Be it enacted by the Legislature of the State of Washington:

PART I  
GENERAL PROVISIONS

NEW SECTION. Sec. 101. The legislature finds and declares that it is of importance to the people of Washington state to live in a healthy environment and to expect a minimum standard of quality in health care. The legislature further finds that the social and economic vitality of the state
depend on a healthy and productive population. The legislature further declares where it is a duty of the state to assure a healthy environment and minimum standards of quality in health care facilities and among health care professionals, the ultimate responsibility for a healthy society lies with the citizens themselves.

For these reasons, the legislature recognizes the need for a strong, clear focus on health issues in state government and among state health agencies to give expression to the needs of individual citizens and local communities as they seek to preserve the public health. It is the intent of the legislature to form such focus by creating a single department in state government with the primary responsibilities for the preservation of public health, monitoring health care costs, the maintenance of minimal standards for quality in health care delivery, and the general oversight and planning for all the state's activities as they relate to the health of its citizenry.

Further, it is the intent of the legislature to improve illness and injury prevention and health promotion, and restore the confidence of the citizenry in the expenditure of public funds on health activities, and to ensure that this new health agency delivers quality health services in an efficient, effective, and economical manner that is faithful and responsive to policies established by the legislature.

NEW SECTION. Sec. 102. As used in this chapter, unless the context indicates otherwise:

(1) "Board" means the state board of health;

(2) The department of health shall be organized consistent with the goals of providing state government with a focus in health and serving the people of this state. The legislature recognizes that the secretary needs sufficient organizational flexibility to carry out the department's various duties. To the extent practical, the secretary shall consider the following organizational principles:

(a) Clear lines of authority which avoid functional duplication within and between subelements of the department;

(e) Decentralized authority and responsibility, with clear accountability;

(f) A single point of access for persons receiving like services from the department which would limit the number of referrals between divisions.

(3) The department shall provide leadership and coordination in identifying and resolving threats to the public health by:

(a) Working with local health departments and local governments to strengthen the state and local governmental partnership in providing public protection;

(b) Developing intervention strategies;

(6) The secretary shall appoint such personnel as are necessary to carry out the duties of the department in accordance with chapter 41.06 RCW.

(7) The secretary shall appoint the state health officer and such deputy secretaries, assistant secretaries, and other administrative positions as deemed necessary consistent with the principles set forth in subsection (2) of this section. All persons who administer the necessary divisions, offices,
bureaus, and programs, and five additional employees shall be exempt from
the provisions of chapter 41.06 RCW. The officers and employees appointed
under this subsection shall be paid salaries to be fixed by the governor in
accordance with the procedure established by law for the fixing of salaries
for officers exempt from the state civil service law.

NEW SECTION. Sec. 104. The executive head and appointing au-
thority of the department shall be the secretary of health. The secretary

cessibility of health care throughout the state as their roles are specified in
this act in accordance with the provisions of this chapter. In furtherance of
this goal, the secretary shall create an ongoing program of data collection,
storage, assessibility, and review. The legislature does not intend that the
department conduct or contract for the conduct of basic research activity.
The secretary may request appropriations for studies according to this sec-
tion from the legislature, the federal government, or private sources.

(2) All state agencies which collect or have access to population-based,
health–related data are directed to allow the secretary access to such data.
This includes, but is not limited to, data on needed health services, facilities,
and personnel; future health issues; emerging bioethical issues; health pro-
motion; recommendations from state and national organizations and associ-

give the secretary access to such data in their possession. The secretary's
access to and use of all data shall be in accordance with state and federal
confidentiality laws and ethical guidelines. Such data in any form where the
patient or provider of health care can be identified shall not be disclosed,
subject to disclosure according to chapter 42.17 RCW, discoverable or ad-
missible in judicial or administrative proceedings. Such data can be used in
proceedings in which the use of the data is clearly relevant and necessary
and both the department and the patient or provider are parties.

(3) The department shall serve as the clearinghouse for information
concerning innovations in the delivery of health care services, the enhance-

the health status of the citizens expected as a result of the study, and the
estimated cost of the study; and
(c) Provide background for the state health report required by RCW

mation to:
(a) Develop guidelines which may be used by consumers, purchasers,
and providers of health care to encourage necessary and cost-effective ser-
vices; and
(b) Make recommendations to the governor on how state government
and private purchasers may be prudent purchasers of cost-effective, ade-

**PART III**
FUNCTIONS TRANSFERRED FROM THE DEPARTMENT OF LICENSING

**NEW SECTION.** Sec. 301. More specifically, the health professions regulatory programs and services presently administered by the department of licensing are hereby transferred to the department of health.

**NEW SECTION.** Sec. 302. (1) The presence of high quality health care professionals practicing in Washington is essential to meet the health care quality objectives of the state. The legislature recognizes that current licensure of professionals assures minimum competence at the time an individual is initially licensed. A concern remains whether the current system of licensure encourages and motivates health care professionals to strive for the best professional performance possible. The effectiveness of the current system of licensure on assuring consumer protection is unclear.

(2) The secretary shall prepare a report with recommendations on the need for improvements in the current system of health care professional licensure or the need for an alternative system of quality assurance and consumer protection to replace or augment the state's current health professional licensure program. The report shall be submitted to the legislature and the governor no later than June 30, 1992, and shall include: (a) A survey of current health professional licensure programs in the United States, (b) an analysis of the impact of these regulatory and educational approaches on quality assurance and consumer protection, (c) an analysis of current licensure of health professionals in this state to assess its impact on quality assurance and consumer protection, (d) an evaluation of alternative approaches to licensure and their impact on quality assurance and consumer protection, and (e) an assessment of the costs of implementation of proposed alternatives.

*Sec. 302 was vetoed, see message at end of chapter.*
NEW SECTION. Sec. 303. There is created in the department an office of health consumer assistance. The office shall establish a state-wide hotline and shall assist and serve as an advocate for consumers who are complainants or witnesses in a licensing or disciplinary proceeding.

NEW SECTION. Sec. 304. The secretary and each of the professional licensing and disciplinary boards under the administration of the department shall enter into written operating agreements on administrative procedures with input from the regulated profession and the public. The intent of these agreements is to provide a process for the department to consult each board on administrative matters and to ensure that the administration and staff functions effectively enable each board to fulfill its statutory responsibilities. The agreements shall include, but not be limited to, the following provisions:

1. Administrative activities supporting the board's policies, goals, and objectives;
2. Development and review of the agency budget as it relates to the board; and
3. Board related personnel issues.

The agreements shall be reviewed and revised in like manner if appropriate at the beginning of each fiscal year, and at other times upon written request by the secretary or the board.

The secretary shall report to the health care committees of the legislature, on or before February 28, 1990, on the implementation of the written operating agreement and the need, if any, for modification of this section.

Sec. 305. Section 59, chapter 279, Laws of 1984 and RCW 18.120.040 are each amended to read as follows:

Applicant groups shall submit a written report explaining the factors enumerated in RCW 18.120.030 to the legislative committees of reference, copies of which shall be sent to the state ((health coordinating council and the department of licensing)) board of health and the department of health for review and comment. The state ((health coordinating council, in addition to the duties specified in RCW 70.38.065;)) board of health and the department of health shall make recommendations based on the report submitted by applicant groups to the extent requested by the legislative committees.

Sec. 306. Section 61, chapter 150, Laws of 1987 and RCW 18.122.010 are each amended to read as follows:

The legislature takes note of the burgeoning number of bills proposed to regulate new health and health-related professions and occupations. The legislature further recognizes the number of allied health professions seeking independent practice. Potentially at least one hundred forty-five discrete health professions and occupations are recognized nationally, with at least two hundred fifty secondary job classifications. A uniform and streamlined
credentialing process needs to be established to permit the department of ((licensing)) health to administer the health professional regulatory programs in the most cost-effective, accountable, and uniform manner. The public interest will be served by establishing uniform administrative provisions for the regulated professions under the jurisdiction of the department of ((licensing)) health regulated after July 26, 1987.

Sec. 307. Section 62, chapter 150, Laws of 1987 and RCW 18.122.020 are each amended to read as follows:

Unless the context clearly requires otherwise, the definitions in this section apply throughout this chapter.

(1) To "credential" means to license, certify, or register an applicant.
(2) "Department" means the department of ((licensing)) health.
(3) "((Director)) Secretary" means the ((director)) secretary of ((licensing)) health or the ((director's)) secretary's designee.
(4) "Health profession" means a profession providing health services regulated under the laws of this state and under which laws this statute is specifically referenced.
(5) "Credential" means the license, certificate, or registration issued to a person.

Sec. 308. Section 63, chapter 150, Laws of 1987 and RCW 18.122.030 are each amended to read as follows:

(1) The three levels of professional credentialing as defined in chapter 18.120 RCW are:

(a) Registration, which is the least restrictive, and requires formal notification of the department of ((licensing)) health identifying the practitioner, and does not require qualifying examinations;

(b) Certification, which is a voluntary process recognizing an individual who qualifies by examination and meets established educational prerequisites, and which protects the title of practice; and

No disposition may be made of substances under seal until the time for taking an appeal has elapsed or until all appeals have been concluded unless a court, upon application therefor, orders the sale of perishable substances and the deposit of the proceeds of the sale with the court. Upon a revocation order becoming final, all controlled substances may be forfeited to the state.

PART V
HEALTH DATA AND CHARITY CARE

NEW SECTION. Sec. 501. (1) The legislature finds and declares that there is a need for health care information that helps the general public understand health care issues and how they can be better consumers and that is useful to purchasers, payers, and providers in making health care choices and negotiating payments. It is the purpose and intent of this chapter to establish a hospital data collection, storage, and retrieval system which supports these data needs and which also provides public officials and others engaged in the development of state health policy the information necessary for the analysis of health care issues.

(2) The legislature finds that rising health care costs and access to health care services are of vital concern to the people of this state. It is, therefore, essential that strategies be explored that moderate health care costs and promote access to health care services.

(3) The legislature further finds that access to health care is among the state's goals and the provision of such care should be among the purposes of health care providers and facilities. Therefore, the legislature intends that charity care requirements and related enforcement provisions for hospitals be explicitly established.

(4) The lack of reliable statistical information about the delivery of charity care is a particular concern that should be addressed. It is the purpose and intent of this chapter to require hospitals to provide, and report to the state, charity care to persons with acute care needs, and to have a state agency both monitor and report on the relative commitment of hospitals to the delivery of charity care services, as well as the relative commitment of public and private purchasers or payers to charity care funding.

NEW SECTION. Sec. 502. As used in this chapter:

(1) "Council" means the health care access and cost control council created by this chapter.

(2) "Department" means department of health.

(3) "Hospital" means any health care institution which is required to qualify for a license under RCW 70.41.020(2); or as a psychiatric hospital under chapter 71.12 RCW.

(4) "Secretary" means secretary of health.

(5) "Charity care" means necessary hospital health care rendered to indigent persons, to the extent that the persons are unable to pay for the care or to pay deductibles or co-insurance amounts required by a third-party payer, as determined by the department.
(6) "Sliding fee schedule" means a hospital-determined, publicly available schedule of discounts to charges for persons deemed eligible for charity care; such schedules shall be established after consideration of guidelines developed by the department.

(7) "Special studies" means studies which have not been funded through the department's biennial or other legislative appropriations.

NEW SECTION. Sec. 503. (1) There is created the health care access and cost control council within the department of health consisting of the following: The director of the department of labor and industries; the administrator of the health care authority; the secretary of social and health services; the administrator of the basic health plan; a person representing the governor on matters of health policy; the secretary of health; and one member from the public-at-large to be selected by the governor who shall represent individual consumers of health care. The public member shall not have any fiduciary obligation to any health care facility or any financial interest in the provision of health care services. Members employed by the state shall serve without pay and participation in the council's work shall be deemed performance of their employment. The public member shall be compensated in accordance with RCW 43.03.240 and shall be reimbursed for related travel expenses in accordance with RCW 43.03.050 and 43.03.060.

(2) A member of the council designated by the governor shall serve as chairman. The council shall elect a vice-chairman from its members biennially. Meetings of the council shall be held as frequently as its duties require. The council shall keep minutes of its meetings and adopt procedures for the governing of its meetings, minutes, and transactions.

(3) Four members shall constitute a quorum, but a vacancy on the council shall not impair its power to act. No action of the council shall be effective unless four members concur therein.

NEW SECTION. Sec. 504. (1) In order to advise the department and the board of health in preparing executive request legislation and the state health report according to RCW 43.20.050, and, in order to represent the public interest, the council shall monitor and evaluate hospital and related health care services consistent with section 501 of this act. In fulfilling its responsibilities, the council shall have complete access to all the department's data and information systems.

(2) The council shall advise the department on the hospital data collection system required by this chapter.

(3) The council, in addition to participation in the development of the state health report, shall, from time to time, report to the governor and the appropriate committees of the legislature with proposed changes in hospital and related health care services, consistent with the findings in section 501 of this act.
(4) The department may undertake, with advice from the council and within available funds, the following studies:
   (a) Recommendations regarding health care cost containment, and the assurance of access and maintenance of adequate standards of care;
   (b) Analysis of the effects of various payment methods on health care access and costs;
   (c) The utility of the certificate of need program and related health planning process;
   (d) Methods of permitting the inclusion of advance medical technology on the health care system, while controlling inappropriate use;
   (e) The appropriateness of allocation of health care services;
   (f) Professional liabilities on health care access and costs, to include:
      (i) Quantification of the financial effects of professional liability on health care reimbursement;
      (ii) Determination of the effects, if any, of nonmonetary factors upon the availability of, and access to, appropriate and necessary basic health services such as, but not limited to, prenatal and obstetrical care; and
      (iii) Recommendation of proposals that would mitigate cost and access impacts associated with professional liability.

The department shall report its findings and recommendations to the governor and the appropriate committees of the legislature not later than July 1, 1991.

NEW SECTION. Sec. 505. The department shall have the authority to respond to requests of others for special studies or analysis. The department may require such sponsors to pay any or all of the reasonable costs associated with such requests that might be approved, but in no event may costs directly associated with any such special study be charged against the funds generated by the assessment authorized under section 508 of this act.

NEW SECTION. Sec. 506. (1) No hospital or its medical staff shall adopt or maintain admission practices or policies which result in:
   (a) A significant reduction in the proportion of patients who have no third-party coverage and who are unable to pay for hospital services;
   (b) A significant reduction in the proportion of individuals admitted for inpatient hospital services for which payment is, or is likely to be, less than the anticipated charges for or costs of such services; or
   (c) The refusal to admit patients who would be expected to require unusually costly or prolonged treatment for reasons other than those related to the appropriateness of the care available at the hospital.

(2) No hospital shall adopt or maintain practices or policies which would deny access to emergency care based on ability to pay. No hospital which maintains an emergency department shall transfer a patient with an emergency medical condition or who is in active labor unless the transfer is
performed at the request of the patient or is due to the limited medical resources of the transferring hospital. Hospitals must follow reasonable procedures in making transfers to other hospitals including confirmation of acceptance of the transfer by the receiving hospital.

(3) The department shall develop definitions by rule, as appropriate, for subsection (1) of this section and, with reference to federal requirements, subsection (2) of this section. The department shall monitor hospital compliance with subsections (1) and (2) of this section. The department shall report to the legislature and the governor on hospital compliance with these requirements and shall report individual instances of possible non-compliance to the state attorney general or the appropriate federal agency.

(4) The department shall establish and maintain by rule, consistent with the definition of charity care in section 502 of this act, the following:

(a) Uniform procedures, data requirements, and criteria for identifying patient's receiving charity care;

(b) A definition of residual bad debt including reasonable and uniform standards for collection procedures to be used in efforts to collect the unpaid portions of hospital charges that are the patient's responsibility.

(5) For the purpose of providing charity care, each hospital shall develop, implement, and maintain a charity care policy which, consistent with subsection (1) of this section, shall enable people below the federal poverty level access to appropriate hospital-based medical services, and a sliding fee schedule for determination of discounts from charges for persons who qualify for such discounts by January 1, 1990. The department shall develop specific guidelines to assist hospitals in setting sliding fee schedules required by this section. All persons with family income below one hundred percent of the federal poverty standard shall be deemed charity care patients for the full amount of hospital charges, provided that such persons are not eligible for other private or public health coverage sponsorship. Persons who may be eligible for charity care shall be notified by the hospital.

(6) Each hospital shall make every reasonable effort to determine the existence or nonexistence of private or public sponsorship which might cover in full or part the charges for care rendered by the hospital to a patient; the family income of the patient as classified under federal poverty income guidelines; and the eligibility of the patient for charity care as defined in this chapter and in accordance with hospital policy. An initial determination of sponsorship status shall precede collection efforts directed at the patient.

(7) The department shall monitor the distribution of charity care among hospitals, with reference to factors such as relative need for charity care in hospital service areas and trends in private and public health coverage. The department shall report to the legislature and executive any problems in distribution which are in contradiction of the intent of this chapter. The report shall include an assessment of the effects of the provisions of this
chapter on access to hospital and health care services, as well as an evaluation of the contribution of all purchasers of care to hospital charity care.

(8) The department shall issue a report on the subjects addressed in this section at least annually, with the first report due on July 1, 1990.

NEW SECTION. Sec. 507. (1) Every person who shall violate or knowingly aid and abet the violation of sections 506 (5) or (6), 508, or 510 of this act, or any valid orders or rules adopted pursuant to these sections, or who fails to perform any act which it is herein made his or her duty to perform, shall be guilty of a misdemeanor. Following official notice to the accused by the department of the existence of an alleged violation, each day of noncompliance upon which a violation occurs shall constitute a separate violation. Any person violating the provisions of this chapter may be enjoined from continuing such violation. The department has authority to levy civil penalties not exceeding one thousand dollars for violations of this chapter and determined pursuant to this section.

(2) Every person who shall violate or knowingly aid and abet the violation of section 506 (1) or (2) of this act, or any valid orders or rules adopted pursuant to such section, or who fails to perform any act which it is herein made his or her duty to perform, shall be subject to the following criminal and civil penalties:

(a) For any initial violations: The violating person shall be guilty of a misdemeanor, and the department may impose a civil penalty not to exceed one thousand dollars as determined pursuant to this section.

(b) For a subsequent violation of section 506 (1) or (2) of this act within five years following a conviction: The violating person shall be guilty of a misdemeanor, and the department may impose a penalty not to exceed three thousand dollars as determined pursuant to this section.

(c) For a subsequent violation with intent to violate section 506 (1) or (2) of this act within five years following a conviction: The criminal and civil penalties enumerated in (a) of this subsection; plus up to a three-year prohibition against the issuance of tax exempt bonds under the authority of the Washington health care facilities authority; and up to a three-year prohibition from applying for and receiving a certificate of need.

(d) For a violation of section 506 (1) or (2) of this act within five years of a conviction under (c) of this subsection: The criminal and civil penalties and prohibition enumerated in (a) and (b) of this subsection; plus up to a one-year prohibition from participation in the state medical assistance or medical care services authorized under chapter 74.09 RCW.

(3) The provisions of chapter 34.05 RCW shall apply to all noncriminal actions undertaken by the department of health, the department of social and health services, and the Washington health care facilities authority pursuant to this act.
NEW SECTION. Sec. 508. The basic expenses for the hospital data collection and reporting activities of this chapter shall be financed by an assessment against hospitals of no more than four one-hundredths of one percent of each hospital's gross operating costs, to be levied and collected from and after that date, upon which the similar assessment levied under chapter 70.39 RCW is terminated, for the provision of hospital services for its last fiscal year ending on or before June 30th of the preceding calendar year. Budgetary requirements in excess of that limit must be financed by a general fund appropriation by the legislature. All moneys collected under this section shall be deposited by the state treasurer in the hospital data collection account which is hereby created in the state treasury. All earnings on investments of balances in the hospital data collection account shall be credited to the general fund. The department may also charge, receive, and dispense funds or authorize any contractor or outside sponsor to charge for and reimburse the costs associated with special studies as specified in section 505 of this act.

Any amounts raised by the collection of assessments from hospitals provided for in this section which are not required to meet appropriations in the budget act for the current fiscal year shall be available to the department in succeeding years.

NEW SECTION. Sec. 509. The department and any of its contractors or agents shall maintain the confidentiality of any information which may, in any manner, identify individual patients.

NEW SECTION. Sec. 510. (1) The department is responsible for the development, implementation, and custody of a state-wide hospital data system. As part of the design stage for development of the system, the department shall undertake a needs assessment of the types of, and format for, hospital data needed by consumers, purchasers, payers, hospitals, and state government as consistent with the intent of this chapter. The department shall identify a set of hospital data elements and report specifications which satisfy these needs. The council shall review the design of the data system and may direct the department to contract with a private vendor for assistance in the design of the data system. The data elements, specifications, and other design features of this data system shall be made available for public review and comment and shall be published, with comments, as the department's first data plan by January 1, 1990.

(2) Subsequent to the initial development of the data system as published as the department's first data plan, revisions to the data system shall be considered through the department's development of a biennial data plan, as proposed to, and funded by, the legislature through the biennial appropriations process. Costs of data activities outside of these data plans except for special studies shall be funded through legislative appropriations.

(3) In designing the state-wide hospital data system and any data plans, the department shall identify hospital data elements relating to both
hospital finances and the use of services by patients. Data elements relating to hospital finances shall be reported by hospitals in conformance with a uniform system of reporting as specified by the department and shall include data elements identifying each hospital's revenues, expenses, contractual allowances, charity care, bad debt, other income, total units of inpatient and outpatient services, and other financial information reasonably necessary to fulfill the purposes of this chapter, for hospital activities as a whole and, as feasible and appropriate, for specified classes of hospital purchasers and payers. Data elements relating to use of hospital services by patients shall, at least initially, be the same as those currently compiled by hospitals through inpatient discharge abstracts and reported to the Washington state hospital commission.

(4) The state-wide hospital data system shall be uniform in its identification of reporting requirements for hospitals across the state to the extent that such uniformity is necessary to fulfill the purposes of this chapter. Data reporting requirements may reflect differences in hospital size; urban or rural location; scope, type, and method of providing service; financial structure; or other pertinent distinguishing factors. So far as possible, the data system shall be coordinated with any requirements of the federal department of health and human services in its administration of the medicare program and the state in its role of gathering public health statistics, so as to minimize any unduly burdensome reporting requirements imposed on hospitals.

(5) In identifying financial reporting requirements under the state-wide hospital data system, the department may require both annual reports and condensed quarterly reports, so as to achieve both accuracy and timeliness in reporting.

(6) In designing the initial state-wide hospital data system as published in the department's first data plan, the department shall review all existing systems of hospital financial and utilization reporting used in this state to determine their usefulness for the purposes of this chapter, including their potential usefulness as revised or simplified.

(7) Until such time as the state-wide hospital data system and first data plan are developed and implemented and hospitals are able to comply with reporting requirements, the department shall require hospitals to continue to submit the hospital financial and patient discharge information previously required to be submitted to the Washington state hospital commission. Upon publication of the first data plan, hospitals shall have a reasonable period of time to comply with any new reporting requirements and, even in the event that new reporting requirements differ greatly from past requirements, shall comply within two years of the effective date of this chapter.

(8) The hospital data collected and maintained by the department shall be available for retrieval in original or processed form to public and private
requestors within a reasonable period of time after the date of request. The cost of retrieving data for state officials and agencies shall be funded through the state general appropriation. The cost of retrieving data for individuals and organizations engaged in research or private use of data shall be funded by a fee schedule developed by the department which reflects the direct cost of retrieving the data in the requested form.

**NEW SECTION.** Sec. 511. The department shall provide, or may contract with a private entity to provide, hospital analyses and reports consistent with the purposes of this chapter. Prior to release, the department shall provide affected hospitals with an opportunity to review and comment on reports which identify individual hospital data with respect to accuracy and completeness, and otherwise shall focus on aggregate reports of hospital performance. These reports shall include:

1. Consumer guides on purchasing hospital care services and publications providing verifiable and useful comparative information to consumers on hospitals and hospital services;

2. Reports for use by classes of purchasers, payers, and providers as specified for content and format in the state-wide data system and data plan; and

3. Reports on relevant hospital policy issues including the distribution of hospital charity care obligations among hospitals; absolute and relative rankings of Washington and other states, regions, and the nation with respect to expenses, net revenues, and other key indicators; hospital efficiencies; and the effect of medicare, medicaid, and other public health care programs on rates paid by other purchasers of hospital care.

**NEW SECTION.** Sec. 512. The department shall, by December 15 of each even-numbered year, submit to the appropriate committees of the legislature a report covering total expenditures by state government over the past two years for the purchase or provision of health care services, together with an estimate of such future expenditures during the ensuing four years. The reports, together with any suitable recommendations, shall be consistent with the provisions of section 17, chapter 288, Laws of 1984 (uncodified).

*Sec. 512 was vetoed, see message at end of chapter.*

**PART VI**

**CERTIFICATE OF NEED**

Sec. 601. Section 1, chapter 161, Laws of 1979 ex. sess. as last amended by section 1, chapter 235, Laws of 1983 and RCW 70.38.015 are each amended to read as follows:

It is declared to be the public policy of this state:

1. That health planning to promote, maintain, and assure the health of all citizens in the state, to provide accessible health services, health manpower, health facilities, and other resources while controlling excessive increases in costs, and to recognize prevention as a high priority in health
programs, is essential to the health, safety, and welfare of the people of the state. Health planning should be (fostered on both a state-wide and regional basis and must maintain responsiveness) responsive to changing health and social needs and conditions. Involvement in health planning from both consumers and providers throughout the state should be encouraged(( Regional health planning under this chapter and in a manner consistent with RCW 36.70.015 is declared to be a proper public purpose for the expenditure of funds of counties or other public entities interested in local and regional health planning));

(2) That the development of health services and resources, including the construction, modernization, and conversion of health facilities, should be accomplished in a planned, orderly fashion, consistent with identified priorities and without unnecessary duplication or fragmentation;

(3) That the development and maintenance of adequate health care information, statistics and projections of need for health facilities and services is essential to effective health planning and resources development;

(4) That the development of nonregulatory approaches to health care cost containment should be considered, including the strengthening of price competition; and

(5) That health planning should be concerned with public health and health care financing, access, and quality, recognizing (the) their close interrelationship (of the three) and emphasizing cost control of health services, including cost-effectiveness and cost-benefit analysis((

(6) That this chapter should be construed to effectuate this policy and to be consistent with requirements of the federal health planning and resources development laws)).

Sec. 602. Section 2, chapter 161, Laws of 1979 ex. sess. as last amended by section 1, chapter 20, Laws of 1988 and RCW 70.38.025 are each amended to read as follows:

Where a person makes an acquisition under lease or comparable arrangement, or through donation, which would have required review if the acquisition had been made by purchase, such expenditure shall be deemed a capital expenditure. Capital expenditures include donations of equipment or facilities to a ((health-care)) nursing home facility which if
acquired directly by such facility would be subject to certificate of need review under the provisions of this chapter and transfer of equipment or facilities for less than fair market value if a transfer of the equipment or facilities at fair market value would be subject to such review. The cost of any studies, surveys, designs, plans, working drawings, specifications, and other activities essential to the acquisition, improvement, expansion, or replacement of any plant or equipment with respect to which such expenditure is made shall be included in determining the amount of the expenditure.

A "continuing care contract" means a contract to provide a person, for the duration of that person's life or for a term in excess of one year, shelter along with nursing, medical, health-related, or personal care services, which is conditioned upon the transfer of property, the payment of an entrance fee to the provider of such services, or the payment of periodic charges for the care and services involved. A continuing care contract is not excluded from this definition because the contract is mutually terminable or because shelter and services are not provided at the same location.

(4) "Council" means the state health coordinating council created in RCW 70.38.055 and described in Public Law 93-641.

(5) "Department" means the (state) department of (social and health services) health.

In addition, the term does not include any nonprofit hospital: (a) Which is operated exclusively to provide health care services for children; (b) which does not charge fees for such services; (c) whose rate reviews are waived by the state hospital commission); and (d) if not contrary to federal law as necessary to
the receipt of federal funds by the state. In addition, the term does not include a continuing care retirement community which: (i) Offers services only to contractual members; and (ii) provides its members a contractually guaranteed range of services from independent living through skilled nursing, including some form of assistance with activities of daily living; and (iii) contractually assumes responsibility for costs of services exceeding the member's financial responsibility as stated in contract, so that, with the exception of insurance purchased by the retirement community or its members, no third party, including the medicaid program, is liable for costs of care even if the member depletes his or her personal resources; and (iv) has offered continuing care contracts and operated a nursing home continuously since January 1, 1988, or has obtained a certificate of need to establish a nursing home; and (v) maintains a binding agreement with the department of social and health services assuring that financial liability for services to members, including nursing home services, shall not fall upon the department of social and health services; and (vi) does not operate, and has not undertaken, a project which would result in a number of nursing home beds in excess of one for every four living units operated by the continuing care retirement community, exclusive of nursing home beds; and (vii) has undertaken no increase in the total number of nursing home beds after January 1, 1988, unless a professional review of pricing and long-term solvency was obtained by the retirement community within the prior five years and fully disclosed to members.

"Health maintenance organization" means a public or private organization, organized under the laws of the state, which:

(a) Is a qualified health maintenance organization under Title XIII, section 1310(d) of the Public Health Services Act; or

In the case of a proposed health care facility (or portion thereof) which has not begun to provide tertiary health services on the date an application is submitted under this subsection with respect to such facility (or portion), the facility (or portion) shall meet the applicable requirements of subsection (1) of this section when the facility first provides such services. An application by a hospital shall be denied if the state hospital commission
does not recommend approval, unless the secretary provides the commission with a written statement setting forth the reason or reasons, and citing the applicable subsection or subsections of this section, for approving an application that the commission has determined to be not feasible);

(e) In the case of health services to be provided, (i) the availability of alternative uses of project resources for the provision of other health services, (ii) the extent to which such proposed services will be accessible to all residents of the area to be served, and (iii) the need for and the availability in the community of services and facilities for osteopathic and allopathic physicians and their patients. The department shall consider the application in terms of its impact on existing and proposed institutional training programs for doctors of osteopathy and medicine at the student, internship, and residency training levels;

(f) In the case of a construction project, the costs and methods of the proposed construction, including the cost and methods of energy provision, and the probable impact of the construction project reviewed (i) on the cost of providing health services by the person proposing such construction project and (ii) on the cost and charges to the public of providing health services by other persons;

(b) The health maintenance organization is unable to provide, through services or facilities which can reasonably be expected to be available to the organization, its (institutional) health services in a reasonable and cost-effective manner which is consistent with the basic method of operation of
the organization and which makes such services available on a long-term basis through physicians and other health professionals associated with it.

A health care facility ((f)), any part thereof ((or medical equipment)), with respect to which a certificate of need was issued under this subsection may not be sold or leased and a controlling interest in such facility ((or equipment)) or in a lease of such facility ((or equipment)) may not be acquired unless the department issues a certificate of need approving the sale, acquisition, or lease.

(4) Until the final expiration of the state health plan as provided under section 610 of this act, the decision of the department on a certificate of need application shall be consistent with the state health plan in effect, except in emergency circumstances which pose a threat to the public health. The department in making its final decision may issue a conditional certificate of need if it finds that the project is justified only under specific circumstances. The conditions shall directly relate to the project being reviewed. The conditions may be released if it can be substantiated that the conditions are no longer valid and the release of such conditions would be consistent with the purposes of this chapter.

(6) The department shall specify information to be required for certificate of need applications. Within fifteen days of receipt of the application, the department shall request additional information considered necessary to the application or start the review process. Applicants may decline to submit requested information through written notice to the department, in which case review starts on the date of receipt of the notice. Applications may be denied or limited because of failure to submit required and necessary information.

(7) Concurrent review is for the purpose of comparative analysis and evaluation of competing or similar projects in order to determine which of the projects may best meet identified needs. Categories of projects subject to concurrent review include at least new health care facilities, new services, and expansion of existing health care facilities. The department shall specify time periods for the submission of applications for certificates of need subject to concurrent review, which shall not exceed ninety days. Review of concurrent applications shall start fifteen days after the conclusion of the time period for submission of applications subject to concurrent review. Concurrent review periods shall be limited to one hundred fifty days, except as provided for in rules adopted by the department authorizing and limiting amendment during the course of the review, or for an unresolved pivotal issue declared by the department.

(8) Review periods for certificate of need applications other than those subject to concurrent review shall be limited to ninety days. Review periods
may be extended up to thirty days if needed by a review agency, and for unresolved pivotal issues the department may extend up to an additional thirty days. A review may be extended in any case if the applicant agrees to the extension.

(9) The department or its designee, shall conduct a public hearing on a certificate of need application if requested unless the review is expedited or subject to emergency review. The department by rule shall specify the period of time within which a public hearing must be requested and requirements related to public notice of the hearing, procedures, recordkeeping and related matters.

The review of reductions or cost increases shall be restricted to the continued conformance of the nursing home project with the review criteria pertaining to financial feasibility and cost containment.

(13) An application for a certificate of need for a nursing home capital expenditure which is determined by the department to be required to eliminate or prevent imminent safety hazards or correct violations of applicable licensure and accreditation standards shall be approved.

(3) The department, in cooperation with the regional health councils, and the hospital commission in the case of hospital projects, shall monitor the approved projects to assure conformance with certificates of need that have been issued. (4) The secretary, in the case of a new health facility, shall not issue any license unless and until a prior certificate of need shall have been issued by the department for the offering or development of such new health facility.

(5) Any person who engages in any undertaking which requires certificate of need review without first having received from the department either a certificate of need or an exception granted in accordance with this chapter shall be liable to the state in an amount not to exceed one hundred dollars a day for each day of such unauthorized offering or development. Such amounts of money shall be recoverable in an action brought by the attorney general on behalf of the state in the superior court of any county in which the unauthorized undertaking occurred. (4) Grant allocated state funds to qualified entities, as defined by the department, to fund not more than seventy-five percent of the costs of regional planning activities, excluding costs related to review of applications for certificates of need, provided for in this chapter or approved by the department; and

PART VII
RURAL HEALTH

NEW SECTION. Sec. 701. (1) The legislature declares that availability of health services to rural citizens is an issue on which a state policy is needed.

The legislature finds that changes in the demand for health care, in reimbursement policies of public and private purchasers, in the economic and demographic conditions in rural areas threaten the availability of care services.

In addition, many factors inhibit needed changes in the delivery of health care services to rural areas which include inappropriate and outdated regulatory laws, aging and inefficient health care facilities, the absence of local planning and coordination of rural health care services, the lack of community understanding of the real costs and benefits of supporting rural hospitals, the lack of regional systems to assure access to care that cannot be provided in every community, and the absence of state health care policy objectives.

The legislature further finds that the creation of effective health care delivery systems that assure access to health care services provided in an affordable manner will depend on active local community involvement. It further finds that it is the duty of the state to create a regulatory environment and health care payment policy that promotes innovation at the local level to provide such care.
It further declares that it is the responsibility of the state to develop policy that provides direction to local communities with regard to such factors as a definition of health care services, identification of state-wide health status outcomes, clarification of state, regional, community responsibilities and interrelationships for assuring access to affordable health care and continued assurances that quality health care services are provided.

(2) The legislature further finds that many rural communities do not operate hospitals in a cost-efficient manner. The cost of operating the rural hospital often exceeds the revenues generated. Some of these hospitals face closure, which may result in the loss of health care services for the community. Many communities are struggling to retain health care services by operating a cost-efficient facility located in the community. Current regulatory laws do not provide for the facilities licensure option that is appropriate for rural areas. A major barrier to the development of an appropriate rural licensure model is federal medicare approval to guarantee reimbursement for the costs of providing care and operating the facility. Medicare certification typically elaborates upon state licensure requirements. Medicare approval of reimbursement is more likely if the state has developed legal criteria for a rural-appropriate health facility. Medicare has begun negotiations with other states facing similar problems to develop exceptions with the goal of allowing reimbursement of rural alternative health care facilities. It is in the best interests of rural citizens for Washington state to begin negotiations with the federal government with the objective of designing a medicare eligible rural health care facility structured to meet the health care needs of rural Washington and be eligible for federal and state financial support for its development and operation.

NEW SECTION. Sec. 702. Unless the context clearly requires otherwise, the definitions in this section apply throughout this chapter.

(1) "Administrative structure" means a system of contracts or formal agreements between organizations and persons providing health services in an area that establishes the roles and responsibilities each will assume in providing the services of the rural health care facility.

"Health care system strategic plan" means a plan developed by the participant and includes identification of health care service needs of the participant, services and personnel necessary to meet health care service needs, identification of health status outcomes and outcome measures, identification of funding sources, and strategies to meet health care needs including measures of effectiveness.

"Institutions of higher education" means educational institutions as defined in RCW 28B.10.016.

"Secretary" means the secretary of health.

NEW SECTION. Sec. 703. (1) The department shall establish the Washington rural health system project to provide financial and technical assistance to participants. (2) Administrative costs necessary to implement this project shall be kept at a minimum to insure the maximum availability of funds for participants.

(3) The secretary may appoint such technical or advisory committees as he or she deems necessary consistent with the provisions of section 106 of this act. In appointing an advisory committee the secretary should assure representation by health care professionals, health care providers, and those directly involved in the purchase, provision, or delivery of health care services as well as consumers, rural community leaders, and those knowledgeable of the issues involved with health care public policy. Individuals appointed to any technical advisory committee shall serve without compensation for their services as members, but may be reimbursed for their travel expenses pursuant to RCW 43.03.050 and 43.03.060.

(4) The secretary may contract with third parties for services necessary to carry out activities to implement this chapter where this will promote

(6) In designing and implementing the project the secretary shall consider the report of the Washington rural health care commission established under chapter 207, Laws of 1988. Nothing in this chapter requires the secretary to follow any specific recommendation contained in that report except as it may also be included in this chapter.

NEW SECTION. Sec. 704. The department shall adopt rules consistent with this chapter to carry out the purpose of this chapter. All rules shall be adopted in accordance with chapter 34.05 RCW. All rules and procedures adopted by the department shall minimize paperwork and compliance requirements for participants and should not be complex in nature so as to serve as a barrier or disincentive for prospective participants applying for the project.

NEW SECTION. Sec. 705. The secretary shall have the following powers and duties:

(1) To design the project application and selection process, including a program to advertise the project to rural communities and encourage prospective applicants to apply. Up to six project sites shall be selected which are eligible to receive seed grant funding. Funding shall be used to hire consultants and perform other activities necessary to meet participant requirements defined in this chapter. In considering selection of participants eligible for seed grant funding, the secretary should consider project sites where (a) existing access to health care is severely inadequate, (b) where a financially vulnerable health care facility is present, (c) where a financially vulnerable health care facility is present and an adjoining community in the same catchment area has a competing facility, or (d) where improvements in the delivery of primary care services, including preventive care services, is needed.

Up to six additional project sites shall be selected which receive no funding. The secretary shall select unfunded project sites based upon merit and to the extent possible, based upon the desire to address specific health status outcomes;

(2) To design acceptable outcome measures which are based upon health status outcomes and are to be part of the community plan, to work with communities to set acceptable local outcome targets in the health care delivery system strategic plan, and to serve as a general resource to participants in the planning, administration, and evaluation of project sites;

NEW SECTION. Sec. 706. The duties and responsibilities of participating communities shall include:

(1) To involve major health care providers, businesses, public officials, and other community leaders in project design, administration, and oversight;

(2) To identify an individual or organization to serve as the local administrator of the project. The secretary may require the local administrator to maintain acceptable accountability of seed grant funding;

(3) To coordinate and avoid duplication of public health and other health care services;

(4) To assess and analyze community health care needs;

(5) To identify services and providers necessary to meet needs;

(6) To develop outcome measures to assess the long-term effectiveness of modifications initiated through the project;

(7) To write a health care delivery system strategic plan including to the extent possible, identification of outcome measures needed to achieve
new organizational structures created should integrate existing programs and activities of local health providers so as to maximize the efficient planning and delivery of health care by local providers and promote more accessible and affordable health care services to rural citizens. Participants should create health care delivery system strategic plans which promote health care services which the participant can financially sustain;

NEW SECTION. Sec. 707. (1) The secretary may call upon other agencies of the state to provide available information to assist the secretary in meeting the responsibilities under this chapter. This information shall be supplied as promptly as circumstances permit.

(2) The secretary may call upon other state agencies including institutions of higher education as authorized under Title 28B RCW to identify and coordinate the delivery of technical assistance services to participants in meeting the responsibilities of this chapter. The state agencies and institutions of higher education shall cooperate and provide technical assistance to the secretary to the extent that current funding for these agencies and institutions of higher education permits.

NEW SECTION. Sec. 708. In addition to the powers and duties specified in section 705 of this act the secretary has the power to enter into contracts for the following functions and services:

(1) With public or private agencies, to assist the secretary in the secretary's duties to design or revise the health status outcomes, or to monitor or evaluate the performance of participants.

(2) With public or private agencies, to provide technical or professional assistance to project participants.

NEW SECTION. Sec. 709. (1) Participants are authorized to use funding granted to them by the secretary for the purpose of contracting for technical assistance services. Participants shall use only consultants identified by the secretary for consulting services unless the participant can show that an alternative consultant is qualified to provide technical assistance and is approved by the secretary. Adequate records shall be kept by the participant showing project site expenditures from grant moneys. Inappropriate use of grant funding shall be a gross misdemeanor.
(2) In providing a list of qualified consultants the secretary and the state shall not be held responsible for assuring qualifications of consultants and shall be held harmless for the actions of consultants. Furthermore, the secretary and the state shall not be held liable for the failure of participants to meet contractual obligations established in connection with project participation.

NEW SECTION. Sec. 710. (1) The department shall establish and adopt such standards and regulations pertaining to the construction, maintenance, and operation of a rural health care facility and the scope of health care services, and rescind, amend, or modify such regulations from time to time as necessary in the public interest. In developing the regulations, the department shall consult with representatives of rural hospitals, community mental health centers, public health departments, community and migrant health clinics, and other providers of health care in rural communities. The department shall also consult with third-party payers, consumers, local officials, and others to insure broad participation in defining regulatory standards and requirements that are appropriate for a rural health care facility.

(2) When developing the rural health care facility licensure rules, the department shall consider the report of the Washington rural health care commission established under chapter 207, Laws of 1988. Nothing in this chapter requires the department to follow any specific recommendation contained in that report except as it may also be included in this chapter.

(3) Upon developing rules, the department shall enter into negotiations with appropriate federal officials to seek medicare approval of the facility and financial participation of medicare and other federal programs in developing and operating the rural health care facility.

(4) The department shall report periodically to the appropriate committees of the legislature on the progress of rule development and negotiations with the federal government.

NEW SECTION. Sec. 711. In developing the rural health care facility licensure regulations, the department shall:

(1) Minimize regulatory requirements to permit local flexibility and innovation in providing services;

(2) Promote the cost-efficient delivery of health care and other social services as is appropriate for the particular local community;

(3) Promote the delivery of services in a coordinated and nonduplicative manner;

(4) Maximize the use of existing health care facilities in the community;

(5) Permit regionalization of health care services when appropriate;

(6) Provide for linkages with hospitals, tertiary care centers, and other health care facilities to provide services not available in the facility; and

(7) Achieve health care outcomes defined by the community through a community planning process.
NEW SECTION. Sec. 712. The rural health care facility is not considered a hospital for building occupancy purposes.

NEW SECTION. Sec. 713. (1) The legislature finds that a current shortage of nurses exists in many areas of the state as well as in certain nurse specialties. Surveys of nurses in Washington state evidenced a need for more accessible education for advancement to higher levels of practice.

The legislature declares that there is a need for the development of a state-wide plan for nursing education to meet the educational needs of nurses and the health care needs of the citizens of Washington state.

(2) The higher education coordinating board, in consultation with at least the state board of nursing, the state board of practical nursing, representatives of the state board for community college education, the superintendent of public instruction, public and private nursing education, health care facilities, and practicing nurses, shall develop a state-wide plan to be implemented no later than January 1, 1992. The plan shall provide for:

(a) Geographic availability of nursing education and training programs;

(b) Curriculum standards for each type of nursing education and training program;

(c) Procedures to facilitate optimal transfer or granting of course credit;

(d) The use of evaluation processes, which may include challenge exams, to maximize opportunities for receiving credit for both knowledge and clinical skills.

The higher education coordinating board shall submit a plan to the legislature by December 1, 1990. The board shall make a progress report to the senate and house of representatives standing committees on health care by December 1, 1989.

*NEW SECTION. Sec. 714. (1) The legislature finds that a shortage of physicians, nurses, and physician assistants exists in rural areas of the state. In addition, many education programs to train these health care providers do not include options for practical training experience in rural settings. As a result, many health care providers find their current training does not prepare them for the unique demands of rural practice.

The legislature declares that the availability of rural training opportunities as a part of professional medical, nursing, and physician assistant education would provide needed practical experience, serve to attract providers to rural areas, and help address the current shortage of these providers in rural Washington.

(2) The higher education coordinating board, in consultation with at least the state board for community college education, the superintendent of public instruction, and state-supported education programs in medicine and nursing, shall develop a plan for increasing rural training opportunities for students in medicine and nursing. The plan shall provide for direct exposure
to rural health professional practice conditions for students planning careers in rural medicine and nursing.

(3) The boards and the medical and nurse education programs shall:
(a) Inventory existing rural-based clinical experience programs, including internships, clerkships, residencies, and other training opportunities available to students pursuing degrees in nursing and medicine;
(b) Identify where training opportunities do not currently exist and are needed;
(c) Develop recommendations for improving the availability of rural training opportunities;
(d) Develop recommendations on establishing agreements between education programs to assure that all students in medical and nurse education programs in the state have access to rural training opportunities; and
(e) Review private and public funding sources to finance rural-based training opportunities.

(4) The higher education coordinating board shall report to the house of representatives and senate standing committees on health care by December 1, 1989, with their findings and recommendations including needed legislative changes.

*Sec. 714 was vetoed, see message at end of chapter.

NEW SECTION. Sec. 715. (1) The legislature finds that a shortage of trained radiologic technologists, respiratory therapists, and pharmacy and laboratory technologists exists in rural areas of the state. In addition, low patient volumes in rural hospitals and primary care clinics make it financially difficult to hire and retain separate individuals with skills from each of these professions. The result is that health care services that could be provided locally are often not provided and patients are forced to go to urban areas for care.

The legislature declares that some limited cross-credentialing of health professionals with skills from one or more of these professions would be desirable in rural areas where shortages exist. The legislature further declares that the cross-credentialing of health professionals should not result in a reduction in the quality of health care provided by such individuals.

(2) The department of health, in consultation with the board of health, the higher education coordinating board, representatives of rural hospitals and rural primary health care clinics, and other entities that the department of health wishes to consult with, shall investigate opportunities for the development of a pool of individuals who are cross-trained with skills in radiology, respiratory therapy, and pharmacy and laboratory technology.

(3) The department shall:
(a) Determine whether there is a need for health care professionals with multiple skills in rural areas;
(b) Determine whether individuals can be cross-credentialed for multiple skills without a reduction in the quality of health care;
(c) Examine current training, education and state credentialing requirements for each of the affected professions;

(d) Identify what training and educational requirements are needed to allow for the medical practice of individuals with multiple skills;

(e) Develop recommendations on changes in current credentialing requirements to allow for credentialing of individuals with multiple skills; and

(f) Develop recommendations on whether the practice of cross-credentialed individuals should be limited to rural areas of the state.

(4) The department shall report to the house of representatives committee on health care and the senate committee on health care and corrections by December 1, 1990, on the need for changes in current credentialing requirements for the affected professions.

(5) The sum of forty-five thousand four hundred ninety-three dollars, or as much thereof as may be necessary, is appropriated from the health professions account to the department of health for the biennium ending June 30, 1991, to carry out the purposes of this section.

NEW SECTION. Sec. 716. The legislature finds that changes in demographics, the delivery of health care services, and an escalation in the cost of educating health professionals has resulted in shortages of health professionals. A poor distribution of health care professionals has resulted in a surplus of some professionals in some areas of the state and a shortage of others in other parts of the state such as in the more rural areas. The high cost of health professional education requires that health care practitioners command higher incomes to repay the financial obligations incurred to obtain the required training. Health professional shortage areas are often areas that have troubled economies and lower per capita incomes. These areas often require more services because the health care needs are greater due to poverty or because the areas are difficult to service due to geographic circumstances. The salary potentials for shortage areas are often not as favorable when compared to nonshortage areas and practitioners are unable to serve. The legislature further finds that encouraging health professionals to serve in shortage areas is essential to assure continued access to health care for persons living in these parts of the state.

NEW SECTION. Sec. 717. Unless the context clearly requires otherwise, the definitions in this section apply throughout this chapter.

(1) "Loan repayment" means a loan that is paid in full or in part if the participant renders health care services in a health professional shortage area or medically underserved areas as defined by the department of health.

(2) "Participant" means a licensed health professional who has commenced practice as a primary care provider in a designated health professional shortage area.

(3) "Board" means the higher education coordinating board.

(4) "Health professional shortage areas" means those geographic areas where health professionals are in short supply as a result of geographic
maldistribution and where vacancies exist in serious numbers that jeopardize patient care and pose a threat to the public health and safety. The department of health shall determine health professional shortage areas in the state guided by federal standards of "health manpower shortage areas," and "medically underserved areas," and "medically underserved populations."

(5) "Satisfied" means paid-in-full.

(6) "Licensed health professional" means a person authorized in the state of Washington to practice medicine pursuant to chapter 18.57 or 18.57A RCW or 18.71 or 18.71A RCW, to practice nursing pursuant to chapter 18.88 or 18.78 RCW, or to practice dentistry pursuant to chapter 18.32 RCW.

NEW SECTION. Sec. 718. The health professional loan repayment program is established for licensed health professionals serving in health professional shortage areas. The program shall be administered by the higher education coordinating board. In administering this program, the board shall have the following duties:

(1) It shall select licensed health professionals to participate in the loan repayment program;
(2) It shall adopt rules to administer the program;
(3) It shall publicize the program; and
(4) It shall solicit and accept grants and donations from public and private sources for the program.

NEW SECTION. Sec. 719. The board shall establish a planning committee to assist it in developing criteria for the selection of participants. The board shall, at a minimum, include on the planning committee: Representatives from rural hospitals; public health districts or departments; community and migrant clinics; and private providers.

NEW SECTION. Sec. 720. The board may grant loan repayment awards to eligible participants from the funds appropriated for this purpose, or from any private or public funds given to the board for this purpose. The amount of the loan repayment shall not exceed fifteen thousand dollars per year for a maximum of five years. The board may establish awards of less than fifteen thousand dollars per year based upon reasonable levels of expenditures for each of the health professions covered by this chapter. Participants in the conditional scholarship program authorized by chapter 28B.104 RCW are ineligible to receive assistance from the program authorized by this chapter.

NEW SECTION. Sec. 721. Participants in the health professional loan repayment program shall receive payment from the program for the purpose of repaying educational loans secured while attending a program of health professional training which led to licensure as a licensed health professional in the state of Washington.
(1) Participants shall agree to serve at least three years in a designated health professional shortage area.

(2) In providing health care services the participant shall not discriminate against any person on the basis of the person's ability to pay for such services or because payment for the health care services provided to such persons will be made under the insurance program established under part A or B of Title XVIII of the federal social security act or under a state plan for medical assistance approved under Title XIX of the federal social security act and agrees to accept assignment under section 18.42(b)(3)(B)(ii) of such act for all services for which payment may be made under part B of Title XVIII and enters into an appropriate agreement with the department of social and health services for medical assistance under Title XIX to provide services to individuals entitled to medical assistance under the plan. Participants found by the board in violation of this section shall be declared ineligible for receiving assistance under the program authorized by this chapter.

(3) Repayment shall be limited to reasonable educational and living expenses as determined by the board and shall include principal and interest.

(4) Loans from both government and private sources may be repaid by the program. Participants shall agree to allow the board access to loan records and to acquire information from lenders necessary to verify eligibility and to determine payments. Loans may not be renegotiated with lenders to accelerate repayment.

(5) Repayment of loans established pursuant to this program shall begin no later than ninety days after the individual has become a participant. Payments shall be made quarterly, or more frequently if deemed appropriate by the board, to the participant until the loan is repaid or the participant becomes ineligible due to discontinued service in a health professional shortage area or after the fifth year of services when eligibility discontinues, whichever comes first.

(6) Should the participant discontinue service in a health professional shortage area payments against the loans of the participants shall cease to be effective on the date that the participant discontinues service.

(7) Except for circumstances beyond their control, participants who serve less than three years shall be obligated to repay to the program an amount equal to twice the total amount paid by the program on their behalf in addition to any payments on the unsatisfied portion of the principal and interest. The board shall determine the applicability of this subsection.

(8) The board is responsible for the collection of payments made on behalf of participants from the participants who discontinue service before their three-year obligation. The board shall exercise due diligence in such collection, maintaining all necessary records to ensure that the maximum
amount of payment made on behalf of the participant is recovered. Collection under this section shall be pursued using the full extent of the law, including wage garnishment if necessary.

(9) The board shall not be held responsible for any outstanding payments on principal and interest to any lenders once a participant’s eligibility expires.

NEW SECTION. Sec. 722. After consulting with the higher education coordinating board, the governor may transfer the administration of this program to another agency with an appropriate mission.

NEW SECTION. Sec. 723. No loan repayment may be awarded after June 30, 1995.

Sec. 816. Section 1, chapter 6, Laws of 1981 1st ex. sess. as last amended by section 31, chapter 75, Laws of 1987 and by section 9, chapter 406, Laws of 1987 and RCW 74.04.005 are each reenacted and amended to read as follows:

For the purposes of this title, unless the context indicates otherwise, the following definitions shall apply:

(1) "Public assistance" or "assistance"—Public aid to persons in need thereof for any cause, including services, medical care, assistance grants, disbursing orders, work relief, general assistance and federal-aid assistance.

(2) "Department"—The department of social and health services.

(3) "County or local office"—The administrative office for one or more counties or designated service areas.

(4) "Director" or "secretary" means the secretary of social and health services.

(5) "Federal-aid assistance"—The specific categories of assistance for which provision is made in any federal law existing or hereafter passed by which payments are made from the federal government to the state in aid or in respect to payment by the state for public assistance rendered to any category of needy persons for which provision for federal funds or aid may from time to time be made, or a federally administered needs–based program.

(6) (a) "General assistance"—Aid to persons in need who:

(i) Are not eligible to receive federal–aid assistance, other than food stamps and medical assistance; however, an individual who refuses or fails to cooperate in obtaining federal–aid assistance, without good cause, is not eligible for general assistance;

(ii) Are either:

(A) Pregnant: PROVIDED, That need is based on the current income and resource requirements of the federal aid to families with dependent children program: PROVIDED FURTHER, That during any period in which an aid for dependent children employable program is not in operation, only those pregnant women who are categorically eligible for medicaid are eligible for general assistance; or

(B) Incapacitated from gainful employment by reason of bodily or mental infirmity that will likely continue for a minimum of sixty days as determined by the department. Persons who are unemployable due to alcohol or drug addiction are not eligible for general assistance. Persons receiving general assistance on July 26, 1987, or becoming eligible for such assistance thereafter, due to an alcohol or drug–related incapacity, shall be referred to appropriate assessment, treatment, shelter, or supplemental security income referral services as authorized under chapter 74.50 RCW.
Referrals shall be made at the time of application or at the time of eligibility review. Alcoholic and drug addicted clients who are receiving general assistance on July 26, 1987, may remain on general assistance if they otherwise retain their eligibility until they are assessed for services under chapter 74.50 RCW. This subsection (6)(a)(ii)(B) shall not be construed to prohibit the department from granting general assistance benefits to alcoholics and drug addicts who are incapacitated due to other physical or mental conditions that meet the eligibility criteria for the general assistance program;

(iii) Are citizens or aliens lawfully admitted for permanent residence or otherwise residing in the United States under color of law; and

(iv) Have furnished the department their social security account number. If the social security account number cannot be furnished because it has not been issued or is not known, an application for a number shall be made prior to authorization of assistance, and the social security number shall be provided to the department upon receipt.

(b) Notwithstanding the provisions of subsection (6)(a)(i), (ii), and (c) of this section, general assistance shall be provided to the following recipients of federal-aid assistance:

(i) Recipients of supplemental security income whose need, as defined in this section, is not met by such supplemental security income grant because of separation from a spouse; or

(ii) To the extent authorized by the legislature in the biennial appropriations act, to recipients of aid to families with dependent children whose needs are not being met because of a temporary reduction in monthly income below the entitled benefit payment level caused by loss or reduction of wages or unemployment compensation benefits or some other unforeseen circumstances. The amount of general assistance authorized shall not exceed the difference between the entitled benefit payment level and the amount of income actually received.

(c) General assistance shall be provided only to persons who are not members of assistance units receiving federal aid assistance, except as provided in subsection (6)(a)(ii)(A) and (b) of this section, and will accept available services which can reasonably be expected to enable the person to work or reduce the need for assistance unless there is good cause to refuse. Failure to accept such services shall result in termination until the person agrees to cooperate in accepting such services and subject to the following maximum periods of ineligibility after reapplication:

(i) First failure: One week;

(ii) Second failure within six months: One month;

(iii) Third and subsequent failure within one year: Two months.

(d) The department shall adopt by rule medical criteria for general assistance eligibility to ensure that eligibility decisions are consistent with
statutory requirements and are based on clear, objective medical information.

(e) The process implementing the medical criteria shall involve consideration of opinions of the treating or consulting physicians or health care professionals regarding incapacity, and any eligibility decision which rejects uncontroverted medical opinion must set forth clear and convincing reasons for doing so.

(f) Recipients of general assistance who remain otherwise eligible shall not have their benefits terminated absent a clear showing of material improvement in their medical or mental condition or specific error in the prior determination that found the recipient eligible by reason of incapacitation.

(7) "Applicant"—Any person who has made a request, or on behalf of whom a request has been made, to any county or local office for assistance.

(8) "Recipient"—Any person receiving assistance and in addition those dependents whose needs are included in the recipient's assistance.

(9) "Standards of assistance"—The level of income required by an applicant or recipient to maintain a level of living specified by the department.

(10) "Resource"—Any asset, tangible or intangible, owned by or available to the applicant at the time of application, which can be applied toward meeting the applicant's need, either directly or by conversion into money or its equivalent: PROVIDED, That an applicant may retain the following described resources and not be ineligible for public assistance because of such resources.

(a) A home, which is defined as real property owned and used by an applicant or recipient as a place of residence, together with a reasonable amount of property surrounding and contiguous thereto, which is used by and useful to the applicant. Whenever a recipient shall cease to use such property for residential purposes, either for himself or his dependents, the property shall be considered as a resource which can be made available to meet need, and if the recipient or his dependents absent themselves from the home for a period of ninety consecutive days such absence, unless due to hospitalization or health reasons or a natural disaster, shall raise a rebuttable presumption of abandonment: PROVIDED, That if in the opinion of three physicians the recipient will be unable to return to the home during his lifetime, and the home is not occupied by a spouse or dependent children or disabled sons or daughters, such property shall be considered as a resource which can be made available to meet need.

(b) Household furnishings and personal effects and other personal property having great sentimental value to the applicant or recipient, as limited by the department consistent with limitations on resources and exemptions for federal aid assistance.
(c) A motor vehicle, other than a motor home, used and useful having an equity value not to exceed one thousand five hundred dollars.

(d) All other resources, including any excess of values exempted, not to exceed one thousand dollars or other limit as set by the department, to be consistent with limitations on resources and exemptions necessary for federal aid assistance.

(e) Applicants for or recipients of general assistance may retain the following described resources in addition to exemption for a motor vehicle or home and not be ineligible for public assistance because of such resources:

(i) Household furnishings, personal effects, and other personal property having great sentimental value to the applicant or recipient;

(ii) Term and burial insurance for use of the applicant or recipient;

(iii) Life insurance having a cash surrender value not exceeding one thousand five hundred dollars; and

(iv) Cash, marketable securities, and any excess of values above one thousand five hundred dollars equity in a vehicle and above one thousand five hundred dollars in cash surrender value of life insurance, not exceeding one thousand five hundred dollars for a single person or two thousand two hundred fifty dollars for a family unit of two or more. The one thousand dollar limit in subsection (10)(d) of this section does not apply to recipients of or applicants for general assistance.

(f) If an applicant for or recipient of public assistance possesses property and belongings in excess of the ceiling value, such value shall be used in determining the need of the applicant or recipient, except that: (i) The department may exempt resources or income when the income and resources are determined necessary to the applicant's or recipient's restoration to independence, to decrease the need for public assistance, or to aid in rehabilitating the applicant or recipient or a dependent of the applicant or recipient; and (ii) the department may provide grant assistance to persons who are otherwise ineligible because of excess real property owned by such persons when they are making a good faith effort to dispose of that property, but the recipient must sign an agreement to dispose of the property and repay assistance payments made to the date of disposition of the property which would not have been made had the disposal occurred at the beginning of the period for which the payments of such assistance were made. In no event shall such amount due the state exceed the net proceeds otherwise available to the recipient from the disposition, unless after nine months from the date of the agreement the property has not been sold, or if the recipient's eligibility for financial assistance ceases for any other reason. In these two instances the entire amount of assistance paid during this period will be treated as an overpayment and a debt due the state, and may be recovered pursuant to RCW 43.20B.630.
"Income"—(a) All appreciable gains in real or personal property (cash or kind) or other assets, which are received by or become available for use and enjoyment by an applicant or recipient during the month of application or after applying for or receiving public assistance. The department may by rule and regulation exempt income received by an applicant for or recipient of public assistance which can be used by him to decrease his need for public assistance or to aid in rehabilitating him or his dependents, but such exemption shall not, unless otherwise provided in this title, exceed the exemptions of resources granted under this chapter to an applicant for public assistance. In determining the amount of assistance to which an applicant or recipient of aid to families with dependent children is entitled, the department is hereby authorized to disregard as a resource or income the earned income exemptions consistent with federal requirements. The department may permit the above exemption of earnings of a child to be retained by such child to cover the cost of special future identifiable needs even though the total exceeds the exemptions or resources granted to applicants and recipients of public assistance, but consistent with federal requirements. In formulating rules and regulations pursuant to this chapter, the department shall define income and resources and the availability thereof, consistent with federal requirements. All resources and income not specifically exempted, and any income or other economic benefit derived from the use of, or appreciation in value of, exempt resources, shall be considered in determining the need of an applicant or recipient of public assistance.

(b) If, under applicable federal requirements, the state has the option of considering property in the form of lump sum compensatory awards or related settlements received by an applicant or recipient as income or as a resource, the department shall consider such property to be a resource.

"Need"—The difference between the applicant's or recipient's standards of assistance for himself and the dependent members of his family, as measured by the standards of the department, and value of all nonexempt resources and nonexempt income received by or available to the applicant or recipient and the dependent members of his family.

For purposes of determining eligibility for public assistance and participation levels in the cost of medical care, the department shall exempt restitution payments made to people of Japanese and Aleut ancestry pursuant to the Civil Liberties Act of 1988 and the Aleutian and Pribilof Island Restitution Act passed by congress, P.L. 100-383, including all income and resources derived therefrom.

In the construction of words and phrases used in this title, the singular number shall include the plural, the masculine gender shall include both the feminine and neuter genders and the present tense shall include the
past and future tenses, unless the context thereof shall clearly indicate to
the contrary.

Passed the Senate May 7, 1989.
Passed the House May 10, 1989.
Approved by the Governor May 31, 1989, with the exception of certain items which were vetoed.
Filed in Office of Secretary of State May 31, 1989.

Note: Governor's explanation of partial veto is as follows:

"I am returning herewith, without my approval as to sections 105, 209, 302, 415, 512, 714, and 814, Engrossed Senate Bill No. 6152 entitled:

"AN ACT Relating to health."

I am pleased that you have sent me a bill creating a Department of Health which encompasses the full range of health issues. You have done considerable and admirable work on this piece of legislation, and it is my pleasure to sign the majority of this bill into law.

While a great number of the programs and policies contained in this bill are sound public policy, I am very concerned for the viability of this Department. When I originally proposed a Department of Health, we carefully and conservatively estimated the costs of transition and of various new programs. However, both the funding provided for the transition in the budget bill and the appropriations for new programs in this bill are grossly inadequate, leaving an estimated shortfall of nearly $2 million. I cannot in good conscience allow this level of new unfunded programs in this Department.

Therefore, I am vetoing those sections of the bill which are not critical to the viability of the Department of Health. This message should not be construed as a statement in opposition to the policy of these sections, except where I have specifically noted. Although I have been forced to use my veto power, there remains a resource shortfall. Without vetoing the entire measure, there is no way I can eliminate the deficit. I am very disappointed that the Legislature did not fully fund this new Department and allow it to begin its duties with sufficient resources.

Section 105 requires that the State Health Officer hold the position of Deputy Secretary within the Department of Health and be subject to Senate confirmation. The requirement of Deputy Director confirmation by the Senate is unprecedented and inappropriate. The other requirements remove administrative flexibility from the executive branch. While I agree that there should be a person employed by the Department with the expertise as defined in this section, I do not agree that the position must be a Deputy Secretary. If I do not appoint a Secretary with the qualifications required by this section, I will ask the Secretary to hire such a person to fill an appropriate position.

Section 209 mandates an increase in staff to the Board of Health. The Board has been understaffed for years, but has been unsuccessful in obtaining the funding for staff support. Currently, the Board is allowed to hire an executive director and a
confidential secretary, but does not have sufficient funds to fill either of those positions. While I strongly support providing the Board of Health with needed assistance, I cannot support signing this section without the appropriate funding accompanying this mandated increase.

Section 302 requires the Department of Health to study and report on health care professional licensure needs. This is a subject deserving a coordinated review; however, I cannot support signing this section without an accompanying appropriation.

Section 415 amends RCW 18.64.044 which is also amended by section 401. Since the language within section 401 reflects the statute as amended by section 1, chapter 352, Laws of 1989 (HB 1478), I am vetoing section 415.

Section 512 requires the Department of Health to perform a biennial study of the State's expenditures on health care services, and submit that report to the Legislature. Since this study was not funded and the Legislature currently has the ability to request this type of information from each of the affected state agencies, I am vetoing this section.

Section 714 requires the Higher Education Coordinating Board (HECB) to develop a plan for increasing rural training opportunities for students in medicine and nursing by December 1, 1989. I agree that the training needed for working in rural settings is different from that needed for urban settings; however, I cannot support yet another unfunded study requirement of the HECB. Note, I would have also vetoed section 713 of this bill but we have the opportunity, given the delayed due date of that study, to come back and seek funding to carry out its purpose.

Section 814 requires the Department or Social and Health Services to monitor alcohol and drug treatment programs, to collect data on addicted persons who receive general assistance, and to contract with the University of Washington Alcoholism and Drug Abuse Institute to evaluate treatment outcomes. Although the purposes of this section are of value, no funds have been provided for these purposes. In order to collect this data, the Department would have to use a substantial portion of funds provided for treatment services. This diversion of treatment funds would impair the State's commitment to assist as many addicted persons as we can to overcome their addictions.

I strongly urge the Legislature to consider the impact of legislation on the budget before passing legislation. The unfunded programs and studies which I am returning to you without my approval are programs of merit. I strongly encourage you to revisit these issues, and to pass them again with appropriate funding.

With the exception of sections 105, 209, 302, 415, 512, 714, and 814, Engrossed Senate Bill No. 6152 is approved.

CHAPTER 10
