In granting the vendor rate increases funded by appropriations in sections 201 through 219 of this act which reference this section, the department may vary percentage increases among vendor groups. The department shall ensure that the overall average rate increase on January 1, 1990, does not exceed three percent and that the average overall increase on January 1, 1991, does not exceed two percent. The department may transfer

funds among appropriations for the purposes of this section. In no case may transfers out of a section exceed the amounts appropriated for the purposes of this section. This section does not apply to rates for hospitals and nursing homes reimbursed under chapter 74.46 RCW.

provided for approved regional network plans through contracts negotiated with the secretary of social and health services.

(i) It is the intent of the legislature to implement mental health reform on a multi-year schedule. Dramatic escalation of costs for new programs would impair the state's ability to proceed with subsequent expansion. The contracts shall contain a fiscal plan that will ensure that the increased cost of maintaining fiscal year 1991 programs in fiscal year 1992 will not unduly exceed the rate of inflation. Of the amounts provided in this subsection, a maximum of \$500,000 from the general fund—state appropriation may be used for planning and technical assistance grants to counties or regions wishing to form networks. The amounts in this subsection include moneys needed to implement the federal omnibus budget and reconciliation act of 1987 ("OBRA"). First priority for necessary mental health services shall be given to individuals transferred from nursing homes because of OBRA. Assumptions regarding the number of transfers from the nursing homes shall be incorporated into each contract and shall be consistent with the state-wide plan. The department shall coordinate OBRA transfers consistent with the provisions of each contract. Priority for referral to western state hospital shall be given to individuals under ninety-day or one hundred eighty-day commitments and individuals who have exhausted all community placement options.

(iii) The department may continue to contract directly with Chartley house until King county joins or becomes a regional support network.

Any amount remaining

after March 1991 may be used for one-time grants. In making grants, the secretary shall give priority to proposals that facilitate network development, demonstrate integration with other mental health services, and are designed to reduce involuntary treatment.

(c) \$5,500,000 of the general fund—state appropriation is provided solely for increases for involuntary treatment act administration, including costs associated with involuntary medication hearings.

(b) The number of classified staff units determined in subsection (3) of this section multiplied by 1.152. This factor is intended to adjust allocations so that, for the purposes of distributing insurance benefits, full time equivalent classified employees may be calculated on the basis of 1440 hours of work per year, with no individual employee counted as more than one full time equivalent.

(9) For the purposes of RCW 84.52.0531, the increase per full time equivalent student in state basic education appropriations provided under this act, including appropriations for salary and benefits increases, is 6.07 percent from the 1988-89 school year to the 1989-90 school year, and 5.74 percent from the 1989-90 school year to the 1990-91 school year.

The superintendent of public instruction shall collect such information from school districts beginning in the 1989-90 school year. School districts may submit supplemental information on changes in staffing levels after the initial personnel report for each school year. Staffing ratios calculated under this subsection may recognize additional staff reported, prorated by the number of months of employment during the academic year.

(b) For each school year, the funding provided under subsection (2)(a) of this section shall be based on a ratio of fifty-one certificated instructional staff per thousand students in kindergarten through grade three only if the district documents an actual ratio of at least fifty-one full time basic education certificated instructional staff per thousand full time equivalent students at those grade levels. For any school district documenting a lower ratio, the funding provided under this section shall be based on the district's actual K-3 ratio achieved in that school year, or the statutory minimum ratio established under RCW 28A.41.140(2)(c), if greater.

(c) School districts that had a ratio of fifty-one basic education certificated instructional staff per thousand students in kindergarten through grade three in the 1988-89 school year shall expend additional funding generated by the increase in staffing ratios provided in this section solely to improve staffing ratios in kindergarten through grade twelve.

In addition to the amounts appropriated in this act for revenue for distribution, state contributions to the law enforcement officers' and fire fighters' retirement system, and bond retirement and interest including ongoing bond registration and transfer charges, transfers, interest on registered warrants, and certificates of indebtedness, there is also appropriated such further amounts as may be required or available for these purposes under any statutory formula or under any proper bond covenant made in accordance with law.

NEW SECTION. Sec. 808. In addition to such other appropriations as are made by this act, there is hereby appropriated to the state finance committee from legally available bond proceeds in the applicable construction or building funds and accounts such amounts as are necessary to pay the expenses incurred in the issuance and sale of the subject bonds.

****NEW SECTION. Sec. 809. It is the intent of the legislature that, unless otherwise provided in this act or in the legislative budget notes for the***

1989-91 biennium, new programs initiated in this act are funded for the entire fiscal biennium. To the extent feasible, funds appropriated for such programs shall be allotted by the office of financial management and expended by the agency at a uniform rate.

*Sec. 809 was vetoed, see message at end of chapter.

**Sec. 810. Section 10, chapter 218, Laws of 1973 1st ex. sess. as last amended by section 505, chapter 405, Laws of 1985 and RCW 9.46.100 are each amended to read as follows:*

There is hereby created a fund to be known as the "gambling revolving fund" which shall consist of all moneys receivable for licensing, penalties, forfeitures, and all other moneys, income, or revenue received by the commission. The state treasurer shall be custodian of the fund. All moneys received by the commission or any employee thereof, except for change funds and an amount of petty cash as fixed by rule or regulation of the commission, shall be deposited each day in a depository approved by the state treasurer and transferred to the state treasurer to be credited to the gambling revolving fund. Disbursements from the revolving fund shall be on authorization of the commission or a duly authorized representative thereof. In order to maintain an effective expenditure and revenue control the gambling revolving fund shall be subject in all respects to chapter 43.88 RCW but no appropriation shall be required to permit expenditures and payment of obligations from such fund. All expenses relative to commission business, including but not limited to salaries and expenses of the director and other commission employees shall be paid from the gambling revolving fund.

The ~~((office of financial management may direct the))~~ state treasurer ~~((to loan))~~ shall transfer to the general fund ~~((an amount not to exceed \$1,400,000))~~ two million dollars from the gambling revolving fund for the ~~((1983-85))~~ 1989-91 fiscal biennium.

*Sec. 810 was vetoed, see message at end of chapter.

Sec. 811. Section 7, chapter 13, Laws of 1983 1st ex. sess. as amended by section 710, chapter 289, Laws of 1988 and RCW 50.16.070 are each amended to read as follows:

The federal interest payment fund shall consist of contributions payable by each employer (except employers as described in RCW 50.44.010 and 50.44.030 who have properly elected to make payments in lieu of contributions, employers who are required to make payments in lieu of contributions, and employers paying contributions under RCW 50.44.035) for any calendar quarter which begins on or after January 1, 1984, and for which the commissioner determines that the department will have an outstanding balance of accruing federal interest at the end of the calendar quarter. The amount of wages subject to tax shall be determined according to RCW 50.24.010. The tax rate applicable to wages paid during the calendar quarter shall be determined by the commissioner and shall not exceed fifteen one-hundredths of one percent. In determining whether to require contributions

as authorized by this section, the commissioner shall consider the current balance in the federal interest payment fund and the projected amount of interest which will be due and payable as of the following September 30. Except as appropriated for the fiscal biennium ending June 30, ~~((1989))~~ 1991, any excess moneys in the federal interest payment fund shall be retained in the fund for future interest payments.

Contributions under this section shall become due and be paid by each employer in accordance with such rules as the commissioner may prescribe and shall not be deducted, in whole or in part, from the remuneration of individuals in the employ of the employer. Any deduction in violation of this section is unlawful.

In the payment of any contributions under this section, a fractional part of a cent shall be disregarded unless it amounts to one-half cent or more, in which case it shall be increased to one cent.

NEW SECTION. Sec. 812. The sum of sixty million dollars is appropriated for the biennium ending June 30, 1989, from the general fund to the state treasurer for immediate transfer to the budget stabilization account pursuant to RCW 43.88.525 and 43.88.530.

***Sec. 813. Section 338, chapter 258, Laws of 1984 as amended by section 27, chapter 57, Laws of 1985 and RCW 43.08.250 are each amended to read as follows:**

The money received by the state treasurer from fees, fines, forfeitures, penalties, reimbursements or assessments by any court organized under Title 3 or 35 RCW, or chapter 2.08 RCW, shall be deposited in the public safety and education account which is hereby created in the state treasury. The legislature shall appropriate the funds in the account to promote traffic safety education, highway safety, criminal justice training, crime victims' compensation, judicial education, the judicial information system, winter recreation parking, and state game programs. All earnings of investments of balances in the public safety and education account shall be credited to the general fund.

On July 1, 1989, the state treasurer shall transfer to the general fund from the public safety and education account the sum of two million dollars.

***Sec. 813 was vetoed, see message at end of chapter.**

NEW SECTION. Sec. 814. Notwithstanding RCW 43.01.090 the house of representatives, the senate, and the permanent statutory committees shall pay expenses quarterly to the department of general administration facilities and services revolving fund for services rendered by the department for operations, maintenance, and supplies relating to buildings, structures, and facilities used by the legislature for the biennium beginning July 1, 1989.

NEW SECTION. Sec. 815. Amounts received by an agency as reimbursements pursuant to RCW 39.34.130 shall be considered as returned

loans of materials supplied or services rendered. Such amounts may be expended as a part of the original appropriation of the fund to which it belongs, without further or additional appropriation, subject to conditions and procedures prescribed by the director of financial management, which shall provide for determination of full costs, disclosure of such reimbursements in the governor's budget, maximum interagency usage of data processing equipment and services, and such restrictions as will promote more economical operations of state government without incurring continuing costs beyond those reimbursed.

NEW SECTION. Sec. 816. The appropriations of moneys and the designation of funds and accounts by this and other acts of the 1989 legislature shall be construed in a manner consistent with legislation enacted by the 1985 and 1987 legislatures to conform state funds and accounts with generally accepted accounting principles.

NEW SECTION. Sec. 817. If any provision of this act or its application to any person or circumstance is held invalid, the remainder of the act or the application of the provision to other persons or circumstances is not affected.

NEW SECTION. Sec. 818. This act is necessary for the immediate preservation of the public peace, health, or safety, or support of the state government and its existing public institutions, and shall take effect July 1, 1989.

Passed the Senate May 10, 1989.

Passed the House May 10, 1989.

Approved by the Governor June 2, 1989, with the exception of certain items which were vetoed.

Filed in Office of Secretary of State June 2, 1989.

Note: Governor's explanation of partial veto is as follows:

"I am returning herewith, without my approval as to sections 123(1),(3),(4),(5),(6), 125(4), 208(3), 209(1), 213(7),(8), 214(4), 218(6), 221(9),(12),(17),(18), 222(1),(2), 225(2), 230(2), 304(7), 313(4), 316(1), 503(10), 601(2), 602(2), 610(2), 709(3), 804, 805, 809, 810, and 813 of Engrossed Substitute Senate Bill No. 5352, entitled:

"AN ACT Relating to fiscal matters; making appropriations and authorizing expenditures for the operations of state agencies for the fiscal biennium beginning July 1, 1989, and ending June 30, 1991."

My reasons for vetoing these sections are as follows:

Section 123(1), page 12, Motor Vehicle Savings

Subsection 1 requires that \$3,200,000 General Fund-State be placed in reserve as a consequence of savings generated by implementation of the motor vehicle review team report. That report identifies potential savings once implementation of the recommendations occur; however, it does not estimate savings to the General Fund-State, separate from savings to other funds. It is premature to estimate and require reserving of General Fund-State monies until planning for the implementation has been completed and the specific sources of savings are identified along with the type of benefiting budget.

Section 123(3), page 13, Handicapped Program Enrollment

Subsection 3 requires forecasting of K-12 handicapped enrollment by the Office of Financial Management (OFM). OFM has normally provided forecasts of budget drivers deemed critical to budget analysis and development, including forecasting K-12 handicapped enrollment. The agency will continue to do this work within its available resources. Specific direction in the budget is unnecessary.

Section 123(4), page 13, Handicapped Education Study

Subsection 4 reduces flexibility in the Office of Financial Management by requiring it to spend \$200,000 General Fund-State appropriation solely for a study of handicapped education. Removing this provision will allow the agency to more effectively perform a study of handicapped education, consistent with the goal of this provision and provide a report by December 1, 1989.

Section 123(5), page 13, Master License Center Transfer

Subsection 5 provides that if the Master License Center does not have sufficient funds for the 1989-91 biennium, then the Office of Financial Management shall transfer amounts associated with savings in benefiting agencies to Master License Center. This strategy was started in the current biennium and abandoned due to difficulties in estimating savings in the benefiting agencies. There is no reason to believe it would be successful for the 1989-91 biennium.

Section 123(6), page 13, Architectural Cost Specialist

Subsection 6 provides for \$130,000 of the General Fund-State appropriation solely for an architectural or structural cost specialist in the Office of Financial Management for analysis related to the capital budget. While the agency does need this additional analysis, my veto provides the agency with the flexibility to obtain this assistance either by hiring staff or seeking consultation.

Section 125(4), page 14, Salary Survey Process

This subsection provides for legislative staff oversight of the Department of Personnel in the salary survey process. The procedures and methodology of the salary survey are clearly defined in statute. Legislative staff oversight would infringe upon the agency's performance of the salary survey process within these statutory requirements.

Section 208(3), page 32, Consolidated Emergency Assistance Program

This subsection directs the Department of Social and Health Services to eliminate the Consolidated Emergency Assistance Program. The program provides assistance to families and pregnant women in emergent circumstances who are not eligible for any other state programs. The proviso does not supersede existing statutory provisions establishing this program. Additionally, elimination of the program might violate federal requirements under the Federal Catastrophic Care Act of 1988.

Section 209(1), page 32, General Assistance-Unemployable

This subsection requires the Department of Social and Health Services to conserve the monies appropriated for the General Assistance-Unemployable (GA-U) program so that assistance is available throughout the biennium. The requirement has the effect of limiting expenditures to the current forecast.

Forecasts of demand for income assistance programs are revised during budget periods due to changes in predictive variables. An additional factor affecting the GA-U forecast is the revision to the Alcohol and Drug Abuse Treatment and Support Act (ADATSA) in section 212 of this act and in Reengrossed Substitute Senate Bill No. 5897. Clients who will be eligible for ADATSA shelter under the revised standards also will be eligible for GA-U. Although these clients will be eligible for either ADATSA or GA-U, all of the funding was appropriated to the ADATSA program.

If actual demand for assistance exceeds the current forecast during the biennium, then the Department of Social and Health Services would have to apply a ratable reduction to the grant standard. I do not support the imposition of a ratable reduction as the only appropriate method to manage unpredictable caseload growth.

Section 213(7), page 36, Chiropractic Services

Section 213(7) prohibits the Department of Social and Health Services from providing chiropractic services as an optional service under the Medical Assistance program. Since many eligible recipients rely on this type of treatment, to not allow for this service would be inconsistent with the overall objectives of the Medical Assistance program.

Section 213(8), page 35, Medicaid Disproportionate Share

Section 213(8) requires that the Department of Social and Health Services expend 57 percent of the medicaid disproportionate share appropriation in Fiscal Year 1990 and requires continuation of payment advances for Harborview. This language is unduly prescriptive and limits the Department's discretion in employing periodic payment advances.

Section 214(4), page 37, Allocation of Funds to Community Health Clinics

This subsection ensures that each clinic receives at least 95 percent of the amount received in the prior fiscal year. The Department of Social and Health Services is also required to promulgate rules to develop an allocation formula and eligibility criteria for distribution and receipt of program monies. It is my intent that community clinics have a reasonably predictable funding level from this appropriation. However, the Department needs administrative flexibility to contract with clinics which best provide required services, or with clinics in health care access problem areas. I will direct the Department of Social and Health Services to promulgate rules under RCW 34.05 to develop an allocation formula for distributing money to community health clinics and to develop eligibility criteria for receipt of program monies.

Section 218(6), page 41, Foster Care Financial Participation Schedule

This subsection sets a financial participation schedule for foster care support collections. This proviso, if enacted, would be inoperative, as it would not supersede existing statutes which require the use of the current child support schedule as the means test for foster care collections.

Section 221(9), page 44, Bordertowns

Subsection 9 requires the Department of Community Development to report to the Legislature on the distribution and the amount of grants to bordertowns. Funding for the grants is provided in RCW 66.08.195 as a set percentage of the Liquor Control Board excess funds for distribution. The requirement that the amount of the distribution be substantially equal to the current level of expenditure is technically unworkable. The Liquor Control Board cannot control factors such as liquor sales that generate the excess funds to that level of specificity. Neither does the Liquor Control Board have the option to distribute the excess funds in any manner other than that required by statute. I will ask the Department of Community Development to report to the Legislature the amount of excess funds generated by the three-tenths of one percent statutory requirement that are distributed to bordertowns.

Section 221(12), page 45, Lewis County Technological Demonstration Project

Subsection 12 provides \$475,000 to continue the Lewis County Technological Demonstration project. Funding for this project, a mobile vocational training program unit operated in conjunction with the school district, was not included in the Department of Community Development's budget recommendation. Vetoing this subsection provides the agency the flexibility, subject to the Office of Financial Management's allotment control, to adapt its appropriations to address the agency's most serious needs. A portion of these funds will be used to complete the pilot project and address the intent of the original legislation.

Section 221(17), page 45, High Risk Youth

Subsection 17 provides \$400,000 for a pilot demonstration project for high risk youth pursuant to Engrossed Second Substitute Senate Bill No. 5624. Inasmuch as the bill did not pass, removal of the subsection will allow the agency the flexibility to better manage within financial constraints.

Section 221(18), page 45-46, Growth Strategies Commission

Subsection 18 establishes the Growth Strategies Commission in the Department of Community Development, consisting of 17 members appointed by legislative leadership, six of whom are legislative members. I applaud those legislators with the foresight to recognize that growth strategies planning is essential to the state. However, it is inappropriate to use appropriations to an executive agency to support what is essentially a legislative effort. I will, establish a Growth Strategies Commission by executive order that will include legislative representation among its members.

Section 222(1)(2), page 46, Human Rights Commission

Subsections 1 and 2 were included in my executive request budget, and would require the agency to manage federal cases and the use of Attorney General services within specific dollar constraints. These constraints were tied to the budget level that I recommended to the Legislature. The intent of the provisoes was that the agency would use state dollars to requalify for the federal dollars in the next contract negotiations with the federal government. Since the Legislature did not provide appropriations for this purpose, the provisoes are unduly restrictive to the agency trying to manage within severely limited resources.

Section 225(2), page 47, Family and Medical Leave Act

This subsection reduces flexibility in the Department of Labor and Industries' budget by requiring it to expend \$300,000 of the General Fund-State appropriation solely for the Family and Medical Leave Act. Funding for this activity was not added to the Department's budget and must be absorbed in existing programs. The agency plans to support the program implemented in Reengrossed Substitute House Bill No. 1581.

Section 230(2), page 48, Hospital Data Collection

This subsection reduces flexibility in the Department of Health's budget by requiring expenditure of this appropriation solely for hospital data collection. While it is clear that hospital data collection is an important function of the new department, it may be possible to utilize some of the available resources for other essential health-related activities.

Section 304(7), page 55, Department of Ecology

This subsection provides \$1,000,000 from the solid waste management account to assist local governments pursuant to section 7 of Engrossed Substitute House Bill No. 1671. Section 7 of that bill was vetoed, which makes this subsection moot. The veto of this subsection is not intended to forsake its intent. Therefore, I am directing the Department of Ecology to make \$1,000,000 available from the Solid Waste Management Account to local governments for the development of materials to promote waste reduction and recycling.

Section 313(4), page 64, Simpson Hatchery

Subsection 4 provides \$276,000 solely for the maintenance of current operations at the Simpson Hatchery. Problems with water quality in the Chehalis River have greatly reduced the survival level of fry. Funding has previously been provided to assess the problem and, if possible, recommend a solution. The field work for that study will be completed this year and it is anticipated that the results should be complete in late spring of 1990. Until a solution to the problem is recommended, continued operation of the hatchery is not a prudent use of limited public funds. If the water quality problems can be corrected, a portion of this \$276,000 shall be used to implement the solution. Funds not so utilized shall be held in reserve.

Additionally, subsection 5 provides \$1,810,000 for recreational salmon enhancement projects. While I support expenditures for recreational salmon enhancement,

restricting them solely for recreational projects is impractical. Due to the migratory nature of salmon, and the complex management activities of both commercial and recreational fisheries, it is not possible to ensure that recreational anglers are the sole beneficiaries of the enhancement projects.

While I am not vetoing the specific language in subsection 5, I want to assure the Legislature that this funding will be used for recreationally oriented salmon enhancement.

Section 316(1), page 68, Common School Construction

Section 316 allows lands and timber to be taken out of trust status and reserved for wildlife habitat, recreation or conservation. The trust funds would be compensated for the timber, and land of equal value would be traded for the land being removed from the trust.

Subsection 1 requires that the lands and timber purchased by the Department of Natural Resources for purposes of this section shall be based on a finding by the Board of Natural Resources in consultation with the House Appropriations Committee and the Senate Ways and Means Committee. The Board of Natural Resources is responsible for the management of the trusts. Requiring consultation with the legislative fiscal committees is an intrusion on the authority of the Board and hinders its ability to fulfill its trust responsibilities.

In addition, the requirement that the Board "find" that the timber "should not be harvested" may prove an impediment to accomplishing the intent of the section. The Board is charged with maximizing the return to the trust funds as trustees. No criteria is specified as a basis for determining which timber should not be harvested. For the Board to find that trust land timber should not be harvested would be in conflict with the Board's mission to maximize benefit to the trust funds.

Without subsection 1, the Board will be able to determine which timber would be desirable not to harvest at this time, for reasons consistent with its statutory trust obligations. Vetoing this subsection will permit the intent of the section to be accomplished without undue restrictions.

Section 503(10), page 84, School Administrator Salary Increases

This subsection limits salary increases for school administrators next biennium to the percentage increase provided by the Legislature. This restriction would unduly limit the ability of local school directors to address the unique needs of their individual districts. The Legislature has given the school system less state funds for school administrator salary increases. This alone will act to limit salary increases. This subsection also requires annual justification of average salary increases in excess of the increase in state-funded salary increases provided by the Legislature. Currently, school districts report salaries for all staff annually. Repeating local debates to justify salary increases for school administrators would be a meaningless reporting requirement that has no relationship to assessing or improving the quality of education available to our children.

Section 601(2), page 102, Student Quality Standard

Section 601(2) of the bill provides for a target level of spending per full time equivalent student at each of the institutions for the entire biennium. A certain level of flexibility is provided in meeting the target, and penalties are stated for variances greater than 2 percent.

I concur with the established method of controlling amounts spent per student. I also agree with the philosophy of setting penalties to ensure compliance with legislative priorities. However, I cannot agree with the penalty clause, since it is too restrictive in that it applies after the first year of the biennium. The target level of spending is based on the biennial budget and any corresponding penalty should be based on an institution's ability to meet the target over a biennium.

Section 602(2), page 106, Community College Faculty

Section 602(2) of the bill places restrictions on the use of enhancement dollars to convert part-time faculty to full-time status at some of the community colleges. This restriction would unduly limit the flexibility of the colleges to manage faculty hiring practices to accomplish the colleges' goals and objectives.

Section 610(2), page 111, State Writing Project

Section 610(2) of the bill provides that \$50,000 of the Higher Education Coordinating Board's (HECB) budget be used to establish a state writing project for public school teachers.

During a time of continued legislative demands of the HECB for centralized information, reporting, and program review involving our colleges and universities, the Legislature reduced the HECB base budget by \$250,000. Veto of this proviso will help the HECB to continue high priority services to the Legislature and executives.

Section 709(3), page 119, For the Governor—Indian Claims

This subsection imposes a requirement on the Attorney General to appear for, and represent owners of, owner-occupied real estate in all cases in which a member of a tribe signatory to the agreement raises a claim of Indian title for land within the properties comprising the agreement. No precedent exists for Attorney General representation of private citizens related to property matters. Other recourse for legal assistance is available to private citizens, typically through their title insurance. Required involvement of the Attorney General in such matters would create unacceptable difficulty in the Attorney General's management of resources appropriated for the specific statutory responsibilities of the office.

Section 804, page 134, OFM Review of Compensation Plans

This section would require all agencies to route through the Office of Financial Management (OFM) any request to the Department of Personnel for reclassification or modifications of any compensation plans or schedules prior to submittal to the State Personnel Board for action. While I agree with the intent of this language, which is to strengthen the review process of actions before the State Personnel Board, as written, this section would be prohibitively difficult to administer. The Office of Financial Management currently review such actions of cabinet agencies based on specific criteria. The language of this section requires that all classification actions be reviewed by OFM regardless of their degree of significance. Lacking provisions to establish thresholds and limits under which to administer this review, the bureaucratic entanglements outweigh the benefits of this section.

Section 805, page 134, Personal Service Contracts

Section 805 requires the Office of Financial Management to approve in advance any General Fund-State personal service contract expenditures that exceed prior biennium percentages.

This provision is vague and unworkable. From a policy standpoint, it makes little sense to relate contract expenditures in two different biennia, because these types of expenditures are often project in nature. Administratively, the prior biennium's percentage of personal service contracts creates an arbitrary benchmark that would be difficult to calculate or impose. There are no legislative appropriations for 1989-91 person service contracts by fund source; and final 1987-89 percentages will not be available until biennial close-out of statewide accounting records, several months after the limitations are supposedly in place.

I am also concerned by the language that exempts appropriations in the judicial agencies. This implies that all other elected officials are covered by the restrictions contained in Section 805. Since the Office of Financial Management does not presently have any authority over allotments for all other elected officials, there is an apparent conflict between the appropriations act and the State Budget, Accounting and Reporting Act (RCW 43.88).

Section 809, page 135, Biennial Funding

The statement that new programs are funded for the entire biennium, unless otherwise provided in either the appropriations act or legislative notes, raises some disturbing questions about the legal status of legislative notes. Although I recognize that this language was intended to minimize "bow-wave" impacts, agencies are already required to allot expenditures in conformance with legislative intent. Legislative notes are the work of legislative staff, not elected representatives, and these documents are sometimes prepared months after appropriations are enacted. Legislative intent should be defined by legislators in the appropriations act and not subject to retroactive elaboration.

Section 810, page 135, Gambling Revolving Fund Transfer

This section transfers \$2,000,000 from the Gambling Revolving Fund to the General Fund during the 1989-91 fiscal biennium. The Gambling Revolving Fund, established as an allotted but nonappropriated fund in the Gambling Commission's enabling statute (RCW 9.46), receives revenues from licensing, penalties, forfeitures, and other gambling-specific sources to support the regulation and enforcement of charitable and social gambling activities in this state. These statutes direct that gambling activities produce a revenue stream—at local government option—for local government, but they do not expressly provide for these funds as a source of revenue for the General Fund. The transfer of funds provided by this section is inappropriate.

Veto of this section preserves the financial reserve of the Gambling Commission's operations and the Gambling Revolving Fund, and allows the Commission to continue to manage its revenue stream and the working capital requirements of the agency. I ask that license, penalty, forfeiture, and other revenue source rates be retained at existing levels but not decreased, until such point as the working capital requirements of the agency warrant increases in one or more of the rates.

Section 813, page 137, Public Safety and Education Account Transfer

This section transfers \$2,000,000 from the Public Safety and Education Account (PSEA) to the General Fund on July 1, 1989. The PSEA has a history of volatile revenue collections. After the decline in the most recent revenue forecast for PSEA, allowing this transfer would require agencies expending from this account to begin the biennium with pro rata expenditure allotment reductions. This budget, combined with other legislation, provides a General Fund reserve of less than \$40,000,000. I do not believe that is an adequate reserve; however, I do not feel it is appropriate to force expenditure reductions in the PSEA to add to the General Fund reserve.

With the exceptions of sections 123(1),(3),(4),(5),(6), 125(4), 208(3), 209(1), 213(7),(8), 214(4), 218(6), 221(9),(12),(17),(18), 222(1),(2), 225(2), 230(2), 304(7), 313(4), 316(1), 503(10), 601(2), 602(2), 610(2), 709(3), 804, 805, 809, 810, and 813 of Engrossed Substitute Senate Bill 5352 is approved."
