Chapter 434-261 WAC
COUNTING CENTER PROCEDURES
(Formerly chapter 434-61 WAC)

WAC 434-261-005 Definitions. (1) "Manual inspection" is the process of inspecting each voter response position on each voted ballot. Inspection is performed as part of the initial processing;
(2) "Duplicating ballots" is the process of making a true copy of valid votes from ballots that may not be properly counted by the vote tallying system. Ballots may be duplicated on blank ballots or by making changes on an electronic image of the ballot. The original ballot may not be altered in any way;
(3) "Readable ballot" is any ballot that the certified vote tallying system can accept and read as the voter intended without alteration, and that meets the standards of the county canvassing board subject to the provisions contained in this title;
(4) "Unreadable ballot" is any ballot that cannot be read by the vote tallying system as the voter intended without alteration. Unreadable ballots may include, but not be limited to, ballots with damage, write-in votes, incorrect or incomplete marks, and questions of voter intent. Unreadable ballots may subsequently be counted as provided by these administrative rules;
(5) "Valid signature" on a ballot declaration for a registered voter eligible to vote in the election is:
(a) A signature verified against the signature in the voter registration file; or
(b) A mark witnessed by two people.
(6) "Overvote" is votes cast for more than the permissible number of selections allowed in a race or measure. An overvoted race or measure does not count in the final tally of that race or measure. Example of an overvote would be voting for two candidates in a single race with the instruction, "vote for one."
(7) "Undervote" is no selections made for a race or measure.
(8) "Election observers" means those persons designated by the county political party central committee chairperson to observe the counting of ballots and related elections procedures.
(9) "Seal log" is a log documenting each time a numbered seal is attached or removed from a ballot container. The log must include the seal number, date, and identifying information of persons attaching or removing the seal. Following certification of the election, the seal log must include docu-
mentation as to why the seal was removed from a ballot container.

WAC 434-261-007 Broken or missing seals. If a seal is missing or broken without authority, all subsequent steps taken must be documented and included in a report to the canvassing board.

[Statutory Authority: RCW 29A.04.611. 06-14-050, § 434-261-007, filed 6/28/06, effective 7/29/06.]

WAC 434-261-010 Counting Center Procedures. The county auditor shall designate a location to serve as the counting center. If that location is other than the county auditor’s office or county election office, the auditor shall include the location of the counting center in the published notice of elections. The county auditor shall be responsible for all counting center functions. Within the counting center, no person except those authorized by the county auditor may touch any ballot or ballot container, or operate a vote tallying system. The auditor shall identify either by roster or identification tag, or both, those persons so authorized. The vote tallying process shall be open to the public to the extent that public observation does not interfere with the proceedings or jeopardize the security of the ballots. The auditor shall establish local administrative rules pertaining to public observers including the media and how they may be accommodated and the necessary limitations thereto.

WAC 434-261-020 Political party observers. Counting center operations shall be observed by at least one representative from each political party, if representatives have been appointed by the respective political parties and those representatives are present while the counting center is in operation.

Prior to the primary or election, the county auditor shall determine the number of observers required in order to observe all aspects of the counting center proceedings, and shall request, in writing, that each major political party appoint representatives to fill the requirements. Where more than one observer is to be appointed, the political party shall designate one of their observers as supervisor. The county auditor may require observers to receive training with respect to ballot processing procedures and the vote tallying system.

Before final assignment as observers, major political party representatives so appointed shall be reviewed by the county auditor, who may refuse to approve any person so appointed. In the event the auditor rejects a person designated, he or she shall promptly notify the political party concerned and request that a substitute observer be appointed, and shall ensure that the substitute observer is trained.

Representatives of the major political parties appointed as observers shall be identified by roster, including assigned observer stations if more than one in the counting center, and by identification tags which will indicate the observer’s name and the party represented.

WAC 434-261-045 Secure storage. Received ballots and ballot images must be maintained in secure storage except during processing, duplication, inspection by the canvassing board, or tabulation. Secure storage must employ the use of numbered seals and logs, or other security measures that will detect any inappropriate access to the secured materials. Ballots and ballot images may only be accessed in accordance with RCW 29A.60.110 and 29A.60.125.

[Statutory Authority: RCW 29A.04.611. 09-03-110, § 434-261-045, filed 1/21/09, effective 2/21/09; 06-11-042, § 434-261-045, filed 5/10/06, effective 6/10/06. Statutory Authority: RCW 29A.04.611, 29A.04.530. 06-02-028, § 434-261-045, filed 12/28/05, effective 1/28/06.]

WAC 434-261-050 Unsigned ballot declaration or mismatched signatures. (1) If a voter neglects to sign a ballot declaration, signs with a mark and fails to have two witnesses attest to the signature, or signs but the signature on the ballot declaration does not match the signature on the voter registration record, the county auditor shall notify the voter by first class mail of the correct procedures for curing the signature. If the ballot is received during the last three business days before the final meeting of the canvassing board, or the voter has been notified by first class mail and has not responded by the last three business days before the final meeting of the canvassing board, the county auditor must attempt to notify the voter by telephone using information in the voter registration record.

(2) If the voter neglects to sign, or signs with a mark and fails to have two witnesses attest to the signature, the voter must either:

(a) Appear in person and sign the declaration no later than the day before certification of the primary or election; or

(b) Sign a copy of the declaration, or mark the declaration in front of two witnesses, and return it to the county auditor no later than the day before certification of the primary or election.

(3) If the signature on the declaration does not match the signature on the voter registration record, the voter must either:

[Ch. 434-261 WAC—p. 2] (7/2/12)
(a) Appear in person and sign a new registration form no later than the day before certification of the primary or election. The updated signature provided on the registration form becomes the signature in the voter registration record for the current election and future elections; or

(b) Sign a signature update form that includes both the ballot declaration required by WAC 434-230-015 and the voter registration oath required by RCW 29A.08.230, and return it to the county auditor no later than the day before certification of the primary or election. The signature on the signature update form must match the signature on the returned ballot declaration. The signature provided on the signature update form becomes the signature in the voter registration record for the current election and future elections.

(4)(a) If the signature on the declaration does not match the signature on the registration record because the last name is different, the ballot may be counted as long as the first name and handwriting are clearly the same. If it appears that the voter has changed his or her name, and the information required under RCW 29A.08.440 to complete a name change is not provided or is illegible, the county auditor shall send the voter a change-of-name form under RCW 29A.08.440 and direct the voter to complete the form.

(b) If the signature on the ballot declaration does not match the signature on the registration record because the voter signed with a middle name, nickname, or initials, the ballot may be counted as long as the last name and handwriting are clearly the same.

(5) If the name on the signature does not match the printed name, and the signature on the ballot declaration does not match the signature on the voter registration record, because the ballot was signed by another registered voter, the ballot may be counted for the registered voter who actually signed the ballot declaration if:

(a) The voter who signed the declaration can be identified;

(b) The signature on the declaration matches the signature on the voter registration record; and

(c) The voter who signed the declaration has not returned another ballot.

The county auditor may only count the races and measures for which the voter who signed the declaration is eligible to vote.

(6) If it is determined that the signature on a ballot declaration does not match the signature on the registration record and, prior to 8:00 p.m. on election day, the registered voter asserts that the signature on the ballot declaration is not his or her signature, the voter may be provided the opportunity to vote a replacement ballot.

(7) A voter may not cure a missing or mismatched signature for purposes of counting the ballot in a recount.

(8) A record must be kept of all ballots with missing and mismatched signatures. The record must contain the date on which the voter was contacted or the notice was mailed, as well as the date on which the voter subsequently submitted a signature to cure the missing or mismatched signature. That record is a public record under chapter 42.56 RCW and may be disclosed to interested parties on written request.

WAC 434-261-055 Returned ballot lacking verification of identity. If a voter who is provisionally registered and must still verify his or her identity as part of the registration process casts a ballot without providing adequate identification, the ballot cannot be counted unless the voter provides adequate identification no later than the day before certification of the election.

WAC 434-261-086 Statewide standards on what is a vote. (1) Pursuant to 42 U.S.C. § 15481(a)(6) and Bush v. Gore, 531 U.S. 98 (2000), the following standards determine whether irregular marks on a ballot constitute a valid vote that may be counted.

(a) Target area. Any marks made in the target area shall be counted as valid votes, with the exceptions below. Any marks made outside of the target area shall be valid only if they fulfill the consistent pattern requirements in (b) of this subsection. Marks that trace or outline the target area are not valid votes unless they fulfill the consistent pattern requirements in (b) of this subsection. Exceptions:

(i) Obvious stray marks.

(ii) Hesitation marks.

(iii) Parts of written notes.

(iv) Corrected votes, as described in (c) and (e) of this subsection.

(b) Consistent pattern. Marks made outside of the target area shall only be counted as valid votes if a consistent pattern of marks is used throughout the whole ballot. This means that all races and issues for which the voter has indicated a choice must have the same mark. If some marks are in the target area and some are not, but the same type of mark is used in a consistent pattern throughout the whole ballot, all such marks shall be counted as valid votes. If the marks strike through candidate names or ballot measure responses in a consistent pattern throughout the whole ballot, all such marks shall be counted as valid votes.

(c) Corrected votes. As described in (c) and (e) of this subsection.

(i) If the voter has followed the instructions for correcting a vote, the stricken vote shall not be counted.

(ii) If a second choice is marked, it shall be counted as a valid vote. If a second choice is not marked, the race shall be considered undervoted.

(iii) If the voter has marked two target areas and placed an 'X' over one of the marked areas, the choice without the 'X' shall be counted as a valid vote.

(d) Not a correction. If the voter has marked a choice correctly and placed an 'X' in the same target area, but has not marked a second target, it shall be counted as a valid vote. Changes made by the voter to wording printed on the ballot will not invalidate votes cast for that race or measure.

(e) Written instructions. If the voter has attempted to correct a vote and provides written instruction regarding his or her intent, it shall be counted as the voter intended. Written instruction includes words, circles, or arrows.

(f) Identifying marks. Marks identifying the voter, such as initials, signatures, or addresses do not disqualify a ballot.

(g) Overvotes. Races or issues that have more target areas marked than are allowed are overvotes. No votes for that race or issue shall be counted. An exception is write-in votes for a candidate already printed on the ballot, as provided in (i) of this subsection.

(h) Write-in: Blank target area. If a name is written on a write-in line, it shall be counted as a valid write-in vote regardless of whether the corresponding target area is marked.

(i) Write-in: Already on the ballot. If the name of a candidate who is already printed on the ballot is written in, that vote shall not be tallied as an overvote, but shall be counted as a valid vote for the printed candidate. This applies even if both target areas are marked or no target areas are marked.

(j) Write-in: Name variations. If a write-in vote is cast for a declared write-in candidate using a commonly recognizable nickname or spelling variation, it shall be counted as a valid vote for that candidate.

(k) Write-in: Blank line. If the write-in target area is marked, but no name is written on the line, it shall not be counted as a valid vote, even though it may be tallied as a write-in vote by the tabulation system.

(l) Write-in: Blank line and candidate. If a candidate's target area is marked, and the write-in target area is marked but no name is written on the line, it shall not be tallied as an overvote, but shall be counted as a valid vote for the printed candidate.

(m) Write-in: Name combinations. If a write-in vote is cast for a candidate with a combination of names already on the ballot, it shall not be counted as a vote for either printed candidate, but rather shall be counted as a valid vote for the name as written.

(n) Write-in: Overvotes. If a candidate's target area is marked and something other than that candidate's name is written in the write-in response area, it shall be counted as an overvote and not a valid vote for any candidate. This applies whether or not the target area for the write-in is marked.

(o) Write-in: Not eligible. A write-in vote for a race not appearing on the voter's ballot shall not be counted.

Exception: If a provisional ballot has been cast and the voter has written in an office or measure that is not on the ballot, that vote shall be counted if it is determined, based on the voter's registration, that he or she is eligible to vote for that office or measure.

(p) Write-in: Vote in the wrong place. A write-in vote for a race appearing elsewhere on the ballot shall be counted as a valid vote, as long as all other requirements are fulfilled and the office, position number and political party, if applicable, are clearly indicated.

(q) Messy marks. When otherwise valid votes marked for a candidate partially extend into the response area of another candidate, it shall be counted as a vote if most of the mark is in the proper area and intent can easily be discerned.

(r) Pattern of partisan voting. Voter intent in any single contest shall not be determined based on a pattern of partisan voting on the ballot.

(s) Anything else. Voter intent on questionable marks not covered by the rules in this manual must be determined by county canvassing boards according to all applicable laws of the state of Washington and the canvassing board manual. Where more than one rule may apply, the county canvassing board has authority to determine which rule is most appropriate.

(2) The secretary of state shall publish an illustrated version of these standards in each optical scan and digital scan voting system used in the state. The secretary of state shall distribute the illustrated version to each county canvassing board and post it on the web site.
WAC 434-261-100 Ballot duplication procedures. Written procedures shall be established detailing the situations in which ballots may be duplicated. These procedures shall be included as a part of the county canvassing board manual.

WAC 434-261-102 Resolving ballots on digital scan vote tallying systems. In counties tabulating ballots on a digital scan vote tallying system, two staff designated by the auditor's office must resolve ballots identified as requiring resolution. A log of the resolutions must be printed linking staff conducting the resolutions to the ballots resolved. The log must be signed by the two staff.

WAC 434-261-106 Manual counting of ballots. Procedures for manual counting of ballots shall be substantially the same as a manual recount according to chapter 434-264 WAC.

WAC 434-261-110 Election results anomalies. Precinct results, showing overvotes and undervotes, shall be inspected by the county canvassing board, or their designees, for anomalies that may indicate problems with the hardware or programming used to tabulate the votes. Anomalies may include, but are not limited to, an abnormal number of overvotes, undervotes, vote distribution, and voter turnout in any precinct, race, or jurisdiction. This inspection shall be completed within two days of the election.

Additionally, these results shall be used in the reconciliation process required in chapter 434-260 WAC.

WAC 434-261-120 Referral of questionable ballots to canvassing board. Whenever counting center personnel has a question about the validity of a ballot or the votes contained on the ballot that they are unable to resolve, the ballot shall be forwarded to the canvassing board for review. The facts giving rise to the question of validity must be noted.

Ballots being held for determination of validity or voter's intent shall be provided the same security as regular voted ballots and shall be kept in a secure area when not being processed.

WAC 434-261-125 Free access system for provisional ballots. (1) Each county shall establish a free access system, as required by the Help America Vote Act, 42 U.S.C. sec. 15482 (a)(5), and RCW 29A.60.195 for provisional ballot voters.

(2) The free access system must employ measures to ensure that access is free of cost to the voter and restricted to the individual who cast the ballot, and that the voter's personal information is secure and confidential.

(3) For provisional ballots sent to other counties in the state, the free access system must provide the voter with information as to where the ballot was sent and how to find out if the ballot was counted in that county.

(4) For ballots received from another county, the free access system must provide the voter with information as to whether the ballot was counted and, if not, why. The county may send instructions to the voter on how to access the information.

(5) Provisional ballot disposition information must be available on a county’s free access system no later than one week following certification of the election.

WAC 434-261-130 Opening ballot container. Whenever it is determined there is a need to open all containers to conduct a mandatory or requested recount, or when such action is directed by court order, the containers shall be opened and the security of the ballots verified only by those persons designated to do so, in writing, by the canvassing board.

WAC 434-261-140 Precertification procedures. Prior to certifying the election, the county auditor shall exercise due diligence to confirm that all returned ballots have been received, processed, and reconciled, and that no ballots have been untabulated erroneously. Due diligence may include:

(1) Rechecking all ballot deposit sites; and

(2) Rechecking ballot storage containers in the ballot processing area, ballot tabulation area, canvassing board area, and vault.

(7/2/12)
