

All milk and milk products consumed raw shall be from herds or additions thereto which have been found free from brucellosis, as shown by blood serum tests or other approved tests for agglutinins against brucella organisms made in a laboratory approved by the director. All such herds shall be retested at least every twelve months and all reactors removed from the herd. If a herd is found to have one or more animals positive to the brucellosis test, all milk from that herd is to be pasteurized until the three consecutive brucellosis tests obtained at thirty-day intervals between each test are found to be negative. A certificate identifying each animal by number and signed by the laboratory making the test shall be evidence of the above test.

Cows which show an extensive or entire induration of one or more quarters of the udder upon physical examination, whether secreting abnormal milk or not, shall be permanently excluded from the milking herd. Cows giving bloody, or stringy, or otherwise abnormal milk, but with only slight induration of the udder shall be excluded from the herd until reexamination shows that the milk has become normal.

For other diseases such tests and examinations as the director may require after consultation with state livestock sanitary officials shall be made at intervals and by methods prescribed by him.
