

SHB 1555 Underground Economy; Master Licensing Process

Contractor files for city business license through the partner city or Master License Service.

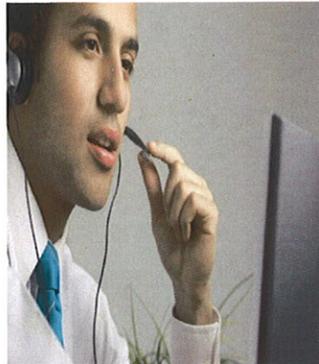

City addendum form asks if the applicant is a contractor.

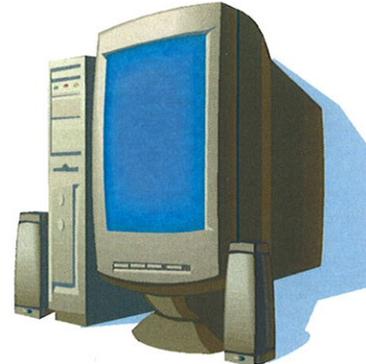

Master License Service processes the application and city addendum form.

Information is sent to the partner city for approval of the city business license.

City staff determine what actions are necessary, if any. The city may contact the contractor, L&I or the Dept. of Licensing.

Results from comparison are immediately displayed to the partnering city (i.e. the contractor is or is not a licensed contractor with L&I)

City staff approve the application in the MLS system which compares information against the L&I contractor master data file.
