Nets with a mesh size different from that being actively fished must be properly stored. A properly stored net is defined as a net on a drum that is fully covered by a tarp (canvas or plastic) and bound with a minimum of ten revolutions of rope that is 3/8 (0.375) inches or greater.

It is unlawful to use a gillnet to fish for salmon or white sturgeon if the lead line weighs more than two pounds per fathom of net as measured on the cork line. It is permissible to have a gillnet with a lead line weighing more than two pounds per fathom aboard a vessel when the vessel is fishing in or transiting through Grays Harbor.

Other:

(3) Recovery boxes and soak times:

(a) For Areas 2A and 2D, soak time must not exceed 45 minutes. Soak time is defined as the time elapsed from when the first of the gillnet web is deployed into the water until the gillnet web is fully retrieved from the water.

(b) Any steelhead or salmon that is required to be released and is bleeding or lethargic must be placed in a recovery box prior to being released to the river/bay. The recovery box must meet the requirements in (d) of this subsection.

(c) All fish placed in recovery boxes must be released to the river/bay prior to landing or docking.

(d) Each boat must have two operable recovery boxes or one box with two chambers on board when fishing Areas 2A and 2D. Each box must be operating during any time the net is being retrieved or picked. The flow in the recovery box must be a minimum of 16 gallons per minute in each chamber of the box, not to exceed 20 gallons per minute. Each chamber of the recovery box must meet the following dimensions as measured from within the box: The inside length measurement must be at or within 39-1/2 inches to 48 inches, the inside width measurements must be at or within 8 to 10 inches, and the inside height measurement must be at or within 14 to 16 inches.

Each chamber of the recovery box must include a water inlet hole between 3/4 inch and 1 inch in diameter, centered horizontally across the door or wall of the chamber and 1-3/4 inches from the floor of the chamber. Each chamber of the recovery box must include a water outlet hole opposite the inflow that is at least 1-1/2 inches in diameter. The center of the outlet hole must be located a minimum of 12 inches above the floor of the box or chamber. The fisher must demonstrate to department employees, fish and wildlife enforcement officers, or other peace officers, upon request, that the pumping system is delivering the proper volume of fresh river/bay water into each chamber.

(5) Fishers must take department observers if requested by department staff when participating in these openings. Fishers also must provide notice of intent to participate by contacting Quick Reporting by phone, fax or e-mail. Notice of intent must be given prior to 12:00 p.m. on August 15, 2012, for openings in Area 2C. Notice of intent must be given prior to 12:00 p.m. on September 26, 2012, for openings in Areas 2A and 2D.

(6) Retention of any species other than Chinook, coho, and chum, and white sturgeon with a fork length measure of not less than 43 inches and not more than 54 inches, is prohibited in Area 2C.

(7) Retention of any species other than coho salmon, white sturgeon with a fork length measure of not less than 43 inches and not more than 54 inches, and hatchery Chinook marked by a healed scar at the site of the adipose fin, is prohibited in Areas 2A and 2D from October 1 through October 20, 2012. Fishers may have wholesale dealers use the "buyer only" portion of the fish ticket and include encounters with each day's quick reporting.

(9) White sturgeon, when lying on their side, are measured from the tip of the nose to the fork of the tail. This measurement is referred to as the fork length. All white sturgeon to be retained must have a fork length measure of no less than 43 inches and no more than 54 inches.

(10) Do NOT remove tags from white sturgeon that are not allowed to be retained. For white sturgeon that can be retained, please submit tags to the Washington Department of Fish and Wildlife, 48 Devonshire Rd., Montesano, WA 98563. For white sturgeon not of a legal size and all green sturgeon, obtain available information from tags without removing the tags.

(11) It is unlawful to fish for salmon with gillnet gear in Areas 2A, 2C, and 2D unless the vessel operator has attended a "Fish Friendly" best fishing practices workshop and has in his or her possession a department-issued certification card.
