

**Addendum to Strategy 1 (Build a high performing health care system that ensures quality, affordable care)**

**Support the Community Health Care Collaborative Grant Program.** Continue support for the Community Health Care Collaborative Grant Program to fund local organizations that demonstrate improved access to high-quality care and efficient use of health care resources. Promote among other things the placement within communities of access specialists, information and services responsive to particular populations within the community, and the formal organization of local health professionals and institutions to provide appropriate free or low-cost care.
