LEGISLATIVE AUDITOR

Ruta Fanning

The Joint Legislative Audit and Review Committee (JLARC) carries out oversight, review, and evaluation of state-funded programs and activities on behalf of the Legislature and the citizens of Washington State. This joint, bipartisan committee consists of eight senators and eight representatives, equally divided between the two major political parties. Its statutory authority is established in RCW 44.28.

JLARC staff, under the direction of the Committee and the Legislative Auditor, conduct performance audits, program evaluations, sunset reviews, and other policy and fiscal studies. These studies assess the efficiency and effectiveness of agency operations, impacts and outcomes of state programs, and levels of compliance with legislative direction and intent. The Committee makes recommendations to improve state government performance and to correct problems it identifies. The Committee also follows up on these recommendations to determine how they have been implemented. JLARC has, in recent years, received national recognition for a number of its major studies.

Refreshing The Comparable Framework

The Comparable Framework is an inventory database JLARC first assembled in 2003 to provide comparable information about college and university facilities for supporting preservation planning at the state level (JLARC Report 03-1, January 8, 2003). The 2005 Capital Budget Act assigned to JLARC the task of refreshing preservation information to support the statutorily prescribed higher education capital project ranking process outlined in RCW 28B.76.220. The charts and tables which make up the body of this report illustrate inventory conditions projected to July 2006 for six baccalaureate institutions and the state's system of community and technical colleges.

Inventory and Value

Washington's public higher education institutions manage two-thirds of all state facilities—over 2,500 buildings totaling 54 million square feet. The state capital-supported portion (42.5 million square feet) is valued at \$14.6 billion to replace. The replacement value has increased by 27 percent since 2003. This change was caused substantially by a sharp rise in market costs for buildings and building systems.

Building Conditions

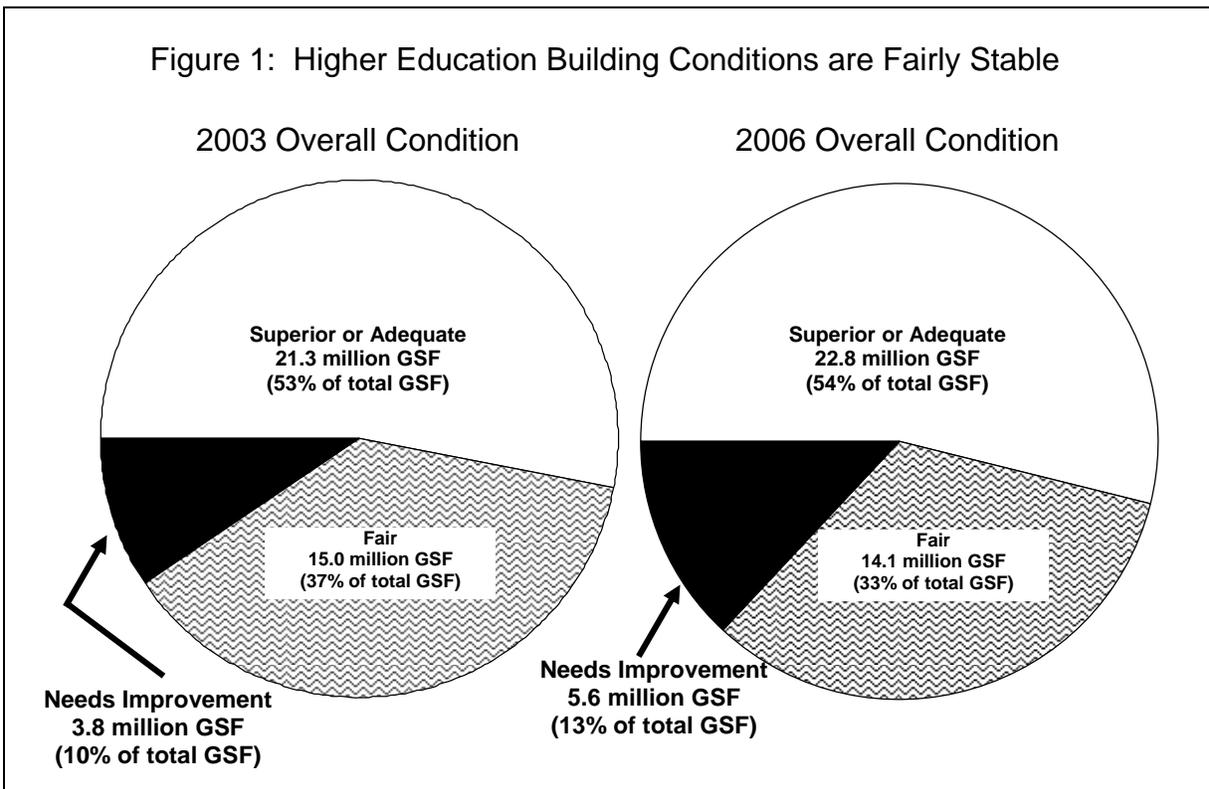

The good news is that building conditions on a statewide and institutional basis are fairly stable. Three years after the 2003 JLARC study, average facility conditions remain solidly in the "adequate" category. But an increased share of the state's total inventory needs improvement—13 percent today compared to 10 percent back in 2003. (See Figure 1 on the following page.)

While the majority of the space needing improvement (5.6 million gross square feet) represents buildings used predominantly for teaching and study, a noticeable shift happened for research buildings. A larger portion of research buildings that were categorized as "fair" in the 2003 inventory are now functioning in "limited" or "marginal" ways for that purpose.

Preservation "Backlogs"

Comparable Framework profiles created for this report include an estimate of the cost of building maintenance and repair system replacement projects to safely preserve campus facilities for current use. The estimating technique produces reliable statistics at an institution level for work not yet done, and are referred to as a "backlog." Aggregating those values statewide, the total preservation "backlog" rose by \$472 million to \$1.8 billion since 2003. Nearly half the increase over the three years can be attributed to underlying price increases (19 percent). The balance is due to a combination of more buildings, aged systems and deferred work.

Figure 1: Higher Education Building Conditions are Fairly Stable

There were changes to the state's capital inventory between 2003 and 2006. New facilities were constructed; major renovations occurred; minor work projects continue, and at some sites, older facilities were razed. It's important to bear in mind—for evaluation purposes—that every building contributes to the Framework's total preservation "backlog" estimates whether profiled buildings are operating in superior, fair or even marginal working condition today. For a longer discussion of this topic, see Chapter 2 on facility renewal in JLARC Report 05-10.

Acknowledgements

JLARC would like to recognize the efforts of Eric Meng, principal for Meng Analysis, as well as state college and university staff who reviewed inventory information and hosted field survey team visitors necessary to complete this data refresh assignment from the Legislature. As the assignment to manage the Comparable Framework has not yet been made to any one state agency, JLARC is transmitting copies of the 2006 inventory database to the Higher Education Coordinating Board, the Office of Financial Management, Senate Ways & Means and House Capital committees for their use.

Ruta Fanning
Legislative Auditor

On March 29, 2006, this report was approved for distribution by the Joint Legislative Audit and Review Committee.

Representative Ross Hunter
Chair

2006 REFRESH – DETAIL ON BUILDING CONDITIONS AND PRESERVATION BACKLOGS

This section summarizes the building condition and preservation backlog information in the 2006 Comparable Framework.

Summary Number	Page	Title	Highlights
4-1	3	<i>Overall Condition of Higher Education Buildings</i>	<ul style="list-style-type: none"> ❖ The majority (54%) of higher education space is in superior or adequate condition. ❖ About 13% of space needs improvement in the immediate future.
4-2	4	<i>Condition of Buildings by Institution</i>	<ul style="list-style-type: none"> ❖ Community and Technical Colleges have the greatest amount of space needing immediate improvement (2.1 million GSF), followed by UW (1.9 million GSF) and WSU (0.9 million GSF).
4-3	5	<i>Condition of Buildings by Building Use</i>	<ul style="list-style-type: none"> ❖ Most of the space needing immediate improvement (64%) is used predominantly for teaching and study purposes. ❖ More campus buildings where research is the predominant use, once “fair,” are now functioning in “limited” or “marginal” ways for that purpose.
4-4	6	<i>JLARC’s Preservation Backlog Estimating Method</i>	<ul style="list-style-type: none"> ❖ Preservation backlogs are the projected cost of building maintenance, repair, and system replacement projects to safely preserve entire facilities for their current use. ❖ The backlog estimating method for the Framework produces reliable totals at the institutional level. It cannot nor should be used to isolate costs for individual campus building projects.
4-5	7	<i>Preservation Backlogs</i>	<ul style="list-style-type: none"> ❖ Estimated preservation backlogs for all state-supported buildings total \$1.8 billion. ❖ Community and Technical Colleges have the largest preservation backlogs (\$628 million), followed by UW (\$497 million) and WSU (\$395 million).
4-6	8	<i>Facility Condition Index</i>	<ul style="list-style-type: none"> ❖ The Facility Condition Index is the ratio of preservation backlogs over current replacement value, expressed as a percentage. ❖ Over time, effective preservation should result in <u>decreasing</u> FCIs. ❖ Across institutions, WWU, WSU, and the CCTCs have the highest FCIs.
4-7	9	<i>Backlogs in Buildings Needing Immediate Improvement</i>	<ul style="list-style-type: none"> ❖ Estimated preservation backlogs in the 13% of buildings needing immediate improvement make up \$820 million of the \$1.8 billion total preservation backlog.

HIGHER EDUCATION INSTITUTIONS

- University of Washington (UW)
- Washington State University (WSU)
- Eastern Washington University (EWU)
- Central Washington University (CWU)
- The Evergreen State College (TESC)
- Spokane Intercollegiate Research and Technology Institute (SIRTI)
- Western Washington University (WWU)
- Community and Technical College System (CCTS)

Summary 4-1, 2006 Update

OVERALL CONDITION OF HIGHER EDUCATION BUILDINGS

(State and Mixed Supported Buildings Over 1,999 GSF)

* *JLARC developed methods to cross-walk and translate building condition information created and maintained by each institution into a "common denominator" scoring system. Scores were field-tested to ensure accuracy and comparability across institutions.*

* *The "common denominator" scoring system uses five condition classes that describe the overall condition and functionality of major building systems (e.g., foundations, building structures, roofs, interior construction and finishes, HVAC systems, electrical systems, plumbing, etc.).*

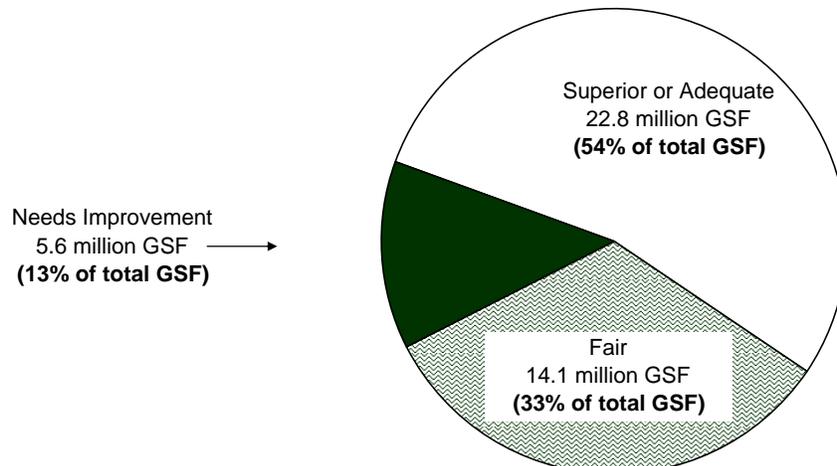

Condition Score	Condition Class	Description
1	Superior	A building with major systems that are in extremely good condition and functioning well.
2	Adequate	A building with major systems in good condition, functioning adequately, and within their expected life cycles.
3	Fair - Systems approaching end of expected life cycles	A building with some older major systems that, though still functional, are approaching the end of their expected life cycles.
4	Needs Improvement: Limited Functionality	A building with some major systems that are in poor condition, exceed expected life cycles, and require immediate attention to prevent or mitigate impacts on function.
5	Needs Improvement: Marginal Functionality	A building with some major systems that are failing and significantly restrict continued use of the building.

54% of higher education space is in superior or adequate condition, with condition scores of 1 or 2.

33% of higher education space is in fair condition, with a condition score of 3.

13% of higher education space needs improvement, with condition scores of 4 or 5.

The Majority of Higher Education Space is in Superior or Adequate Condition

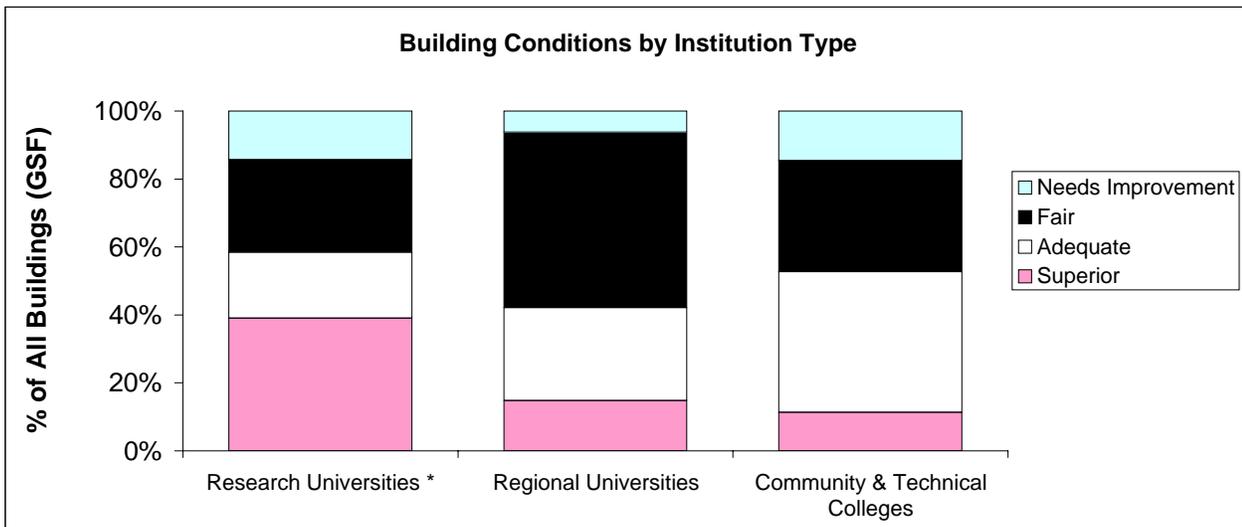

Summary 4-2, 2006 Update

CONDITION OF BUILDINGS BY INSTITUTION

(State and Mixed Supported Buildings Over 1,999 GSF)

- * *The Community & Technical Colleges have the greatest amount of space needing immediate improvement (2.1 million GSF), followed by UW (1.9 million GSF), and WSU (0.9 million GSF).*
- * *Overall, the four Regional Universities have the smallest proportion of space in superior and adequate condition.*
- * *The average condition score of all higher education buildings, weighted by GSF, is 2.35 (roughly a third of the way between "adequate" and "fair").*

* Includes SIRTl.

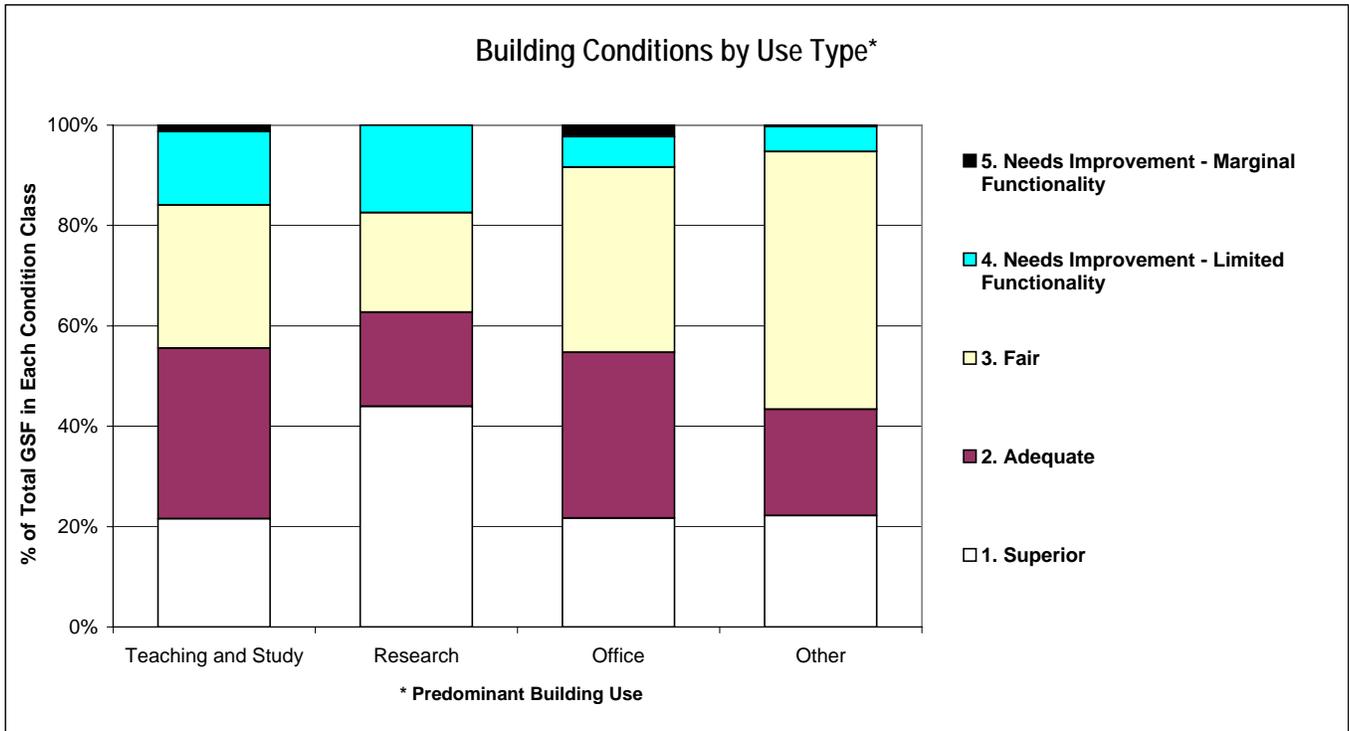

INSTITUTION	Average Condition Score	AMOUNT OF SPACE IN EACH CONDITION CLASS										
		1. SUPERIOR		2. ADEQUATE		3. FAIR		4. NEEDS IMPROVEMENT - LIMITED FUNCTIONALITY		5. NEEDS IMPROVEMENT - MARGINAL FUNCTIONALITY		TOTAL

Summary 4-3, 2006 Update

CONDITION OF PUBLIC HIGHER EDUCATION BUILDINGS BY BUILDING USE

(State and Mixed Supported Buildings Over 1,999 GSF)

- * *More than one-half of teaching and study buildings are in superior or adequate condition.*
- * *Almost two-thirds of research buildings are in superior or adequate condition.*
- * *Of all space in condition classes 4 & 5 (needing improvement), 64% is in teaching and study buildings, and 22% in research buildings.*

PREDOMINANT BUILDING USE	Average Condition Score	AMOUNT OF SPACE IN EACH CONDITION CLASS

Summary 4-4, 2006 Update

PRESERVATION BACKLOGS IN PUBLIC HIGHER EDUCATION BUILDINGS

(State and Mixed Supported Buildings Over 1,999 GSF)

- * *Preservation backlogs are estimated costs of building maintenance, repair, and system replacement projects to safely preserve buildings and their systems for current use (projects that have not been accomplished).*
- * *Preservation backlogs include : deferred maintenance projects, cyclical repair and replacement projects on building systems that will have exceeded their useful life by the middle of the 2005-07 Biennium, and mandatory code upgrades.*
- * *Preservation backlogs do not include : program upgrades or renewal, non-mandatory code upgrades (e.g., ADA, energy code, major seismic upgrades), and building renovations.*
- * *To produce comparable preservation backlog estimates for all of Washington's public higher education institutions, JLARC modified a backlog estimating tool used by the National Aeronautics and Space Administration (NASA.) This tool is designed to produce backlog estimates at the institutional level. It is less accurate when viewed at the individual building level and therefore, should not be used to calculate costs for actual preservation projects. However, it provides a relative measure of estimated preservation backlogs across in situations that can be used for overall budgeting , monitoring, and accountability purposes.*
- * *The backlog estimating tool assigns a "preservation backlog" factor to each building based on its condition score. This factor is then multiplied by the building's current replacement value (CRV) , producing a preservation backlog estimate for that building. These amounts are totaled for all buildings to generate an overall backlog estimate for each higher education institution.*

JLARC Preservation Backlog Estimates are Calculated For Each Building as Follows:

Preservation Backlog = Current Replacement Value (CRV) x Midpoint Preservation Backlog Factor from the Following Table

Condition Score	Condition Class	Typical Preservation Backlog Factor Range, as % of CRV	Midpoint Preservation Backlog Factor used to Calculate Estimates of Preservation Backlogs
1	Superior	0-2%	1%
2	Adequate	3-7%	5%
3	Fair	8-24%	16%
4	Needs Improvement : Limited Functionality	25-51%	38%
5	Needs Improvement: Marginal Functionality	>52%	69%

- * *Using this methodology, even buildings in superior and adequate condition (Classes 1 & 2) contribute to overall backlog estimates for institutions.*

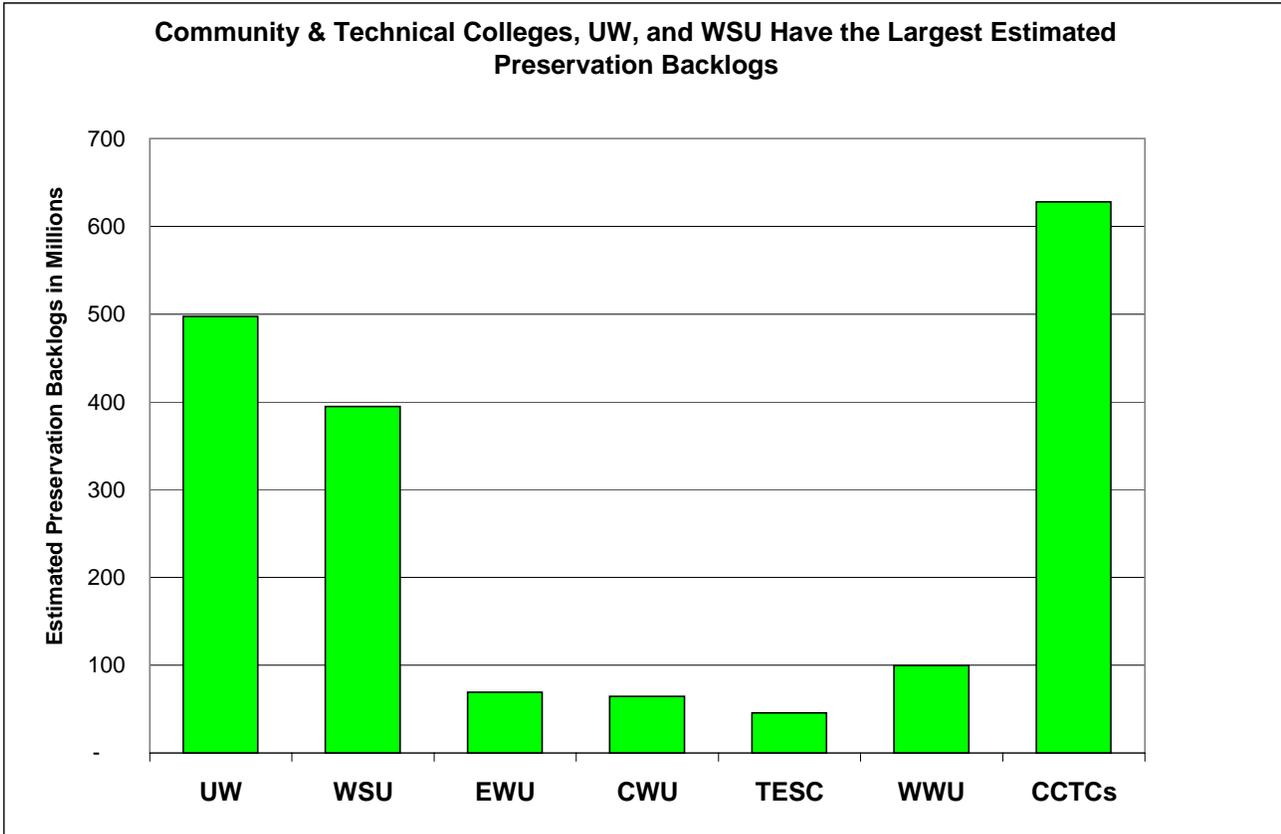

Summary 4-5, 2006 Update

PRESERVATION BACKLOGS IN PUBLIC HIGHER EDUCATION BUILDINGS

(State and Mixed Supported Buildings Over 1,999 GSF)

* **Estimated preservation backlogs for all buildings in all condition classes at all institutions total \$1.8 billion.** *

* **The Community & Technical Colleges have the largest estimated preservation backlog (\$628 million), followed by UW (\$497 million) and WSU (\$395 million).**

INSTITUTION	ESTIMATED PRESERVATION BACKLOG *
UW	497,196,451
WSU	394,654,931
EWU	69,065,497
CWU	64,377,997
TESC	45,502,517
SIRTI	1,256,708
WWU	99,823,101
CCTCs	627,865,226
TOTAL	\$ 1,799,742,427

* Using Midpoint FCI's

Summary 4-6, 2006 Update

FACILITY CONDITION INDEX (FCI)

(State and Mixed Supported Buildings Over 1,999 GSF)

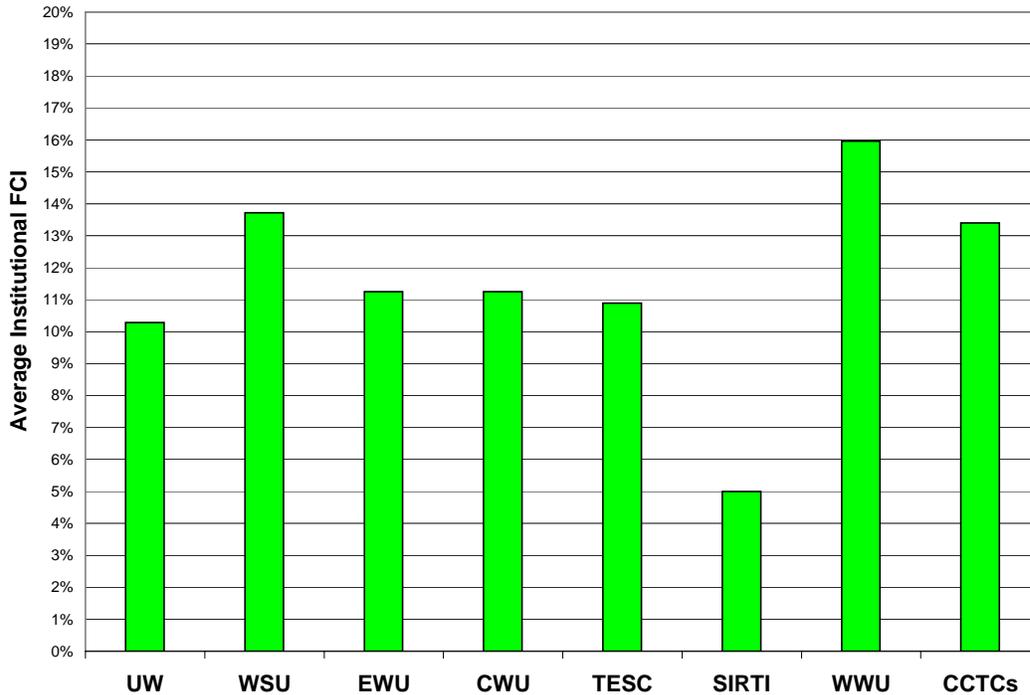

* **The Facility Condition Index (FCI) is a performance measure that accounts for differences in the type and quality of higher education buildings. The FCI can be monitored over time to track average building conditions at the institution level.**

* **The FCI is calculated as the ratio of preservation backlogs over current replacement value, expressed as a percentage.**

Lower FCI = Better Overall Condition Higher FCI = Worse Overall Condition

* **Over time effective preservation should result in decreasing FCIs.**

WWU, WSU, and the CCTCs Currently Have the Highest FCIs.

INSTITUTION	ESTIMATED PRESERVATION BACKLOG *	CURRENT REPLACEMENT VALUE	FACILITY CONDITION INDEX
UW	\$ 497,196,451	\$ 4,836,856,666	10.3%
WSU	\$ 394,654,931	\$ 2,876,788,295	13.7%
EWU	\$ 69,065,497	\$ 614,139,553	11.2%
CWU	\$ 64,377,997	\$ 572,095,608	11.3%
TESC	\$ 45,502,517	\$ 417,864,287	10.9%
SIRT	\$ 1,256,708	\$ 25,134,168	5.0%
WWU	\$ 99,823,101	\$ 625,648,476	16.0%
CCTCs	\$ 627,865,226	\$ 4,685,568,681	13.4%
TOTAL	\$ 1,799,742,427	\$ 14,654,095,733	12.3%

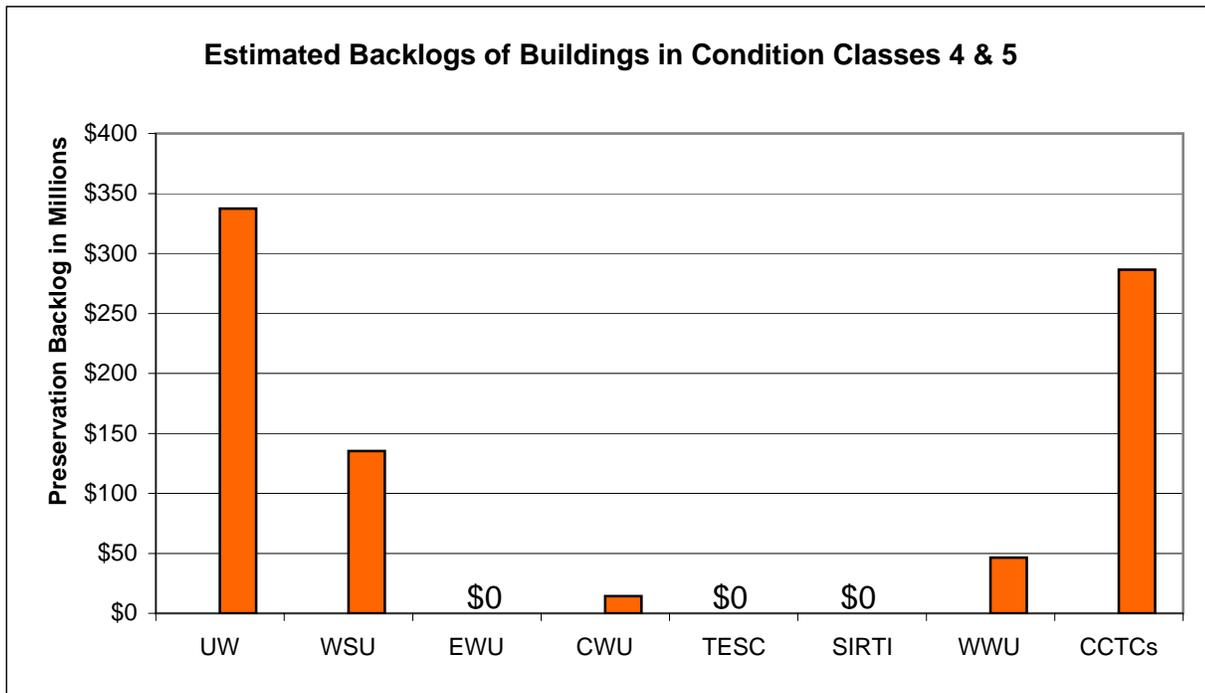

* Using Midpoint FCIs

Summary 4-7, 2006 Update

PRESERVATION BACKLOGS IN BUILDINGS NEEDING IMMEDIATE IMPROVEMENT

(State and Mixed Supported Buildings Over 1,999 GSF)

- * *The buildings in the worst condition often draw the most attention during the budgeting process.*
- * *About 13% of buildings fall in Condition Classes 4 and 5, conditions that potentially impact the functionality of the buildings.*
- * *Estimated preservation backlogs for these buildings total \$820 million out of the \$1.8 billion total backlog.**

INSTITUTION	Estimated Preservation Backlog of Buildings in Condition Classes 4 & 5 *	
UW	\$	337,341,626
WSU	\$	135,315,510
EWU		-
CWU	\$	14,417,242
TESC		-
SIRTI		-
WWU	\$	46,454,871
CCTCs	\$	286,515,989
TOTAL	\$	820,045,238

* Using Midpoint FCIs.
