(1) The appropriations to the department of social and health services in this act shall be expended for the programs and in the amounts specified in this act. Appropriations made in this act to the department of social and health services shall initially be allotted as required by this act. Subsequent allotment modifications shall not include transfers of moneys between sections of this act except as expressly provided in this act, nor shall allotment modifications permit moneys that are provided solely for a specified purpose to be used for other than that purpose.

(2) The department of social and health services shall not initiate any services that require expenditure of state general fund moneys unless expressly authorized in this act or other law. The department may seek, receive, and spend, under RCW 43.79.260 through 43.79.282, federal moneys not anticipated in this act as long as the federal funding does not require expenditure of state moneys for the program in excess of amounts anticipated in this act. If the department receives unanticipated unrestricted federal moneys, those moneys shall be spent for services authorized in this act or in any

other legislation providing appropriation authority, and an equal amount of appropriated state general fund moneys shall lapse. Upon the lapsing of any moneys under this subsection, the office of financial management shall notify the legislative fiscal committees. As used in this subsection, "unrestricted federal moneys" includes block grants and other funds that federal law does not require to be spent on specifically defined projects or matched on a formula basis by state funds.

(3) The legislature finds that medicaid payment rates, as calculated by the department pursuant to the appropriations in this act, bear a reasonable relationship to the costs incurred by efficiently and economically operated facilities for providing quality services and will be sufficient to enlist enough providers so that care and services are available to the extent that such care and services are available to the general population in the geographic area. The legislature finds that cost reports, payment data from the federal government, historical utilization, economic data, and clinical input constitute reliable data upon which to determine the payment rates.

(4) The department shall to the maximum extent practicable use the same system for delivery of spoken-language interpreter services for social services appointments as the one established for medical appointments in the health care authority. When contracting directly with an individual to deliver spoken language interpreter services, the department shall only contract with language access providers who are working at a location in the state and who are state-certified or state-authorized, except that when such a provider is not available, the department may use a language access provider who meets other certifications or standards deemed to meet state standards, including interpreters in other states.

(5) Information technology projects or investments and proposed projects or investments impacting time capture, payroll and payment processes and systems, eligibility, case management, and authorization systems within the department of social and health services are subject to technical oversight by the office of the chief information officer.

(6) (a) The department shall facilitate enrollment under the medicaid expansion

for clients applying for or receiving state funded services from the department and its contractors. Prior to open enrollment, the department shall coordinate with the health care authority to provide referrals to the Washington health benefit exchange for clients that will be ineligible for medicaid.

(b) To facilitate a single point of entry across public and medical assistance programs, and to maximize the use of federal funding, the health care authority, the department of social and health services, and the health benefit exchange will coordinate efforts to expand HealthPlanfinder access to public assistance and medical eligibility staff. The department shall complete medicaid applications in the HealthPlanfinder for households receiving or applying for public assistance benefits.

(7) The health care authority, the health benefit exchange, the department of social and health services, the department of health, and the department of children, youth, and families shall work together within existing resources to establish the health and human services enterprise coalition (the coalition). The coalition, led by the health care authority, must be a multi-organization collaborative that provides strategic direction and federal funding guidance for projects that have cross-organizational or enterprise impact, including information technology projects that affect organizations within the coalition. The office of the chief information officer shall maintain a statewide perspective when collaborating with the coalition to ensure that projects are planned for in a manner that ensures the efficient use of state resources and maximizes federal financial participation. The work of the coalition is subject to the conditions, limitations, and review provided in section 701 of this act.

(7) Sufficient amounts are appropriated in this subsection to implement the medicaid expansion as defined in the social security act, section 1902(a)(10)(A)(i)(VIII).

(8) The legislature finds that medicaid payment rates, as calculated by the health care authority pursuant to the appropriations in this act, bear a reasonable relationship to the costs incurred by efficiently and economically operated facilities for providing quality services and will be sufficient to enlist enough providers so that care and services are available to the extent that such care and services are available to the general population in the geographic area. The legislature finds that the cost reports, payment data from the federal government, historical utilization, economic data, and clinical input constitute reliable data upon which to determine the payment rates.

(9) Based on quarterly expenditure reports and caseload forecasts, if the health care authority estimates that expenditures for the medical assistance program will exceed the appropriations, the health care authority shall take steps including but not limited to reduction of rates or elimination of optional services to reduce expenditures so that total program costs do not exceed the annual appropriation authority.

(10) In determining financial eligibility for medicaid-funded services, the health care authority is authorized to disregard recoveries by Holocaust survivors of insurance

(14) \$7,000,000 of the general fund-federal appropriation is provided solely for supplemental payments to nursing homes operated by public hospital districts. The public hospital district shall be responsible for providing the required nonfederal match for the supplemental payment, and the payments shall not exceed the maximum allowable under federal rules. It is the legislature's intent that the payments shall be supplemental to and shall not in any way offset or reduce the payments calculated and provided in accordance with part E of chapter 74.46 RCW. It is the legislature's further intent that costs otherwise allowable for rate-setting and settlement against payments under chapter 74.46 RCW shall not be disallowed solely because such costs have been paid by revenues retained by the nursing home from these supplemental payments. The supplemental payments are subject to retrospective interim and final cost settlements based on the nursing homes' as-filed and final medicare cost reports. The timing of the interim and final cost settlements shall be at the health care authority's discretion. During either the interim cost settlement or the final cost settlement, the health care authority shall recoup from the public hospital districts the supplemental payments that

If the certified public expenditures (CPE) program in its current form is no longer cost-effective to maintain, the health care authority shall submit a report to the governor and legislature detailing cost-effective alternative uses of local, state, and federal resources as a replacement for this program. During fiscal year 2022 and fiscal year 2023, hospitals in the program shall be paid and shall retain one hundred percent of the federal portion of the allowable hospital cost for each medicaid inpatient fee-for-service claim payable by medical assistance and one hundred percent of the federal portion of the maximum disproportionate share hospital payment allowable under federal regulations. Inpatient medicaid payments shall be established using an allowable methodology that approximates the cost of claims submitted by the hospitals. Payments made to each hospital in the program in each fiscal year of the biennium shall be compared to a baseline amount. The baseline amount will be determined by the total of (a) the inpatient claim payment amounts that would have been paid during the fiscal year had the hospital not been in the CPE program based on the reimbursement rates developed, implemented, and consistent with policies approved in the 2021-2023 biennial operating appropriations act and in effect on July 1, 2015, (b) one-half of the indigent assistance disproportionate share hospital payment amounts paid to and retained by each hospital during fiscal year 2005, and (c) all of the other disproportionate share hospital payment amounts paid to and

retained by each hospital during fiscal year 2005 to the extent the same disproportionate share hospital programs exist in the 2019-2021 fiscal biennium. If payments during the fiscal year exceed the hospital's baseline amount, no additional payments will be made to the hospital except the federal portion of allowable disproportionate share hospital payments for which the hospital can certify allowable match. If payments during the fiscal year are less than the baseline amount, the hospital will be paid a state grant equal to the difference between payments during the fiscal year and the applicable baseline amount. Payment of the state grant shall be made in the applicable fiscal year and distributed in monthly payments. The grants will be recalculated and redistributed as the baseline is updated during the fiscal year. The grant payments are subject to an interim settlement within eleven months after the end of the fiscal year. A final settlement shall be performed. To the extent that either settlement determines that a hospital has received funds in excess of what it would have received as described in this subsection, the hospital must repay the excess amounts to the state when requested. \$702,000 of the general fund-state appropriation for fiscal year 2022 and \$649,000 of the general fund-state appropriation for fiscal year 2023 are provided solely for state grants for the participating hospitals.

(16) The health care authority shall seek public-private partnerships and federal funds that are or may become available to provide on-going support for outreach and education efforts under the federal children's health insurance program reauthorization act of 2009.

The health care authority shall prioritize evidence-based practices for delivery of maternity support services. To the extent practicable, the health care authority shall develop a mechanism

to increase federal funding for maternity support services by leveraging local public funding for those services.

(18) The authority shall submit reports to the governor and the legislature by September 15, 2021, and no later than September 15, 2022, that delineate the number of individuals in medicaid managed care, by carrier, age, gender, and eligibility category, receiving preventative services and vaccinations. The reports should include baseline and benchmark information from the previous two fiscal years and should be inclusive of, but not limited to, services recommended under the United States preventative services task force, advisory committee on immunization practices, early and periodic screening, diagnostic, and treatment (EPSDT) guidelines, and other relevant preventative and vaccination medicaid guidelines and requirements.

The health care authority shall complete medicaid applications in the HealthPlanfinder for households receiving or applying for medical assistance benefits.

(27) The authority shall use revenue appropriated from the dedicated marijuana fund for contracts with community health centers under RCW 69.50.540 in lieu of general fund-state payments to community health centers for services provided to medical assistance clients, and it is the intent of the legislature that this policy will be continued in subsequent fiscal biennia.

(b) The authority shall set the four common measures to be analyzed across all managed care organizations.

(c) The authority shall set three quality focus performance measures specific to each managed care organization. The authority must determine performance measures for each managed care organization based on the criteria established in (a)(ii) of this subsection.

(ii) Scored in the top national medicaid quartile of the performance measures.

(f) The amount of withhold annually paid to each managed care organization shall be proportional to findings of statistically significant improvement or top national medicaid quartile scoring by a managed care organization.

(g) For no more than two of the four quality focus performance measures, the authority may use an alternate

methodology to approximate top national medicaid quartile performance where top quartile performance data is unavailable.

(h) For the purposes of this subsection, "external quality improvement organization" means an organization that meets the competence and independence requirements under 42 C.F.R. Sec. 438.354, as it existed on the effective date of this section.

(9) Behavioral health entities may use local funds to earn additional federal medicaid match, provided the locally matched rate does not exceed the upper-bound of their federally allowable rate range, and provided that the enhanced funding is used only to provide medicaid state plan or waiver services to medicaid clients. Additionally, behavioral health entities may use a portion of the state funds allocated in accordance with subsection (6) of this section to earn additional medicaid match, but only to the extent that the application of such funds to medicaid services does not diminish the level of crisis and commitment, community inpatient, residential care, and outpatient

services presently available to persons not eligible for medicaid.

The authority must monitor revenue and expenditure reports and must require a behavioral health administrative service organization to submit a corrective action plan on how it will spend its excess reserves within a reasonable period of time, when its reported reserves exceed maximum levels established under the contract. The authority must review and approve such plans and monitor to ensure compliance. If the authority determines that a behavioral health administrative service organization has failed to provide an adequate excess reserve corrective action plan or is not complying with an approved plan, the authority must reduce payments to the entity in accordance with remedial actions provisions included in the contract. These reductions in payments must continue until the authority determines that the entity has come into substantial compliance with an

The department of corrections and the authority must develop a memorandum of understanding for department of corrections offenders on active supervision who are medicaid eligible and meet medical necessity for outpatient substance use disorder treatment. The agreement will ensure that treatment services provided are coordinated, do not result in duplication of services, and maintain access and quality of care for the individuals being served. The authority must provide all necessary data, access, and reports to the department of corrections for all department of corrections offenders that receive medicaid paid services.

General Fund-Private/Local Appropriation \$86,000

Education Legacy Trust Account-State Appropriation \$28,127,000

Home Visiting Services Account-State Appropriation \$23,966,000

Home Visiting Services Account-Federal Appropriation \$29,776,000

Washington Opportunity Pathways Account-State

Appropriation \$80,000,000

Workforce Education Investment Account-State

Appropriation \$8,482,000

TOTAL APPROPRIATION \$1,876,105,000

The appropriations in this section are subject to the following conditions and limitations:

(1) (a) \$80,273,000 of the general fund-state appropriation for fiscal year 2022, \$119,932,000 of the general fund-state appropriation for fiscal year 2023, \$24,070,000 of the education legacy trust account-state appropriation, \$80,000,000 of the opportunity pathways account-state appropriation, and \$25,452,000 of the general fund-federal appropriation (CRRSA/GEER) are provided solely for the early childhood education and assistance program. These amounts shall support at

least 15,162 slots in fiscal year 2022 and 15,912 slots in fiscal year 2023. Of the total slots in each fiscal year, 100 slots must be reserved for foster children to receive school-year-round enrollment.

(b) Of the amounts provided in this subsection, \$14,930,000 of the general fund-state appropriation for fiscal year 2023 and \$14,889,000 of the general fund-federal appropriation (CRRSA/GEER) are for a slot rate increase of ten percent beginning July 1, 2021. The funding provided in this subsection is sufficient for the department to increase rates according to inflation, pursuant to Engrossed Second Substitute Senate Bill No. 5237 (child care & early dev. exp.), beginning in fiscal year 2023 and annually thereafter.

(c) The department of children, youth, and families must develop a methodology to identify, at the school district level, the geographic locations of where early childhood education and assistance program slots are needed to meet the entitlement specified in RCW 43.216.556. This methodology must be linked to the caseload forecast produced by the caseload forecast council and must include estimates of the number of slots needed at each school district and the corresponding facility needs required to meet the entitlement in accordance with RCW 43.216.556. This methodology must be included as part of the budget submittal documentation required by RCW 43.88.030.

(2) \$200,000 of the general fund-state appropriation for fiscal year 2022 and \$200,000 of the general fund-state appropriation for fiscal year 2023 are provided solely to develop and provide culturally relevant supports for parents, family, and other caregivers.

(3) The department is the lead agency for and recipient of the federal child care and development fund grant. Amounts within this grant shall be used to fund child care licensing, quality initiatives, agency administration, and other costs associated with child care subsidies.

(4) The legislature recognizes that the federal government has provided substantial additional funding through the coronavirus response and relief supplemental appropriations act, P.L. 116-260, division M. and the American rescue plan act of 2021, P.L. 117-2. The purpose of the additional federal funding

is to ensure access to affordable child care and to stabilize and support child care providers from the effects of the COVID-19 pandemic. The legislature intends with the passage of Engrossed Second Substitute Senate Bill No. 5237 (child care & early dev. exp.) to implement these federal purposes by expanding eligibility for subsidized child care, reducing parent copayments, increasing provider base rates to recognize increased costs, and providing other financial support to stabilize the child care sector to remain open or to reopen. The legislature finds that the state lacked the fiscal capacity to make these investments and the additional federal funding has provided the opportunity to supplement state funding to expand and accelerate child care access, affordability, and provider support as the state navigates the COVID-19 pandemic and its aftermath.

the total funding allocated to each district from the federal relief funds, as defined in (b) of this subsection, by a school district's total enrollment as defined in (c) of this subsection. A school district with a relief per pupil amount less than \$500 shall receive the difference between \$500 and the relief per pupil amount, multiplied by the school district's total enrollment.

In the final year on the depreciation schedule, the depreciation payment shall be based on the lowest bid in the appropriate bus category for that school year.

(8) Funding levels in this section reflect waivers granted by the state board of education for four-day school weeks as allowed under RCW 28A.305.141.

TOTAL APPROPRIATION \$31,823,000

The appropriations in this section are subject to the following conditions and limitations:

(1) The appropriations in this section are provided solely for expenditure into the information technology investment revolving account created in RCW 43.41.433. Amounts in the account are provided solely for the information technology projects shown in LEAP omnibus document IT-2021, dated April 22, 2021, which is hereby incorporated by reference. To facilitate the transfer of moneys from other funds and accounts that are associated with projects contained in LEAP omnibus document IT-2021, dated April 22, 2021, the state treasurer is directed to transfer moneys from other funds and accounts to the information technology investment revolving account in accordance with schedules provided by the office of financial management. Restricted federal funds may be transferred only to the extent permitted by law, and will otherwise remain outside the information technology investment account. The projects affected remain subject to the other provisions of this section.

(2) Agencies must apply to the office of financial management and the office of the chief information officer to receive funding from the information technology investment revolving account. The office of financial management must notify the fiscal committees of the legislature of the receipt of each application and may not approve a funding request for ten business days from the date of notification.

(3)(a) Allocations and allotments of information technology investment revolving account must be made for discrete stages of projects as determined by the technology budget approved by the office of the chief information officer and office of financial management.

(b) Fifteen percent of total funding allocated by the office of financial

management, or another amount as defined jointly by the office of financial management and the office of the chief information officer, will be retained in the account, but remain allocated to that project. The retained funding will be released to the agency only after successful completion of that stage of the project. For the one Washington project, the amount retained is increased to at least twenty percent of total funding allocated for any stage of that project.

(4)(a) Each project must have a technology budget. The technology budget must have the detail by fiscal month for the 2021-2023 fiscal biennium. The technology budget must use a method similar to the state capital budget, identifying project costs, each fund source, and anticipated deliverables through each stage of the entire project investment and across fiscal periods and biennia from project onset through implementation and close out, as well as at least five years of maintenance and operations costs.

(b) As part of the development of a technology budget and at each request for funding, the agency shall submit an updated technology budget, if changes occurred, to include detailed financial information to the office of financial management and the office of the chief information officer. The technology budget must describe the total cost of the project, as well as maintenance and operations costs, to include and identify at least:

(i) Fund sources:

(A) If the project is funded from the information technology revolving account, the technology budget must include a worksheet that provides the fund sources that were transferred into the account by fiscal year;

(B) If the project is by a central service agency, and funds are driven out by the central service model, the technology budget must provide a statewide impact by agency by fund as a worksheet in the technology budget file;

(ii) Full time equivalent staffing level to include job classification assumptions;

(iii) Discreet financial budget codes to include at least the appropriation index and program index;

(iv) Object and subobject codes of expenditures;

(v) Anticipated deliverables;

(vi) Historical budget and expenditure detail by fiscal year; and

(vii) Maintenance and operations costs by fiscal year for at least five years as a separate worksheet.

(c) If a project technology budget changes and a revised technology budget is completed, a comparison of the revised technology budget to the last approved technology budget must be posted to the dashboard, to include a narrative rationale on what changed, why, and how that impacts the project in scope, budget, and schedule.

(5)(a) Each project must have an investment plan that includes:

(i) An organizational chart of the project management team that identifies team members and their roles and responsibilities;

(ii) The office of the chief information officer staff assigned to the project;

(iii) An implementation schedule covering activities, critical milestones, and deliverables at each stage of the project for the life of the project at each agency affected by the project;

(iv) Performance measures used to determine that the project is on time, within budget, and meeting expectations for quality of work product;

(v) Ongoing maintenance and operations cost of the project post implementation and close out delineated by agency staffing, contracted staffing, and service level agreements; and

(vi) Financial budget coding to include at least discrete financial coding for the project.

(6) Projects with estimated costs greater than one hundred million dollars from initiation to completion and implementation may be divided into discrete subprojects as determined by the office of the chief information officer, except for the one Washington project which must be divided into the following discrete subprojects: Core financials, expanding financials and procurement, budget, and human resources. Each subproject must have a technology budget

and investment plan as provided in this section.

(7)(a) The office of the chief information officer shall maintain an information technology project dashboard that provides updated information each fiscal month on projects subject to this section. This includes, at least:

(i) Project changes each fiscal month;

(ii) Noting if the project has a completed market requirements document, and when it was completed;

(iii) Financial status of information technology projects under oversight;

(iv) Coordination with agencies;

(v) Monthly quality assurance reports, if applicable;

(vi) Monthly office of the chief information officer status reports;

(vii) Historical project budget and expenditures through fiscal year 2021;

(viii) Budget and expenditures each fiscal month;

(ix) Estimated annual maintenance and operations costs by fiscal year; and

(x) Posting monthly project status assessments on scope, schedule, budget, and overall by the:

(A) Office of the chief information officer;

(B) Agency project team; and

(C) Quality assurance vendor, if applicable to the project.

(b) The dashboard must retain a roll up of the entire project cost, including all subprojects, that can display subproject detail. This includes coalition projects that are active.

(8) If the project affects more than one agency:

(a) A separate technology budget and investment plan must be prepared for each agency; and

(b) The dashboard must contain a statewide project technology budget roll up that includes each affected agency at the subproject level.

(9) For any project that exceeds two million dollars in total funds to complete, requires more than one biennium to complete, or is financed through

financial contracts, bonds, or other indebtedness:

(a) Quality assurance for the project must report independently to the office of the chief information officer;

(b) The office of the chief information officer must review, and, if necessary, revise the proposed project to ensure it is flexible and adaptable to advances in technology;

(c) The technology budget must specifically identify the uses of any financing proceeds. No more than thirty percent of the financing proceeds may be used for payroll-related costs for state employees assigned to project management, installation, testing, or training;

(d) The agency must consult with the office of the state treasurer during the competitive procurement process to evaluate early in the process whether products and services to be solicited and the responsive bids from a solicitation may be financed; and

(e) The agency must consult with the contracting division of the department of enterprise services for a review of all contracts and agreements related to the project's information technology procurements.

(10) The office of the chief information officer must evaluate the project at each stage and certify whether the project is planned, managed, and meeting deliverable targets as defined in the project's approved technology budget and investment plan.

(11) The office of the chief information officer may suspend or terminate a project at any time if it determines that the project is not meeting or not expected to meet anticipated performance and technology outcomes. Once suspension or termination occurs, the agency shall unallot any unused funding and shall not make any expenditure for the project without the approval of the office of financial management. The office of the chief information officer must report on July 1 and December 1 each calendar year any suspension or termination of a project in the previous six month period to the legislative fiscal committees.

(12) The office of the chief information officer, in consultation with the office of financial management,

may identify additional projects to be subject to this section, including projects that are not separately identified within an agency budget. The office of the chief information officer must report on July 1 and December 1 each calendar year any additional projects to be subjected to this section that were identified in the previous six month period to the legislative fiscal committees.

(13) Any cost to administer or implement this section for projects listed in subsection (1) of this section, must be paid from the information technology investment revolving account. For any other information technology project made subject to the conditions, limitations, and review of this section, the cost to implement this section must be paid from the funds for that project.

The coalition shall bargain for a master collective bargaining agreement covering all of the employees represented by the coalition. The governor's designee and the exclusive bargaining representative or representatives are authorized to enter into supplemental bargaining of agency-specific issues for inclusion in or as an addendum to the master collective bargaining agreement, subject to the parties' agreement regarding the issues and procedures for supplemental bargaining. Exclusive bargaining representatives that represent employees covered under chapter 41.06 RCW and exclusive bargaining representatives that represent employees exempt under chapter 41.06 RCW shall constitute separate coalitions and must negotiate separate master collective bargaining agreements. This subsection does not prohibit cooperation and coordination of bargaining between two or more exclusive bargaining representatives.

(b) This subsection does not apply to exclusive bargaining representatives who represent employees of institutions of higher education, except when the institution of higher education has elected to exercise its option under subsection (4) of this section to have its negotiations conducted by the governor or governor's designee under the procedures provided for general government agencies in subsections (1) through (3) of this section.

(c) If five hundred or more employees of an independent state elected official listed in RCW 43.01.010 are organized in

(3) The governor shall submit a request for funds necessary to implement the compensation and fringe benefit provisions in the master collective bargaining agreement or for legislation necessary to implement the agreement. Requests for funds necessary to implement the provisions of bargaining agreements shall not be submitted to the legislature by the governor unless such requests:

(a) Have been submitted to the director of the office of financial management by October 1 prior to the legislative session at which the requests are to be considered; and

(b) Have been certified by the director of the office of financial management as being feasible financially for the state.

The legislature shall approve or reject the submission of the request for funds as a whole. The legislature shall not consider a request for funds to implement a collective bargaining agreement unless the request is transmitted to the legislature as part of the governor's budget document submitted under RCW 43.88.030 and 43.88.060. If the legislature rejects or fails to act on the submission, either party may reopen all or part of the agreement or the exclusive bargaining representative may seek to implement the procedures provided for in RCW 41.80.090.

(4)(a)(i) For the purpose of negotiating agreements for institutions of higher education, the employer shall be the respective governing board of each of the universities, colleges, or community colleges or a designee chosen by the board to negotiate on its behalf.

(ii) A governing board of a university or college may elect to have its negotiations conducted by the governor or governor's designee under the procedures provided for general government agencies

in subsections (1) through (3) of this section, except that:

(A) The governor or the governor's designee and an exclusive bargaining representative shall negotiate one master collective bargaining agreement for all of the bargaining units of employees of a university or college that the representative represents; or

(c)(i) In the case of bargaining agreements reached between institutions of higher education other than the University of Washington and exclusive bargaining representatives agreed to under the provisions of this chapter, if appropriations are necessary to implement the compensation and fringe benefit provisions of the bargaining agreements, the governor shall submit a request for such funds to the legislature according to the provisions of subsection (3) of this section, except as provided in (c)(iii) of this subsection.

(ii) In the case of bargaining agreements reached between the University of Washington and exclusive bargaining representatives agreed to under the provisions of this chapter, if appropriations are necessary to implement the compensation and fringe benefit provisions of a bargaining agreement, the governor shall submit a request for such funds to the legislature according to the provisions of subsection (3) of this section, except as provided in this subsection (4)(c)(ii) and as provided in (c)(iii) of this subsection.

(A) If appropriations of less than ten thousand dollars are necessary to implement the provisions of a bargaining agreement, a request for such funds shall not be submitted to the legislature by the governor unless the request has been submitted to the director of the office of financial management by October 1 prior to the legislative session at which the request is to be considered.

(B) If appropriations of ten thousand dollars or more are necessary to implement the provisions of a bargaining agreement, a request for such funds shall not be submitted to the legislature by the governor unless the request:

(I) Has been submitted to the director of the office of financial management by October 1 prior to the legislative session at which the request is to be considered; and

(II) Has been certified by the director of the office of financial management as being feasible financially for the state.

(C) If the director of the office of financial management does not certify a request under (c)(ii)(B) of this subsection as being feasible financially for the state, the parties shall enter into collective bargaining solely for the purpose of reaching a mutually agreed upon modification of the agreement necessary to address the absence of those requested funds. The legislature may act upon the compensation and fringe benefit provisions of the modified collective bargaining agreement if those provisions are agreed upon and submitted to the office of financial management and legislative budget committees before final legislative action on the biennial or supplemental operating budget by the sitting legislature.

(iii) In the case of a bargaining unit of employees of institutions of higher education in which the exclusive bargaining representative is certified during or after the conclusion of a legislative session, the legislature may act upon the compensation and fringe benefit provisions of the unit's initial collective bargaining agreement if those provisions are agreed upon and submitted to the office of financial management and legislative budget committees before final legislative action on the biennial or supplemental operating budget by the sitting legislature.

(5) If, after the compensation and fringe benefit provisions of an agreement are approved by the legislature, a significant revenue shortfall occurs resulting in reduced appropriations, as declared by proclamation of the governor or by resolution of the legislature, both parties shall immediately enter into collective bargaining for a mutually agreed upon modification of the agreement.

(6) After the expiration date of a collective bargaining agreement negotiated under this chapter, all of the terms and conditions specified in the collective bargaining agreement remain in effect until the effective date of a subsequently negotiated agreement, not to exceed one year from the expiration date stated in the agreement. Thereafter, the employer may unilaterally implement according to law.

(7)(a) For the 2019-2021 fiscal biennium, the legislature may approve funding for a collective bargaining agreement negotiated by a higher education institution and the Washington federation of state employees and ratified by the exclusive bargaining representative before final legislative action on the omnibus appropriations act by the sitting legislature.

(1) The stadium and exhibition center account is created in the custody of the state treasurer. All receipts from the taxes imposed under RCW 82.14.0494 and distributions under RCW 67.70.240(~~(4)~~) (1)(d) shall be deposited into the account. Only the director of the office of financial management or the director's designee may authorize expenditures from the account. The account is subject to allotment procedures under chapter 43.88 RCW. An appropriation is not required for expenditures from this account.

(2) Until bonds are issued under RCW 43.99N.020, up to five million dollars per year beginning January 1, 1999, shall be used for the purposes of subsection (3)(b) of this section, all remaining moneys in the account shall be transferred to the public stadium authority, created under RCW 36.102.020, to be used for public stadium authority operations and development of the stadium and exhibition center.

(3) After bonds are issued under RCW 43.99N.020, all moneys in the stadium and exhibition center account shall be used exclusively for the following purposes in the following priority:

(a) On or before June 30th of each year, the office of financial management shall accumulate in the stadium and exhibition center account an amount at least equal to the amount required in the next succeeding twelve months for the payment of principal of and interest on the bonds issued under RCW 43.99N.020;

(b) An additional reserve amount not in excess of the expected average annual principal and interest requirements of bonds issued under RCW 43.99N.020 shall be accumulated and maintained in the account, subject to withdrawal by the state treasurer at any time if necessary to meet the requirements of (a) of this subsection, and, following any withdrawal, reaccumulated from the first tax revenues and other amounts deposited in the account after meeting the requirements of (a) of this subsection; and

(c) The balance, if any, shall be transferred to the youth athletic

facility account under subsection (4) of this section.

Any revenues derived from the taxes authorized by RCW 36.38.010(5) and 36.38.040 or other amounts that if used as provided under (a) and (b) of this subsection would cause the loss of any tax exemption under federal law for interest on bonds issued under RCW 43.99N.020 shall be deposited in and used exclusively for the purposes of the youth athletic facility account and shall not be used, directly or indirectly, as a source of payment of principal of or interest on bonds issued under RCW 43.99N.020, or to replace or reimburse other funds used for that purpose.

(4) Any moneys in the stadium and exhibition center account not required or permitted to be used for the purposes described in subsection (3)(a) and (b) of this section shall be deposited in the youth athletic facility account hereby created in the state treasury. Expenditures from the account may be used only for purposes of grants or loans to cities, counties, and qualified nonprofit organizations for community outdoor athletic facilities. Only the director of the recreation and conservation office or the director's designee may authorize expenditures from the account. The account is subject to allotment procedures under chapter 43.88 RCW, but an appropriation is not required for expenditures. The athletic facility grants or loans may be used for acquiring, developing, equipping, maintaining, and improving community outdoor athletic facilities. Funds shall be divided equally between the development of new community outdoor athletic facilities, the improvement of existing community outdoor athletic facilities, and the maintenance of existing community outdoor athletic facilities. Cities, counties, and qualified nonprofit organizations must submit proposals for grants or loans from the account. To the extent that funds are available, cities, counties, and qualified nonprofit organizations must meet eligibility criteria as established by the director of the recreation and conservation office. Grants or loans awarded in any one year need not be

distributed in that year. In the 2009-2011 biennium, if there are not enough project applications submitted in a category within the account to meet the requirement of equal distribution of funds to each category, the director of the recreation and conservation office may distribute any remaining funds to other categories within the account. The director of the recreation and conservation office may expend up to one and one-half percent of the moneys deposited in the account created in this subsection for administrative purposes. During the 2021-2023 fiscal biennium, the legislature may appropriate moneys from the youth athletic facility account to support a task force to consider ways to improve equitable access to K-12 schools' fields and athletic facilities and local parks agency facilities with the goal of increasing physical activity for youth and families. A portion of the appropriation must be used to inventory K-12 school fields and athletic facilities and park agency facilities.

(b) Three and one-half percent must be credited to the ORV and nonhighway vehicle account and administered by the department of fish and wildlife solely for the acquisition, planning, development, maintenance, and management of ORV, nonmotorized, and nonhighway road recreation facilities and the maintenance of nonhighway roads;

If the family connections program determines that such a meeting is

The format of this exchange of information may include written messages, phone calls, or videoconferencing. The family connections program shall routinely reevaluate whether an in-person meeting should occur using the analysis required under subsection (4) of this section.

(1) The legislature recognizes that staff and resources needed to adequately care for individuals with cognitive or behavioral impairments is not limited to support for activities of daily living. Therefore, the department shall:

(a) Employ the resource utilization group IV case mix classification methodology. The department shall use the fifty-seven group index maximizing model for the resource utilization group IV grouper version MDS 3.05, but in the 2021-2023 biennium the department may revise or update the ((classification)) methodology used to establish case mix classifications to reflect advances or refinements in resident assessment or classification, ((subject to federal requirements)) as made available by the federal government. The department may adjust by no more than thirteen percent the case mix index for resource utilization group categories beginning with PA1 through PB2 to any case mix index that aids in achieving the purpose and intent of RCW 74.39A.007 and cost-efficient care, excluding

behaviors, and allowing for exceptions for limited placement options; and

(b) Implement minimum data set 3.0 under the authority of this section. The department must notify nursing home contractors twenty-eight days in advance the date of implementation of the minimum data set 3.0. In the notification, the department must identify for all semiannual rate settings following the date of minimum data set 3.0 implementation a previously established semiannual case mix adjustment established for the semiannual rate settings that will be used for semiannual case mix calculations in direct care until minimum data set 3.0 is fully implemented.

(2) The department is authorized to adjust upward the weights for resource utilization groups BA1-BB2 related to cognitive or behavioral health to ensure adequate access to appropriate levels of care.

(3) A default case mix group shall be established for cases in which the resident dies or is discharged for any purpose prior to completion of the resident's initial assessment. The default case mix group and case mix weight for these cases shall be designated by the department.

(4) A default case mix group may also be established for cases in which there is an untimely assessment for the resident. The default case mix group and case mix weight for these cases shall be designated by the department.

Sec. 992. RCW 74.46.501 and 2016 c 131 s 5 are each amended to read as follows:

(1) From individual case mix weights for the applicable quarter, the department shall determine two average case mix indexes for each medicaid nursing facility, one for all residents in the facility, known as the facility average case mix index, and one for medicaid residents, known as the medicaid average case mix index.

(2) (a) In calculating a facility's two average case mix indexes for each quarter, the department shall include all residents or medicaid residents, as applicable, who were physically in the facility during the quarter in question based on the resident assessment instrument completed by the facility and the requirements and limitations for the

instrument's completion and transmission (January 1st through March 31st, April 1st through June 30th, July 1st through September 30th, or October 1st through December 31st).

(b) The facility average case mix index shall exclude all default cases as defined in this chapter. However, the medicaid average case mix index shall include all default cases.

(3) Both the facility average and the medicaid average case mix indexes shall be determined by multiplying the case mix weight of each resident, or each medicaid resident, as applicable, by the number of days, as defined in this section and as applicable, the resident was at each particular case mix classification or group, and then averaging.

(4) In determining the number of days a resident is classified into a particular case mix group, the department shall determine a start date for calculating case mix grouping periods as specified by rule.

(5) The cutoff date for the department to use resident assessment data, for the purposes of calculating both the facility average and the medicaid average case mix indexes, and for establishing and updating a facility's direct care component rate, shall be one month and one day after the end of the quarter for which the resident assessment data applies.

(6) (a) Although the facility average and the medicaid average case mix indexes shall both be calculated quarterly, the cost-rebasing period facility average case mix index will be used throughout the applicable cost-rebasing period in combination with cost report data as specified by RCW 74.46.561, to establish a facility's allowable cost per case mix unit. To allow for the transition to minimum data set 3.0 and implementation of resource utilization group IV for July 1, 2015, through June 30, 2016, the department shall calculate rates using the medicaid average case mix scores effective for January 1, 2015, rates adjusted under RCW 74.46.485(1)(a), and the scores shall be increased each six months during the transition period by one-half of one percent. The July 1, 2016, direct care cost per case mix unit shall be calculated by utilizing 2014 direct care costs, patient days, and 2014 facility average case mix indexes based on the minimum data set 3.0 resource

utilization group IV grouper 57. Otherwise, a facility's medicaid average case mix index shall be used to update a nursing facility's direct care component rate semiannually.

(b) ~~((The))~~ Except during the 2021-2023 fiscal biennium, the facility average case mix index used to establish each nursing facility's direct care component rate shall be based on an average of calendar quarters of the facility's average case mix indexes from the four calendar quarters occurring during the cost report period used to rebase the direct care component rate allocations as specified in RCW 74.46.561.

(c) ~~((The))~~ Except during the 2021-2023 fiscal biennium, the medicaid average case mix index used to update or recalibrate a nursing facility's direct care component rate semiannually shall be from the calendar six-month period commencing nine months prior to the effective date of the semiannual rate. For example, July 1, 2010, through December 31, 2010, direct care component rates shall utilize case mix averages from the October 1, 2009, through March 31, 2010, calendar quarters, and so forth.

(d) The department shall establish a methodology to use the case mix to set the direct care component in the 2021-2023 fiscal biennium.

Sec. 993. RCW 74.46.561 and 2020 c 357 s 918 are each amended to read as follows:

(1) The legislature adopts a new system for establishing nursing home payment rates beginning July 1, 2016. Any payments to nursing homes for services provided after June 30, 2016, must be based on the new system. The new system must be designed in such a manner as to decrease administrative complexity associated with the payment methodology, reward nursing homes providing care for high acuity residents, incentivize quality care for residents of nursing homes, and establish minimum staffing standards for direct care.

(2) The new system must be based primarily on industry-wide costs, and have three main components: Direct care, indirect care, and capital.

(3) The direct care component must include the direct care and therapy care components of the previous system, along

with food, laundry, and dietary services. Direct care must be paid at a fixed rate, based on one hundred percent or greater of statewide case mix neutral median costs, but for fiscal year 2023 shall be ~~((set))~~ capped so that a nursing home provider's direct care rate does not exceed one hundred ~~((eighteen))~~ thirty percent of its base year's direct care allowable costs except if the provider is below the minimum staffing standard established in RCW 74.42.360(2). The legislature intends to remove the cap on direct care rates by June 30, 2027. Direct care must be performance-adjusted for acuity every six months, using case mix principles. Direct care must be regionally adjusted using countywide wage index information available through the United States department of labor's bureau of labor statistics. There is no minimum occupancy for direct care. The direct care component rate allocations calculated in accordance with this section must be adjusted to the extent necessary to comply with RCW 74.46.421.

(4) The indirect care component must include the elements of administrative expenses, maintenance costs, and housekeeping services from the previous system. A minimum occupancy assumption of ninety percent must be applied to indirect care. Indirect care must be paid at a fixed rate, based on ninety percent or greater of statewide median costs. The indirect care component rate allocations calculated in accordance with this section must be adjusted to the extent necessary to comply with RCW 74.46.421.

(5) The capital component must use a fair market rental system to set a price per bed. The capital component must be adjusted for the age of the facility, and must use a minimum occupancy assumption of ninety percent.

(a) Beginning July 1, 2016, the fair rental rate allocation for each facility must be determined by multiplying the allowable nursing home square footage in (c) of this subsection by the RSMean rental rate in (d) of this subsection and by the number of licensed beds yielding the gross unadjusted building value. An equipment allowance of ten percent must be added to the unadjusted building value. The sum of the unadjusted building value and equipment allowance must then be reduced by the average age of the facility as determined by (e) of this subsection using a depreciation rate of one and one-half percent. The depreciated

building and equipment plus land valued at ten percent of the gross unadjusted building value before depreciation must then be multiplied by the rental rate at seven and one-half percent to yield an allowable fair rental value for the land, building, and equipment.

(b) The fair rental value determined in (a) of this subsection must be divided by the greater of the actual total facility census from the prior full calendar year or imputed census based on the number of licensed beds at ninety percent occupancy.

(c) For the rate year beginning July 1, 2016, all facilities must be reimbursed using four hundred square feet. For the rate year beginning July 1, 2017, allowable nursing facility square footage must be determined using the total nursing facility square footage as reported on the medicaid cost reports submitted to the department in compliance with this chapter. The maximum allowable square feet per bed may not exceed four hundred fifty.

(d) Each facility must be paid at eighty-three percent or greater of the median nursing facility RSMeans construction index value per square foot. The department may use updated RSMeans construction index information when more recent square footage data becomes available. The statewide value per square foot must be indexed based on facility zip code by multiplying the statewide value per square foot times the appropriate zip code based index. For the purpose of implementing this section, the value per square foot effective July 1, 2016, must be set so that the weighted average fair rental value rate is not less than ten dollars and eighty cents per patient day. The capital component rate allocations calculated in accordance with this section must be adjusted to the extent necessary to comply with RCW 74.46.421.

(e) The average age is the actual facility age reduced for significant renovations. Significant renovations are defined as those renovations that exceed two thousand dollars per bed in a calendar year as reported on the annual cost report submitted in accordance with this chapter. For the rate beginning July 1, 2016, the department shall use renovation data back to 1994 as submitted on facility cost reports. Beginning July 1, 2016, facility ages must be reduced in future years if the value of the

renovation completed in any year exceeds two thousand dollars times the number of licensed beds. The cost of the renovation must be divided by the accumulated depreciation per bed in the year of the renovation to determine the equivalent number of new replacement beds. The new age for the facility is a weighted average with the replacement bed equivalents reflecting an age of zero and the existing licensed beds, minus the new bed equivalents, reflecting their age in the year of the renovation. At no time may the depreciated age be less than zero or greater than forty-four years.

(f) A nursing facility's capital component rate allocation must be rebased annually, effective July 1, 2016, in accordance with this section and this chapter.

(g) For the purposes of this subsection (5), "RSMeans" means building construction costs data as published by Gordian.

(6) A quality incentive must be offered as a rate enhancement beginning July 1, 2016.

(a) An enhancement no larger than five percent and no less than one percent of the statewide average daily rate must be paid to facilities that meet or exceed the standard established for the quality incentive. All providers must have the opportunity to earn the full quality incentive payment.

(b) The quality incentive component must be determined by calculating an overall facility quality score composed of four to six quality measures. For fiscal year 2017 there shall be four quality measures, and for fiscal year 2018 there shall be six quality measures. Initially, the quality incentive component must be based on minimum data set quality measures for the percentage of long-stay residents who self-report moderate to severe pain, the percentage of high-risk long-stay residents with pressure ulcers, the percentage of long-stay residents experiencing one or more falls with major injury, and the percentage of long-stay residents with a urinary tract infection. Quality measures must be reviewed on an annual basis by a stakeholder work group established by the department. Upon review, quality measures may be added or changed. The department may risk adjust individual quality measures as it deems appropriate.

(c) The facility quality score must be point based, using at a minimum the facility's most recent available three-quarter average centers for medicare and medicaid services quality data. Point thresholds for each quality measure must be established using the corresponding statistical values for the quality measure point determinants of eighty quality measure points, sixty quality measure points, forty quality measure points, and twenty quality measure points, identified in the most recent available five-star quality rating system technical user's guide published by the (~~center[s]~~) centers for medicare and medicaid services.

(d) Facilities meeting or exceeding the highest performance threshold (top level) for a quality measure receive twenty-five points. Facilities meeting the second highest performance threshold receive twenty points. Facilities meeting the third level of performance threshold receive fifteen points. Facilities in the bottom performance threshold level receive no points. Points from all quality measures must then be summed into a single aggregate quality score for each facility.

(e) Facilities receiving an aggregate quality score of eighty percent of the overall available total score or higher must be placed in the highest tier (tier V), facilities receiving an aggregate score of between seventy and seventy-nine percent of the overall available total score must be placed in the second highest tier (tier IV), facilities receiving an aggregate score of between sixty and sixty-nine percent of the overall available total score must be placed in the third highest tier (tier III), facilities receiving an aggregate score of between fifty and fifty-nine percent of the overall available total score must be placed in the fourth highest tier (tier II), and facilities receiving less than fifty percent of the overall available total score must be placed in the lowest tier (tier I).

(f) The tier system must be used to determine the amount of each facility's per patient day quality incentive component. The per patient day quality incentive component for tier IV is seventy-five percent of the per patient day quality incentive component for tier V, the per patient day quality incentive component for tier III is fifty percent of the per patient day quality incentive

component for tier V, and the per patient day quality incentive component for tier II is twenty-five percent of the per patient day quality incentive component for tier V. Facilities in tier I receive no quality incentive component.

(g) Tier system payments must be set in a manner that ensures that the entire biennial appropriation for the quality incentive program is allocated.

(h) Facilities with insufficient three-quarter average centers for medicare and medicaid services quality data must be assigned to the tier corresponding to their five-star quality rating. Facilities with a five-star quality rating must be assigned to the highest tier (tier V) and facilities with a one-star quality rating must be assigned to the lowest tier (tier I). The use of a facility's five-star quality rating shall only occur in the case of insufficient centers for medicare and medicaid services minimum data set information.

(i) The quality incentive rates must be adjusted semiannually on July 1 and January 1 of each year using, at a minimum, the most recent available three-quarter average centers for medicare and medicaid services quality data.

(j) Beginning July 1, 2017, the percentage of short-stay residents who newly received an antipsychotic medication must be added as a quality measure. The department must determine the quality incentive thresholds for this quality measure in a manner consistent with those outlined in (b) through (h) of this subsection using the centers for medicare and medicaid services quality data.

(k) Beginning July 1, 2017, the percentage of direct care staff turnover must be added as a quality measure using the centers for medicare and medicaid services' payroll-based journal and nursing home facility payroll data. Turnover is defined as an employee departure. The department must determine the quality incentive thresholds for this quality measure using data from the centers for medicare and medicaid services' payroll-based journal, unless such data is not available, in which case the department shall use direct care staffing turnover data from the most recent medicaid cost report.

(7) Reimbursement of the safety net assessment imposed by chapter 74.48 RCW

and paid in relation to medicaid residents must be continued.

(8)(a) The direct care and indirect care components must be rebased in even-numbered years, beginning with rates paid on July 1, 2016. Rates paid on July 1, 2016, must be based on the 2014 calendar year cost report. On a percentage basis, after rebasing, the department must confirm that the statewide average daily rate has increased at least as much as the average rate of inflation, as determined by the skilled nursing facility market basket index published by the centers for medicare and medicaid services, or a comparable index. If after rebasing, the percentage increase to the statewide average daily rate is less than the average rate of inflation for the same time period, the department is authorized to increase rates by the difference between the percentage increase after rebasing and the average rate of inflation.

(b) It is the intention of the legislature that direct and indirect care rates paid in fiscal year 2022 will be rebased using the calendar year 2019 cost reports. For fiscal year 2021, in addition to the rates generated by (a) of this subsection, an additional adjustment is provided as established in this subsection (8)(b). Beginning May 1, 2020, and through June 30, 2021, the calendar year costs must be adjusted for inflation by a twenty-four month consumer price index, based on the most recently available monthly index for all urban consumers, as published by the bureau of labor statistics. It is also the intent of the legislature that, starting in fiscal year 2022, a facility-specific rate add-on equal to the inflation adjustment that facilities received solely in fiscal year 2021, must be added to the rate.

(c) To determine the necessity of regular inflationary adjustments to the nursing facility rates, by December 1, 2020, the department shall provide the appropriate policy and fiscal committees of the legislature with a report that provides a review of rates paid in 2017, 2018, and 2019 in comparison to costs incurred by nursing facilities.

(9) The direct care component provided in subsection (3) of this section is subject to the reconciliation and settlement process provided in RCW 74.46.022(6). Beginning July 1, 2016, pursuant to rules established by the

department, funds that are received through the reconciliation and settlement process provided in RCW 74.46.022(6) must be used for technical assistance, specialized training, or an increase to the quality enhancement established in subsection (6) of this section. The legislature intends to review the utility of maintaining the reconciliation and settlement process under a price-based payment methodology, and may discontinue the reconciliation and settlement process after the 2017-2019 fiscal biennium.

(10) Compared to the rate in effect June 30, 2016, including all cost components and rate add-ons, no facility may receive a rate reduction of more than one percent on July 1, 2016, more than two percent on July 1, 2017, or more than five percent on July 1, 2018. To ensure that the appropriation for nursing homes remains cost neutral, the department is authorized to cap the rate increase for facilities in fiscal years 2017, 2018, and 2019.

Sec. 994. RCW 79.64.040 and 2019 c 415 s 984 are each amended to read as follows:

(1) The board shall determine the amount deemed necessary in order to achieve the purposes of this chapter and shall provide by rule for the deduction of this amount from the moneys received from all leases, sales, contracts, licenses, permits, easements, and rights-of-way issued by the department and affecting state lands and aquatic lands, except as provided in RCW 79.64.130, provided that no deduction shall be made from the proceeds from agricultural college lands.

(2) Moneys received as deposits from successful bidders, advance payments, and security under RCW 79.15.100, 79.15.080, and 79.11.150 prior to December 1, 1981, which have not been subjected to deduction under this section are not subject to deduction under this section.

(3) Except as otherwise provided in subsection (5) of this section, the deductions authorized under this section shall not exceed twenty-five percent of the moneys received by the department in connection with any one transaction pertaining to state lands and aquatic lands other than second-class tide and shore lands and the beds of navigable waters, and fifty percent of the moneys

received by the department pertaining to second-class tide and shore lands and the beds of navigable waters.

(4) In the event that the department sells logs using the contract harvesting process described in RCW 79.15.500 through 79.15.530, the moneys received subject to this section are the net proceeds from the contract harvesting sale.

(5) During the 2015-2017, 2017-2019, ~~((and))~~ 2019-2021, and 2021-2023 fiscal biennia, the board may increase the twenty-five percent limitation up to thirty-two percent.

Sec. 995. RCW 79.64.110 and 2019 c 415 s 985 and 2019 c 309 s 1 are each reenacted and amended to read as follows:

(1) Any moneys derived from the lease of state forestlands or from the sale of valuable materials, oils, gases, coal, minerals, or fossils from those lands, except as provided in RCW 79.64.130, or the appraised value of these resources when transferred to a public agency under RCW 79.22.060, except as provided in RCW 79.22.060(4), must be distributed as follows:

(a) For state forestlands acquired through RCW 79.22.040 or by exchange for lands acquired through RCW 79.22.040:

(i) The expense incurred by the state for administration, reforestation, and protection, not to exceed twenty-five percent, which rate of percentage shall be determined by the board, must be returned to the forest development account created in RCW 79.64.100. During the 2017-2019 ~~((and))~~, 2019-2021, and 2021-2023 fiscal biennia, the board may increase the twenty-five percent limitation up to twenty-seven percent.

(ii) Any balance remaining must be paid to the county in which the land is located or, for counties participating in a land pool created under RCW 79.22.140, to each participating county proportionate to its contribution of asset value to the land pool as determined by the board. Payments made under this subsection are to be paid, distributed, and prorated, except as otherwise provided in this section, to the various funds in the same manner as general taxes are paid and distributed during the year of payment. However, in order to test county flexibility in distributing state forestland revenue, a county may in its discretion pay,

distribute, and prorate payments made under this subsection of moneys derived from state forestlands acquired by exchange between July 28, 2019, and June 30, 2020, for lands acquired through RCW 79.22.040, within the same county, in the same manner as general taxes are paid and distributed during the year of payment for the former state forestlands that were subject to the exchange.

(iii) Any balance remaining, paid to a county with a population of less than sixteen thousand, must first be applied to the reduction of any indebtedness existing in the current expense fund of the county during the year of payment.

(iv) With regard to moneys remaining under this subsection (1)(a), within seven working days of receipt of these moneys, the department shall certify to the state treasurer the amounts to be distributed to the counties. The state treasurer shall distribute funds to the counties four times per month, with no more than ten days between each payment date.

(b) For state forestlands acquired through RCW 79.22.010 or by exchange for lands acquired through RCW 79.22.010, except as provided in RCW 79.64.120:

(i) Fifty percent shall be placed in the forest development account.

(ii) Fifty percent shall be prorated and distributed to the state general fund, to be dedicated for the benefit of the public schools, to the county in which the land is located or, for counties participating in a land pool created under RCW 79.22.140, to each participating county proportionate to its contribution of asset value to the land pool as determined by the board, and according to the relative proportions of tax levies of all taxing districts in the county. The portion to be distributed to the state general fund shall be based on the regular school levy rate under RCW 84.52.065 (1) and (2) and the levy rate for any maintenance and operation special school levies. With regard to the portion to be distributed to the counties, the department shall certify to the state treasurer the amounts to be distributed within seven working days of receipt of the money. The state treasurer shall distribute funds to the counties four times per month, with no more than ten days between each payment date. The money distributed to the county must be paid, distributed, and prorated to the various

other funds in the same manner as general taxes are paid and distributed during the year of payment.

(2) A school district may transfer amounts deposited in its debt service fund pursuant to this section into its capital projects fund as authorized in RCW 28A.320.330.

Sec. 996. RCW 79.105.150 and 2019 c 415 s 986 are each amended to read as follows:

(1) After deduction for management costs as provided in RCW 79.64.040 and payments to towns under RCW 79.115.150(2), all moneys received by the state from the sale or lease of state-owned aquatic lands and from the sale of valuable material from state-owned aquatic lands shall be deposited in the aquatic lands enhancement account which is hereby created in the state treasury. After appropriation, these funds shall be used solely for aquatic lands enhancement projects; for the purchase, improvement, or protection of aquatic lands for public purposes; for providing and improving access to the lands; and for volunteer cooperative fish and game projects. During the 2017-2019 (~~and~~), 2019-2021, and 2021-2023 fiscal biennia, the aquatic lands enhancement account may be used to support the shellfish program, the ballast water program, hatcheries, the Puget Sound toxic sampling program and steelhead mortality research at the department of fish and wildlife, the knotweed program at the department of agriculture, actions at the University of Washington for reducing ocean acidification, which may include the creation of a center on ocean acidification, the Puget Sound Corps program, and support of the marine resource advisory council and the Washington coastal marine advisory council. During the 2017-2019 and 2019-2021 fiscal biennia, the legislature may transfer from the aquatic lands enhancement account to the geoduck aquaculture research account for research related to shellfish aquaculture. During the 2015-2017 fiscal biennium, the legislature may transfer moneys from the aquatic lands enhancement account to the marine resources stewardship trust account.

(2) In providing grants for aquatic lands enhancement projects, the recreation and conservation funding board shall:

(a) Require grant recipients to incorporate the environmental benefits of the project into their grant applications;

(b) Utilize the statement of environmental benefits, consideration, except as provided in RCW 79.105.610, of whether the applicant is a Puget Sound partner, as defined in RCW 90.71.010, whether a project is referenced in the action agenda developed by the Puget Sound partnership under RCW 90.71.310, and except as otherwise provided in RCW 79.105.630, and effective one calendar year following the development and statewide availability of model evergreen community management plans and ordinances under RCW 35.105.050, whether the applicant is an entity that has been recognized, and what gradation of recognition was received, in the evergreen community recognition program created in RCW 35.105.030 in its prioritization and selection process; and

(c) Develop appropriate outcome-focused performance measures to be used both for management and performance assessment of the grants.

(3) To the extent possible, the department should coordinate its performance measure system with other natural resource-related agencies as defined in RCW 43.41.270.

(4) The department shall consult with affected interest groups in implementing this section.

(5) Any project designed to address the restoration of Puget Sound may be funded under this chapter only if the project is not in conflict with the action agenda developed by the Puget Sound partnership under RCW 90.71.310.

Sec. 997. RCW 79A.25.210 and 2019 c 415 s 987 are each amended to read as follows:

The firearms range account is hereby created in the state general fund. Moneys in the account shall be subject to legislative appropriation and shall be used for purchase and development of land, construction or improvement of range facilities, including fixed structure construction or remodeling, equipment purchase, safety or environmental improvements, noise abatement, and liability protection for public and nonprofit firearm range training and practice facilities.

Grant funds shall not be used for expendable shooting supplies, or normal operating expenses. In making grants, the board shall give priority to projects for noise abatement or safety improvement. Grant funds shall not supplant funds for other organization programs.

The funds will be available to nonprofit shooting organizations, school districts, and state, county, or local governments on a match basis. All entities receiving matching funds must be open on a regular basis and usable by law enforcement personnel or the general public who possess Washington concealed pistol licenses or Washington hunting licenses or who are enrolled in a firearm safety class.

Applicants for a grant from the firearms range account shall provide matching funds in either cash or in-kind contributions. The match must represent one dollar in value for each one dollar of the grant except that in the case of a grant for noise abatement or safety improvements the match must represent one dollar in value for each two dollars of the grant. In-kind contributions include but are not limited to labor, materials, and new property. Existing assets and existing development may not apply to the match.

Applicants other than school districts or local or state government must be registered as a nonprofit or not-for-profit organization with the Washington secretary of state. The organization's articles of incorporation must contain provisions for the organization's structure, officers, legal address, and registered agent.

Organizations requesting grants must provide the hours of range availability for public and law enforcement use. The fee structure will be submitted with the grant application.

Any nonprofit organization or agency accepting a grant under this program will be required to pay back the entire grant amount to the firearms range account if the use of the range facility is discontinued less than ten years after the grant is accepted.

Entities receiving grants must make the facilities for which grant funding is received open for hunter safety education classes and firearm safety classes on a regular basis for no fee.

Government units or school districts applying for grants must open their range facility on a regular basis for hunter safety education classes and firearm safety classes.

The board shall adopt rules to implement chapter 195, Laws of 1990, pursuant to chapter 34.05 RCW. During the 2017-2019 and 2019-2021 fiscal biennia, expenditures from the firearms range account may be used to implement chapter 74, Laws of 2017 (SHB 1100) (concealed pistol licenses) and chapter 282, Laws of 2017 (SB 5268) (concealed pistol license notices). During the 2021-2023 fiscal biennium, expenditures from the firearms range account may be used to implement chapter 74, Laws of 2017 (SHB 1100) (concealed pistol licenses).

Sec. 998. RCW 82.08.170 and 2020 c 357 s 919 are each amended to read as follows:

(1) Except as provided in subsections (4) and (5) of this section, during the months of January, April, July, and October of each year, the state treasurer must make the transfers required under subsections (2) and (3) of this section from the liquor excise tax fund and then the apportionment and distribution of all remaining moneys in the liquor excise tax fund to the counties, cities, and towns in the following proportions: (a) Twenty percent of the moneys in the liquor excise tax fund must be divided among and distributed to the counties of the state in accordance with the provisions of RCW 66.08.200; and (b) eighty percent of the moneys in the liquor excise tax fund must be divided among and distributed to the cities and towns of the state in accordance with the provisions of RCW 66.08.210.

(2) Each fiscal quarter and prior to making the twenty percent distribution to counties under subsection (1)(a) of this section, the treasurer shall transfer to the liquor revolving fund created in RCW 66.08.170 sufficient moneys to fund the allotments from any legislative appropriations for county research and services as provided under chapter 43.110 RCW.

(3) During the months of January, April, July, and October of each year, the state treasurer must transfer two million five hundred thousand dollars from the liquor excise tax fund to the state general fund.

(4) During calendar year 2012, the October distribution under subsection (1) of this section and the July and October transfers under subsections (2) and (3) of this section must not be made. During calendar year 2013, the January, April, and July distributions under subsection (1) of this section and transfers under subsections (2) and (3) of this section must not be made.

(5) During the 2015-2017 ~~((and))~~, 2019-2021, and 2021-2023 fiscal biennia, the liquor excise tax fund may be appropriated for the local government fiscal note program in the department of commerce. It is the intent of the legislature to continue this policy in the subsequent fiscal biennium.

Sec. 999. RCW 82.14.310 and 2019 c 415 s 988 are each amended to read as follows:

(1) The county criminal justice assistance account is created in the state treasury. Beginning in fiscal year 2000, the state treasurer must transfer into the county criminal justice assistance account from the general fund the sum of twenty-three million two hundred thousand dollars divided into four equal deposits occurring on July 1, October 1, January 1, and April 1. For each fiscal year thereafter, the state treasurer must increase the total transfer by the fiscal growth factor, as defined in RCW 43.135.025, forecast for that fiscal year by the office of financial management in November of the preceding year.

(2) The moneys deposited in the county criminal justice assistance account for distribution under this section, less any moneys appropriated for purposes under subsections (4) and (5) of this section, must be distributed at such times as distributions are made under RCW 82.44.150 and on the relative basis of each county's funding factor as determined under this subsection.

(a) A county's funding factor is the sum of:

(i) The population of the county, divided by one thousand, and multiplied by two-tenths;

(ii) The crime rate of the county, multiplied by three-tenths; and

(iii) The annual number of criminal cases filed in the county superior court,

for each one thousand in population, multiplied by five-tenths.

(b) Under this section and RCW 82.14.320 and 82.14.330:

(i) The population of the county or city is as last determined by the office of financial management;

(ii) The crime rate of the county or city is the annual occurrence of specified criminal offenses, as calculated in the most recent annual report on crime in Washington state as published by the Washington association of sheriffs and police chiefs, for each one thousand in population;

(iii) The annual number of criminal cases filed in the county superior court must be determined by the most recent annual report of the courts of Washington, as published by the administrative office of the courts;

(iv) Distributions and eligibility for distributions in the 1989-1991 biennium must be based on 1988 figures for both the crime rate as described under (ii) of this subsection and the annual number of criminal cases that are filed as described under (iii) of this subsection. Future distributions must be based on the most recent figures for both the crime rate as described under (ii) of this subsection and the annual number of criminal cases that are filed as described under (iii) of this subsection.

(3) Moneys distributed under this section must be expended exclusively for criminal justice purposes and may not be used to replace or supplant existing funding. Criminal justice purposes are defined as activities that substantially assist the criminal justice system, which may include circumstances where ancillary benefit to the civil or juvenile justice system occurs, and which includes (a) domestic violence services such as those provided by domestic violence programs, community advocates, and legal advocates, as defined in RCW 70.123.020, and (b) during the 2001-2003 fiscal biennium, juvenile dispositional hearings relating to petitions for at-risk youth, truancy, and children in need of services. Existing funding for purposes of this subsection is defined as calendar year 1989 actual operating expenditures for criminal justice purposes. Calendar year 1989 actual operating expenditures for criminal justice purposes exclude the following: Expenditures for extraordinary events

not likely to reoccur, changes in contract provisions for criminal justice services, beyond the control of the local jurisdiction receiving the services, and major nonrecurring capital expenditures.

(4) Not more than five percent of the funds deposited to the county criminal justice assistance account may be available for appropriations for enhancements to the state patrol crime laboratory system and the continuing costs related to these enhancements. Funds appropriated from this account for such enhancements may not supplant existing funds from the state general fund.

(5) During the 2017-2019 fiscal biennium, the sum of one hundred fifty-three thousand dollars, and during the 2019-2021 and 2021-2023 fiscal (~~biennium~~) biennia, the sum of five hundred ten thousand dollars, may be appropriated for the Washington state patrol to provide investigative assistance and report services to assist local law enforcement agencies to prosecute criminals. It is the intent of the legislature that this policy will be continued in subsequent fiscal biennia.

Sec. 1000. RCW 90.50A.090 and 2019 c 415 s 992 are each amended to read as follows:

(1) The water pollution control revolving administration account is created in the state treasury. All receipts from charges authorized in this section must be deposited in the account. Moneys in the account may be spent only after appropriation. Expenditures from the account may be used only in a manner consistent with this section.

(2) The department is authorized to assess administration charges as a portion of the debt service for loans issued under the water pollution control revolving fund created in RCW 90.50A.020. The sole purpose of assessing administration charges is to predictably and adequately fund the department's costs of administering the water pollution control revolving fund loan program, as identified in subsection (5) of this section. The department must assess administration charges on each water pollution control revolving fund loan at the point the loan enters repayment status, after July 28, 2013, and rule changes are adopted to implement the administration charge. Loans that are at an interest rate below the established

administration charge rate are exempt from the administration charge.

(3) The water pollution control revolving administration account consists of:

(a) Any administration charge levied by the department in conjunction with administration of the water pollution control revolving fund; and

(b) Any other revenues derived from gifts, grants, or bequests pledged to the state for the purpose of administering the water pollution control revolving fund.

(4) The state treasurer may invest and reinvest moneys in the water pollution control revolving administration account in the manner provided by law. All earnings from such investment and reinvestment must be credited to the water pollution control revolving administration account.

(5) Moneys in the water pollution control revolving administration account are to be used for the following water pollution control revolving fund loan program costs:

(a) Administration costs associated with conducting application processes, managing contracts, collecting loan repayments, managing the revolving fund, providing technical assistance, and meeting state and federal reporting requirements; and

(b) Information and data system costs associated with loan tracking and fund management.

(6) Each biennium, the department may spend from the water pollution control revolving administration account an amount no greater than four percent of the water pollution control revolving fund new capital appropriation.

(7) For its 2017-2019 biennial operating budget submittal, and every biennium thereafter, the department must compare the projected water pollution control revolving administration account balance and the projected administration charge income with projected program costs, including an adequate working capital reserve as defined by the office of financial management. In its submittal to the office of financial management, the department may:

(a) Find that the projected administration charge income is

inadequate to fund the cost of administering the program, and that the rate of the charge must be increased. However, the administration charge may never exceed one percent on the declining principal loan balance;

(b) Find that the projected administration charge income exceeds what is needed to fund the cost of administering the program, and that the rate of the charge must be decreased;

(c) Find that there is an excess balance in the revolving administration account, and that the excess must be transferred to the water pollution control revolving fund to be used for loans; or

(d) Find that there is no need for any rate adjustments or balance transfers.

(8) At the point where the water pollution control revolving administration account adequately covers the program administration costs, the department may no longer use the federal administration allowance. If a federal capitalization grant is awarded after that point, all federal capitalization dollars must be used for making loans.

(9) By December 1, 2018, the department must submit to the appropriate legislative fiscal committees a report on implementation of the administration charge, including information on: The amount of income the administration charge has produced since its inception; the uses and adequacy of the income for administrative costs; any excess balances that have been transferred to the water pollution control revolving fund; and any additional sources that the department is using for program administration.

(10) During the 2019-2021 and 2021-2023 fiscal (~~(biennium)~~) biennia, the legislature may direct the state treasurer to make transfers of moneys in the water pollution control revolving administration account to the water pollution control revolving (~~(account fund)~~) fund.

Sec. 1004. RCW 43.70.--- and 2021 c 3 s 19 are each amended to read as follows:

(1) The COVID-19 public health response account is created in the custody of the state treasurer. The account shall consist of funds appropriated by the legislature and grants received by the department of health for activities in response to the coronavirus pandemic (COVID-19). Only

the secretary, or the secretary's designee, may authorize expenditures from the account for costs related to the public health response to COVID-19, subject to any limitations imposed by grant funding deposited into the account. The COVID-19 public health response account is subject to allotment procedures under chapter 43.88 RCW, but an appropriation is not required for expenditures.

(2)(a) The legislature finds that a safe, efficient, and effective delivery of vaccinations is of the utmost importance for restoring societal and economic functions. As we learn more about the virus, the vaccine, and challenges to vaccine allocation and distribution, it is anticipated that the state's COVID-19 vaccination distribution plan will evolve. To that end, the legislature has provided flexibility by funding ((vaccine expenditure)) expenditures for testing, contact tracing, mitigation activities, vaccine administration and distribution, and other allowable uses for the state, local health jurisdictions, and tribes at the discretion of the secretary and without an appropriation. However, to maintain fiscal control and to ensure spending priorities align, the department is required to collaborate and communicate with the chairs and ranking members of the health care and fiscal committees of the legislature and local health jurisdictions in advance of any significant revision of the state's COVID-19 vaccination plan and to provide regular updates on its implementation and spending.

(b) As part of the public health response to COVID-19, the expenditures from the account must be used to effectively administer the vaccine for COVID-19 and conduct testing and contact tracing. The department must ensure that COVID-19 outreach is accessible, culturally and linguistically appropriate, and that it includes community-driven partnerships and strategies.

(c) When making expenditures for administering the vaccine for COVID-19, the department must focus on identifying persons for vaccination, prioritizing underserved, underrepresented, and hard-to-reach communities, making the vaccine accessible, and providing support to schools for safe reopening. Strategies for vaccine distribution shall include

the establishment and expansion of community vaccination centers, mobile vaccination units, reporting enhancements, in-home visits for vaccinations for the elderly, and transportation of individuals to vaccination sites.

(d) When making expenditures regarding testing and contact tracing, the department must provide equitable access, prioritize underserved, underrepresented, and hard-to-reach communities, and provide support and resources to facilitate the safe reopening of schools while minimizing community spread of the virus.

(e) The department may also make expenditures from the account related to developing the public health workforce using funds granted by the federal government for that purpose in section 2501, the American rescue plan act of 2021, P.L. 117-2.

(3) When making expenditures from the account, the department must include an emphasis on public communication regarding the availability and accessibility of the vaccine and testing, and the importance of vaccine and testing availability to the safe reopening of the state.

(4)(a) The department must report to the fiscal and health care committees of the legislature on a monthly basis regarding its COVID-19 response.

(b) To the extent that it is available, the report must include data regarding vaccine distribution, testing, and contact tracing, as follows:

(i) The number of vaccines administered per day, including regional data regarding the location and age groups of persons receiving the vaccine, specifically identifying hard-to-reach communities in which vaccines were administered; and

(ii) The number of tests conducted per week, including data specifically addressing testing conducted in hard-to-reach communities.

(c) The first monthly report is due no later than one month from February 19, 2021. Monthly reports are no longer required upon the department's determination that the remaining balance of the COVID-19 response account is less than \$100,000.

PART XII

HUMAN SERVICES

SUPPLEMENTAL

Sec. 1201. 2020 c 357 s 201 (uncodified) is amended to read as follows:

FOR THE DEPARTMENT OF SOCIAL AND HEALTH SERVICES

(1) The appropriations to the department of social and health services in this act shall be expended for the programs and in the amounts specified in this act. Appropriations made in this act to the department of social and health services shall initially be allotted as required by this act. Subsequent allotment modifications shall not include transfers of moneys between sections of this act except as expressly provided in this act, nor shall allotment modifications permit moneys that are provided solely for a specified purpose to be used for other than that purpose.

(2) The department of social and health services shall not initiate any services that require expenditure of state general fund moneys unless expressly authorized in this act or other law. The department may seek, receive, and spend, under RCW 43.79.260 through 43.79.282, federal moneys not anticipated in this act as long as the federal funding does not require expenditure of state moneys for the program in excess of amounts anticipated in this act. If the department receives unanticipated unrestricted federal moneys, those moneys shall be spent for services authorized in this act or in any other legislation providing appropriation authority, and an equal amount of appropriated state general fund moneys shall lapse. Upon the lapsing of any moneys under this subsection, the office of financial management shall notify the legislative fiscal committees. As used in this subsection, "unrestricted federal moneys" includes block grants and other funds that federal law does not require to be spent on specifically defined projects or matched on a formula basis by state funds.

(3) The legislature finds that medicaid payment rates, as calculated by the department pursuant to the appropriations in this act, bear a reasonable relationship to the costs incurred by efficiently and economically operated facilities for providing quality services and will be sufficient to enlist enough providers so that care and services are available to the extent that such care and services are available to the general population in the geographic area. The legislature finds that cost reports, payment data from the federal government, historical utilization, economic data, and clinical input constitute reliable data upon which to determine the payment rates.

(4) The department shall to the maximum extent practicable use the same system for delivery of spoken-language interpreter services for social services appointments as the one established for medical appointments in the health care authority. When contracting directly with an individual to deliver spoken language interpreter services, the department shall only contract with language access providers who are working at a location in the state and who are state-certified or state-authorized, except that when such a provider is not available, the department may use a language access provider who meets other certifications or standards deemed to meet state standards, including interpreters in other states.

(5) Information technology projects or investments and proposed projects or investments impacting time capture, payroll and payment processes and systems, eligibility, case management, and authorization systems within the department of social and health services are subject to technical oversight by the office of the chief information officer.

(6) (a) The department shall facilitate enrollment under the medicaid expansion for clients applying for or receiving state funded services from the department and its contractors. Prior to open enrollment, the department shall coordinate with the health care authority to provide referrals to the Washington health benefit exchange for clients that will be ineligible for medicaid.

(b) To facilitate a single point of entry across public and medical assistance programs, and to maximize the use of federal funding, the health care authority, the department of social and health services, and the health benefit exchange will coordinate efforts to expand HealthPlanfinder access to public assistance and medical eligibility staff. The department shall complete medicaid applications in the HealthPlanfinder for households receiving or applying for public assistance benefits.

(7) The health care authority, the health benefit exchange, the department of social and health services, the department of health, and the department of children, youth, and families shall work together within existing resources to establish the health and human services enterprise coalition (the coalition). The coalition, led by the

health care authority, must be a multi-organization collaborative that provides strategic direction and federal funding guidance for projects that have cross-organizational or enterprise impact, including information technology projects that affect organizations within the coalition. By October 31, 2019, the coalition must submit a report to the governor and the legislature that describes the coalition's plan for projects affecting the coalition organizations. The report must include any information technology projects impacting coalition organizations and, in collaboration with the office of the chief information officer, provide: (a) The status of any information technology projects currently being developed or implemented that affect the coalition; (b) funding needs of these current and future information technology projects; and (c) next steps for the coalition's information technology projects. The office of the chief information officer shall maintain a statewide perspective when collaborating with the coalition to ensure that the development of projects identified in this report are planned for in a manner that ensures the efficient use of state resources and maximizes federal financial participation. The work of the coalition is subject to the conditions, limitations, and review provided in section 701 of this act.

(8) (a) The appropriations to the department of social and health services in this act must be expended for the programs and in the amounts specified in this act. However, after May 1, (~~2020~~) 2021, unless prohibited by this act, the department may transfer general fund-state, general fund-federal, or general fund-local appropriations for fiscal year (~~2020~~) 2021 among programs and subprograms after approval by the director of the office of financial management. However, the department may not transfer state appropriations that are provided solely for a specified purpose except as expressly provided in (b) of this subsection.

(b) To the extent that transfers under (a) of this subsection are insufficient to fund actual expenditures in excess of fiscal year (~~2020~~) 2021 in response to the COVID-19 pandemic or caseload forecasts and utilization assumptions in the long-term care, developmental disabilities, and public assistance programs, the department may transfer state, federal, or local appropriations

that are provided solely for a specified purpose. The department may not transfer funds, and the director of the office of financial management may not approve the transfer, unless the transfer is consistent with the objective of conserving, to the maximum extent possible, the expenditure of state funds. The director of the office of financial management shall notify the appropriate fiscal committees of the legislature in writing seven days prior to approving any allotment modifications or transfers under this subsection. The written notification shall include a narrative explanation and justification of the changes, along with expenditures and allotments by budget unit and appropriation, both before and after any allotment modifications or transfers.

(c) The department may not transfer appropriations from any other program or subprogram to the mental health program. Within the mental health program, the department may transfer appropriations that are provided solely for a specified purpose as needed to fund actual expenditures through the end of fiscal year (~~2020~~) 2021.

(d) The department may not transfer appropriations for the developmental disabilities program to any other program or subprograms of the department of social and health services.

The model shall incorporate factors for capacity in state hospitals as well as contracted facilities, which provide similar levels of care, referral patterns, wait lists, lengths of stay, and other factors identified as appropriate for predicting the number of beds needed to meet the demand for civil and forensic state hospital services. Factors should include identification of need for the services and analysis of the effect of community investments in behavioral health services and other types of beds that may reduce the need for long-term civil commitment needs. The department must submit a report to the legislature by October 1, 2019, with an update of the model and the estimated civil and forensic state hospital bed need by November 1, 2020, and each November 1st thereafter through the end of fiscal year 2027. Sec. 1209. 2020 c 357 s 210 (uncodified) is amended to read as follows:

FOR THE STATE HEALTH CARE AUTHORITY

During the 2019-2021 fiscal biennium, the health care authority shall provide support and data as required by the office of the state actuary in providing the legislature with health care actuarial analysis, including providing any information in the possession of the health care authority or available to the health care authority through contracts with providers, plans, insurers, consultants, or any other entities contracting with the health care authority.

Information technology projects or investments and proposed projects or investments impacting time capture, payroll and payment processes and systems, eligibility, case management, and authorization systems within the health care authority are subject to technical oversight by the office of the chief information officer.

The health care authority shall not initiate any services that require expenditure of state general fund moneys unless expressly authorized in this act or other law. The health care authority may seek, receive, and spend, under RCW 43.79.260 through 43.79.282, federal

moneys not anticipated in this act as long as the federal funding does not require expenditure of state moneys for the program in excess of amounts anticipated in this act. If the health care authority receives unanticipated unrestricted federal moneys, those moneys shall be spent for services authorized in this act or in any other legislation providing appropriation authority, and an equal amount of appropriated state general fund moneys shall lapse. Upon the lapsing of any moneys under this subsection, the office of financial management shall notify the legislative fiscal committees. As used in this subsection, "unrestricted federal moneys" includes block grants and other funds that federal law does not require to be spent on specifically defined projects or matched on a formula basis by state funds.

The health care authority, the health benefit exchange, the department of social and health services, the department of health, and the department of children, youth, and families shall work together within existing resources to establish the health and human services enterprise coalition (the coalition). The coalition, led by the health care authority, must be a multi-organization collaborative that provides strategic direction and federal funding guidance for projects that have cross-organizational or enterprise impact, including information technology projects that affect organizations within the coalition. By October 31, 2019, the coalition must submit a report to the governor and the legislature that describes the coalition's plan for projects affecting the coalition organizations. The report must include any information technology projects impacting coalition organizations and, in collaboration with the office of the chief information officer, provide: (1) The status of any information technology projects currently being developed or implemented that affect the coalition; (2) funding needs of these current and future information technology projects; and (3) next steps for the coalition's information technology projects. The office of the chief information officer shall maintain a statewide perspective when collaborating with the coalition to ensure that the development of projects identified in this report are planned for in a manner that ensures the efficient use of state resources and maximizes

federal financial participation. The work of the coalition is subject to the conditions, limitations, and review provided in section 701 of this act.

The appropriations to the health care authority in this act shall be expended for the programs and in the amounts specified in this act. However, after May 1, ~~((2020))~~ 2021, unless prohibited by this act, the authority may transfer general fund-state appropriations for fiscal year ~~((2020))~~ 2021 among programs after approval by the director of the office of financial management. The authority must notify the fiscal committees of the legislature prior to receiving approval from the director of the office of financial management. To the extent that appropriations in sections 211 through 215 are insufficient to fund actual expenditures in excess of caseload forecast and utilization assumptions, the authority may transfer general fund-state appropriations for fiscal year ~~((2020))~~ 2021 that are provided solely for a specified purpose. The authority may also transfer general fund-state appropriations for fiscal year 2020 that are provided solely for a specified purpose within section 215 of this act resulting from assumptions related to the return of \$35,000,000 in general fund-state behavioral health organization reserves in fiscal year ~~((2020))~~ 2021. The authority may not transfer funds, including for expenses in response to the COVID-19 pandemic in fiscal year 2021, and the director of the office of financial management shall not approve the transfer, unless the transfer is consistent with the objective of conserving, to the maximum extent possible, the expenditure of state funds. The director of the office of financial management shall notify the appropriate fiscal committees of the legislature in writing seven days prior to approving any allotment modifications or transfers under this section. The written notification must include a narrative explanation and justification of changes, along with expenditures and allotments by budget unit and appropriation, both before and after any allotment modifications and transfers.

The appropriations in this section are subject to the following conditions and limitations:

(1) The authority shall not accept or expend any federal funds received under a medicaid transformation waiver under

healthier Washington except as described in subsections (2) and (3) of this section until specifically approved and appropriated by the legislature. To ensure compliance with legislative directive budget requirements and terms and conditions of the waiver, the authority shall implement the waiver and reporting requirements with oversight from the office of financial management. The legislature finds that appropriate management of the innovation waiver requires better analytic capability, transparency, consistency, timeliness, accuracy, and lack of redundancy with other established measures and that the patient must be considered first and foremost in the implementation and execution of the demonstration waiver. In order to effectuate these goals, the authority shall: (a) Require the Dr. Robert Bree collaborative and the health technology assessment program to reduce the administrative burden upon providers by only requiring performance measures that are nonduplicative of other nationally established measures. The joint select committee on health care oversight will evaluate the measures chosen by the collaborative and the health technology assessment program for effectiveness and appropriateness; (b) develop a patient satisfaction survey with the goal to gather information about whether it was beneficial for the patient to use the center of excellence location in exchange for additional out-of-pocket savings; (c) ensure patients and health care providers have significant input into the implementation of the demonstration waiver, in order to ensure improved patient health outcomes; and (d) in cooperation with the department of social and health services, consult with and provide notification of work on applications for federal waivers, including details on waiver duration, financial implications, and potential future impacts on the state budget, to the joint select committee on health care oversight prior to submitting waivers for federal approval. By federal standard, the medicaid transformation demonstration waiver shall not exceed the duration originally granted by the centers for medicare and medicaid services and any programs created or funded by this waiver do not create an entitlement. Beginning May 15, 2019, and continuing through December 15, 2019, by the 15th of each month, the director in consultation with the secretary shall report to the fiscal chair of the

appropriate committees of the legislature in the manner and form requested the status of the medicaid transformation waiver, including any anticipated or proposed changes to accruals or expenditures.

(2) No more than (~~(\$153,357,000)~~) \$165,082,000 of the general fund-federal appropriation and no more than (~~(\$86,190,000)~~) \$112,949,000 of the general fund-local appropriation may be expended for transformation through accountable communities of health described in initiative 1 of the medicaid transformation demonstration wavier under healthier Washington, including preventing youth drug use, opioid prevention and treatment, and physical and behavioral health integration. Under this initiative, the authority shall take into account local input regarding community needs. In order to ensure transparency to the appropriate fiscal committees of the legislature, the authority shall provide fiscal staff of the legislature query ability into any database of the fiscal intermediary that authority staff would be authorized to access. The authority shall not increase general fund-state expenditures under this initiative. The director shall also report to the fiscal committees of the legislature all of the expenditures under this subsection and shall provide such fiscal data in the time, manner, and form requested by the legislative fiscal committees. By December 15, 2019, the authority in collaboration with each accountable community of health shall demonstrate how it will be self-sustaining by the end of the demonstration waiver period, including sources of outside funding, and provide this reporting to the joint select committee on health care oversight. If by the third year of the demonstration waiver there are not measurable, improved patient outcomes and financial returns, the Washington state institute for public policy will conduct an audit of the accountable communities of health, in addition to the process set in place through the independent evaluation required by the agreement with centers for medicare and medicaid services.

(3) (a) No more than (~~(\$79,829,000)~~) \$67,896,000 of the general fund-federal appropriation may be expended for supported housing and employment services described in initiative 3a and 3b of the medicaid transformation demonstration waiver under healthier

Washington. Under this initiative, the authority and the department of social and health services shall ensure that allowable and necessary services are provided to eligible clients as identified by the department or its third party administrator. The authority and the department in consultation with the medicaid forecast work group, shall ensure that reasonable reimbursements are established for services deemed necessary within an identified limit per individual. The authority shall not increase general fund-state expenditures under this initiative. The director shall report to the joint select committee on health care oversight no less than quarterly on financial and health outcomes. The director shall also report to the fiscal committees of the legislature all of the expenditures of this subsection and shall provide such fiscal data in the time, manner, and form requested by the legislative fiscal committees.

(b) No more than (~~(\$89,476,000)~~) \$105,283,000 of the general fund-federal appropriation and no more than (~~(\$36,548,000)~~) \$43,004,000 of the general fund-local appropriation may be expended for the medicaid quality improvement program. Under federal regulations, the medicaid quality improvement program is authorized and allows states to design quality improvement programs for the medicaid population in ways that support the state's quality goals. Medicaid quality improvement program payments will not count against initiative 1 of the medicaid transformation demonstration waiver spending limit and are excluded from the waiver's budget neutrality calculation. Apple health managed care organizations and their partnering providers will receive medicaid quality improvement program payments as they meet designated milestones. Partnering providers and apple health managed care organizations will work together to achieve medicaid quality improvement program goals according to the performance period timelines and reporting deadlines as set forth by the authority. The authority shall only utilize the medicaid quality improvement program to support the transformation waiver and shall not pursue its use for other purposes. Any programs created or funded by the medicaid quality improvement program do not create an entitlement. The authority shall not

increase general fund-state, federal, or local expenditures under this program. The director shall report to the joint select committee on health care oversight not less than quarterly on financial and health outcomes. The director shall report to the fiscal committees of the legislature all of the expenditures under this subsection and shall provide such fiscal data in the time, manner, and form requested by the legislative fiscal committees.

(4) Annually, no later than November 1st, the authority shall report to the governor and appropriate committees of the legislature: (a) Savings attributed to behavioral and physical integration in areas that are scheduled to integrate in the following calendar year, and (b) savings attributed to behavioral and physical health integration and the level of savings achieved in areas that have integrated behavioral and physical health.

(5) Sufficient amounts are appropriated in this subsection to implement the medicaid expansion as defined in the social security act, section 1902(a)(10)(A)(i)(VIII).

(6) The legislature finds that medicaid payment rates, as calculated by the health care authority pursuant to the appropriations in this act, bear a reasonable relationship to the costs incurred by efficiently and economically operated facilities for providing quality services and will be sufficient to enlist enough providers so that care and services are available to the extent that such care and services are available to the general population in the geographic area. The legislature finds that the cost reports, payment data from the federal government, historical utilization, economic data, and clinical input constitute reliable data upon which to determine the payment rates.

(7) Based on quarterly expenditure reports and caseload forecasts, if the health care authority estimates that expenditures for the medical assistance program will exceed the appropriations, the health care authority shall take steps including but not limited to reduction of rates or elimination of optional services to reduce expenditures so that total program costs do not exceed the annual appropriation authority.

(8) In determining financial eligibility for medicaid-funded

services, the health care authority is authorized to disregard recoveries by Holocaust survivors of insurance proceeds or other assets, as defined in RCW 48.104.030.

(9) The legislature affirms that it is in the state's interest for Harborview medical center to remain an economically viable component of the state's health care system.

(10) When a person is ineligible for medicaid solely by reason of residence in an institution for mental diseases, the health care authority shall provide the person with the same benefits as he or she would receive if eligible for medicaid, using state-only funds to the extent necessary.

(11) \$4,261,000 of the general fund-state appropriation for fiscal year 2020, (~~(\$4,261,000)~~) \$3,733,000 of the general fund-state appropriation for fiscal year 2021, and (~~(\$8,522,000)~~) \$9,050,000 of the general fund-federal appropriation are provided solely for low-income disproportionate share hospital payments.

(12) Within the amounts appropriated in this section, the health care authority shall provide disproportionate share hospital payments to hospitals that provide services to children in the children's health program who are not eligible for services under Title XIX or XXI of the federal social security act due to their citizenship status.

(13) (a) \$7,000,000 of the general fund-federal appropriation is provided solely for supplemental payments to nursing homes operated by public hospital districts. The public hospital district shall be responsible for providing the required nonfederal match for the supplemental payment, and the payments shall not exceed the maximum allowable under federal rules. It is the legislature's intent that the payments shall be supplemental to and shall not in any way offset or reduce the payments calculated and provided in accordance with part E of chapter 74.46 RCW. It is the legislature's further intent that costs otherwise allowable for rate-setting and settlement against payments under chapter 74.46 RCW shall not be disallowed solely because such costs have been paid by revenues retained by the nursing home from these supplemental payments. The supplemental payments are subject to retrospective interim and

final cost settlements based on the nursing homes' as-filed and final medicare cost reports. The timing of the interim and final cost settlements shall be at the health care authority's discretion. During either the interim cost settlement or the final cost settlement, the health care authority shall recoup from the public hospital districts the supplemental payments that exceed the medicaid cost limit and/or the medicare upper payment limit. The health care authority shall apply federal rules for identifying the eligible incurred medicaid costs and the medicare upper payment limit.

(b) The authority, in consultation with the department of social and health services and the nursing homes operated by public hospitals in (a) of this subsection, must develop a plan with recommendations for an upper payment limit calculation and the supplemental payment model for nursing homes operated by a public hospital district. The group must consider how to restructure payments under (a) of this subsection, taking into consideration alternate upper payment limit calculation. If upon completion of the plan, the authority determines it can implement the recommendations of the group within the amounts provided in (a) of this subsection, the authority must submit a state plan amendment, if necessary, and submit a report to the fiscal committees of the legislature no later than September 30, 2020.

(c) \$193,000 of the general fund-state appropriation for fiscal year 2020 is provided solely for the authority to provide a one-time grant to a standalone skilled nursing facility operated by a public hospital district in Grant county. This grant is provided as a one-time offset to address the impact of the recoupment requirements of this subsection (13).

(14) The health care authority shall continue the inpatient hospital certified public expenditures program for the 2019-2021 fiscal biennium. The program shall apply to all public hospitals, including those owned or operated by the state, except those classified as critical access hospitals or state psychiatric institutions. The health care authority shall submit reports to the governor and legislature by November 1, 2020, and by November 1, 2021, that evaluate whether savings continue to exceed costs for this

program. If the certified public expenditures (CPE) program in its current form is no longer cost-effective to maintain, the health care authority shall submit a report to the governor and legislature detailing cost-effective alternative uses of local, state, and federal resources as a replacement for this program. During fiscal year 2020 and fiscal year 2021, hospitals in the program shall be paid and shall retain one hundred percent of the federal portion of the allowable hospital cost for each medicaid inpatient fee-for-service claim payable by medical assistance and one hundred percent of the federal portion of the maximum disproportionate share hospital payment allowable under federal regulations. Inpatient medicaid payments shall be established using an allowable methodology that approximates the cost of claims submitted by the hospitals. Payments made to each hospital in the program in each fiscal year of the biennium shall be compared to a baseline amount. The baseline amount will be determined by the total of (a) the inpatient claim payment amounts that would have been paid during the fiscal year had the hospital not been in the CPE program based on the reimbursement rates developed, implemented, and consistent with policies approved in the 2019-2021 biennial operating appropriations act and in effect on July 1, 2015, (b) one-half of the indigent assistance disproportionate share hospital payment amounts paid to and retained by each hospital during fiscal year 2005, and (c) all of the other disproportionate share hospital payment amounts paid to and retained by each hospital during fiscal year 2005 to the extent the same disproportionate share hospital programs exist in the 2019-2021 fiscal biennium. If payments during the fiscal year exceed the hospital's baseline amount, no additional payments will be made to the hospital except the federal portion of allowable disproportionate share hospital payments for which the hospital can certify allowable match. If payments during the fiscal year are less than the baseline amount, the hospital will be paid a state grant equal to the difference between payments during the fiscal year and the applicable baseline amount. Payment of the state grant shall be made in the applicable fiscal year and distributed in monthly payments. The grants will be recalculated and redistributed as the baseline is updated

during the fiscal year. The grant payments are subject to an interim settlement within eleven months after the end of the fiscal year. A final settlement shall be performed. To the extent that either settlement determines that a hospital has received funds in excess of what it would have received as described in this subsection, the hospital must repay the excess amounts to the state when requested. \$759,000 of the general fund-state appropriation for fiscal year 2020 and ~~((\$740,000))~~ \$698,000 of the general fund-state appropriation for fiscal year 2021 are provided solely for state grants for the participating hospitals.

(15) The health care authority shall seek public-private partnerships and federal funds that are or may become available to provide on-going support for outreach and education efforts under the federal children's health insurance program reauthorization act of 2009.

(16) The health care authority shall target funding for maternity support services towards pregnant women with factors that lead to higher rates of poor birth outcomes, including hypertension, a preterm or low birth weight birth in the most recent previous birth, a cognitive deficit or developmental disability, substance abuse, severe mental illness, unhealthy weight or failure to gain weight, tobacco use, or African American or Native American race. The health care authority shall prioritize evidence-based practices for delivery of maternity support services. To the extent practicable, the health care authority shall develop a mechanism to increase federal funding for maternity support services by leveraging local public funding for those services.

(17) The authority shall submit reports to the governor and the legislature by September 15, 2020, and no later than September 15, 2021, that delineate the number of individuals in medicaid managed care, by carrier, age, gender, and eligibility category, receiving preventative services and vaccinations. The reports should include baseline and benchmark information from the previous two fiscal years and should be inclusive of, but not limited to, services recommended under the United States preventative services task force, advisory committee on immunization practices, early and periodic screening, diagnostic, and treatment (EPSDT)

guidelines, and other relevant preventative and vaccination medicaid guidelines and requirements.

(18) Managed care contracts must incorporate accountability measures that monitor patient health and improved health outcomes, and shall include an expectation that each patient receive a wellness examination that documents the baseline health status and allows for monitoring of health improvements and outcome measures.

(19) Sufficient amounts are appropriated in this section for the authority to provide an adult dental benefit.

(20) The health care authority shall coordinate with the department of social and health services to provide referrals to the Washington health benefit exchange for clients that will be ineligible for medicaid.

(21) To facilitate a single point of entry across public and medical assistance programs, and to maximize the use of federal funding, the health care authority, the department of social and health services, and the health benefit exchange will coordinate efforts to expand HealthPlanfinder access to public assistance and medical eligibility staff. The health care authority shall complete medicaid applications in the HealthPlanfinder for households receiving or applying for medical assistance benefits.

(22) \$90,000 of the general fund-state appropriation for fiscal year 2020, \$90,000 of the general fund-state appropriation for fiscal year 2021, and \$180,000 of the general fund-federal appropriation are provided solely to continue operation by a nonprofit organization of a toll-free hotline that assists families to learn about and enroll in the apple health for kids program.

(23) Within the amounts appropriated in this section, the authority shall reimburse for primary care services provided by naturopathic physicians.

(24) Within the amounts appropriated in this section, the authority shall continue to provide coverage for pregnant teens that qualify under existing pregnancy medical programs, but whose eligibility for pregnancy related services would otherwise end due to the

application of the new modified adjusted gross income eligibility standard.

(25) Sufficient amounts are appropriated in this section to remove the mental health visit limit and to provide the shingles vaccine and screening, brief intervention, and referral to treatment benefits that are available in the medicaid alternative benefit plan in the classic medicaid benefit plan.

(26) The authority shall use revenue appropriated from the dedicated marijuana fund for contracts with community health centers under RCW 69.50.540 in lieu of general fund-state payments to community health centers for services provided to medical assistance clients, and it is the intent of the legislature that this policy will be continued in subsequent fiscal biennia.

(27) Beginning no later than January 1, 2018, for any service eligible under the medicaid state plan for encounter payments, managed care organizations at the request of a rural health clinic shall pay the full published encounter rate directly to the clinic. At no time will a managed care organization be at risk for or have any right to the supplemental portion of the claim. Payments will be reconciled on at least an annual basis between the managed care organization and the authority, with final review and approval by the authority.

~~(28) ((Sufficient funds are provided for the authority to remove payment and billing limitations identified during the review process required for implementation of chapter 226, Laws of 2017 (behavioral health care primary care integration) for health and behavior codes, psychotherapy codes, and to continue to offer face to face tobacco cessation counseling only for pregnant individuals. Additional funding is provided to increase the rates for the health and behavior codes and psychotherapy codes identified through the stakeholder work group process required under chapter 226, Laws of 2017 (SSB 5779) by ten percent.~~

~~(29))~~ (a) \$34,145,000 of the general fund-state appropriation for fiscal year 2021 and \$5,898,000 of the general fund-federal appropriation are provided solely for the compromise of claims in the reconciliation process for rural health clinics for the calendar years

2014-2017. The authority may not recover the state portion of rural health clinic reconciliations for calendar years 2014-2017 for which no state accrual was made. If the authority determines there are unliquidated prior period accrual balances available to refund the federal government for these years, these amounts must be used prior to the amounts provided under this subsection.

(b) By October 15, 2019, the authority shall report to the governor and relevant committees of the legislature the status of rural health clinic reconciliations for calendar years 2011-2013, including any use of available unliquidated prior period accrual balances to refund the federal government for those calendar years. Additionally, the report shall include the status of rural health clinic reconciliations for calendar years 2014-2017, including anticipated amounts owed to or from rural health clinics from the reconciliation process for those fiscal years. The authority shall not recover the state portion of rural health reconciliations for calendar years 2011-2013 for which no general fund state accrual was made. The authority shall not pursue recoveries for calendar years 2014-2017 until after the legislature has an opportunity to take action during the 2020 legislative session. If the legislature does not take any action on rural health clinic reconciliations for calendar years 2014-2017, recoveries shall commence per administrative rule.

(c) Beginning with fiscal year 2020, and for each subsequent year thereafter, the authority shall reconcile on an annual basis with rural health centers.

(d) Beginning with fiscal year 2020, and for each subsequent year thereafter, the authority shall properly accrue for any anticipated reconciliations with rural health centers during the fiscal year close process following generally accepted accounting practices.

~~((30))~~ (29) Sufficient amounts are appropriated in this section for the authority to provide a medicaid equivalent adult dental benefit to clients enrolled in the medical care service program.

~~((31))~~ (30) \$300,000 of the general fund-state appropriation for fiscal year 2020 and \$600,000 of the general fund-state appropriation for fiscal year 2021 are provided solely for the Bree collaborative to support collaborative

learning and targeted technical assistance for quality improvement initiatives. The collaborative must use these amounts to hire one full-time staff person to promote the adoption of Bree collaborative recommendations and to hold two conferences focused on the sharing of best implementation practices.

~~((32))~~ (31) Within the amounts appropriated in this section, the authority shall reimburse for maternity services provided by doulas. The authority and the department of health must consult with stakeholders and develop methods to secure approval from the centers for medicare and medicaid services for reimbursement for doulas. The authority will report the group's recommendations to the appropriate committees of the legislature by December 1, 2020.

\$3,542,472,000

The appropriations in this section are subject to the following conditions and limitations:

(1) For the purposes of this section, "behavioral health entities" means managed care organizations and administrative services organizations in regions where the authority is purchasing medical and behavioral health services

through fully integrated contracts pursuant to RCW 71.24.380, and behavioral health organizations in regions that have not yet transitioned to fully integrated managed care.

(2) Within the amounts appropriated in this section, funding is provided for implementation of the settlement agreement under *Trueblood, et al. v. Department of Social and Health Services, et al.*, United States District Court for the Western District of Washington, Cause No. 14-cv-01178-MJP. In addition to amounts provided solely for implementation of the settlement agreement, class members must have access to supports and services funded throughout this section for which they meet eligibility and medical necessity requirements. The authority must include language in contracts that requires regional behavioral health entities to develop and implement plans for improving access to timely and appropriate treatment for individuals with behavioral health needs and current or prior criminal justice involvement who are eligible for services under these contracts.

(3) \$15,605,000 of the general fund-state appropriation for fiscal year 2020, (~~(\$15,754,000)~~) \$15,861,000 of the general fund-state appropriation for fiscal year 2021, and \$4,789,000 of the general fund-federal appropriation are provided solely for the phase-in of the settlement agreement under *Trueblood, et al. v. Department of Social and Health Services, et al.*, United States District Court for the Western District of Washington, Cause No. 14-cv-01178-MJP. The department, in collaboration with the health care authority and the criminal justice training commission, must implement the provisions of the settlement agreement pursuant to the timeline and implementation plan provided for under the settlement agreement. This includes implementing provisions related to competency evaluations, competency restoration, crisis diversion and supports, education and training, and workforce development.

(4) \$7,657,000 of the general fund-state appropriation for fiscal year 2020, \$11,544,000 of the general fund-state appropriation for fiscal year 2021, and \$20,197,000 of the general fund-federal appropriation are provided solely for the authority and behavioral health entities to continue to contract for

implementation of high-intensity programs for assertive community treatment (PACT) teams. In determining the proportion of medicaid and nonmedicaid funding provided to behavioral health entities with PACT teams, the authority shall consider the differences between behavioral health entities in the percentages of services and other costs associated with the teams that are not reimbursable under medicaid. The authority may allow behavioral health entities which have nonmedicaid reimbursable costs that are higher than the nonmedicaid allocation they receive under this section to supplement these funds with local dollars or funds received under subsection (7) of this section. The authority and behavioral health entities shall maintain consistency with all essential elements of the PACT evidence-based practice model in programs funded under this section.

(5) \$7,071,000 of the general fund-state appropriation for fiscal year 2021 is provided solely for increased state costs for exceptional behavioral health personal care services. From ~~((the))~~ these amounts and the other general fund-state appropriations in this section, the authority shall assure that behavioral health entities reimburse the department of social and health services aging and long term support administration for the general fund-state cost of exceptional medicaid personal care services that enrolled behavioral health entity consumers use because of their psychiatric disability.

(6) \$3,520,000 of the general fund-federal appropriation is provided solely for the authority to maintain a pilot project to incorporate peer bridging staff into behavioral health regional teams that provide transitional services to individuals returning to their communities.

(7) \$81,930,000 of the general fund-state appropriation for fiscal year 2020 and \$85,122,000 of the general fund-state appropriation for fiscal year 2021 are provided solely for persons and services not covered by the medicaid program. To the extent possible, levels of behavioral health entity spending must be maintained in the following priority order: Crisis and commitment services; community inpatient services; and residential care services, including personal care and emergency housing assistance. These

amounts must be distributed to behavioral health entities as follows:

(a) Of the amount provided for fiscal year 2020, seventy percent must be distributed to behavioral health administrative service organizations and thirty percent to managed care organizations. The percentage of funding provided to each behavioral health administrative services organization must be proportionate to the fiscal year 2019 regional allocation of flexible nonmedicaid funds.

(b) \$3,939,000 of the fiscal year 2021 amounts must be distributed to behavioral health administrative service organizations. Of the remaining amount for fiscal year 2021, eighty percent must be distributed to behavioral health administrative service organizations and twenty percent to managed care organizations. The percentage of funding provided to each behavioral health administrative services organization must be proportionate to the fiscal year 2020 regional allocation of flexible nonmedicaid funds.

(c) The authority must include the following language in medicaid contracts with behavioral health entities unless they are provided formal notification from the center for medicaid and medicare services that the language will result in the loss of federal medicaid participation: "The contractor may voluntarily provide services that are in addition to those covered under the state plan, although the cost of these services cannot be included when determining payment rates unless including these costs are specifically allowed under federal law or an approved waiver."

(8) The authority is authorized to continue to contract directly, rather than through contracts with behavioral health entities for children's long-term inpatient facility services.

(9) \$1,204,000 of the general fund-state appropriation for fiscal year 2020 and \$1,204,000 of the general fund-state appropriation for fiscal year 2021 are provided solely to reimburse Pierce and Spokane counties for the cost of conducting one hundred eighty-day commitment hearings at the state psychiatric hospitals.

(10) Behavioral health entities may use local funds to earn additional federal medicaid match, provided the locally matched rate does not exceed the

upper-bound of their federally allowable rate range, and provided that the enhanced funding is used only to provide medicaid state plan or waiver services to medicaid clients. Additionally, behavioral health entities may use a portion of the state funds allocated in accordance with subsection (7) of this section to earn additional medicaid match, but only to the extent that the application of such funds to medicaid services does not diminish the level of crisis and commitment, community inpatient, residential care, and outpatient services presently available to persons not eligible for medicaid.

(11) \$2,291,000 of the general fund-state appropriation for fiscal year 2020 and \$2,291,000 of the general fund-state appropriation for fiscal year 2021 are provided solely for mental health services for mentally ill offenders while confined in a county or city jail and for facilitating access to programs that offer mental health services upon release from confinement. The authority must collect information from the behavioral health entities on their plan for using these funds, the numbers of individuals served, and the types of services provided and submit a report to the office of financial management and the appropriate fiscal committees of the legislature by December 1st of each year of the biennium.

(12) Within the amounts appropriated in this section, funding is provided for the authority to develop and phase in intensive mental health services for high needs youth consistent with the settlement agreement in *T.R. v. Dreyfus and Porter*.

(13) The authority must establish minimum and maximum funding levels for all reserves allowed under behavioral health organization and administrative services organization contracts and include contract language that clearly states the requirements and limitations. The authority must monitor and ensure that behavioral health organization and administrative services organization reserves do not exceed maximum levels. The authority must monitor revenue and expenditure reports and must require a behavioral health organization or administrative services organization to submit a corrective action plan on how it will spend its excess reserves within a reasonable period of time, when its reported reserves exceed maximum levels

established under the contract. The authority must review and approve such plans and monitor to ensure compliance. If the authority determines that a behavioral health organization or administrative services organization has failed to provide an adequate excess reserve corrective action plan or is not complying with an approved plan, the authority must reduce payments to the entity in accordance with remedial actions provisions included in the contract. These reductions in payments must continue until the authority determines that the entity has come into substantial compliance with an approved excess reserve corrective action plan.

(14) During the 2019-2021 fiscal biennium, any amounts provided in this section that are used for case management services for pregnant and parenting women must be contracted directly between the authority and providers rather than through contracts with behavioral health organizations.

(15) Within the amounts appropriated in this section, the authority may contract with the University of Washington and community-based providers for the provision of the parent-child assistance program or other specialized chemical dependency case management providers for pregnant, post-partum, and parenting women. For all contractors: (a) Service and other outcome data must be provided to the authority by request; and (b) indirect charges for administering the program must not exceed ten percent of the total contract amount.

(16) \$3,500,000 of the general fund-federal appropriation (from the substance abuse prevention and treatment federal block grant) is provided solely for the continued funding of existing county drug and alcohol use prevention programs.

(17) Within the amounts provided in this section, behavioral health entities must provide outpatient chemical dependency treatment for offenders enrolled in the medicaid program who are supervised by the department of corrections pursuant to a term of community supervision. Contracts with behavioral health entities must require that behavioral health entities include in their provider network specialized expertise in the provision of manualized, evidence-based chemical dependency treatment services for offenders. The department of corrections and the

authority must develop a memorandum of understanding for department of corrections offenders on active supervision who are medicaid eligible and meet medical necessity for outpatient substance use disorder treatment. The agreement will ensure that treatment services provided are coordinated, do not result in duplication of services, and maintain access and quality of care for the individuals being served. The authority must provide all necessary data, access, and reports to the department of corrections for all department of corrections offenders that receive medicaid paid services.

(18) The criminal justice treatment account-state appropriation is provided solely for treatment and treatment support services for offenders with a substance use disorder pursuant to RCW 71.24.580. The authority must offer counties the option to administer their share of the distributions provided for under RCW 71.24.580(5)(a). If a county is not interested in administering the funds, the authority shall contract with behavioral health entities to administer these funds consistent with the plans approved by local panels pursuant to RCW 71.24.580(5)(b). The authority must provide a report to the office of financial management and the appropriate committees of the legislature which identifies the distribution of criminal justice treatment account funds by September 30, 2019.

(19) No more than (~~(\$27,844,000)~~) \$15,358,000 of the general fund-federal appropriation may be expended for supported housing and employment services described in initiative 3a and 3b of the medicaid transformation demonstration waiver under healthier Washington. Under this initiative, the authority and the department of social and health services shall ensure that allowable and necessary services are provided to eligible clients as identified by the authority or its providers or third party administrator. The department and the authority in consultation with the medicaid forecast work group, shall ensure that reasonable reimbursements are established for services deemed necessary within an identified limit per individual. The authority shall not increase general fund-state expenditures under this initiative. The secretary in collaboration with the director of the authority shall report to the joint

select committee on health care oversight no less than quarterly on financial and health outcomes. The secretary in cooperation with the director shall also report to the fiscal committees of the legislature all of the expenditures of this subsection and shall provide such fiscal data in the time, manner, and form requested by the legislative fiscal committees.

(20) \$6,858,000 of the general fund–state appropriation for fiscal year 2020, \$6,858,000 of the general fund–state appropriation for fiscal year 2021, and \$8,046,000 of the general fund–federal appropriation are provided solely to maintain new crisis triage or stabilization centers. Services in these facilities may include crisis stabilization and intervention, individual counseling, peer support, medication management, education, and referral assistance. The authority shall monitor each center's effectiveness at lowering the rate of state psychiatric hospital admissions.

(21) \$1,125,000 of the general fund–federal appropriation is provided solely for the authority to develop a memorandum of understanding with the department of health for implementation of chapter 297, Laws of 2017 (opioid treatment programs). The authority must use these amounts to reimburse the department of health for costs incurred through the implementation of the bill.

(22) \$6,655,000 of the general fund–state appropriation for fiscal year 2020, (~~(\$10,015,000)~~) \$9,074,000 of the general fund–state appropriation for fiscal year 2021, and (~~(\$12,965,000)~~) \$12,024,000 of the general fund–federal appropriation are provided solely for the operation of secure withdrawal management and stabilization facilities. The authority may not use any of these amounts for services in facilities that are subject to federal funding restrictions that apply to institutions for mental diseases, unless they have received a waiver that allows for full federal participation in these facilities. Within these amounts, funding is provided to increase the fee for service rate for these facilities up to \$650 per day. The authority must require in contracts with behavioral health entities that, beginning in calendar year 2020, they pay no lower than the fee for service rate. The authority must coordinate with regional

behavioral health entities to identify and implement purchasing strategies or regulatory changes that increase access to services for individuals with complex behavioral health needs at secure withdrawal management and stabilization facilities.

(23) \$23,090,000 of the general fund–state appropriation for fiscal year 2020, \$23,090,000 of the general fund–state appropriation for fiscal year 2021, and \$92,444,000 of the general fund–federal appropriation are provided solely to maintain the enhancement of community-based behavioral health services that was funded in fiscal year 2019. Twenty percent of the general fund–state appropriation amounts for each regional service area must be contracted to the behavioral health administrative services organizations and used to increase their nonmedicaid funding and the remainder must be used to increase medicaid rates above FY 2018 levels. Effective January 2020, the medicaid funding is intended to increase rates for behavioral health services provided by licensed and certified community behavioral health agencies as defined by the department of health. This funding must be allocated to the managed care organizations proportionate to their medicaid enrollees. The authority must require the managed care organizations to provide a report on their implementation of this funding. The authority must submit a report to the legislature by December 1, 2020, summarizing how this funding was used and provide information for future options of increasing behavioral health provider rates through directed payments. The report must identify different mechanisms for implementing directed payment for behavioral health providers including but not limited to minimum fee schedules, across the board percentage increases, and value-based payments. The report must provide a description of each of the mechanisms considered, the timeline that would be required for implementing the mechanism, and whether and how the mechanism is expected to have a differential impact on different providers. The report must also summarize the information provided by managed care organizations in implementing the funding provided under this section.

(24) \$27,917,000 of the general fund–state appropriation for fiscal year 2020, (~~(\$36,095,000)~~) \$21,366,000 of the general fund–state appropriation for

Within these amounts, the authority must meet the requirements for reimbursing counties for the judicial services for patients being served in these settings in accordance with RCW 71.05.730. The authority must coordinate with the department of social and health services in developing the contract requirements, selecting contractors, and establishing processes for identifying patients that will be admitted to these facilities.

(a) Sufficient amounts are provided in fiscal year 2020 for the authority to reimburse community hospitals serving medicaid clients in long-term inpatient care beds as defined in RCW 71.24.025 at a rate of \$1,171 per day, or the hospital's current psychiatric inpatient per diem rate, whichever is higher. In fiscal year 2020, the rate paid to hospitals in this subsection cannot exceed one-hundred percent of the hospitals eligible costs based on their most recently completed medicare cost report.

(b) Sufficient amounts are provided in fiscal year 2021 for the authority to reimburse providers serving medicaid clients in long-term inpatient care beds as defined in RCW 71.24.025 as follows:

(i) Community hospitals whose costs exceed their current rates based on their most recently filed medicare cost report at one hundred percent of the hospital's eligible costs documented in the most recently filed medicare cost report; (ii) community hospitals that do not have a filed medicare cost report on file with the authority at the statewide average rate based on the average of provider specific long-term inpatient care rates or the provider's current per diem rate, whichever is higher; (iii) community hospitals whose costs do not exceed their current rates based on their most recently filed medicare cost report at a rate of \$940 per day; and (iv) nonhospital residential treatment centers certified to provide long-term inpatient care beds as defined in RCW 71.24.025 at a rate that reflects a five percent increase from their fiscal year 2020 rate for serving medicaid clients in

long-term inpatient care beds as defined in RCW 71.24.025.

~~((e))~~ (c) The authority in collaboration with the Washington state hospital association must convene a work group to further refine the methodology for reimbursing community hospitals serving these clients. The authority must provide a report to the appropriate committees of the legislature by December 1, 2020. The report must include options for incorporating additional factors into future rate adjustments and identify where there may be overlap within the different options. The report must include the following areas and provide a description of the option and the methodology and implementation costs associated with each option:

The appropriations in this section are subject to the following conditions and limitations:

(1)(a) Funding for special education programs is provided on an excess cost basis, pursuant to RCW 28A.150.390. School districts shall ensure that special education students as a class receive their full share of the general apportionment allocation accruing through sections 503 and 505 of this act. These amounts must be used to increase the number of licensed primary care health professionals to serve in licensed primary care health professional critical shortage areas. Contracts between the office and program recipients must guarantee at least three years of conditional loan repayments. The office of student financial assistance and the department of health shall prioritize a portion of any nonfederal balances in the health professional loan repayment and scholarship fund for conditional loan repayment contracts with psychiatrists and with advanced registered nurse practitioners for work at one of the state-operated psychiatric hospitals. The office and department shall designate the state hospitals as health professional shortage areas if necessary for this purpose. The office shall coordinate with the department of social and health services to effectively incorporate three conditional loan repayments into the department's advanced psychiatric professional recruitment and retention strategies. The office may use these targeted amounts for other program participants should there be any remaining amounts after eligible psychiatrists and advanced registered nurse practitioners have been served. The office shall also work to prioritize loan repayments to professionals working at health care delivery sites that demonstrate a commitment to serving uninsured clients. It is the intent of the legislature to provide funding to maintain the current

number and amount of awards for the program in the 2021-2023 fiscal biennium on the basis of these contractual obligations.

(12) \$850,000 of the general fund-state appropriation for fiscal year 2020 and \$750,000 of the general fund-state appropriation for fiscal year 2021 are provided solely for implementation of Second Substitute House Bill No. 1973 (dual enrollment scholarship).

Other Appropriated Funds \$65,139,000

TOTAL APPROPRIATION \$94,195,000

The appropriations in this section are subject to the following conditions and limitations:

(1) The appropriations in this section are provided solely for expenditure into the information technology investment revolving account created in RCW 43.41.433. Funds in the account are provided solely for the information technology projects shown in LEAP omnibus documents IT-2019, dated April 25, 2019, and IT-2020, dated March 9, 2020, which is hereby incorporated by reference. To facilitate the transfer of moneys from other funds and accounts that are associated with projects contained in LEAP omnibus documents IT-2019, dated April 25, 2019, and IT-2020, dated March 9, 2020, the state treasurer is directed to transfer moneys from other funds and accounts to the information technology investment revolving account in accordance with schedules provided by the office of financial management. To facilitate transfer of unused moneys originally from other funds and accounts that were deposited into the information technology revolving account as associated with these same projects, and that are not expended by June 30, 2021, the state treasurer is directed to transfer money from other funds and accounts out of the information technology investment revolving account and deposit into the fund or account of origin in accordance with schedules provided by the office of financial management. However, restricted federal funds and qualified employee benefit and pension funds may be transferred only to the extent permitted by law, and will otherwise remain outside the information technology investment account. The

projects affected remain subject to the other provisions of this section.

(2) Agencies must apply to the office of financial management and the office of the chief information officer to receive funding from the information technology investment revolving account. The office of financial management must notify the fiscal committees of the legislature of the receipt of each application and may not approve a funding request for ten business days from the date of notification.

(3) Allocations and allotments of information technology investment revolving account must be made for discrete stages of projects as determined by the technology budget approved by the office of the state chief information officer and office of financial management. Fifteen percent of total funding allocated by the office of financial management, or another amount as defined jointly by the office of financial management and the office of the state chief information officer, will be retained in the account, but remain allocated to that project. The retained funding will be released to the agency only after successful completion of that stage of the project. For the military department enhanced 911 next generation project and the one Washington project, the amount retained is increased to at least twenty percent of total funding allocated for any stage of that project.

(4)(a) Each project must have a technology budget. The technology budget must use a method similar to the state capital budget, identifying project costs, each fund source, and anticipated deliverables through each stage of the entire project investment and across fiscal periods and biennia from project onset through implementation and close out.

(b) As part of the development of a technology budget and at each request for funding, the agency shall submit detailed financial information to the office of financial management and the office of the state chief information officer. The technology budget must describe the total cost of the project by fiscal month to include and identify:

(i) Fund sources;

(ii) Full time equivalent staffing level to include job classification assumptions;

(iii) A discreet appropriation index and program index;

(iv) Object and subobject codes of expenditures; and

(v) Anticipated deliverables.

(c) If a project technology budget changes and a revised technology budget is completed, a comparison of the revised technology budget to the last approved technology budget must be posted to the dashboard, to include a narrative rationale on what changed, why, and how that impacts the project in scope, budget, and schedule.

(5)(a) Each project must have an investment plan that includes:

(i) An organizational chart of the project management team that identifies team members and their roles and responsibilities;

(ii) The office of the state chief information officer staff assigned to the project;

(iii) An implementation schedule covering activities, critical milestones, and deliverables at each stage of the project for the life of the project at each agency affected by the project;

(iv) Performance measures used to determine that the project is on time, within budget, and meeting expectations for quality of work product;

(v) Ongoing maintenance and operations cost of the project post implementation and close out delineated by agency staffing, contracted staffing, and service level agreements; and

(vi) Financial budget coding to include at least discreet program index and subobject codes.

(6) Projects with estimated costs greater than one hundred million dollars from initiation to completion and implementation may be divided into discrete subprojects as determined by the office of the state chief information officer, except for the one Washington project which must be divided into the following discrete subprojects: Core financials, expanding financials and procurement, budget, and human resources. Each subproject must have a technology budget and investment plan as provided in this section.

(7) (a) The office of the state chief information officer shall maintain an information technology project dashboard that provides updated information each fiscal month on projects subject to this section. This includes, at least:

- (i) Project changes each fiscal month;
- (ii) Noting if the project has a completed market requirements document;
- (iii) Financial status of information technology projects under oversight;
- (iv) Coordination with agencies;
- (v) Monthly quality assurance reports, if applicable;
- (vi) Monthly office of the state chief information officer status reports;
- (vii) Historical project budget and expenditures through fiscal year 2019;

(b) The dashboard must retain a roll up of the entire project cost, including all subprojects, that can be displayed the subproject detail.

(8) If the project affects more than one agency:

(a) A separate technology budget and investment plan must be prepared for each agency; and

(b) The dashboard must contain a statewide project technology budget roll up that includes each affected agency at the subproject level.

(9) For any project that exceeds two million dollars in total funds to complete, requires more than one biennium to complete, or is financed through financial contracts, bonds, or other indebtedness:

(a) Quality assurance for the project must report independently to the office of the chief information officer;

(b) The office of the chief information officer must review, and, if necessary, revise the proposed project to ensure it is flexible and adaptable to advances in technology;

(c) The technology budget must specifically identify the uses of any financing proceeds. No more than thirty percent of the financing proceeds may be

used for payroll-related costs for state employees assigned to project management, installation, testing, or training;

(d) The agency must consult with the office of the state treasurer during the competitive procurement process to evaluate early in the process whether products and services to be solicited and the responsive bids from a solicitation may be financed; and

(e) The agency must consult with the contracting division of the department of enterprise services for a review of all contracts and agreements related to the project's information technology procurements.

(10) The office of the state chief information officer must evaluate the project at each stage and certify whether the project is planned, managed, and meeting deliverable targets as defined in the project's approved technology budget and investment plan.

(11) The office of the state chief information officer may suspend or terminate a project at any time if it determines that the project is not meeting or not expected to meet anticipated performance and technology outcomes. Once suspension or termination occurs, the agency shall unallot any unused funding and shall not make any expenditure for the project without the approval of the office of financial management. The office of the state chief information officer must report on July 1 and December 1 each calendar year, beginning July 1, 2020, any suspension or termination of a project in the previous six month period to the legislative fiscal committees.

(12) The office of the state chief information officer, in consultation with the office of financial management, may identify additional projects to be subject to this section, including projects that are not separately identified within an agency budget. The office of the state chief information officer must report on July 1 and December 1 each calendar year, beginning July 1, 2020, any additional projects to be subjected to this section that were identified in the previous six month period to the legislative fiscal committees.

(13) Any cost to administer or implement this section for projects listed in subsection (1) of this section,

must be paid from the information technology investment revolving account. For any other information technology project made subject to the conditions, limitations, and review of this section, the cost to implement this section must be paid from the funds for that project.

The department shall distribute funding in the form of grants to local housing providers. In making distributions, the department must consider the number of unemployed persons and renters in each jurisdiction served by the provider as well as account for any funding that jurisdiction, including cities within each county, received directly from the federal government. A provider may use up to 9.5 percent of their grant award for administrative costs and the remainder must be used for financial assistance as defined in P.L. 116-260. The department may retain up to 0.5 percent of the funding provided in this subsection to administer the program.

(2)(a) \$30,000,000 of the general fund—federal appropriation (CRF) is provided solely for the department to administer an eviction rental assistance program. (d) The department may inspect the property and the landlord's records related to an application under the program, including the use of a third-party inspector as needed to investigate fraud, to assist in making its application review, and to determine eligibility.

(e) A landlord who receives a grant under this section is prohibited from:

CONFERENCE COMMITTEE REPORT

April 24, 2021

Engrossed Third Substitute House Bill No. 1091

Includes "New Item": YES

Madame Speaker:

We of your Conference Committee, to whom was referred ENGROSSED THIRD SUBSTITUTE HOUSE BILL NO. 1091, reducing greenhouse gas emissions by reducing the carbon intensity of transportation fuel, have had the same under consideration and we recommend that:

All previous amendments not be adopted and that the attached striking amendment S3083.4 be adopted.

Strike everything after the enacting clause and insert the following:

"NEW SECTION. **Sec. 1.** (1) The legislature finds that rapid innovations in low carbon transportation technologies, including electric vehicles and clean transportation fuels, are at the threshold of widespread commercial deployment. In order to help prompt the use of clean fuels, other states have successfully implemented programs that reduce the carbon intensity of their transportation fuels. California and Oregon have both implemented low carbon fuel standards that are similar to the program created in this act, and both states have experienced biofuel sector growth and have successfully sited large biofuel projects that had originally been planned for Washington. Washington state has extensively studied the potential impact of a clean fuels program, and most projections show that a low carbon fuel standard would decrease greenhouse gas and conventional air pollutant emissions, while positively impacting the state's economy.

(2) The legislature further finds that the health and welfare of the people of the state of Washington is threatened by the prospect of crumbling or swamped coastlines, rising water, and more intense forest fires caused by higher temperatures and related droughts, all of which are intensified and made more frequent by the volume of greenhouse gas emissions. As of 2017, the transportation sector contributes 45 percent of Washington's greenhouse gas emissions, and the legislature's interest in the life cycle of the fuels used in the state arises from a concern for the effects of the production and use of these fuels on Washington's environment and public health, including its air quality, snowpack, and coastline.

(3) Therefore, it is the intent of the legislature to support the deployment of clean transportation fuel technologies through a carefully designed program that reduces the carbon intensity of fuel used in Washington, in order to:

(a) Reduce levels of conventional air pollutants from diesel and gasoline that are harmful to public health;

(b) Reduce greenhouse gas emissions associated with transportation fuels, which are the state's largest source of greenhouse gas emissions; and

(c) Create jobs and spur economic development based on innovative clean fuel technologies.

NEW SECTION. **Sec. 2.** The definitions in this section apply throughout this chapter unless the context clearly indicates otherwise.

(1) "Carbon dioxide equivalents" has the same meaning as defined in RCW 70A.45.010.

(2) "Carbon intensity" means the quantity of life-cycle greenhouse gas emissions, per unit of fuel energy, expressed in grams of carbon dioxide equivalent per megajoule (gCO₂e/MJ).

(3) "Clean fuels program" means the requirements established under this chapter.

(4) "Cost" means an expense connected to the manufacture, distribution, or other aspects of the provision of a transportation fuel product.

(5) "Credit" means a unit of measure generated when a transportation fuel with a carbon intensity that is less than the applicable standard adopted by the department under section 3 of this act is produced, imported, or dispensed for use in Washington, such that one credit is equal to one metric ton of carbon dioxide equivalents. A credit may also be generated through other activities consistent with this chapter.

(6) "Deficit" means a unit of measure generated when a transportation fuel with a carbon intensity that is greater than the applicable standard adopted by the department under section 3 of this act is produced, imported, or dispensed for use in Washington, such that one deficit is equal to one metric ton of carbon dioxide equivalents.

(7) "Department" means the department of ecology.

(8) "Electric utility" means a consumer-owned utility or investor-owned utility, as those terms are defined in RCW 19.29A.010.

(9) "Greenhouse gas" has the same meaning as defined in RCW 70A.45.010.

(10) "Military tactical vehicle" means a motor vehicle owned by the United States department of defense or the United States military services and that is used in combat, combat support, combat service support, tactical or relief

operations, or training for such operations.

(11) "Motor vehicle" has the same meaning as defined in RCW 46.04.320.

(12) "Price" means the amount of payment or compensation provided as consideration for a specified quantity of transportation fuel by a consumer or end user of the transportation fuel.

(13) "Regulated party" means a producer or importer of any amount of a transportation fuel that is ineligible to generate credits under this chapter.

(14)(a) "Tactical support equipment" means equipment using a portable engine, including turbines, that meets military specifications, owned by the United States military services or its allies, and that is used in combat, combat support, combat service support, tactical or relief operations, or training for such operations.

(b) "Tactical support equipment" includes, but is not limited to, engines associated with portable generators, aircraft start carts, heaters, and lighting carts.

(15) "Transportation fuel" means electricity and any liquid or gaseous fuel sold, supplied, offered for sale, or used for the propulsion of a motor vehicle or that is intended for use for transportation purposes.

NEW SECTION. Sec. 3. (1) The department shall adopt rules that establish standards that reduce carbon intensity in transportation fuels used in Washington. The standards established by the rules must be based on the carbon intensity of gasoline and gasoline substitutes and the carbon intensity of diesel and diesel substitutes. The standards:

(a) Must reduce the overall, aggregate carbon intensity of transportation fuels used in Washington;

(b) May only require carbon intensity reductions at the aggregate level of all transportation fuels and may not require a reduction in carbon intensity to be achieved by any individual type of transportation fuel;

(c) Must assign a compliance obligation to fuels whose carbon intensity exceeds the standards adopted by the department, consistent with the

requirements of section 4 of this act; and

(d) Must assign credits that can be used to satisfy or offset compliance obligations to fuels whose carbon intensity is below the standards adopted by the department and that elect to participate in the program, consistent with the requirements of section 4 of this act.

(2) The clean fuels program adopted by the department must be designed such that:

(a) Regulated parties generate deficits and may reconcile the deficits, and thus comply with the clean fuels program standards for a compliance period, by obtaining and retiring credits;

(b) Regulated parties and credit generators may generate credits for fuels used as substitutes or alternatives for gasoline or diesel;

(c) Regulated parties, credit generators, and credit aggregators shall have opportunities to trade credits; and

(d) Regulated parties shall be allowed to carry over to the next compliance period a small deficit without penalty.

(3) The department shall, throughout a compliance period, regularly monitor the availability of fuels needed for compliance with the clean fuels program.

(4)(a) Under the clean fuels program, the department shall monthly calculate the volume-weighted average price of credits and, no later than the last day of the month immediately following the month for which the calculation is completed, post the formula and the nonaggregated data the department used for the calculation and the results of the calculation on the department's website.

(b) In completing the calculation required by this subsection, the department may exclude from the data set credit transfers without a price or other credit transfers made for a price that falls two standard deviations outside of the mean credit price for the month. Data posted on the department's website under this section may not include any individually identifiable information or information that would constitute a trade secret.

(5)(a) Except as provided in this section, the rules adopted under this section must reduce the greenhouse gas emissions attributable to each unit of the fuels to 20 percent below 2017 levels by 2038 based on the following schedule:

(i) No more than 0.5 percent each year in 2023 and 2024;

(ii) No more than an additional one percent each year beginning in 2025 through 2027;

(iii) No more than an additional 1.5 percent each year beginning in 2028 through 2031; and

(iv) No change in 2032 and 2033.

(b) The rules must establish a start date for the clean fuels program of no later than January 1, 2023, except as provided in subsection (8) of this section.

(6) Beginning with the program year beginning in calendar year 2028, the department may not increase the carbon intensity reductions required by the applicable clean fuels program standard adopted by the department under subsection (5) of this section beyond a 10 percent reduction in carbon intensity until the department demonstrates that the following have occurred:

(a) At least a 15 percent net increase in the volume of in-state liquid biofuel production and the use of feedstocks grown or produced within the state relative to the start of the program; and

(b) At least one new or expanded biofuel production facility representing an increase in production capacity or producing, in total, in excess of 60,000,000 gallons of biofuels per year has or have received after July 1, 2021, all necessary siting, operating, and environmental permits post all timely and applicable appeals. As part of the threshold of 60,000,000 gallons of biofuel under this subsection, at least one new facility producing at least 10,000,000 gallons per year must have received all necessary siting, operating, and environmental permits. Timely and applicable appeals must be determined by the attorney general's office.

(7) Beginning with the program year beginning in calendar year 2031, the department may not increase the carbon intensity reductions required by the applicable clean fuels program standard

adopted by the department under subsection (5) of this section beyond a 10 percent reduction in carbon intensity until the:

(a) Joint legislative audit and review committee report required in section 15 of this act has been completed; and

(b) 2033 regular legislative session has adjourned, in order to allow an opportunity for the legislature to amend the requirements of this chapter in light of the report required in (a) of this subsection.

(8)(a) In order to coordinate and synchronize the clean fuels program with other transportation-related investments, the department may not assign compliance obligations or allow the generation of credits under this chapter until a separate additive transportation revenue act becomes law, at which time the department of licensing must provide written notice to the chief clerk of the house of representatives, the secretary of the senate, and the office of the code reviser.

(b) For the purposes of this subsection, "additive transportation revenue act" means an act enacted after April 1, 2021, in which the state fuel tax under RCW 82.38.030 is increased by an additional and cumulative tax rate of at least five cents per gallon of fuel.

(9) Transportation fuels exported from Washington are not subject to the greenhouse gas emissions reduction requirements in this section.

(10) To the extent the requirements of this chapter conflict with the requirements of chapter 19.112 RCW, the requirements of this chapter prevail.

NEW SECTION. Sec. 4. The rules adopted by the department to achieve the greenhouse gas emissions reductions per unit of fuel energy specified in section 3 of this act must include, but are not limited to, the following:

(1) Standards for greenhouse gas emissions attributable to the transportation fuels throughout their life cycles, including but not limited to emissions from the production, storage, transportation, and combustion of transportation fuels and from changes in land use associated with transportation fuels and any permanent greenhouse gas sequestration activities.

(a) The rules adopted by the department under this subsection (1) may:

(i) Include provisions to address the efficiency of a fuel as used in a powertrain as compared to a reference fuel;

(ii) Consider carbon intensity calculations for transportation fuels developed by national laboratories or used by similar programs in other states; and

(iii) Consider changes in land use and any permanent greenhouse gas sequestration activities associated with the production of any type of transportation fuel.

(b) The rules adopted by the department under this subsection (1) must:

(i) Neutrally consider the life-cycle emissions associated with transportation fuels with respect to the political jurisdiction in which the fuels originated and may not discriminate against fuels on the basis of having originated in another state or jurisdiction. Nothing in this subsection may be construed to prohibit inclusion or assessment of emissions related to fuel production, storage, transportation, or combustion or associated changes in land use in determining the carbon intensity of a fuel;

(ii) Measure greenhouse gas emissions associated with electricity and hydrogen based on a mix of generation resources specific to each electric utility participating in the clean fuels program. The department may apply an asset-controlling supplier emission factor certified or approved by a similar program to reduce the greenhouse gas emissions associated with transportation fuels in another state;

(iii) Include mechanisms for certifying electricity that has a carbon intensity of zero. This electricity must include, at minimum, electricity:

(A) For which a renewable energy credit or other environmental attribute has been retired or used; and

(B) Produced using a zero emission resource including, but not limited to, solar, wind, geothermal, or the industrial combustion of biomass consistent with RCW 70A.45.020(3), that is directly supplied as a transportation fuel by the generator of the electricity

to a metered customer for electric vehicle charging or refueling;

(iv) Allow the generation of credits associated with electricity with a carbon intensity lower than that of standard adopted by the department. The department may not require electricity to have a carbon intensity of zero in order to be eligible to generate credits from use as a transportation fuel; and

(v) Include procedures for setting and adjusting the amounts of greenhouse gas emissions per unit of fuel energy that is assigned to transportation fuels under this subsection.

(c) If the department determines that it is necessary for purposes of accurately measuring greenhouse gas emissions associated with transportation fuels, the department may require transportation fuel suppliers to submit data or information to be used for purposes of calculating greenhouse gas emissions that is different from or additional to the greenhouse gas emissions data reported under RCW 70A.15.2200(5)(a)(iii).

(d) If the department determines that it is necessary for purposes of accurately measuring greenhouse gas emissions associated with electricity supplied to retail customers or hydrogen production facilities by an electric utility, the department may require electric utilities participating in the clean fuels program to submit data or information to be used for purposes of calculating greenhouse gas emissions that is different from or additional to the fuel mix disclosure information submitted under chapter 19.29A RCW. To the extent practicable, rules adopted by the department may allow data requested of utilities to be submitted in a form and manner consistent with other required state or federal data submissions;

(2) Provisions allowing for the achievement of limits on the greenhouse gas emissions intensity of transportation fuels in section 3 of this act to be achieved by any combination of credit generating activities capable of meeting such standards. Where such provisions would not produce results counter to the emission reduction goals of the program or prove administratively burdensome for the department, the rules should provide each participant in the clean fuels program with the opportunity to demonstrate appropriate carbon

intensity values taking into account both emissions from production facilities and elsewhere in the production cycle, including changes in land use and permanent greenhouse gas sequestration activities;

(3) (a) Methods for assigning compliance obligations and methods for tracking tradable credits. The department may assign the generation of a credit when a fuel with associated life-cycle greenhouse gas emissions that are lower than the applicable per-unit standard adopted by the department under section 3 of this act is produced, imported, or dispensed for use in Washington, or when specified activities are undertaken that support the reduction of greenhouse gas emissions associated with transportation in Washington;

(b) Mechanisms that allow credits to be traded and to be banked for future compliance periods; and

(c) Procedures for verifying the validity of credits and deficits generated under the clean fuels program;

(4) Mechanisms to elect to participate in the clean fuels program for persons associated with the supply chains of transportation fuels that are eligible to generate credits consistent with subsection (3) of this section, including producers, importers, distributors, users, or retailers of such fuels, and electric vehicle manufacturers;

(5) Mechanisms for persons associated with the supply chains of transportation fuels that are used for purposes that are exempt from the clean fuels program compliance obligations including, but not limited to, fuels used by aircraft, vessels, railroad locomotives, and other exempt fuels specified in section 5 of this act, to elect to participate in the clean fuels program by earning credits for the production, import, distribution, use, or retail of exempt fuels with associated life-cycle greenhouse gas emissions lower than the per-unit standard established in section 3 of this act;

(6) Mechanisms that allow for the assignment of credits to an electric utility for electricity used within its utility service area, at minimum, for residential electric vehicle charging or fueling;

(7) Cost containment mechanisms.

(a) Cost containment mechanisms must include the credit clearance market specified in subsection (8) of this section and may also include, but are not limited to:

(i) Procedures similar to the credit clearance market required in subsection (8) of this section that provide a means of compliance with the clean fuels program requirements in the event that a regulated person has not been able to acquire sufficient volumes of credits at the end of a compliance period; or

(ii) Similar procedures that ensure that credit prices do not significantly exceed credit prices in other jurisdictions that have adopted similar programs to reduce the carbon intensity of transportation fuels.

(b) Any cost containment mechanisms must be designed to provide financial disincentive for regulated persons to rely on the cost containment mechanism for purposes of program compliance instead of seeking to generate or acquire sufficient credits under the program.

(c) The department shall harmonize the program's cost containment mechanisms with the cost containment rules in the states specified in section 7(1) of this act.

(d) The department shall consider mechanisms such as the establishment of a credit price cap or other alternative cost containment measures if deemed necessary to harmonize market credit costs with those in the states specified in section 7(1) of this act;

(8) (a) (i) A credit clearance market for any compliance period in which at least one regulated party reports that the regulated party has a net deficit balance at the end of the compliance period, after retirement of all credits held by the regulated party, that is greater than a small deficit. A regulated party described by this subsection is required to participate in the credit clearance market.

(ii) If a regulated party has a small deficit at the end of a compliance period, the regulated party shall notify the department that it will achieve compliance with the clean fuels program during the compliance period by either: (A) Participating in a credit clearance market; or (B) carrying forward the small deficit.

(b) For the purposes of administering a credit clearance market required by this section, the department shall:

(i) Allow any regulated party, credit generator, or credit aggregator that holds excess credits at the end of the compliance period to voluntarily participate in the credit clearance market as a seller by pledging a specified number of credits for sale in the market;

(ii) Require each regulated party participating in the credit clearance market as purchaser of credits to:

(A) Have retired all credits in the regulated party's possession prior to participating in the credit clearance market; and

(B) Purchase the specified number of the total pledged credits that the department has determined are that regulated party's pro rata share of the pledged credits;

(iii) Require all sellers to:

(A) Agree to sell pledged credits at a price no higher than a maximum price for credits;

(B) Accept all offers to purchase pledged credits at the maximum price for credits; and

(C) Agree to withhold any pledged credits from sale in any transaction outside of the credit clearance market until the end of the credit clearance market, or if no credit clearance market is held in a given year, then until the date on which the department announces it will not be held.

(c)(i) The department shall set a maximum price for credits in a credit clearance market, consistent with states that have adopted similar clean fuels programs, not to exceed \$200 in 2018 dollars for 2023.

(ii) For 2024 and subsequent years, the maximum price may exceed \$200 in 2018 dollars, but only to the extent that a greater maximum price for credits is necessary to annually adjust for inflation, beginning on January 1, 2024, pursuant to the increase, if any, from the preceding calendar year in the consumer price index for all urban consumers, west region (all items), as published by the bureau of labor statistics of the United States department of labor.

(d) A regulated party that has a net deficit balance after the close of a credit clearance market:

(i) Must carry over the remaining deficits into the next compliance period; and

(ii) May not be subject to interest greater than five percent, penalties, or assertions of noncompliance that accrue based on the carryover of deficits under this subsection.

(e) If a regulated party has been required under (a) of this subsection to participate as a purchaser in two consecutive credit clearance markets and continues to have a net deficit balance after the close of the second consecutive credit clearance market, the department shall complete, no later than two months after the close of the second credit clearance market, an analysis of the root cause of an inability of the regulated party to retire the remaining deficits. The department may recommend and implement any remedy that the department determines is necessary to address the root cause identified in the analysis including, but not limited to, issuing a deferral, provided that the remedy implemented does not:

(i) Require a regulated party to purchase credits for an amount that exceeds the maximum price for credits in the most recent credit clearance market; or

(ii) Compel a person to sell credits.

(f) If credits sold in a credit clearance market are subsequently invalidated as a result of fraud or any other form of noncompliance on the part of the generator of the credit, the department may not pursue civil penalties against, or require credit replacement by, the regulated party that purchased the credits unless the regulated party was a party to the fraud or other form of noncompliance.

(g) The department may not disclose the deficit balances or pro rata share purchase requirements of a regulated party that participates in the credit clearance market;

(9) Authority for the department to designate an entity to aggregate and use unclaimed credits associated with persons that elect not to participate in the clean fuels program under subsection (4) of this section.

NEW SECTION. Sec. 5. (1) The rules adopted under sections 3 and 4 of this act must include exemptions for, at minimum, the following transportation fuels:

(a) Fuels used in volumes below thresholds adopted by the department;

(b) Fuels used for the propulsion of all aircraft, vessels, and railroad locomotives; and

(c) Fuels used for the operation of military tactical vehicles and tactical support equipment.

(2)(a) The rules adopted under sections 3 and 4 of this act must exempt the following transportation fuels from greenhouse gas emission intensity reduction requirements until January 1, 2028:

(i) Special fuel used off-road in vehicles used primarily to transport logs;

(ii) Dyed special fuel used in vehicles that are not designed primarily to transport persons or property, that are not designed to be primarily operated on highways, and that are used primarily for construction work including, but not limited to, mining and timber harvest operations; and

(iii) Dyed special fuel used for agricultural purposes exempt from chapter 82.38 RCW.

(b) Prior to January 1, 2028, fuels identified in this subsection (2) are eligible to generate credits, consistent with subsection (5) of this section. Beginning January 1, 2028, the fuels identified in this subsection (2) are subject to the greenhouse gas emission intensity reduction requirements applicable to transportation fuels specified in section 3 of this act.

(3) The department may adopt rules to specify the standards for persons to qualify for the exemptions provided in this section. The department may implement the exemptions under subsection (2) of this section to align with the implementation of exemptions for similar fuels exempt from chapter 82.38 RCW.

(4) The rules adopted under sections 3 and 4 of this act may include exemptions in addition to those described in subsections (1) and (2) of this section, but only if such exemptions are

necessary, with respect to the relationship between the program and similar greenhouse gas emissions requirements or low carbon fuel standards, in order to avoid:

(a) Mismatched incentives across programs;

(b) Fuel shifting between markets; or

(c) Other results that are counter to the intent of this chapter.

(5) Nothing in this chapter precludes the department from adopting rules under sections 3 and 4 of this act that allow the generation of credits associated with electric or alternative transportation infrastructure that existed prior to the effective date of this section or to the start date of program requirements. The department must apply the same baseline years to credits associated with electric or alternative transportation infrastructure that apply to gasoline and diesel liquid fuels in any market-based program enacted by the legislature that establishes a cap on greenhouse gas emissions.

NEW SECTION. Sec. 6. (1) The rules adopted under sections 3 and 4 of this act may allow the generation of credits from activities that support the reduction of greenhouse gas emissions associated with transportation in Washington, including but not limited to:

(a) Carbon capture and sequestration projects, including but not limited to:

(i) Innovative crude oil production projects that include carbon capture and sequestration;

(ii) Project-based refinery greenhouse gas mitigation including, but not limited to, process improvements, renewable hydrogen use, and carbon capture and sequestration; or

(iii) Direct air capture projects;

(b) Investments and activities that support deployment of machinery and equipment used to produce gaseous and liquid fuels from nonfossil feedstocks, and derivatives thereof;

(c) The fueling of battery or fuel cell electric vehicles by a commercial, nonprofit, or public entity that is not an electric utility, which may include, but is not limited to, the fueling of vehicles using electricity certified by the department to have a carbon intensity of zero; and

(d) The use of smart vehicle charging technology that results in the fueling of an electric vehicle during times when the carbon intensity of grid electricity is comparatively low.

(2)(a) The rules adopted under sections 3 and 4 of this act must allow the generation of credits based on capacity for zero emission vehicle refueling infrastructure, including DC fast charging infrastructure and hydrogen refueling infrastructure.

(b) The rules adopted under sections 3 and 4 of this act may allow the generation of credits from the provision of low carbon fuel infrastructure not specified in (a) of this subsection.

(3) The rules adopted under sections 3 and 4 of this act must allow the generation of credits from state transportation investments funded in an omnibus transportation appropriations act for activities and projects that reduce greenhouse gas emissions and decarbonize the transportation sector. These include, but are not limited to: (a) Electrical grid and hydrogen fueling infrastructure investments; (b) ferry operating and capital investments; (c) electrification of the state ferry fleet; (d) alternative fuel vehicle rebate programs; (e) transit grants; (f) infrastructure and other costs associated with the adoption of alternative fuel use by transit agencies; (g) bike and pedestrian grant programs and other activities; (h) complete streets and safe walking grants and allocations; (i) rail funding; and (j) multimodal investments.

(4) The rules adopted by the department may establish limits for the number of credits that may be earned each year by persons participating in the program for some or all of the activities specified in subsections (1) and (2) of this section. The department must limit the number of credits that may be earned each year under subsection (3) of this section to 10 percent of the total program credits. Any limits established under this subsection must take into consideration the return on investment required in order for an activity specified in subsection (2) of this section to be financially viable.

NEW SECTION. Sec. 7. (1) Except where otherwise provided in this chapter, the department shall seek to adopt rules that are harmonized with the regulatory

standards, exemptions, reporting obligations, and other clean fuels program compliance requirements and methods for credit generation of other states that:

(a) Have adopted low carbon fuel standards or similar greenhouse gas emissions requirements applicable specifically to transportation fuels; and

(b)(i) Supply, or have the potential to supply, significant quantities of transportation fuel to Washington markets; or

(ii) To which Washington supplies, or has the potential to supply, significant quantities of transportation fuel.

(2) The department must establish and periodically consult a stakeholder advisory panel, including representatives of forestland and agricultural landowners, for purposes of soliciting input on how to best incentivize and allot credits for the sequestration of greenhouse gases through activities on agricultural and forestlands in a manner that is consistent with the goals and requirements of this chapter.

(3) The department must conduct a biennial review of innovative technologies and pathways that reduce carbon and increase credit generation opportunities and must modify rules or guidance as needed to maintain stable credit markets.

(4) In any reports to the legislature under section 10 of this act, on the department's website, or in other public documents or communications that refer to assumed public health benefits associated with the program created in this chapter, the department must distinguish between public health benefits from small particulate matter and other conventional pollutant reductions achieved primarily as a result of vehicle emission standards established under chapter 70A.30 RCW, and the incremental benefits to air pollution attributable to the program created under this chapter.

NEW SECTION. Sec. 8. (1)(a) Each producer or importer of any amount of a transportation fuel that is ineligible to generate credits consistent with the requirements of section 4(3) of this act must register with the department.

(b) Electric vehicle manufacturers and producers, importers, distributors, users, and retailers of transportation fuels that are eligible to generate credits consistent with section 4(3) of this act must register with the department if they elect to participate in the clean fuels program.

(c) Other persons must register with the department to generate credits from other activities that support the reduction of greenhouse gas emissions associated with transportation in Washington.

(2) Each transaction transferring ownership of transportation fuels for which clean fuels program participation is mandated must be accompanied by documentation, in a format approved by the department, that assigns the clean fuels program compliance responsibility associated with the fuels, including the assignment of associated credits. The department may also require documentation assigning clean fuels program compliance responsibility associated with fuels for which program participation has been elected.

(3) The department may adopt rules requiring the periodic reporting of information to the department by persons associated with the supply chains of transportation fuels participating in the clean fuels program. To the extent practicable, the rules must establish reporting procedures and timelines that are consistent with similar programs in other states that reduce the greenhouse gas emission intensity of transportation fuel and with procedures and timelines of state programs requiring similar information to be reported by regulated parties, including electric utilities.

(4) RCW 70A.15.2510 applies to records or information submitted to the department under this chapter.

NEW SECTION. Sec. 9. (1)(a) Fifty percent of the revenues generated by an electric utility from credits earned from the electricity supplied to retail customers by an electric utility under the clean fuels program must be expended by the electric utility on transportation electrification projects, which may include projects to support the production and provision of hydrogen and other gaseous fuels produced from nonfossil feedstocks, and derivatives thereof as a transportation fuel.

(b) Sixty percent of the revenues described in (a) of this subsection, or 30 percent of the revenues generated by an electric utility from credits earned from the electricity supplied to retail customers by an electric utility under the clean fuels program, must be expended by the electric utility on transportation electrification projects, which may include projects to support the production and provision of hydrogen and other gaseous fuels produced from nonfossil feedstocks, and derivatives thereof as a transportation fuel, located within or directly benefiting a federally designated nonattainment or maintenance area, a federally designated nonattainment or maintenance area that existed as of January 1, 2021, a disproportionately impacted community identified by the department of health, or an area designated by the department as being at risk of nonattainment, if such a nonattainment or maintenance area or disproportionately impacted community is within the service area of the utility.

(2)(a) Each electric utility must spend 50 percent of revenues not subject to the requirements of subsection (1) of this section on one or more transportation electrification programs or projects it selects from a list of types of programs and projects jointly developed by the department and the Washington state department of transportation. The department and the Washington state department of transportation must develop the list based on those with the highest impact on reducing greenhouse gas emissions and decarbonizing the transportation sector. The types of transportation electrification projects or programs placed on the list must include, but are not limited to:

(i) Provision of new or used zero emissions vehicles at no cost or at a discount to nonprofit service providers, transit agencies, or public fleets for the purpose of providing transportation services for low-income or vulnerable populations or to reduce transportation costs for the nonprofits, transit agencies, or public fleets serving low-income or vulnerable populations;

(ii) Construction, operation, or maintenance of, or funding for charging infrastructure, including smart charging infrastructure, or hydrogen fueling infrastructure;

(iii) Expanding grid capacity to enable transportation electrification investments directly associated with expenditures permitted by this chapter; and

(iv) Partnership programs with public and private vehicle fleet owners to enable increased electrification of transportation.

(b) Under (a) of this subsection, electric utilities should consider programs or projects that expand low and moderate-income customer access to zero emissions transportation, when prioritizing program expenditures.

(3) Electric utilities that participate in the clean fuels program must annually provide information to the department accounting for and briefly describing all expenditures of revenues generated from credits earned under the clean fuels program.

NEW SECTION. Sec. 10. (1) Beginning May 1, 2025, and each May 1st thereafter, the department must post a report on the department's website that includes the following information regarding the previous calendar year of clean fuels program activities:

(a) The program-wide number of credits and deficits generated by entities participating in the clean fuels program;

(b) The volumes of each transportation fuel and average price per credit used to comply with the requirements of the clean fuels program;

(c) The best estimate or range in probable costs or cost savings attributable to the clean fuels program per gallon of gasoline and per gallon of diesel, as determined by an independent consultant whose services the department has contracted. The estimate or range in probable costs or cost savings from the independent consultant must be announced in a press release to the news media at the time that the report under this subsection (1) is posted to the department's website, and must be simultaneously reported to the transportation committees of the house of representatives and the senate;

(d) The total greenhouse gas emissions reductions attributable to the clean fuels program isolated from the greenhouse gas emissions reductions attributable to other state and national programs on the same fuels; and

(e) The range in the probable cost per ton of greenhouse gas emissions reductions attributable to fuels supported by the clean fuels program, taking into account the information in (c) and (d) of this subsection.

(2) Nothing in this section prohibits the department from posting information described in subsection (1) of this section on a more frequent basis than once per year.

(3) By May 1, 2025, and each May 1st thereafter, the department must submit the report required under subsection (1) of this section to the appropriate committees of the house of representatives and senate.

(4) The department must contract for a one-time ex ante independent analysis of the information specified in subsection (1)(c) of this section covering each year of the program through 2038. The analysis must be informed by input from stakeholders, including regulated industries, and informed by experience from other jurisdictions. The analysis must impute price impacts using multiple analytical methodologies and must make clear how the assumptions or factors considered differed in each methodology used and price impact imputed. The analysis required in this subsection must be completed and submitted to the appropriate committees of the legislature by July 1, 2022.

NEW SECTION. Sec. 11. (1) In consultation with the department, the utilities and transportation commission, and the department of agriculture, the department of commerce must develop a periodic fuel supply forecast to project the availability of fuels to Washington necessary for compliance with clean fuels program requirements.

(2) Based upon the estimates in subsection (3) of this section, the fuel supply forecast must include a prediction by the department of commerce regarding whether sufficient credits will be available to comply with clean fuels program requirements.

(3) The fuel supply forecast for each upcoming compliance period must include, but is not limited to, the following:

(a) An estimate of the potential volumes of gasoline, gasoline substitutes, and gasoline alternatives, and diesel, diesel substitutes, and diesel alternatives available to

Washington. In developing this estimate, the department of commerce must consider, but is not limited to considering:

(i) The existing and future vehicle fleet in Washington; and

(ii) Any constraints that might be preventing access to available and cost-effective low carbon fuels by Washington, such as geographic and logistical factors, and alleviating factors to the constraints;

(b) An estimate of the total banked credits and carried over deficits held by regulated parties, credit generators, and credit aggregators at the beginning of the compliance period, and an estimate of the total credits attributable to fuels described in (a) of this subsection;

(c) An estimate of the number of credits needed to meet the applicable clean fuels program requirements during the forecasted compliance period; and

(d) A comparison in the estimates of (a) and (b) of this subsection with the estimate in (c) of this subsection, for the purpose of indicating the availability of fuels and banked credits needed for compliance with the requirements of this chapter.

(4) The department of commerce, in coordination with the department, may appoint a forecast review team of relevant experts to participate in the fuel supply forecast or examination of data required by this section. The department of commerce must finalize a fuel supply forecast for an upcoming compliance period by no later than 90 days prior to the start of the compliance period.

NEW SECTION. Sec. 12. (1) No later than 30 calendar days before the commencement of a compliance period, the department shall issue an order declaring a forecast deferral if the fuel supply forecast under section 11 of this act projects that the amount of credits that will be available during the forecast compliance period will be less than 100 percent of the credits projected to be necessary for regulated parties to comply with the scheduled applicable clean fuels program standard adopted by the department for the forecast compliance period.

(2) An order declaring a forecast deferral under this section must set forth:

(a) The duration of the forecast deferral;

(b) The types of fuel to which the forecast deferral applies; and

(c) Which of the following methods the department has selected for deferring compliance with the scheduled applicable clean fuels program standard during the forecast deferral:

(i) Temporarily adjusting the scheduled applicable clean fuels program standard to a standard identified in the order that better reflects the forecast availability of credits during the forecast compliance period and requiring regulated parties to comply with the temporary standard;

(ii) Requiring regulated parties to comply only with the clean fuels program standard applicable during the compliance period prior to the forecast compliance period; or

(iii) Suspending deficit accrual for part or all of the forecast deferral period.

(3)(a) In implementing a forecast deferral, the department may take an action for deferring compliance with the clean fuels program standard other than, or in addition to, selecting a method under subsection (2)(c) of this section only if the department determines that none of the methods under subsection (2)(c) of this section will provide a sufficient mechanism for containing the costs of compliance with the clean fuels program standards during the forecast deferral.

(b) If the department makes the determination specified in (a) of this subsection, the department shall:

(i) Include in the order declaring a forecast deferral the determination and the action to be taken; and

(ii) Provide written notification and justification of the determination and the action to:

(A) The governor;

(B) The president of the senate;

(C) The speaker of the house of representatives;

(D) The majority and minority leaders of the senate; and

(E) The majority and minority leaders of the house of representatives.

(4) The duration of a forecast deferral may not be less than one calendar quarter or longer than one compliance period. Only the department may terminate, by order, a forecast deferral before the expiration date of the forecast deferral. Termination of a forecast deferral is effective on the first day of the next calendar quarter after the date that the order declaring the termination is adopted.

NEW SECTION. **Sec. 13.** (1) The director of the department may issue an order declaring an emergency deferral of compliance with the carbon intensity standard established under section 3 of this act no later than 15 calendar days after the date the department determines, in consultation with the governor's office and the department of commerce, that:

(a) Extreme and unusual circumstances exist that prevent the distribution of an adequate supply of renewable fuels needed for regulated parties to comply with the clean fuels program taking into consideration all available methods of obtaining sufficient credits to comply with the standard;

(b) The extreme and unusual circumstances are the result of a natural disaster, an act of God, a significant supply chain disruption or production facility equipment failure, or another event that could not reasonably have been foreseen or prevented and not the lack of prudent planning on the part of the suppliers of the fuels to the state; and

(c) It is in the public interest to grant the deferral such as when a deferral is necessary to meet projected temporary shortfalls in the supply of the renewable fuel in the state and that other methods of obtaining compliance credits are unavailable to compensate for the shortage of renewable fuel supply.

(2) If the director of the department makes the determination required under subsection (1) of this section, such a temporary extreme and unusual deferral is permitted only if:

(a) The deferral applies only for the shortest time necessary to address the extreme and unusual circumstances;

(b) The deferral is effective for the shortest practicable time period the director of the department determines necessary to permit the correction of the extreme and unusual circumstances; and

(c) The director has given public notice of a proposed deferral.

(3) An order declaring an emergency deferral under this section must set forth:

(a) The duration of the emergency deferral;

(b) The types of fuel to which the emergency deferral applies;

(c) Which of the following methods the department has selected for deferring compliance with the clean fuels program during the emergency deferral:

(i) Temporarily adjusting the scheduled applicable carbon intensity standard to a standard identified in the order that better reflects the availability of credits during the emergency deferral and requiring regulated parties to comply with the temporary standard;

(ii) Allowing for the carryover of deficits accrued during the emergency deferral into the next compliance period without penalty; or

(iii) Suspending deficit accrual during the emergency deferral period.

(4) An emergency deferral may be terminated prior to the expiration date of the emergency deferral if new information becomes available indicating that the shortage that provided the basis for the emergency deferral has ended. The director of the department shall consult with the department of commerce and the governor's office in making an early termination decision. Termination of an emergency deferral is effective 15 calendar days after the date that the order declaring the termination is adopted.

(5) (a) In addition to the emergency deferral specified in subsection (1) of this section, the department may issue a full or partial deferral for one calendar quarter of a person's obligation to furnish credits for compliance under section 4 of this act if it finds that the person is unable to comply with the requirements of this chapter due to reasons beyond the person's reasonable control. The department may initiate a

deferral under this subsection at its own discretion or at the request of a person regulated under this chapter. The department may renew issued deferrals. In evaluating whether to issue a deferral under this subsection, the department may consider the results of the fuel supply forecast in section 11 of this act, but is not bound in its decision-making discretion by the results of the forecast.

(b) If the department issues a deferral pursuant to this subsection, the department may:

(i) Direct the person subject to the deferral to file a progress report on achieving full compliance with the requirements of this chapter within an amount of time determined to be reasonable by the department; and

(ii) Direct the person to take specific actions to achieve full compliance with the requirements of this chapter.

(c) The issuance of a deferral under this subsection does not permanently relieve the deferral recipient of the obligation to comply with the requirements of this chapter.

NEW SECTION. Sec. 14. (1) The department may require that persons that are required or elect to register or report under this chapter pay a fee. If the department elects to require program participants to pay a fee, the department must, after an opportunity for public review and comment, adopt rules to establish a process to determine the payment schedule and the amount of the fee charged. The amount of the fee must be set so as to equal but not exceed the projected direct and indirect costs to the department for developing and implementing the program and the projected direct and indirect costs to the department of commerce to carry out its responsibilities under section 11 of this act. The department and the department of commerce must prepare a biennial workload analysis and provide an opportunity for public review of and comment on the workload analysis. The department shall enter into an interagency agreement with the department of commerce to implement this section.

(2) The clean fuels program account is created in the state treasury. All receipts from fees and penalties received under the program created in this chapter

must be deposited into the account. Moneys in the account may be spent only after appropriation. The department may only use expenditures from the account for carrying out the program created in this chapter.

(3) All rule making authorized under this act must be conducted according to the standards for significant legislative rules provided in RCW 34.05.328.

NEW SECTION. Sec. 15. (1) By December 1, 2030, the joint legislative audit and review committee must analyze the impacts of the initial five years of clean fuels program implementation and must submit a report summarizing the analysis to the legislature. The analysis must include, at minimum, the following components:

(a) Costs and benefits, including environmental and public health costs and benefits, associated with this chapter for categories of persons participating in the clean fuels program or that are most impacted by air pollution, as defined in consultation with the departments of ecology and health and as measured on a census tract scale. This component of the analysis must, at minimum, assess the costs and benefits of changes in the following metrics since the start of the program:

(i) Levels of greenhouse gas emissions and criteria air pollutants for which the United States environmental protection agency has established national ambient air quality standards;

(ii) Fuel prices; and

(iii) Total employment in categories of industries generating credits or deficits. The categories of industries assessed must include but are not limited to electric utilities, oil refineries, and other industries involved in the production of high carbon fuels, industries involved in the delivery and sale of high carbon fuels, biofuel refineries, and industries involved in the delivery and sale of low carbon fuels;

(b) An evaluation of the information calculated and provided by the department under section 10(1) of this act;

(c) A summary of the estimated total statewide costs and benefits attributable to the clean fuels program, including state agency administrative costs and regulated entity compliance

costs. For purposes of calculating the benefits of the program, the summary may rely, in part, on a constant value of the social costs attributable to greenhouse gas emissions, as identified in contemporary internationally accepted estimates of such global social cost. This summary must include an estimate of the total statewide costs of the program per ton of greenhouse gas emissions reductions achieved by the clean fuels program;

(d) An evaluation of the impacts of the program on low-income households; and

(e) The outcomes of proposals to site biofuel facilities through the energy facility site evaluation council review process that is allowed by RCW 80.50.060(2).

(2) This section expires June 30, 2030.

If the person has been disqualified for a period of one

year or more, the person shall demonstrate that he or she meets the commercial driver's license or commercial learner's permit qualification standards specified in RCW 46.25.060.

(2) The fees under this section must be deposited into the highway safety fund unless prior to July 1, 2023, the actions described in (a) or (b) of this subsection occur, in which case the portion of the revenue that is the result of the fee increased in section 208, chapter 44, Laws of 2015 3rd sp. sess. must be distributed to the connecting Washington account created under RCW 46.68.395.

(a) Any state agency files a notice of rule making under chapter 34.05 RCW, absent explicit legislative authorization enacted subsequent to July 1, 2015, for a rule regarding a fuel standard based upon or defined by the carbon intensity of fuel, including a low carbon fuel standard or clean fuel standard.

(b) Any state agency otherwise enacts, adopts, orders, or in any way implements a fuel standard based upon or defined by the carbon intensity of fuel, including a low carbon fuel standard or clean fuel standard, without explicit legislative authorization enacted subsequent to July 1, 2015.

(c) Nothing in this subsection acknowledges, establishes, or creates legal authority for the department of ecology or any other state agency to enact, adopt, order, or in any way implement a fuel standard based upon or defined by the carbon intensity of fuel, including a low carbon fuel standard or clean fuel standard.

Sec. 21. RCW 46.20.202 and 2017 c 310 s 3 are each amended to read as follows:

(1) The department may enter into a memorandum of understanding with any federal agency for the purposes of facilitating the crossing of the border between the state of Washington and the Canadian province of British Columbia.

(2) The department may enter into an agreement with the Canadian province of British Columbia for the purposes of implementing a border-crossing initiative.

(3)(a) The department may issue an enhanced driver's license or identicard

for the purposes of crossing the border between the state of Washington and the Canadian province of British Columbia to an applicant who provides the department with proof of: United States citizenship, identity, and state residency. The department shall continue to offer a standard driver's license and identicard. If the department chooses to issue an enhanced driver's license, the department must allow each applicant to choose between a standard driver's license or identicard, or an enhanced driver's license or identicard.

(b) The department shall implement a one-to-many biometric matching system for the enhanced driver's license or identicard. An applicant for an enhanced driver's license or identicard shall submit a biometric identifier as designated by the department. Applicants are required to sign a declaration acknowledging their understanding of the one-to-many biometric match.

(c) The enhanced driver's license or identicard must include reasonable security measures to protect the privacy of Washington state residents, including reasonable safeguards to protect against unauthorized disclosure of data about Washington state residents. If the enhanced driver's license or identicard includes a radio frequency identification chip, or similar technology, the department shall ensure that the technology is encrypted or otherwise secure from unauthorized data access.

(d) The requirements of this subsection are in addition to the requirements otherwise imposed on applicants for a driver's license or identicard. The department shall adopt such rules as necessary to meet the requirements of this subsection. From time to time the department shall review technological innovations related to the security of identity cards and amend the rules related to enhanced driver's licenses and identicards as the director deems consistent with this section and appropriate to protect the privacy of Washington state residents.

(e) Notwithstanding RCW 46.20.118, the department may make images associated with enhanced drivers' licenses or identicards from the negative file

available to United States customs and border agents for the purposes of verifying identity.

(4) Beginning on July 23, 2017, the fee for an enhanced driver's license or enhanced identicard is twenty-four dollars, which is in addition to the fees for any regular driver's license or identicard. If the enhanced driver's license or enhanced identicard is issued, renewed, or extended for a period other than six years, the fee for each class is four dollars for each year that the enhanced driver's license or enhanced identicard is issued, renewed, or extended.

(5) The enhanced driver's license and enhanced identicard fee under this section must be deposited into the highway safety fund unless prior to July 1, 2023, the actions described in (a) or (b) of this subsection occur, in which case the portion of the revenue that is the result of the fee increased in section 209, chapter 44, Laws of 2015 3rd sp. sess. must be distributed to the connecting Washington account created under RCW 46.68.395.

(a) Any state agency files a notice of rule making under chapter 34.05 RCW, absent explicit legislative authorization enacted subsequent to July 1, 2015, for a rule regarding a fuel standard based upon or defined by the carbon intensity of fuel, including a low carbon fuel standard or clean fuel standard.

(b) Any state agency otherwise enacts, adopts, orders, or in any way implements a fuel standard based upon or defined by the carbon intensity of fuel, including a low carbon fuel standard or clean fuel standard, without explicit legislative authorization enacted subsequent to July 1, 2015.

(c) Nothing in this subsection acknowledges, establishes, or creates legal authority for the department of ecology or any other state agency to enact, adopt, order, or in any way implement a fuel standard based upon or defined by the carbon intensity of fuel, including a low carbon fuel standard or clean fuel standard.

Sec. 22. RCW 46.25.052 and 2015 3rd sp.s. c 44 s 206 are each amended to read as follows:

The holder of a CLP with an N endorsement may only operate an empty tank vehicle and is prohibited from operating any tank vehicle that previously contained hazardous materials and has not been purged of any residue.

(6) A CLP may be issued with appropriate restrictions as described in RCW 46.25.080(2)(c). In addition, a CLP may be issued with the following restrictions:

(a) "P" restricts the driver from operating a bus with passengers;

(b) "X" restricts the driver from operating a tank vehicle that contains cargo; and

(c) Any restriction as established by rule of the department.

(7) The holder of a CLP is not authorized to operate a commercial motor vehicle transporting hazardous materials.

(9) The department must transmit the fees collected for CLPs to the state treasurer for deposit in the highway safety fund unless prior to July 1, 2023, the actions described in (a) or (b) of this subsection occur, in which case the portion of the revenue that is the result of the fee increased in section 206, chapter 44, Laws of 2015 3rd sp. sess. must be distributed to the connecting Washington account created under RCW 46.68.395.

(a) Any state agency files a notice of rule making under chapter 34.05 RCW,

absent explicit legislative authorization enacted subsequent to July 1, 2015, for a rule regarding a fuel standard based upon or defined by the carbon intensity of fuel, including a low carbon fuel standard or clean fuel standard.

(b) Any state agency otherwise enacts, adopts, orders, or in any way implements a fuel standard based upon or defined by the carbon intensity of fuel, including a low carbon fuel standard or clean fuel standard, without explicit legislative authorization enacted subsequent to July 1, 2015.

(c) Nothing in this subsection acknowledges, establishes, or creates legal authority for the department of ecology or any other state agency to enact, adopt, order, or in any way implement a fuel standard based upon or defined by the carbon intensity of fuel, including a low carbon fuel standard or clean fuel standard.

Sec. 23. RCW 46.25.060 and 2020 c 78 s 2 are each amended to read as follows:

(1)(a) No person may be issued a commercial driver's license unless that person:

(i) Is a resident of this state;

(ii) Has successfully completed a course of instruction in the operation of a commercial motor vehicle that has been approved by the director or has been certified by an employer as having the skills and training necessary to operate a commercial motor vehicle safely;

(iii) If he or she does not hold a valid commercial driver's license of the appropriate classification, has been issued a commercial learner's permit under RCW 46.25.052; and

(iv) Has passed a knowledge and skills examination for driving a commercial motor vehicle that complies with minimum federal standards established by federal regulation enumerated in 49 C.F.R. Part 383, subparts F, G, and H, in addition to other requirements imposed by state law or federal regulation. The department may not allow the person to take the skills examination during the first fourteen days after initial issuance of the person's commercial learner's permit. The examinations must be prescribed and conducted by the department.

(b) In addition to the fee charged for issuance or renewal of any license, the

applicant shall pay a fee of no more than ten dollars until June 30, 2016, and thirty-five dollars beginning July 1, 2016, for the classified knowledge examination, classified endorsement knowledge examination, or any combination of classified license and endorsement knowledge examinations. The applicant shall pay a fee of no more than one hundred dollars until June 30, 2016, and two hundred fifty dollars beginning July 1, 2016, for each classified skill examination or combination of classified skill examinations conducted by the department.

(c) The department may authorize a person, including an agency of this or another state, an employer, a private driver training facility, or other private institution, or a department, agency, or instrumentality of local government, to administer the skills examination specified by this section under the following conditions:

(i) The examination is the same which would otherwise be administered by the state;

(ii) The third party has entered into an agreement with the state that complies with the requirements of 49 C.F.R. Sec. 383.75; and

(iii) The director has adopted rules as to the third party testing program and the development and justification for fees charged by any third party.

(d) If the applicant's primary use of a commercial driver's license is for any of the following, then the applicant shall pay a fee of no more than seventy-five dollars until June 30, 2016, and two hundred twenty-five dollars beginning July 1, 2016, for the classified skill examination or combination of classified skill examinations whether conducted by the department or a third-party tester:

(e) Beginning July 1, 2016, if the applicant's primary use of a commercial driver's license is to drive a school bus, the applicant shall pay a fee of no more than one hundred dollars for the classified skill examination or

combination of classified skill examinations conducted by the department.

(f) Beginning July 1, 2016, payment of the examination fees under this subsection entitles the applicant to take the examination up to two times in order to pass.

(2)(a) The department may waive the skills examination and the requirement for completion of a course of instruction in the operation of a commercial motor vehicle specified in this section for a commercial driver's license applicant who meets the requirements of 49 C.F.R. Sec. 383.77. For current or former military service members that meet the requirements of 49 C.F.R. Sec. 383.77, the department may also waive the requirements for a knowledge test for commercial driver's license applicants. Beginning December 1, 2021, the department shall provide an annual report to the house and senate transportation committees and the joint committee on veterans' and military affairs of the legislature on the number and types of waivers granted pursuant to this subsection.

(b) An applicant who operates a commercial motor vehicle for agribusiness purposes is exempt from the course of instruction completion and employer skills and training certification requirements under this section. By January 1, 2010, the department shall submit recommendations regarding the continuance of this exemption to the transportation committees of the legislature. For purposes of this subsection (2)(b), "agribusiness" means a private carrier who in the normal course of business primarily transports:

(i) Farm machinery, farm equipment, implements of husbandry, farm supplies, and materials used in farming;

(ii) Agricultural inputs, such as seed, feed, fertilizer, and crop protection products;

(iii) Unprocessed agricultural commodities, as defined in RCW 17.21.020, where such commodities are produced by farmers, ranchers, vineyardists, or orchardists; or

(iv) Any combination of (b)(i) through (iii) of this subsection.

The department shall notify the transportation committees of the legislature if the federal government takes action affecting the exemption provided in this subsection (2)(b).

(3) A commercial driver's license or commercial learner's permit may not be issued to a person while the person is subject to a disqualification from driving a commercial motor vehicle, or while the person's driver's license is suspended, revoked, or canceled in any state, nor may a commercial driver's license be issued to a person who has a commercial driver's license issued by any other state unless the person first surrenders all such licenses, which must be returned to the issuing state for cancellation.

(4) The fees under this section must be deposited into the highway safety fund unless prior to July 1, 2023, the actions described in (a) or (b) of this subsection occur, in which case the portion of the revenue that is the result of the fee increased in section 207, chapter 44, Laws of 2015 3rd sp. sess. must be distributed to the connecting Washington account created under RCW 46.68.395.

(a) Any state agency files a notice of rule making under chapter 34.05 RCW, absent explicit legislative authorization enacted subsequent to July 1, 2015, for a rule regarding a fuel standard based upon or defined by the carbon intensity of fuel, including a low carbon fuel standard or clean fuel standard.

(b) Any state agency otherwise enacts, adopts, orders, or in any way implements a fuel standard based upon or defined by the carbon intensity of fuel, including a low carbon fuel standard or clean fuel standard, without explicit legislative authorization enacted subsequent to July 1, 2015.

(c) Nothing in this subsection acknowledges, establishes, or creates legal authority for the department of ecology or any other state agency to enact, adopt, order, or in any way implement a fuel standard based upon or defined by the carbon intensity of fuel, including a low carbon fuel standard or clean fuel standard.

Sec. 24. RCW 70A.15.3150 and 2020 c 20 s 1111 are each amended to read as follows:

(1) Any person who knowingly violates any of the provisions of this chapter (~~(~~of~~)~~), chapter 70A.25 or 70A.--- (the new chapter created in section 29 of this act) RCW, RCW 70A.45.080, or any ordinance, resolution, or regulation in force pursuant thereto is guilty of a gross misdemeanor and upon conviction thereof shall be punished by a fine of not more than ten thousand dollars, or by imprisonment in the county jail for up to three hundred sixty-four days, or by both for each separate violation.

(2) Any person who negligently releases into the ambient air any substance listed by the department of ecology as a hazardous air pollutant, other than in compliance with the terms of an applicable permit or emission limit, and who at the time negligently places another person in imminent danger of death or substantial bodily harm is guilty of a gross misdemeanor and shall, upon conviction, be punished by a fine of not more than ten thousand dollars, or by imprisonment for up to three hundred sixty-four days, or both.

(3) Any person who knowingly releases into the ambient air any substance listed by the department of ecology as a hazardous air pollutant, other than in compliance with the terms of an applicable permit or emission limit, and who knows at the time that he or she thereby places another person in imminent danger of death or substantial bodily harm, is guilty of a class C felony and shall, upon conviction, be punished by a fine of not less than fifty thousand dollars, or by imprisonment for not more than five years, or both.

(4) Any person who knowingly fails to disclose a potential conflict of interest under RCW 70A.15.2000 is guilty of a gross misdemeanor, and upon conviction thereof shall be punished by a fine of not more than five thousand dollars.

Sec. 25. RCW 70A.15.3160 and 2020 c 20 s 1112 are each amended to read as follows:

(1)(a) Except as provided in RCW 43.05.060 through 43.05.080 and 43.05.150, and in addition to or as an alternate to any other penalty provided by law, any person who violates any of the provisions of this chapter, chapter 70A.25 (~~(~~of~~)~~), 70A.450, or 70A.--- (the new chapter created in section 29 of this act) RCW, RCW 70A.45.080, or any of the rules in force under such chapters or

section may incur a civil penalty in an amount not to exceed ten thousand dollars per day for each violation. Each such violation shall be a separate and distinct offense, and in case of a continuing violation, each day's continuance shall be a separate and distinct violation.

(b) Any person who fails to take action as specified by an order issued pursuant to this chapter shall be liable for a civil penalty of not more than ten thousand dollars for each day of continued noncompliance.

(2)(a) Penalties incurred but not paid shall accrue interest, beginning on the ninety-first day following the date that the penalty becomes due and payable, at the highest rate allowed by RCW 19.52.020 on the date that the penalty becomes due and payable. If violations or penalties are appealed, interest shall not begin to accrue until the thirty-first day following final resolution of the appeal.

(b) The maximum penalty amounts established in this section may be increased annually to account for inflation as determined by the state office of the economic and revenue forecast council.

(3) Each act of commission or omission which procures, aids or abets in the violation shall be considered a violation under the provisions of this section and subject to the same penalty. The penalties provided in this section shall be imposed pursuant to RCW 43.21B.300.

(4) All penalties recovered under this section by the department shall be paid into the state treasury and credited to the air pollution control account established in RCW 70A.15.1010 or, if recovered by the authority, shall be paid into the treasury of the authority and credited to its funds. If a prior penalty for the same violation has been paid to a local authority, the penalty imposed by the department under subsection (1) of this section shall be reduced by the amount of the payment.

(5) To secure the penalty incurred under this section, the state or the authority shall have a lien on any vessel used or operated in violation of this chapter which shall be enforced as provided in RCW 60.36.050.

(6) Public or private entities that are recipients or potential recipients of department grants, whether for air

quality related activities or not, may have such grants rescinded or withheld by the department for failure to comply with provisions of this chapter.

(7) In addition to other penalties provided by this chapter, persons knowingly under-reporting emissions or other information used to set fees, or persons required to pay emission or permit fees who are more than ninety days late with such payments may be subject to a penalty equal to three times the amount of the original fee owed.

(8) The department shall develop rules for excusing excess emissions from enforcement action if such excess emissions are unavoidable. The rules shall specify the criteria and procedures for the department and local air authorities to determine whether a period of excess emissions is excusable in accordance with the state implementation plan.

Sec. 26. RCW 19.112.110 and 2013 c 225 s 601 are each amended to read as follows:

(1) Special fuel licensees under chapter 82.38 RCW, as determined by the department of licensing, must provide evidence to the department of licensing that at least two percent of the total annual diesel fuel sold in Washington is biodiesel or renewable diesel fuel, following the earlier of: (a) November 30, 2008; or (b) when a determination is made by the director, published in the Washington State Register, that feedstock grown in Washington state can satisfy a two-percent requirement.

(2) Special fuel licensees under chapter 82.38 RCW, as determined by the department of licensing, must provide evidence to the department of licensing that at least five percent of total annual diesel fuel sold in Washington is biodiesel or renewable diesel fuel, when the director determines, and publishes this determination in the Washington State Register, that both in-state oil seed crushing capacity and feedstock grown in Washington state can satisfy a three-percent requirement.

(3) The requirements of subsections (1) and (2) of this section may take effect no sooner than one hundred eighty days after the determination has been published in the Washington State Register.

(4) The director and the director of licensing must each adopt rules, in coordination with each other, for enforcing and carrying out the purposes of this section.

(5) To the extent that the requirements of this section conflict with the requirements of chapter 70A.--- (the new chapter created in section 29 of this act) RCW, the requirements of chapter 70A.--- (the new chapter created in section 29 of this act) RCW prevail.

Sec. 27. RCW 19.112.120 and 2013 c 225 s 602 are each amended to read as follows:

(1) By December 1, 2008, motor vehicle fuel licensees under chapter 82.38 RCW, as determined by the department of licensing, must provide evidence to the department of licensing that at least two percent of total gasoline sold in Washington, measured on a quarterly basis, is denatured ethanol.

(2) If the director of ecology determines that ethanol content greater than two percent of the total gasoline sold in Washington will not jeopardize continued attainment of the federal clean air act's national ambient air quality standard for ozone pollution in Washington and the director of agriculture determines and publishes this determination in the Washington State Register that sufficient raw materials are available within Washington to support economical production of ethanol at higher levels, the director of agriculture may require by rule that licensees provide evidence to the department of licensing that denatured ethanol comprises between two percent and at least ten percent of total gasoline sold in Washington, measured on a quarterly basis.

(3) The requirements of subsections (1) and (2) of this section may take effect no sooner than one hundred eighty days after the determination has been published in the Washington State Register.

(4) The director and the director of licensing must each adopt rules, in coordination with each other, for enforcing and carrying out the purposes of this section.

(5) Nothing in this section is intended to prohibit the production, sale, or use of motor fuel for use in federally designated flexibly fueled

vehicles capable of using E85 motor fuel. Nothing in this section is intended to limit the use of high octane gasoline not blended with ethanol for use in aircraft.

(6) To the extent that the requirements of this section conflict with the requirements of chapter 70A.--- (the new chapter created in section 29 of this act) RCW, the requirements of chapter 70A.--- (the new chapter created in section 29 of this act) RCW prevail.

NEW SECTION. Sec. 28. A new section is added to chapter 43.21A RCW to read as follows:

(1) The department, in coordination with the department of commerce and other agencies as appropriate, must develop recommendations for potential improvements to the permitting processes for industrial projects and facilities in Washington that would contribute to achieving greenhouse gas emissions limits established under RCW 70A.45.020 while maintaining standards for the protection of the environment and the preservation of tribal consultation and treaty rights. The department must provide increased clarity on areas in the state that may be suitable for siting projects that have a lower potential for negative environmental impacts, especially to highly impacted communities as defined in RCW 19.405.020 and identify strategies for minimizing and mitigating negative environmental impacts where possible. The department must provide clear guidance and direction intended to improve project proposals, recommend policy and administrative improvements necessary to improve the permitting process, and recommend any additional studies needed. The department shall convene businesses, local governments, community organizations, and environmental and labor stakeholders, and consult with tribes.

(2) The department and the department of commerce shall produce and submit to the governor and the legislature an interim progress report with initial policy proposal recommendations for the 2022 legislative session by December 1, 2021, and a final report including findings, recommendations, and further policy proposals by December 1, 2022.

(3) This section expires June 30, 2023.

NEW SECTION. Sec. 29. Sections 1 through 15 of this act constitute a new chapter in Title 70A RCW.

NEW SECTION. Sec. 30. If specific funding for the purposes of this act, referencing this act by bill or chapter number, is not provided by June 30, 2021, in the omnibus appropriations act, this act is null and void.

NEW SECTION. Sec. 31. If any provision of this act or its application to any person or circumstance is held invalid, the remainder of the act or the application of the provision to other persons or circumstances is not affected. In the event that there is litigation on the provisions of section 3(6) of this act or any other provision of this act, it is the intent of the legislature that the remainder of the act shall continue to be enforced and if such provisions are held invalid, the remainder of the act shall not be affected."

To the Honorable Speaker and Members,
The House of Representatives of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval as to Sections 9, 17, and 18, Engrossed Second Substitute House Bill No. 1069 entitled:

“AN ACT Relating to local government fiscal flexibility.”

Sections 8 and 9 of this bill amend different versions of RCW 82.04.050, and Sections 17 and 18 establish different effective dates for Sections 8 and 9. Two other bills enacted by the Legislature this session, Substitute House Bill 1095 and Engrossed Senate Bill 5220, contain technical amendments to the same statute that would conflict with Sections 9, 17 and 18 of this bill. Therefore, I am vetoing Sections 9, 17 and 18 to avoid any confusion that may arise from these double amendments. These vetoes will not disturb the substantive provisions of this bill.

In addition, Sections 15 and 16 extend the timeframe for a city-owned utility to issue a tax lien related to unpaid utility fees. This is a difficult time for many Washingtonians, therefore I urge utility providers and local governments to use this power sparingly and as a last resort. Local governments should utilize resources provided by the federal government to cover customer utility bills that are in arrears before relying upon their lien authority. Providers should work with customers by providing payment assistance programs and identifying solutions to prevent service disconnections following the current utility shutoff moratorium. I urge members of the public who need help paying their utility bills to contact their utilities and enroll in their assistance programs.

For these reasons I have vetoed Sections 9, 17, and 18 of Engrossed Second Substitute House Bill No. 1069.

With the exception of Sections 9, 17, and 18, Engrossed Second Substitute House Bill No. 1069 is approved.

Respectfully submitted,

To the Honorable Speaker and Members,
The House of Representatives of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval as to Section 3(8), Engrossed Third Substitute House Bill No. 1091 entitled:

“AN ACT Relating to reducing greenhouse gas emissions by reducing the carbon intensity of transportation fuel.”

Subsection (8) of Section 3 operates to delay the assignment of compliance obligations or the generation of credits “under this chapter” until a separate additive transportation revenue act becomes law. Although a governor is generally limited to full section vetoes in policy bills, and our courts generally defer to the Legislature’s designation of full sections, this deference is not without limits. The Legislature may not design or construct a section for the purpose, or with the effect, of circumventing a governor’s veto authority. In this case, subsection (8), the delayed effective date, is embedded in Section 3, a section that primarily directs the Department of Ecology to adopt rules and establish standards. However, the delayed effective date in subsection (8) reaches far beyond Section 3 by delaying the Department’s authority to assign compliance obligations or allow the generation of credits “under this chapter”. Several other sections of the bill address both compliance obligations and the generation of credits, such as Sections 4, 5, 6, 7 and 8. Additionally, other sections impose obligations on the department that relate to compliance obligations and credits. Effective dates are typically standalone sections when they impact more than one section of a bill. This delayed effective date impacts many sections of the bill, perhaps the entire act, but it is embedded in a single section to prevent a veto. It strains the imagination to discern any reason for embedding into a single section a delayed effective date that impacts not just that one section but also multiple additional sections, unless that reason is to prevent it from being vetoed. This type of legislative drafting demonstrates manipulation and is a palpable attempt at dissimulation, which our Supreme Court in *Legislature v. Lowry*, 131 Wn.2d 309 (1997), has ruled will not stand. As a result, I am vetoing Section 3(8) as a *de facto* section. I applaud the extraordinary efforts of the Legislature in moving this policy forward, but we cannot delay its implementation until some unknown time in the future – the crisis is now, and we must act now.

For these reasons I have vetoed Section 3(8) of Engrossed Third Substitute House Bill No. 1091.

With the exception of Section 3(8), Engrossed Third Substitute House Bill No. 1091 is approved.

Respectfully submitted,

To the Honorable Speaker and Members,
The House of Representatives of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval, Second Substitute House Bill No. 1127 entitled:

“AN ACT Relating to protecting the privacy and security of COVID-19 health data collected by entities other than public health agencies, health care providers, and health care facilities.”

2SHB 1127 is a thoughtful, important proposal addressing privacy and confidentiality issues related to every person's COVID-19 health data when that data is collected, disclosed or used by entities other than public health agencies, health care providers, and health care facilities. I fully support these goals. The intent of the proposal was to address data collected during contact tracing work, however the plain language of the bill is very broad and covers other COVID-related information that was not contemplated at the time of drafting. For example, this bill appears to prohibit efforts by public and private entities to offer incentives to become vaccinated or to make certain opportunities available to those persons who are vaccinated. The current critical need to incentivize every eligible person to become vaccinated is an issue that did not exist, and was not contemplated, at the time this bill was drafted or made its way through the legislative process. I have spoken with the bill's prime sponsor, and my office will work with Representative Slatter and stakeholders to advance the policy goals in 2SHB 1127 both in the short term and long term.

For these reasons I have vetoed Second Substitute House Bill No. 1127 in its entirety.

Respectfully submitted,

To the Honorable Speaker and Members,
The House of Representatives of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval as to Section 7, Engrossed Second Substitute House Bill No. 1220 entitled:

“AN ACT Relating to supporting emergency shelters and housing through local planning and development regulations.”

Section 7 of this bill can be read to encourage the siting and development of accessory dwelling units in areas of the state outside of urban growth areas. This was a technical oversight that occurred during the legislative process. As passed, the bill inadvertently omitted a key reference limiting these policies to urban growth areas, which was not the intention of the bill’s sponsor.

For these reasons I have vetoed Section 7 of Engrossed Second Substitute House Bill No. 1220.

With the exception of Section 7, Engrossed Second Substitute House Bill No. 1220 is approved.

Respectfully submitted,

To the Honorable Speaker and Members,
The House of Representatives of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval as to Section 6, Engrossed Second Substitute House Bill No. 1287 entitled:

“AN ACT Relating to preparedness for a zero emissions transportation future.”

Section 6 of the bill ties a very important goal of electrifying our transportation sector to the implementation of a road usage charge program. Transportation is our state’s greatest source of carbon emissions and we cannot afford to link an important goal like getting to 100% zero-emission vehicles to a separate policy that will take time to design and implement.

I am committed to getting to zero emission transportation as quickly as possible. In fact, Washington is leading the way by building electric vehicle charging infrastructure, procuring zero-emission transit vehicles and building electric ferries, providing financial incentives for electric vehicle purchases, and advocating for a national 100% zero-emission vehicle standard by 2035.

I am also open to exploring the potential of a road usage charge program as part of a larger transportation revenue discussion. I look forward to working with legislators and stakeholders to figure out how to design a road usage charge that ensures the privacy of drivers, helps meet our zero-emission transportation goals, and ensures low-income and overburdened communities are not doubly penalized after already suffering through longer commutes.

Yet setting and achieving a goal of 100% electric vehicles is too important to tie to the implementation of a separate policy like the road usage charge.

For these reasons I have vetoed Section 6 of Engrossed Second Substitute House Bill No. 1287.

With the exception of Section 6, Engrossed Second Substitute House Bill No. 1287 is approved.

Respectfully submitted,

To the Honorable Speaker and Members,
The House of Representatives of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval as to Section 11, Engrossed Substitute House Bill No. 1336 entitled:

“AN ACT Relating to creating and expanding unrestricted authority for public entities to provide telecommunications services to end users.”

Section 11 of this bill would allow local governments that are out of compliance with the Growth Management Act (GMA) to access funding distributed by the Public Works Board (Board) for broadband infrastructure. This language is almost identical to section 4 of 2SSB 5368 (encouraging rural economic development), but the language in this bill also requires an update to the Washington Administrative Code. Current law prohibits any funding distributed by the Board to go to a GMA noncompliant jurisdiction unless that funding is necessary to address a public health need or substantial environmental degradation. The new exception in Section 11 does not rise to the same level of urgency established in current law. In addition, an underpinning of the GMA has been that noncompliant jurisdictions are unable to access various forms of infrastructure funding. Broadband is critical infrastructure comparable to roads, bridges, and water systems, and should be treated the same before the Board.

For these reasons I have vetoed Section 11 of Engrossed Substitute House Bill No. 1336.

With the exception of Section 11, Engrossed Substitute House Bill No. 1336 is approved.

To the Honorable Speaker and Members,
The House of Representatives of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval, House Bill No. 1495 entitled:

“AN ACT Relating to providing that qualified dealer cash incentives paid to auto dealers are bona fide discounts for purposes of the business and occupation tax.”

As drafted, House Bill 1495 would provide automobile dealers with a business and occupation (B&O) tax deduction for qualified dealer cash incentives. Auto dealers earn taxable income by purchasing vehicles at wholesale from automobile manufacturers to sell at retail to consumers. However, dealers can also earn dealer cash incentives by selling specific automobile models during specific times and by complying with other terms and conditions. The Washington State Supreme Court concluded in *Steven Klein Inc. v. State Department of Revenue*, 183 Wash.2d 889 (2015), that this “dealer cash” is income received by auto dealers in addition to the income they receive from retail sales and, therefore, constitutes an additional taxable business activity. The Court further found that dealer cash incentives do not qualify as bona fide discounts to the wholesale purchase price of vehicles.

The Court's ruling is aligned with normal principles of good tax policy as well as the intent of the B&O tax. The B&O tax is intended to be a gross receipts tax on essentially all income. Allowing a specific deduction for the portion of gross income associated with dealer cash incentives would introduce additional complexity into our tax system, erode Washington's tax base, and reduce revenues needed to provide critical services to Washington residents – all without providing a recognizable countervailing benefit to the people of this state.

By providing a B&O tax deduction for this income stream, HB 1495 would nullify the Court's decision related to the taxability of dealer cash incentives. As a result, HB 1495 would be a departure from normal principles of good tax policy without a compelling public policy reason to justify that departure. In addition, it is concerning that there is no requirement for a dealer who receives these incentives to pass on or even disclose these savings to the retail buyer.

For these reasons I have vetoed House Bill No. 1495 in its entirety.
