**WAC 508-12-230** Groundwater appropriation procedure—Relative rights—Ground and surface water appropriators. Where controversy arises over the relative rights as between ground and surface water appropriators, the basic law of “first in time, first in right” shall apply.

[Ch. 508-12 WAC—p. 3]
WAC 508-12-240  Groundwater appropriation procedure—Where proposed construction is near surface water supply. Where a proposed well is to be constructed near a lake, stream, or spring, which is heavily or fully appropriated, the department of ecology may specify a minimum distance between the well location and the surface water supply, or, require that the well casing be installed in such a manner as to insure a break in hydraulic continuity between the well and the shallow groundwaters contributing to the surface water supply.

WAC 508-12-250  Groundwater appropriation procedure—Where wells penetrate artesian water zones. Wells penetrating artesian water zones: RCW 90.44.070.

   (1) Wells taking water from artesian zones shall contain water-tight casings from the ground surface down through and properly sealed into the confining layer.

   (2) Issuance of permits to take water from an artesian zone shall not be stopped when existing wells penetrating said artesian zone no longer flow at ground surface; rather, a reasonable seasonal lowering of the water table will be permissible to more fully utilize the reservoir capacity of the aquifer.

   (3) Where the waste of water through improperly constructed wells has been found and wasting of said water is depriving others of water to which they are entitled, or causing an unreasonable drop in the water table, or threatens permanent damage to the aquifer, the department of ecology shall direct the owner to make necessary repairs to correct the situation. (RCW 90.44.120.)

WAC 508-12-260  Reservoir permits—Where required. A reservoir permit will be required whenever it is proposed to construct a barrier across a stream, channel, or water course, and which will actually retain for a beneficial use a portion of the annual runoff of the stream or water course. (For positive determination of the necessity of a reservoir permit, a reservoir shall be defined as any dam or dike storing water to a depth of ten or more feet at its deepest point, or one that is retaining ten or more acre-feet of water.) This will also apply to a reservoir adjacent to a stream channel when water will be required to fill the reservoir in addition to a constant diversion to keep it full.

WAC 508-12-270  Reservoir permits—Limits on filling. Unless otherwise specified, a reservoir permit will allow the permittee to fill the reservoir once annually and the permit shall specifically state the period during which the water may be used to fill the reservoir. If water in excess of one filling of the reservoir is required, a further application for the additional water must be filed.

WAC 508-12-390  Enforcement. In enforcement of this chapter, the department of ecology may impose such sanctions as are appropriate under authorities vested in it, including but not limited to the issuance of regulatory orders under RCW 43.27A.190 and civil penalties under RCW 90.03.600.

WAC 508-12-400  Appeals. All final written decisions of the department of ecology pertaining to permits, regulatory orders, and related decisions made pursuant to this chapter shall be subject to review by the pollution control hearings board in accordance with chapter 43.21B RCW.

WAC 508-12-410  Regulation review. The department of ecology shall initiate a review of the rules established in this chapter whenever new information, changing conditions, or statutory modifications make it necessary to consider revisions.
