Chapter 16-86 WAC

CATTLE AND BISON DISEASES IN WASHINGTON STATE

WAC
16-86-005 Definitions.
16-86-008 Forms used in this chapter.

BRUCELLOSIS
16-86-012
16-86-013 Quarantine.
16-86-014 Adoption of United States Department of Agriculture Brucellosis Eradication Uniform Methods and Rules.
16-86-015 Change of ownership requirements for cattle and bison in Washington.
16-86-017 Grazing permits.
16-86-025 Official brucellosis vaccination.
16-86-026 Brucellosis testing requirements for raw milk dairies.
16-86-040 Brucellosis quarantine and release.
16-86-092 Indemnity for brucellosis affected or exposed cattle.

Q FEVER
16-86-110 Q fever testing requirements for raw milk dairies.

TRICHOMONIASIS
16-86-114 Trichomoniasis testing at public livestock markets.
16-86-115 Trichomoniasis in Washington cattle.
16-86-116 Duties of certified, accredited veterinarians—Training requirement for veterinarians performing trichomoniasis testing in cattle.

TUBERCULOSIS
16-86-120 Adoption of United States Department of Agriculture Bovine Tuberculosis Eradication Uniform Methods and Rules.
16-86-125 Duties of accredited veterinarians—Training requirement for veterinarians performing tuberculosis testing in cattle and bison.
16-86-130 Cattle used in rodeo or timed events.
16-86-140 Tuberculosis testing requirements for raw milk dairies.
16-86-150 Tuberculosis quarantine and release.
16-86-160 Indemnity for tuberculosis affected or exposed cattle and bison.

DISPOSITION OF SECTIONS FORMERLY CODIFIED IN THIS CHAPTER
16-86-001 Promulgation. [Order 956, Promulgation, filed 8/31/64; Order 855, Promulgation, effective 7/19/61.] Repealed by Order 1171, filed 12/15/70. See WAC 16-86-002.
16-86-002 Promulgation. [Order 1171, § 16-86-002, filed 12/15/70. Formerly WAC 16-86-001.] Repealed by Order 1429, filed 2/9/76.
16-86-003 Promulgation. [Order 1429, § 16-86-003, filed 2/9/76.] Repealed by Order 1539, filed 10/17/77.
16-86-006 Department defined. [Statutory Authority: Chapters 16.36 and 16.40 RCW. WSR 79-09-076 (Order 1642), § 16-86-006, filed 8/30/79.] Repealed by WSR 84-08-037 (Order 1814), filed 3/30/84. Statutory Authority: Chapter 16.36 RCW.
16-86-007 Definition—Accredited veterinarian. [Statutory Authority: Chapters 16.36 and 16.40 RCW. WSR 79-09-076 (Order 1642), § 16-86-007, filed 8/30/79.] Repealed by WSR 84-08-037 (Order 1814), filed 3/30/84. Statutory Authority: Chapter 16.36 RCW.
16-86-009 Definition—Commercial dairy herd. [Order 1539, § 16-86-009, filed 10/17/77.] Repealed by WSR 84-08-037 (Order 1814), filed 3/30/84. Statutory Authority: Chapter 16.36 RCW.
16-86-010 Definitions. [Order 1171, § 16-86-010, filed 12/15/70; Order 855, Regulation 1, effective 7/19/61.] Repealed by Order 1429, filed 2/9/76.
16-86-011 Definition—Official calfhood vaccination. [Statutory Authority: Chapters 16.36 and 16.40 RCW. WSR 81-01-072 (Order 1717), § 16-86-011, filed 12/17/80, effective 4/1/81; Order 1539, § 16-86-011, filed 10/17/77; Order 1429, § 16-86-011, filed 2/9/76.] Repealed by WSR 84-08-037 (Order 1814), filed 3/30/84. Statutory Authority: Chapter 16.36 RCW.

(12/18/15)
Official brucellosis vaccination. [Statutory Authority: RCW 16.36.040. WSR 99-09-025, § 16-86-005, filed 4/15/99, effective 5/16/99. Statutory Authority: Chapter 16.36 RCW. WSR 84-08-037 (Order 1814), § 16-86-095, filed 3/30/84. Statutory Authority: Chapters 16.36 and 16.40 RCW. WSR 81-10-049 (Order 1732), § 16-86-095, filed 5/1/81, effective 7/1/81; WSR 79-09-076 (Order 1642), § 16-86-095, filed 8/30/79; Decodified and amended by WSR 08-01-094, filed 12/17/07, effective 1/17/08. Statutory Authority: Chapters 16.36 and 34.05 RCW. Recodified as § 16-86-025.]

Herd plan means a written management agreement in which each participant agrees to undertake actions specified in the herd plan to control the spread of infectious, contagious, or communicable disease after an official test will be quarantined as provided under RCW 16.36.010. If owners refuse to allow the department to test for diseases provided for in this chapter, all cattle or bison will be regarded as a menace to the health of livestock, and the premises on which they are kept will be immediately quarantined and no animals or products of these animals may be removed from the premises.

Official calfhood vaccinate means female cattle over the age of twelve months that have resided in Washington state for ninety days or more and are vaccinated with a dose of brucellosis vaccine (2cc subcutaneously) under directions issued by the director.

"Official Washington adult vaccinate" means female cattle of animals less than eighteen months of age, as determined by dentition inspection by an accredited veterinarian or verified by breed registration documents, that is confirmed by a statement and the signature of the owner or the owner's designee as having had no breeding contact with female cattle.

WAC 16-86-008 Forms used in this chapter. Forms used in this chapter may be obtained from the department at:
Animal Services Division
Washington State Department of Agriculture
1111 Washington St. S.E.
Olympia, WA 98504-2560
Phone: 360-902-1878.

[Statutory Authority: Chapters 16.36 and 34.05 RCW. WSR 08-01-094, § 16-86-008, filed 12/17/07, effective 1/17/08.]

BRUCELLOSIS

WAC 16-86-013 Quarantine. Cattle or bison that are infected or suspected of being infected with an infectious or communicable disease after an official test will be quarantined as provided under RCW 16.36.010. If owners refuse to allow the department to test for diseases provided for in this chapter, all cattle or bison will be regarded as a menace to the health of livestock, and the premises on which they are kept will be immediately quarantined and no animals or products of these animals may be removed from the premises.

[Statutory Authority: Chapters 16.36 and 34.05 RCW. WSR 08-01-094, amended and recodified as § 16-86-013, filed 12/17/07, effective 1/17/08.]

WAC 16-86-005 Cattle and Bison Diseases

Definitions. In addition to the definitions found in RCW 16.36.005, the following definitions apply to this chapter:

"Accredited veterinarian" means a veterinarian licensed to practice veterinary medicine, surgery, and dentistry in the state of Washington and approved by the United States Department of Agriculture (USDA) Veterinary Services to participate in state-federal cooperative programs.

"Adult vaccination tattoo" means a tattoo in the right ear with the letters RAV followed by the last digit of the year in which the vaccination was administered with RB-51 Brucella vaccine. An example is RAV2 for an adult vaccinated in 2012.

"Breed registry tattoo" means individual registry tattoos issued by breed associations.

"Brucellosis vaccine" means only those Brucella abortus products that are approved by and produced under license of the USDA for injection into cattle to enhance their resistance to brucellosis.

"Calfhood vaccination tattoo" means a tattoo in the right ear consisting of an R, the United States registered V-shield, and the last digit of the year in which the animal was vaccinated with RB-51 Brucella vaccine. An example is RV-shield2 for a calf vaccinated in 2012.

"Department" means the Washington state department of agriculture (WSDA).

"Director" means the director of WSDA or the director's authorized representative.

"Herd plan" means a written management agreement between the animal owner and the state veterinarian, with possible input from a private accredited veterinarian designated by the owner, in which each participant agrees to undertake actions specified in the herd plan to control the spread of infectious, contagious, or communicable disease within and from an infected herd and to work toward eradicating the disease in the infected herd.

"Official calfhood vaccinate" means female cattle between four and twelve months of age that are vaccinated with brucellosis vaccine at a calfhood dose (2cc subcutaneously) and officially individually identified.

"Official individual identification" means identifying an animal using USDA-approved devices or methods or an alternative form of identification agreed upon by the sending and receiving states, such as unique breed registry tattoos when accompanied by registration documentation. A group of animals may be identified by registered brands when accompanied by a certificate of inspection from a brand inspection authority recognized by the director when agreed upon by the sending and receiving states.

"Official Washington adult vaccinate" means female cattle of animals less than eighteen months of age, as determined by dentition inspection by an accredited veterinarian or verified by breed registration documents, that is confirmed by a statement and the signature of the owner or the owner's designee as having had no breeding contact with female cattle.
WAC 16-86-014 Adoption of United States Department of Agriculture Brucellosis Eradication Uniform Methods and Rules. In addition to the rules adopted in this chapter, the Washington state department of agriculture adopts the procedures and methods of the USDA Brucellosis Eradication Uniform Methods and Rules, effective October 1, 2003. The department maintains a copy of this document for public inspection. You may also find the information on the internet at: www.aphis.usda.gov/animal_health/animal_diseases/brucellosis/downloads/umr_bovine_bruc.pdf.

[Statutory Authority: Chapters 16.36 and 34.05 RCW. WSR 88-01-094, § 16-86-014, filed 12/17/07, effective 1/17/08.]

WAC 16-86-015 Change of ownership requirements for cattle and bison in Washington. (1) Cattle. All female cattle must be official calfhood or official Washington mature vaccinates and bear legible vaccination tattoos before being sold or introduced into any breeding herd in the state of Washington. This rule does not apply to the following: (a) Cattle sold or consigned to a restricted feedlot; (b) Cattle sold or consigned to a federally inspected slaughter plant; (c) Cattle sold or consigned to a public livestock market for immediate slaughter within three days of sale; (d) Spayed heifers; (e) Cattle sold to buyers in states or countries without brucellosis vaccination import requirements; and (f) Calves under four months of age. (2) Bison. All bison, except calves under eight months of age at the side of their negative-tested mothers, are required to test negative for brucellosis upon change of ownership. (3)(a) Under RCW 20.01.380, as cattle and bison move throughout the marketing system, livestock dealers are required to retain cattle and bison identification to the herd of origin. Official identification devices provide permanent identification of livestock and ensure the ability to find the source of animal disease outbreaks. (b) Removing an official animal health tag, or official animal identification tag, permanent mark, or other device is prohibited except at the time of slaughter. (c) If an official identification device is lost and it is necessary to retag an animal, the new official number shall correlate, whenever possible, with the previous official number of the animal and shall be reported to the office of the state veterinarian.

[Statutory Authority: Chapters 16.36 and 34.05 RCW. WSR 08-01-094, § 16-86-015, filed 12/17/07, effective 1/17/08. Statutory Authority: RCW 16.36.040. WSR 99-09-025, § 16-86-017, filed 10/5/12, effective 11/5/12; WSR 08-01-094, amended and reclassified as § 16-86-025, filed 12/17/07, effective 1/17/08. Statutory Authority: RCW 16.36.040. WSR 99-09-025, § 16-86-095, filed 4/15/99, effective 5/16/99; Order 1539, § 16-86-017, filed 10/17/77.]
WAC 16-86-026 Brucellosis testing requirements for raw milk dairies. (1) All cattle whose raw milk or raw milk products are offered for sale must be from a herd that has tested negative to a serological test for brucellosis within the previous twelve months.

(2) Any additions to the herd must be serologically tested negative at the owner's expense for brucellosis within thirty days before introduction into the herd.

(3) Herds must be serologically tested negative at the owner's expense annually to maintain the dairy's raw milk license.

(4) The state veterinarian shall direct all testing procedures in accordance with state and federal standards for animal disease eradication.

(5) All raw milk and raw milk products from animals that test positive for brucellosis are prohibited from sale and must be destroyed.

[Statutory Authority: Chapters 16.36 and 34.05 RCW. WSR 08-01-094, § 16-86-026, filed 12/17/07, effective 1/17/08.]

WAC 16-86-040 Brucellosis quarantine and release. (1) Any herd of cattle or bison in which brucellosis reactors are found will be quarantined. Positive or reactor classification shall be based on standards listed in USDA Brucellosis Eradication Uniform Methods and Rules, effective October 1, 2003.

(2) The quarantine will be released when the entire quarantined herd has passed two consecutive negative blood tests without reactors.

(a) The first test must be not less than thirty days following removal of all reactors from the herd. The second test must not be less than ninety days nor more than one year following the date of the previous test.

(b) Steers, spayed heifers, officially vaccinated dairy cattle under twenty months of age, and officially vaccinated beef animals under twenty-four months of age need not be tested.

(c) Adult vaccination for cattle may be used as a whole herd vaccination under the terms of a herd plan and based on the standards listed in USDA Brucellosis Eradication Uniform Methods and Rules, effective October 1, 2003.

(3) Cattle or bison that test positive to the brucellosis test must not be sold or offered for sale except for immediate slaughter.

(4) Quarantined cattle and bison may only be moved when accompanied by an official USDA form number VS1-27.

[Statutory Authority: Chapters 16.36 and 34.05 RCW. WSR 08-01-094, § 16-86-026, filed 12/17/07, effective 1/17/08.]

WAC 16-86-092 Indemnity for brucellosis affected or exposed cattle. (1) As provided under RCW 16.36.090, the director may order the slaughter or destruction of any cattle affected with or exposed to brucellosis.

(2) Under RCW 16.36.096, subject to the availability of amounts appropriated for this specific purpose, owners, individuals, partnerships, corporations or other legal entities whose animals have been slaughtered or destroyed by order of the director may be eligible for indemnification in an amount not to exceed seventy-five percent of the appraised or salvage value of the animal ordered slaughtered or destroyed.

[Statutory Authority: Chapters 16.36 and 34.05 RCW. WSR 08-01-094, § 16-86-092, filed 12/17/07, effective 1/17/08.]

Q FEVER

WAC 16-86-110 Q fever testing requirements for raw milk dairies. (1) All cattle whose raw milk or raw milk products are offered for sale must be from a herd that has tested negative serologically for Q fever within the previous twelve months. Q fever is caused by the coccobacillus Coxiella burnetii and is highly infectious to humans.

(2) Any additions to the herd must be tested negative for Q fever at the owner's expense within thirty days before introduction into the herd.

(3) Herds must be tested negative annually at the owner's expense to maintain the dairy's raw milk license.

(4) The state veterinarian shall direct all testing procedures in accordance with state and federal standards for animal disease eradication.

(5) All raw milk and raw milk products from animals that test positive for Q fever are prohibited from sale and must be destroyed or pasteurized according to industry standards.

[Statutory Authority: Chapters 16.36 and 34.05 RCW. WSR 08-01-094, § 16-86-110, filed 12/17/07, effective 1/17/08.]

TRICHOMONIASIS

WAC 16-86-114 Trichomoniasis testing at public livestock markets. (1) Virgin bulls, as defined in WAC 16-86-005, that are presented at a public livestock market are exempt from trichomoniasis testing.

(2) All other bulls must be:

- Sampled for trichomoniasis prior to leaving the market and not be turned out with female cattle until confirmed negative test results are reported; or
- Castrated prior to leaving the market; or
- Sent to a category 2 restricted holding facility as defined in WAC 16-30-055; or
- Delivered directly to a USDA-inspected slaughter facility.

[Statutory Authority: RCW 16.36.040 and chapter 34.05 RCW. WSR 16-01-132, § 16-86-114, filed 12/18/15, effective 1/18/16.]

WAC 16-86-115 Trichomoniasis in Washington cattle. (1) Any sexually intact bovine, except for bison, that is found test-positive for trichomoniasis, and any herd in which
Cattle and Bison Diseases 16-86-125

one or more bulls or cows are found test-positive for trichomoniasis, is considered infected. Test-positive means a positive result on a quantitative polymerase chain reaction (qPCR) test for trichomoniasis.

(2) In the case of infected sexually intact bovine, the herd shall be quarantined pending an epidemiological investigation to determine the source of the infection.

(3) All exposed herds will be identified by an accredited veterinarian in conjunction with the department. An exposed herd is defined as a cattle herd which has had, within the past twelve months, direct conglobing or cross-fence contact with an infected herd during a time of potential breeding activity. The owner of exposed herds will be notified of the possible exposure and requested to test the herd using a qPCR test. All testing will be at the owner's expense.

(4) Infected bulls will be quarantined and branded high on the tail head by the department with a USDA regulatory S-brand, and will not be used for breeding.

(b) Infected bulls must be slaughtered, sold for slaughter, or sent to a category 2 restricted holding facility to remain in slaughter channels. Infected bulls shall only be moved when accompanied by a USDA form VS 1-27.

(c) A nonpregnant female, with no calf at side, which is identified by the owner as being from an infected herd and is offered for sale at a livestock market, must remain in slaughter channels.

(5) The quarantine will be removed when all remaining bulls in the herd test negative to a second qPCR test for trichomoniasis and following proof of removal of infected bulls. Bulls must have a minimum of two negative qPCR tests at least one week apart for quarantine release. All bulls from infected herds, except virgin bulls, will be tested using a qPCR test the following trich-year before breeding. A trich-year means the period from September 1st to August 31st of any given year. Bulls from infected herds may not have to be tested the following trich-year if a herd plan has been approved by the state veterinarian.

(6) Information that cattle have tested positive for trichomoniasis may be supplied to county extension agents, accredited veterinarians, and industry representatives. Each month, the department may publish a press release of counties that have infected herds.

(12/18/15)

Washington State Department of Agriculture
Animal Services Division
1111 Washington Street S.E.
P.O. Box 42577
Olympia, Washington 98504-2577
360-902-1878

(4) Certified veterinarians shall utilize only official laboratories recognized by the state veterinarian for testing trichomoniasis samples. Positive test results will be sent to the department by the next business day.

(5) (a) Quantitative polymerase chain reaction (qPCR) is the test method for official tests accepted by the department.

(b) An official test is one in which the sample is collected by a certified veterinarian and received in the official laboratory in good condition within forty-eight hours of collection. Samples in transit for more than forty-eight hours or have been frozen or exposed to high temperatures will not be accepted for official testing. All samples shipped to the laboratory must be in a transport medium approved by the testing laboratory. All sampling will be obtained by pipette scrapings from the prepuce and glans of a bull.

(6) Each sampled bull shall have a current-year Washington trichomoniasis tag and a USDA-approved official identification tag applied. If a bull already bears an official identification tag at the time of sampling, the individual identification number on that device shall be recorded. Both tag numbers should be recorded on the laboratory submission form so that testing and results can be verified by either number. Additional official individual identification must not be applied.

(7) A trichomoniasis testing year is defined as September 1st through August 31st.

(Statutory Authority: RCW 16.36.040 and chapter 34.05 RCW. WSR 16-01-132, § 16-86-115, filed 12/18/15, effective 1/18/16; WSR 15-02-028, § 16-86-115, filed 12/30/14, effective 1/30/15. Statutory Authority: Chapters 16.36 and 34.05 RCW. WSR 10-20-093, § 16-86-116, filed 9/30/10, effective 10/31/10.)

TUBERCULOSIS

(Statutory Authority: Chapters 16.36 and 34.05 RCW. WSR 08-01-094, § 16-86-120, filed 12/17/07, effective 1/17/08.)

WAC 16-86-125 Duties of certified, accredited veterinarians—Training requirement for veterinarians performing trichomoniasis testing in cattle. (1) Effective January 1, 2011, accredited veterinarians may not perform official trichomoniasis testing of bulls in Washington state until they are certified to do so by having successfully completed training and passed a proficiency examination provided by the department.

(2) All official trichomoniasis testing of bulls in Washington state shall be performed by a certified, accredited veterinarian.

(3) Information on training opportunities is available by contacting the department at:

(251x752)Cattle and Bison Diseases 16-86-125
WAC 16-86-130 Cattle used in rodeo or timed events. 
All cattle used for rodeo or timed events must be accompanied by proof recorded on a tuberculosis test chart (USDA form number VS6-22) of a negative bovine tuberculosis test within twelve months of the event. Calves under six months old that were born and have continuously resided in the state of Washington and Washington origin timed event cattle that are not commingled with high-risk are excluded from this requirement. [Statutory Authority: Chapters 16.36 and 34.05 RCW. WSR 08-01-094, § 16-86-125, filed 1/9/09, effective 2/9/09.]

WAC 16-86-140 Tuberculosis testing requirements for raw milk dairies. (1) All cattle whose raw milk or raw milk products are offered for sale must be from a herd that has tested negative for tuberculosis within the previous twelve months.
(2) Any additions to the herd must be tested negative for tuberculosis at the owner's expense within sixty days before introduction into the herd.
(3) Herds must be tested negative annually at the owner's expense to maintain the dairy's raw milk license.
(4) The state veterinarian shall direct all testing procedures in accordance with state and federal standards for animal disease eradication.
(5) All raw milk and raw milk products from animals that test positive for tuberculosis are prohibited from sale and must be destroyed. [Statutory Authority: RCW 16.36.040 and chapter 34.05 RCW. WSR 15-02-028, § 16-86-140, filed 12/30/14, effective 1/30/15. Statutory Authority: Chapters 16.36 and 34.05 RCW. WSR 08-01-094, § 16-86-140, filed 12/17/07, effective 1/17/08.]

WAC 16-86-150 Tuberculosis quarantine and release. (1) Any herd of cattle or bison in which tuberculosis reactors are found will be quarantined. The sale or removal of any animal out of a quarantined herd is prohibited except for removal for immediate slaughter.
(2) Herds in which no gross lesions reactors occur and in which no evidence of Mycobacterium bovis infection has been disclosed may be released from quarantine after a sixty-day negative caudal fold tuberculosis retest of the entire herd.
Herds containing one or more suspects to the caudal fold tuberculosis test will be quarantined until the suspect animals are:
(a) Retested by the comparative-cervical tuberculosis test within ten days of the caudal fold injection; or
(b) Retested by the gamma interferon tuberculosis test and the tuberculosis status of the suspect has been determined; or
(c) Retested by the comparative-cervical tuberculosis test after sixty days and the tuberculosis status of the suspect has been determined; or
(d) Shipped under permit directly to slaughter in accordance with state or federal laws and regulations and the tuberculosis status of the suspect has been determined.
(3) Herds in which Mycobacterium bovis infection has been confirmed and the herd has not been depopulated will remain under quarantine and must pass two tuberculin tests at intervals of at least sixty days and one additional test after six months from the previous negative test. Following the release from quarantine, these herds will also be subject to five annual tests on the entire herd. [Statutory Authority: Chapters 16.36 and 34.05 RCW. WSR 08-01-094, § 16-86-150, filed 12/17/07, effective 1/17/08.]

WAC 16-86-160 Indemnity for tuberculosis affected or exposed cattle and bison. (1) As provided under RCW 16.36.090, the director may order the slaughter or destruction of any cattle and bison affected with or exposed to tuberculosis.
(2) As provided for under RCW 16.36.096, subject to the availability of amounts appropriated for this specific purpose, owners, individuals, partnerships, corporations or other legal entities whose animals have been slaughtered or destroyed by order of the director may be eligible for indemnification in an amount not to exceed seventy-five percent of the appraised or salvage value of the animal ordered slaughtered or destroyed. [Statutory Authority: Chapters 16.36 and 34.05 RCW. WSR 08-01-094, § 16-86-160, filed 12/17/07, effective 1/17/08.]

Ch. 16-86 WAC p. 5
