

	12-9-14 DRAFT RECOMMENDATIONS	Sen. Frockt	Marty Brown	Council of Presidents
Data	1. Develop and expand data collection for the College Bound Scholarship Program from enrollment through post-secondary education via the Washington State Education Research and Data Center (ERDC).			
	2. Study certain aspects of the program and student outcomes.			
	3. Reconvene the CBS Program Work Group in 2017 to review program data and determine whether program changes are needed.	Combine #3 & #4: Direct WSIPP or JLARC to conduct a study to be completed after 2018 (5 yrs after the first cohort of scholars first enrolled in college) to evaluate educational outcomes emphasizing degree completion rates at both the high school and college levels. Reconvene the CBS Program Work Group at the conclusion to review the data and determine whether further program changes are recommended.		
	4. Direct the Washington State Institute for Public Policy to conduct a study to ensure effective CBS spending as well as address potential equity issues.		#4 we should say "request" rather than "direct" WSIPP unless we ask for money too.	
Student Supports: College Access	5. Add a robust student component to the CBS Portal to maintain contact and help students manage their college preparation work.			
	6. Leverage coordinated support with the state's required High School and Beyond Plan in middle and high schools.			

	7. Implement a coordinated service model using K-2, postsecondary and youth-serving organizations to equalize mentoring and advising resources across the state.		#7 should say "K-12" not "K-2" organizations	
Student Supports: College Completion	8. Require postsecondary institutions to designate a CBS professional on campus to be the contact for CBS students in order to receive CBS support dollars.		#8 and #9 will need money if they are required and I question why these students are more important than other students receiving financial aid.	Concerns with mandates without resources & singling out only students eligible for CBS
	9. Require institutions to provide tailored advising resources for CBS students once they have enrolled at a post-secondary institution.			
Communication	10. Enhance communications with contact metrics, including more robust and comprehensive social media outreach, designed to keep CBS students on track to graduate. Expand online resources to help schools track students and find new ways to reach out at key junctures.		#10 will need money	
Statutory Changes	11. Align statute with administrative rules that were implemented to provide clarity for students.			
	12. Direct WSAC to actually verify that applicants have no felony convictions.			

	13. Synchronize the income eligibility factors for CBS and SNG.			
	14. There is not a need for statutory changes at this time.			
Funding	15. Fully fund the State Need Grant Program.	Fund the State Need Grant Program Consistently With A Goal of Full Funding To Leave No Eligible Students Unserved	#15 and #16 conflict. I support 15 but we can't afford it so 16 is more realistic.	
	16. Phase in full funding of the State Need Grant Program to align with the recommendation of the Washington Student Achievement Council.			
	17. Continue to fully fund CBS caseload requirements.			
	18. Invest long-range funding for the CBS program in dedicated state accounts to save for long term CBS costs.			
	19. Fully fund enhanced coordinated support services for CBS students.			
	20. Create a competitive grant program seeded with state funds to be awarded to high quality outreach programs that can demonstrate success in improving both high school and college graduation rates for CBS students.			

<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Paramount Duty</p>	<p>21. CBS and SNG programs shall be fully funded and considered an integral part of the State's overall commitment to the paramount duty.</p>		<p>I disagree with #21. I don't think financial aid is part of the paramount duty...education beyond 12th grade for all may well be but not just financial aid eligible students.</p>
