

Prevailing Wages". For a contract in excess of ten thousand dollars, the statement of intent to pay prevailing wages shall include:

- (1) The contractor's registration certificate number; and
- (2) The prevailing rate of wage for each classification of workers entitled to prevailing wages under RCW 39.12.020 and the estimated number of workers in each classification.

Each statement of intent to pay prevailing wages must be approved by the industrial statistician of the department of labor and industries before it is submitted to said officer. Unless otherwise authorized by the department of labor and industries, each voucher claim submitted by a contractor for payment on a project estimate shall state that the prevailing wages have been paid in accordance with the prefiled statement or statements of intent to pay prevailing wages on file with the public agency. Following the final acceptance of a public works project, it shall be the duty of the officer charged with the disbursement of public funds, to require the contractor and each and every subcontractor from the contractor or a subcontractor to submit to such officer an "Affidavit of Wages Paid" before the funds retained according to the provisions of RCW 60.28.010 are released to the contractor. Each affidavit of wages paid must be certified by the industrial statistician of the department of labor and industries before it is submitted to said officer.

[Substitute Senate Bill No. 4046]

### CATTLE—BRUCELLOSIS VACCINATIONS—RETESTING

AN ACT Relating to livestock; amending section 15.36.150, chapter 11, Laws of 1961 and RCW 15.36.150; and adding a new section to chapter 15.36 RCW.

Be it enacted by the Legislature of the State of Washington:

NEW SECTION. Section 1. There is added to chapter 15.36 RCW a new section to read as follows:

"Official brucellosis adult vaccinated cattle" means those cattle, officially vaccinated over the age of official calfhood vaccinated cattle, which the director has determined have been commingled with, or kept in close proximity to, cattle identified as brucellosis reactors, and have been vaccinated against brucellosis in a manner and under the conditions prescribed by the director after a hearing and under rules adopted under chapter 34.04 RCW, the administrative procedure act.

Sec. 2. Section 15.36.150, chapter 11, Laws of 1961 and RCW 15.36-.150 are each amended to read as follows:

Except as provided hereinafter, tuberculin test of all herds and additions thereto shall be made before any milk therefrom is sold, and at least once every twelve months thereafter, by an accredited and licensed veterinarian approved by the state department of agriculture or veterinarian employed by the bureau of animal industry, United States department of agriculture. Said tests shall be made and the reactors disposed of in accordance with the requirements approved by the director for accredited herds. A certificate signed by the veterinarian or attested to by the director and filed with the director shall be evidence of the above test: **PROVIDED**, That in modified accredited counties in which the modified accredited area plan is applied to the dairy herds, the modified accredited area system approved by the director shall be accepted in lieu of annual testing.

No fluid milk or cream designated or represented to be "grade A" fluid milk or cream shall be sold, offered or exposed for sale which has been produced from a herd of cows, one or more of which are infected with brucellosis at the time such milk is produced, or from animals in such herd which have not been blood tested for brucellosis at least once during the preceding calendar year, or milk ring tested for brucellosis at least semiannually during the preceding year. The results of a test for brucellosis by the state or federal laboratory of a blood sample drawn by an official veterinarian, shall be prima facie evidence of the infection or noninfection of the animal or herds: **PROVIDED**, That in lieu thereof, two official negative milk ring tests for brucellosis not less than six months apart may be accepted as such evidence. All herds of cows, the fluid milk or cream from which is designated or represented to be "grade A" fluid milk or cream shall be blood tested for brucellosis annually or milk ring tested for brucellosis semiannually. Such herds showing any reaction to the milk ring test shall be blood tested and all reactors to the blood test removed from the herd and disposed of within fifteen days from the date they are tagged and branded. The remaining animals in the infected herd shall be retested at not less than thirty-day nor more than sixty-day intervals from the date of the first test: **PROVIDED**, That herds that have been officially brucellosis adult vaccinated shall be retested not less than sixty days nor more than one hundred fifty days after being so vaccinated and such herds shall be retested and released from quarantine at intervals and under conditions prescribed by the director. A series of retests, with removal and disposition of reacting animals, shall be continued until the herd shall have passed two successive tests in which no reactors are found. If upon a final test, not less than six months nor more than seven months from the date of the last negative test, no reactors are found in the herd, it shall be deemed a disease free herd. Results of official blood or milk ring tests shall be conspicuously displayed in the milk house.

All milk and milk products consumed raw shall be from herds or additions thereto which have been found free from brucellosis, as shown by blood serum tests or other approved tests for agglutinins against brucella organisms made in a laboratory approved by the director. All such herds shall be retested at least every twelve months and all reactors removed from the herd. If a herd is found to have one or more animals positive to the brucellosis test, all milk from that herd is to be pasteurized until the three consecutive brucellosis tests obtained at thirty-day intervals between each test are found to be negative. A certificate identifying each animal by number and signed by the laboratory making the test shall be evidence of the above test.

Cows which show an extensive or entire induration of one or more quarters of the udder upon physical examination, whether secreting abnormal milk or not, shall be permanently excluded from the milking herd. Cows giving bloody, or stringy, or otherwise abnormal milk, but with only slight induration of the udder shall be excluded from the herd until reexamination shows that the milk has become normal.

For other diseases such tests and examinations as the director may require after consultation with state livestock sanitary officials shall be made at intervals and by methods prescribed by him.

Passed the Senate February 24, 1982.

Passed the House March 6, 1982.

Approved by the Governor April 1, 1982.

Filed in Office of Secretary of State April 1, 1982.
