Definitions.

tures are of two classes, viz.: Outlay (new construction and equipment) and Operation and Maintenance (running expense). The first relates to the purchase of property, buildings, land and equipment and the making of new improvements. Whatever creates additional value, *i. e.*, augments the state's assets, is an "Outlay" as herein considered. The term "Operation and Maintenance" is applied to simply operating the machinery of government and keeping it in running order—a transaction which does not produce a betterment or increase over and above the original value, belongs under this head.
