

# Compensation Discussion Follow-up

- During the October 12<sup>th</sup> meeting of the Joint Task Force on Education Funding, the Task Force expressed a desire to look at classified and administrator salaries in the scope of its potential recommendation
- Rep. Hunter's strawman proposal showed the difference in cost between current state allocations in these classifications and the total salaries paid by the school districts for these same positions.
- To clarify, not all of the total salaries are necessarily basic education salaries
  - They include compensation for extra duties currently defined as outside the scope of basic education
  - They include salaries for state-funded positions that districts enhance using state, federal and local funds.
  - The state currently does not have the data that would be needed to untangle these components of locally paid salaries.
