NEW SECTION. Sec. 301. This act is necessary for the immediate preservation of the public peace, health, or safety, or support of the state government and its existing public institutions, and shall take effect immediately.

Passed the House April 22, 1989.
Passed the Senate April 14, 1989.
Approved by the Governor May 11, 1989, with the exception of certain items which were vetoed.
Filed in Office of Secretary of State May 11, 1989.

Note: Governor's explanation of partial veto is as follows:

"I am returning herewith, without my approval as to section 206, Substitute House Bill No. 1305 entitled:

"AN ACT Relating to public utility taxation."

Section 206 creates a new exemption to the public utility tax for electrical power purchased for resale. This exemption would create an unfair competitive advantage for firms which purchase electrical power and then resell it. Such power would be subject only to a B&O tax of 1.5% while other power in the state is subject to a public utility tax of 3.852%.

To our knowledge, only one firm would benefit from this exemption. The purpose of the exemption was to eliminate the double taxation of such electrical power. In this case, a firm purchases electrical power from a utility. The utility pays a public utility tax on such power of 3.852%. The firm which purchases the power then sells it to a subsidiary. Since the power is a sale by the firm, it is part of its gross receipts and subject to a 1.5% B&O tax. The firm argues that the public utility tax is unfair double taxation.

Unfortunately, double taxation is the rule with the B&O tax, not the exception. The B&O tax is a gross receipts tax which is imposed on gross income with no deductions. Since the firm is in business and sells the power, the value of the power is part of their gross receipts. What the firm in fact wants is a deduction for the costs of doing business. In effect, this is tax reform, but only for one firm not for everybody. The need for tax reform is real. This piecemeal revision of the tax code is not the appropriate way to address the shortcomings of the existing tax system.

Furthermore, no logical argument has been presented which would indicate that electrical power for resale should be exempt. Under this bill, the power purchased by the firm in this case would be subject to a B&O tax of only 1.5%. All other power sold for in-state use is subject to a public utility tax of 3.852%. There is no reason why this power should be taxed at a lower rate.

With the exception of section 206, Substitute House Bill No. 1305 is approved."
