12 education meets a level of no less than ninety percent of the national average of total funding from all sources per student as determined by the most recent published data from the national center for education statistics of the United States department of education, as calculated by the office of financial management, further deposits to the student achievement fund shall be required only to the extent necessary to maintain the ninety-percent level. Remaining funds are part of the general fund balance and these funds are subject to the expenditure limits of this chapter.

(4) The education construction fund is hereby created in the state treasury.

(a) Funds may be appropriated from the education construction fund exclusively for common school construction or higher education construction. During the fiscal years beginning July 1, 2003, and ending June 30, 2005, funds may also be used for higher education facilities preservation and maintenance.

(b) Funds may be appropriated for any other purpose only if approved by a two-thirds vote of each house of the legislature and if approved by a vote of the people at the next general election. An appropriation approved by the people under this subsection shall result in an adjustment to the state expenditure limit only for the fiscal period for which the appropriation is made and shall not affect any subsequent fiscal period.

(5) Funds from the student achievement fund shall be appropriated to the superintendent of public instruction strictly for distribution to school districts to meet the provisions set out in the student achievement act. Allocations shall be made on an equal per full-time equivalent student basis to each school district.

(6) Earnings of the emergency reserve fund under RCW 43.84.092(4)(a) shall be transferred quarterly to the multimodal transportation account, except for those earnings that are in excess of thirty-five million dollars each fiscal year. Within thirty days following any fiscal year in which earnings transferred to the multimodal transportation account under this subsection did not total thirty-five million dollars, the state treasurer shall transfer from the emergency reserve fund an amount necessary to bring the total deposited in the multimodal transportation account under this subsection to thirty-five million dollars. The revenues to the multimodal transportation account reflected in this subsection provide ongoing support for the transportation programs of the state. However, it is the intent of the legislature that any new long-term financial support that may be subsequently provided for transportation programs will be used to replace and supplant the revenues reflected in

this subsection, thereby allowing those revenues to be returned to the purposes to which they were previously dedicated.

**Sec. 919.** RCW 43.135.045 and 2001 c 3 s 9, 2000 2nd sp.s. c 5 s 1, and 2000 2nd sp.s. c 2 s 3 are each reenacted and amended to read as follows:

(1) The emergency reserve fund is established in the state treasury. **Sec. 920.** RCW 46.09.170 and 1995 c 166 s 9 are each amended to read as follows:

(1) From time to time, but at least once each year, the state treasurer shall refund from the motor vehicle fund one percent of the motor vehicle fuel tax revenues collected under chapter 82.36 RCW, based on the tax rate in effect January 1, 1990, less proper deductions for refunds and costs of collection as provided in RCW 46.68.090. The treasurer shall place these funds in the general fund as follows:

(a) Forty percent shall be credited to the ORV and nonhighway vehicle account and administered by the department of natural resources solely for planning, maintenance, and management of ORV recreation facilities, nonhighway roads, and nonhighway road recreation facilities. The funds under this subsection shall be expended in accordance with the following limitations:

(i) Not more than five percent may be expended for information programs under this chapter;

(ii) Not less than ten percent and not more than fifty percent may be expended for ORV recreation facilities;

(iii) Not more than twenty-five percent may be expended for maintenance of nonhighway roads;

(iv) Not more than fifty percent may be expended for nonhighway road recreation facilities;

(v) Ten percent shall be transferred to the interagency committee for outdoor recreation for grants to law enforcement agencies in those counties where the department of natural resources maintains ORV facilities. This amount is in addition to those distributions made by the interagency committee for outdoor recreation under (d)(i) of this subsection;

(b) Three and one-half percent shall be credited to the ORV and nonhighway vehicle account and administered by the department of fish and wildlife solely for the acquisition, planning, development, maintenance, and management of nonhighway roads and recreation facilities;

(c) Two percent shall be credited to the ORV and nonhighway vehicle account and administered by the parks and recreation commission solely for the maintenance and management of ORV use areas and facilities; and

(d) Fifty-four and one-half percent, together with the funds received by the interagency committee for outdoor recreation under RCW 46.09.110, shall be credited to the nonhighway and off-road vehicle activities program account to be administered by the committee for planning, acquisition, development, maintenance, and management of ORV recreation facilities and nonhighway road recreation facilities; ORV user education and information; and ORV law enforcement programs. During the fiscal year ending June 30, 2004, a portion of these funds may be appropriated to the department of natural resources to maintain and operate existing ORV and other recreation facilities, including ORV campgrounds, for the state parks and recreation commission to construct and upgrade trails and trail-related facilities for both motorized and nonmotorized uses, and for other activities identified in this section. The funds under this subsection shall be expended in accordance with the following limitations, except that during the fiscal year ending June 30, 2004, funds appropriated to the committee from motor vehicle fuel tax revenues for the activities in (d)(ii) and (iii) of this subsection shall be reduced by the amounts appropriated to the department of natural resources and the state parks and recreation commission as provided in this subsection:

(i) Not more than twenty percent may be expended for ORV education, information, and law enforcement programs under this chapter;

(ii) Not less than an amount equal to the funds received by the interagency committee for outdoor recreation under RCW 46.09.110 and not more than sixty percent may be expended for ORV recreation facilities;

(iii) Not more than twenty percent may be expended for nonhighway road recreation facilities.

(2) On a yearly basis an agency may not, except as provided in RCW 46.09.110, expend more than ten percent of the funds it receives under this chapter for general administration expenses incurred in carrying out this chapter.

**Sec. 921.** RCW 43.88.032 and 1997 c 96 s 5 are each amended to read as follows:

(1) Normal maintenance costs, except for funds appropriated for facility preservation of state institutions of higher education, shall be programmed in the operating budget rather than in the capital budget.

(2) All debt-financed pass-through money to local governments shall be programmed and separately identified in the budget document.

**NEW SECTION. Sec. 922.** The University of Washington shall develop a ten year program for the eventual relocation of the residents of the floating homes located at 1409 NE Boat street. After meeting and negotiating with the affected residents, the University of Washington shall develop a report to the legislature. The report, giving the various options for achieving relocation, shall be submitted no later than January 15, 2004, to the senate ways and means committee and the house of representatives capital budget committee. Relocation may include the purchase and rental back of existing homes through reverse declining purchase agreements, the physical relocation of the floating homes to other locations, the creation of a buy-back fund, the relocation of residents in concert with the purchase of the existing residences, or other creative real estate transactions that achieve the relocation of the existing residents or floating homes.

**NEW SECTION. Sec. 923.** (1) The joint legislative audit and review committee shall conduct a performance audit of state capital planning, design, and construction processes. In conducting this study, the committee shall select a sample of major capital projects from the 1995-97 through the 2003-05 biennia in higher education, corrections, social and health services, and other state agencies. Capital projects selected for this sample shall accommodate regional differences within the state. The committee shall consider the following topics in conducting this performance audit:

(a) Agency development, evaluation, and justification of the cost drivers and cost elements associated with each of the major phases of a capital project: General or master planning, predesign, design, construction, and postconstruction review;

(b) Evaluation of the management and fiscal controls surrounding agency capital project decision making and implementation processes, such as policy goals, planning procedures, budget limits, cost and performance standards, criteria for selecting project priorities, written instructions, review processes, as well as management, oversight, reporting, and accountability systems;

(c) Processes and standards for cost-effective and efficient design and construction contracting, management, oversight, and review;

(d) Assignment of agency staff and administrative costs to major capital construction projects and the relationship of such agency costs to project delivery;

(e) Extent of the practice of including equipment as part of the basic capital project costs, and how equipment costs are estimated and evaluated for inclusion in projects; and

(f) Comparison of costs to public and private sector benchmarks, when available and where appropriate, in establishing cost parameters for state capital construction projects.

(2) To the extent resources permit, the audit shall include a review of public works projects utilizing the general contractor/construction manager procedure. This may include: An inventory of the state agencies and local jurisdictions that have used the general contractor/construction manager procedure, including the number, size, type, and cost of public works projects built or being built using the procedure; an examination of the ways the general contractor/construction manager procedure may affect public benefits and costs associated with public works projects; and, if feasible, based on a sample of public works projects built after June 9, 1994, an analysis of the costs and benefits of using the general contractor/construction manager procedure as opposed to other public works contracting procedures.

(3) State agencies, including state public higher education institutions, shall provide any requested information concerning the planning, selection, design, contracting, implementation, management, costs, performance, and outcomes of projects to the joint legislative audit and review committee in a timely manner, including relevant proprietary information that may be associated with individual firms. However, any proprietary information provided to the committee for this performance audit shall be deemed confidential and shall not be subject to public disclosure.

(4) In conducting this performance audit, the committee shall work closely with the appropriate legislative fiscal committees and shall consult with the office of financial management, the department of general administration, the department of corrections, the department of social and health services, the higher education coordinating board, the state board for community and technical colleges, individual higher education institutions, and other agencies as appropriate. The committee may contract for consulting services in conducting this performance audit. In its final report, the committee shall make recommendations as appropriate. The committee shall provide a progress report to the appropriate legislative committees by January 9, 2004, and a final report by January 8, 2005.

**NEW SECTION. Sec. 924.** The joint legislative audit and review committee, in collaboration with the legislative evaluation and accountability program, shall accomplish the following higher education comparable framework tasks and projects during the 2003-05 biennium:

(1) Fill in comparable framework gaps related to infrastructure.

(a) Develop inventory and condition protocols/standards;

(b) Develop infrastructure cost factors;

(c) Facilitate institution data collection and reporting;

(d) Field-verify data on a sample basis;

(e) Develop translation protocols;

(f) Translate data and populate comparable framework.

(2) Explore the feasibility of including dates of renewal and replacement of major building systems in the comparable framework.

(a) Develop protocols/standards;

(b) Facilitate institution data collection and reporting;

(c) Field-verify data on a sample basis;

(d) Develop translation protocols;

(e) Translate data and populate comparable framework.

(3) Explore how the comparable framework could be expanded to facility modernization.

(a) Analyze the feasibility of and approaches to quantifying modernization backlogs across institutions;

(b) Describe current modernization rating processes used by individual institutions including how they fit into master plans, program delivery choices, and other manifestations related to the development of requests for capital support from the state;

(c) Explore models used in other government sectors;

(d) Assess benefits and costs of potential approaches.

(4) Explore how to integrate the comparable framework with governmental accounting standards for accountability related to the efficiency and effectiveness of managing public assets.

(5) Revise and update the comparable framework data base.

(a) Modify and/or develop, as needed, tables, queries, and reports;

(b) Develop reporting capabilities to share data with other legislative agencies, the office of financial management, the higher education coordinating board, the state board for community and technical colleges, and state institutions of higher education.

In executing these tasks, the joint legislative audit and review committee shall seek technical advice and input from stakeholder groups including but not limited to the office of financial management, the higher education coordinating board, the state board for community and technical colleges, and the council of presidents.

As a general condition upon appropriations provided to higher education institutions in part five of this act, higher education institutions, the higher education coordinating board, the office of financial management, and the state board for community and technical colleges shall provide any requested information to the joint legislative audit and review committee in a timely manner to enable its completion of the above tasks and projects so assigned.

**NEW SECTION. Sec. 925.** (1) In concert with a commitment to increase higher education funding levels significantly above historic levels in this biennium and the following two biennia for primarily access-related projects, the legislature is directing a substantial share of state capital resources to reduce the backlog in facility preservation, focusing on the worst and most critical facilities first. The first commitment is dependent on the latter. To that end and through this act, the legislature begins to address findings and recommendations from the higher education preservation study by the joint legislative audit and review committee, report 03-1, by taking the following actions:

(a) The 2003 legislature affirms that proactive and ongoing facility maintenance, properly supported, can prevent and mitigate preservation backlogs and maximize the useful life of physical assets supported by, used by, and beneficial to state taxpayers. As a step toward that end, the legislature appropriates in this act a portion of the facilities operating and maintenance costs for building maintenance traditionally appropriated in the omnibus operating budget. This is done in "preventative facility maintenance and building system repairs" sections for each four-year institution and the community and technical college system.

(b) The 2003 legislature affirms the importance of reducing the significant higher education preservation backlog, of instilling a greater sense of stewardship regarding these important state assets, and of preventing the current backlog from reoccurring. The legislature recognizes that the preservation backlog took many years to develop and will take several years to address. The legislature intends that each higher education institution and the community and technical college system stabilize and improve the average facility condition index as compared to levels reported by the higher education preservation study in January 2003.

(c) The 2003 legislature affirms the importance of continuing to address these preservation issues, including developing a comparable framework. Section 924 of this act (JLARC work) is intended to build a foundation for capital budget policy and funding deliberations in the 2005-07 biennium, and beyond.

(2) The emphasis on higher education facility preservation described in subsections (1)(a) and (b) of this section provide extra resources for projects that traditionally fall into minor works categories for "preservation" and "health/safety/code requirements" but not to the exclusion of providing state capital funds for minor works "program" and "infrastructure preservation" projects, separately appropriated. The legislature intends to review infrastructure needs for college and university campuses comprehensively, with the assistance of the joint legislative audit and review committee, the office of financial management, and stakeholder institutions and boards during the interim leading up to the 2005-07 biennium. Until comprehensive, comparable data is collected to inform deliberations, higher education institutions may find it necessary to use local, nonappropriated resources to augment 2003-05 biennial funds given the legislature's intent and focus in this act on the deferred renewal needs of aging college facilities. Nonappropriated resources should be used to help meet preservation needs in the spirit of recommendation 3 from the joint legislative audit and review committee's report 03-1.

(3) For projects that address significant preservation needs through major renovations or replacement facilities and that also enhance access by maintaining or improving the usefulness of existing space for important programs, the Gardner-Evans initiative may be appropriate to help fund these projects.

(4) For the purposes of this section and sections that specifically refer to this section by number, the following definitions apply unless the context clearly requires otherwise:

(a) "Auxiliary programs" in the context of higher education means those that are secondary to the missions of state institutions and, being enterprise in character, draw supporting revenue from user fees and charges. Examples include housing and dining; food services; vehicular parking; infirmaries; hospitals; recreation and student-activity centers; campus stores retailing textbooks, supplies, clothing, and objects bearing institutional logos or emblems; and media reproduction centers, among others.

(b) "Average facility condition index" means the index developed in the joint legislative audit and review committee's report number 03-1.

## Regarding industrial insurance hearing loss claims.

The bill was read the second time.

Representative Conway moved the adoption of the following amendment (613):

Strike everything after the enacting clause and insert the following:

"**Sec. 1.** RCW 51.28.055 and 1984 c 159 s 2 are each amended to read as follows:

(1) Except as provided in subsection (2) of this section, claims for occupational disease or infection to be valid and compensable must be filed within two years following the date the worker had written notice from a physician: ~~((1))~~ (a) Of the existence of his or her occupational disease, and ~~((2))~~ (b) that a claim for disability benefits may be filed. The notice shall also contain a statement that the worker has two years from the date of the notice to file a claim. The physician shall file the notice with the department. The department shall send a copy to the worker and to the self-insurer if the worker's employer is self-insured. However, a claim is valid if it is filed within two years from the date of death of the worker suffering from an occupational disease.

(2)(a) Except as provided in (b) of this subsection, to be valid and compensable, claims for hearing loss due to prolonged or repeated exposure to occupational noise must be filed within the earlier of the following:

(i) The time limits specified in subsection (1) of this section; or

(ii) The later of two years after the date that the worker retires from the work force or one year after the effective date of this section. A worker is presumed to be retired from the work force when he or she no longer receives income, salary, or wages from any employment that is regular, continuous, and gainful.

(b) A claim for hearing loss due to prolonged or repeated exposure to occupational noise that is not timely filed under (a) of this subsection may be allowed only for medical aid benefits under chapter 51.36 RCW.

(3) The department may adopt rules to implement this section.

**Sec. 2.** RCW 51.36.020 and 1999 c 395 s 1 are each amended to read as follows:

(1) When the injury to any worker is so serious as to require his or her being taken from the place of injury to a place of treatment, his or her employer shall, at the expense of the medical aid fund, or self-insurer, as the case may be, furnish transportation to the nearest place of proper treatment.

(2) Every worker whose injury results in the loss of one or more limbs or eyes shall be provided with proper artificial substitutes and every worker, who suffers an injury to an eye producing an error of refraction, shall be once provided proper and properly equipped lenses to correct such error of refraction and his or her disability rating shall be based upon the loss of sight before correction.

(3) Every worker whose accident results in damage to or destruction of an artificial limb, eye, or tooth, shall have same repaired or replaced.

(4) Every worker whose hearing aid or eyeglasses or lenses are damaged, destroyed, or lost as a result of an industrial accident shall have the same restored or replaced. The department or self-insurer shall be liable only for the cost of restoring damaged hearing aids or eyeglasses to their condition at the time of the accident.

(5)(a) All mechanical appliances necessary in the treatment of an injured worker, such as braces, belts, casts, and crutches, shall be provided and all mechanical appliances required as permanent equipment after treatment has been completed shall continue to be provided or replaced without regard to the date of injury or date treatment was completed, notwithstanding any other provision of law.

(b) The department shall assess the benefits to workers and the costs of emerging technologies in determining which hearing devices are provided to workers under this title. Such new technology shall be made available to workers requiring new or replacement devices as deemed appropriate based on the department's assessment.

(6) A worker, whose injury is of such short duration as to bring him or her within the time limit provisions of RCW 51.32.090, shall nevertheless receive during the omitted period medical, surgical, and hospital care and service and transportation under the provisions of this chapter.

(7) Whenever in the sole discretion of the supervisor it is reasonable and necessary to provide residence modifications necessary to meet the needs and requirements of the worker who has sustained catastrophic injury, the department or self-insurer may be ordered to pay an amount not to exceed the state's average annual wage for one year as determined under RCW 50.04.355, as now existing or hereafter amended, toward the cost of such modifications or construction. Such payment shall only be made for the construction or modification of a residence in which the injured worker resides. Only one residence of any worker may be modified or constructed under this subsection, although the supervisor may order more than one payment for any one home, up to the maximum amount permitted by this section.

(8)(a) Whenever in the sole discretion of the supervisor it is reasonable and necessary to modify a motor vehicle owned by a worker who has become an amputee or becomes paralyzed because of an industrial injury, the supervisor may order up to fifty percent of the state's average annual wage for one year, as determined under RCW 50.04.355, to be paid by the department or self-insurer toward the costs thereof.

(b) In the sole discretion of the supervisor after his or her review, the amount paid under this subsection may be increased by no more than four thousand dollars by written order of the supervisor.  
 (9) The benefits provided by subsections (7) and (8) of this section are available to any otherwise eligible worker regardless of the date of industrial injury.

Complete loss of hearing in both ears	43,200.00
Complete loss of hearing in one ear	7,200.00

(b) Beginning on July 1, 1993, compensation under this subsection shall be computed as follows:

(i) Beginning on July 1, 1993, the compensation amounts for the specified disabilities listed in (a) of this subsection shall be increased by thirty-two percent; and

(ii) Beginning on July 1, 1994, and each July 1 thereafter, the compensation amounts for the specified disabilities listed in (a) of this subsection, as adjusted under (b)(i) of this subsection, shall be readjusted to reflect the percentage change in the consumer price index, calculated as follows: The index for the calendar year preceding the year in which the July calculation is made, to be known as "calendar year A," is divided by the index for the calendar year preceding calendar year A, and the resulting ratio is multiplied by the compensation amount in effect on June 30 immediately preceding the July 1st on which the respective calculation is made. For the purposes of this subsection, "index" means the same as the definition in RCW 2.12.037(1).

(c) For occupational disease claims filed on or after the effective date of this section, compensation for permanent partial disabilities for hearing loss due to prolonged or repeated exposure to occupational noise shall be paid at an amount equal to seventy-five percent of the monetary value of such disability under this section.

(2) Compensation for amputation of a member or part thereof at a site other than those specified in subsection (1) of this section, and for loss of central visual acuity and loss of hearing other than complete, shall be in proportion to that which such other amputation or partial loss of visual acuity or hearing most closely resembles and approximates. Compensation shall be calculated based on the adjusted schedule of compensation in effect for the respective time period as prescribed in subsection (1) of this section.

(3)(a) Compensation for any other permanent partial disability not involving amputation shall be in the proportion which the extent of such other disability, called unspecified disability, shall bear to the disabilities specified in subsection (1) of this section, which most closely resembles and approximates in degree of disability such other disability, and compensation for any other unspecified permanent partial disability shall be in an amount as measured and compared to total bodily impairment. To reduce litigation and establish more certainty and uniformity in the rating of unspecified permanent partial disabilities, the department shall enact rules having the force of law classifying such disabilities in the proportion which the department shall determine such disabilities reasonably bear to total bodily impairment. In enacting such rules, the department shall give consideration to, but need not necessarily adopt, any nationally recognized medical standards or guides for determining various bodily impairments.

(b) Until July 1, 1993, for purposes of calculating monetary benefits under (a) of this subsection, the amount payable for total bodily impairment shall be deemed to be ninety thousand dollars. Beginning on July 1, 1993, for purposes of calculating monetary benefits under (a) of this subsection, the amount payable for total bodily impairment shall be adjusted as follows:

(i) Beginning on July 1, 1993, the amount payable for total bodily impairment under this section shall be increased to one hundred eighteen thousand eight hundred dollars; and

(ii) Beginning on July 1, 1994, and each July 1 thereafter, the amount payable for total bodily impairment prescribed in (b)(i) of this subsection shall be adjusted as provided in subsection (1)(b)(ii) of this section.

(c) Until July 1, 1993, the total compensation for all unspecified permanent partial disabilities resulting from the same injury shall not exceed the sum of ninety thousand dollars. Beginning on July 1, 1993, total compensation for all unspecified permanent partial disabilities resulting from the same injury shall not exceed a sum calculated as follows:

(i) Beginning on July 1, 1993, the sum shall be increased to one hundred eighteen thousand eight hundred dollars; and

(ii) Beginning on July 1, 1994, and each July 1 thereafter, the sum prescribed in (b)(i) of this subsection shall be adjusted as provided in subsection (1)(b)(ii) of this section.

(4) If permanent partial disability compensation is followed by permanent total disability compensation, any portion of the permanent partial disability compensation which exceeds the amount that would have been paid the injured worker if permanent total disability compensation had been paid in the first instance, shall be deducted from the pension reserve of such injured worker and his or her monthly compensation payments shall be reduced accordingly.

(5) Should a worker receive an injury to a member or part of his or her body already, from whatever cause, permanently partially disabled, resulting in the amputation thereof or in an aggravation or increase in such permanent partial disability but not resulting in the permanent total disability of such worker, his or her compensation for such partial disability shall be adjudged with regard to the previous disability of the injured member or part and the degree or extent of the aggravation or increase of disability thereof.

(6) When the compensation provided for in subsections (1) through (3) of this section exceeds three times the average monthly wage in the state as computed under the provisions of RCW 51.08.018, payment shall be

made in monthly payments in accordance with the schedule of temporary total disability payments set forth in RCW 51.32.090 until such compensation is paid to the injured worker in full, except that the first monthly payment shall be in an amount equal to three times the average monthly wage in the state as computed under the provisions of RCW 51.08.018, and interest shall be paid at the rate of eight percent on the unpaid balance of such compensation commencing with the second monthly payment. However, upon application of the injured worker or survivor the monthly payment may be converted, in whole or in part, into a lump sum payment, in which event the monthly payment shall cease in whole or in part. Such conversion may be made only upon written application of the injured worker or survivor to the department and shall rest in the discretion of the department depending upon the merits of each individual application. Upon the death of a worker all unpaid installments accrued shall be paid according to the payment schedule established prior to the death of the worker to the widow or widower, or if there is no widow or widower surviving, to the dependent children of such claimant, and if there are no such dependent children, then to such other dependents as defined by this title.

(7) Except as otherwise provided in this section, awards payable under this section are governed by the schedule in effect on the date of injury.

**NEW SECTION. Sec. 4.** A new section is added to chapter 51.32 RCW to read as follows:

A claim for hearing loss due to prolonged or repeated exposure to occupational noise is allowed under this title only if it otherwise satisfies the definition of occupational disease under RCW 51.08.140.

**NEW SECTION. Sec. 5.** Section 1 of this act applies to all claims filed on or after the effective date of this section for hearing loss due to prolonged or repeated exposure to occupational noise regardless of the date of injurious exposure."

Sincerely,

Chief Clerk

### **ELECTION OF CHIEF CLERK**

Representative Kessler: "Thank you Mr. Speaker. It is an honor to nominate Rich Nafziger as Chief Clerk of the Washington State House of Representatives.

Rich and I go back many years. In fact, before I was elected to the State House, Rich arrived in Grays Harbor from Olympia to work with a battered and bruised community. He offered his hand...the hand of government . . . "Hi, I'm Rich Nafziger, I'm from the government and I'm here to help you." I thought at the time, what a brave man he was to come to timber country and offer to help pick up the pieces. A daunting task at best since my community was in a fairly hostile mood over decisions that were made by government. Decisions that drove the unemployment rate in Grays Harbor up to 19% by 1993.

Well here we are, over a decade later and I am nominating this same man to serve as Chief Clerk for the Washington State House of Representatives. A very critical and important administrative job to be sure. But also a job that requires someone who can work with both sides of the aisle to ensure that the institution is protected at all times. That the employees and members feel valued and respected. That our ever shrinking dollars are spent wisely and efficiently. A daunting task but one Rich is certainly up to.

He emerged from his job in timber country unscathed and with the respect of the community. I know he will give the same energy, respect and expertise to the job of Chief Clerk. I am confident that we can look to him for leadership and a commitment to our beloved House of Representatives. He is a man of honor, a man of compassion, a proven leader and administrator and, more importantly, a good listener. A skill that will go a long way in performing the myriad of tasks required of this job and the diverse cast of characters that make up the House of Representatives.

Please join me in voting for Rich Nafziger as the Chief Clerk of the Washington State House of Representatives.

Thank you."

Representative Clements: "Thank you, Mr. Speaker. I am pleased to second and proud to support the nomination of Rich Nafziger for Chief Clerk. Rich and I met in 1996 and have been professional friends since then. I know his political adventure and career began as a nonpartisan employee of the House Appropriations Committee twenty years ago. And as mentioned, he worked for Governor Gardner on the timber issues that impacted this State dramatically in the 80's and 90's.

My introduction to Rich was in 1996. He was the liaison for Governor Locke when it came to farm worker issues, unemployment issues and work force training. In all these years, we've never had an argument, Mr. Speaker. We both decided early on that success on some of these tough issues was to be determined by genuine concern rather than politics. Rich is a man that will work for this body building bridges rather than burning them. He has always worked, Mr. Speaker, with fairness and an open mind. I know even today very little is for certain in this world that you and I live in, but I do know that Rich will serve this body well and with honor.

Thank you."

Representative Kessler moved that the nominations for Chief Clerk be closed. The motion carried.

Representative Kessler moved that by a unanimous voice vote, Richard Nafziger be elected as Chief Clerk of the House. The motion carried.

The Speaker asked Representatives Kessler and Clements to escort Richard Nafziger to the Rostrum.

Supreme Court Justice Tom Chambers administered the Oath of Office to Richard Nafziger.

Chief Clerk Richard Nafziger: "Thank you Mr. Speaker. Thank you Justice Chambers. Thank you Representative Kessler and Representative Clements for your kind words.

Mr. Speaker, I am truly honored to be here. And I am pleased that my family is here, too. I'd like to thank my wife Kristin Swenddal, and my daughters, Tess and Mia, for coming today, and for all their support.

I recognize that my service will be one very small moment in the long history of this institution. This moment was made possible by all those who have come before me, and who have built the standards of civility, transparency, and mutual respect that make democracy possible. So I want to acknowledge an enormous debt of gratitude to all those who have held this office before me.

I want to thank both staff and members for their hard work, and for sharing the special experience of making Washington history.

I also want to express my commitment to respect the important role of the minority party. Debate and dissent are the lifeblood of the democratic tradition. A strong and vocal minority is essential to the rigor and integrity of the legislative process, and to the full representation of Washington's citizens.

Again, thank you very much for entrusting me with the administration of this institution, and for your devotion to the practice of democracy."

The Speaker requested the Sergeant-at-Arms to escort Justice Chambers from the Chambers.
