biennial acquisition target for cost-effective conservation consistent with its identification of achievable opportunities in (a) of this subsection, and meet that target during the subsequent two-year period. At a minimum, each biennial target must be no lower than the qualifying utility's pro rata share for that two-year period of its cost-effective conservation potential for the subsequent ten-year period.

(c)(i) Except as provided in (c)(ii) and (iii) of this subsection, beginning on January 1, 2014, cost-effective conservation achieved by a qualifying utility in excess of its biennial acquisition target may be used to help meet the immediately subsequent two biennial acquisition targets, such that no more than twenty percent of any biennial target may be met with excess conservation savings.

(ii) Beginning January 1, 2014, a qualifying utility may use single large facility conservation savings in excess of its biennial target to meet up to an additional five percent of the immediately subsequent two biennial acquisition targets, such that no more than twenty-five percent of any biennial target may be met with excess conservation savings allowed under all of the provisions of this section combined. For the purposes of this subsection (1)(c)(ii), "single large facility conservation savings" means cost-effective conservation savings achieved in a single biennial period at the premises of a single customer of a qualifying utility whose annual electricity consumption prior to the conservation savings exceeded five average megawatts.

(iii) Beginning January 1, 2012, and until December 31, 2017, a qualifying utility with an industrial facility located in a county with a population between ninety-five thousand and one hundred fifteen thousand that is directly interconnected with electricity facilities that are capable of carrying electricity at transmission voltage may use cost-effective conservation from that industrial facility in excess of its biennial acquisition target to help meet the immediately subsequent two biennial acquisition targets, such that no more than twenty-five percent of any biennial target may be met with excess conservation savings allowed under all of the provisions of this section combined.

(d) In meeting its conservation targets, a qualifying utility may count high-efficiency cogeneration owned and used by a retail electric customer to meet its own needs. High-efficiency cogeneration is the sequential production of electricity and useful thermal energy from a common fuel source, where, under normal operating conditions, the facility has a useful thermal energy output of no less than thirty-three percent of the total energy output. The reduction in load due to high-efficiency cogeneration (~~(shall)~~) must be: (i) Calculated as the ratio of the fuel chargeable to power heat rate of the cogeneration facility compared to the heat rate on a new and clean basis of a best-commercially available technology combined-cycle natural gas-fired combustion turbine; and (ii) counted towards meeting the biennial conservation target in the same manner as other conservation savings.

(e) The commission may determine if a conservation program implemented by an investor-owned utility is cost-effective based on the commission's policies and practice.

(f) The commission may rely on its standard practice for review and approval of investor-owned utility conservation targets.

(2)(a) Except as provided in (j) of this subsection, each qualifying utility (~~shall~~) must use eligible renewable resources or acquire equivalent renewable energy credits, or any combination of them, to meet the following annual targets:

(i) At least three percent of its load by January 1, 2012, and each year thereafter through December 31, 2015;

(ii) At least nine percent of its load by January 1, 2016, and each year thereafter through December 31, 2019; and

(iii) At least fifteen percent of its load by January 1, 2020, and each year thereafter.

(b) A qualifying utility may count distributed generation at double the facility's electrical output if the utility: (i) Owns or has contracted for the distributed generation and the associated renewable energy credits; or (ii) has contracted to purchase the associated renewable energy credits.

(c) In meeting the annual targets in (a) of this subsection, a qualifying utility (~~shall~~) must calculate its annual load based on the average of the utility's load for the previous two years.

(d) A qualifying utility (~~shall be~~) is considered in compliance with an annual target in (a) of this subsection if: (i) The utility's weather-adjusted load for the previous three years on average did not increase over that time period; (ii) after December 7, 2006, the utility did not commence or renew ownership or incremental purchases of electricity from resources other than coal transition power or renewable resources other than on a daily spot price basis and the electricity is not offset by equivalent renewable energy credits; and (iii) the utility invested at least one percent of its total annual retail revenue requirement that year on eligible renewable resources, renewable energy credits, or a combination of both.

(e) The requirements of this section may be met for any given year with renewable energy credits produced during that year, the preceding year, or the subsequent year. Each renewable energy credit may be used only once to meet the requirements of this section.

(f) In complying with the targets established in (a) of this subsection, a qualifying utility may not count:

(i) Eligible renewable resources or distributed generation where the associated renewable energy credits are owned by a separate entity; or

(ii) Eligible renewable resources or renewable energy credits obtained for and used in an optional pricing program such as the program established in RCW 19.29A.090.

(g) Where fossil and combustible renewable resources are cofired in one generating unit located in the (~~Pacific Northwest~~) western interconnection where the cofiring commenced after March 31, 1999, the unit (~~shall be~~) is considered to produce eligible renewable resources in direct

proportion to the percentage of the total heat value represented by the heat value of the renewable resources.

(h)(i) A qualifying utility that acquires an eligible renewable resource or renewable energy credit may count that acquisition at one and two-tenths times its base value:

(A) Where the eligible renewable resource comes from a facility that commenced operation after December 31, 2005; and

(B) Where the developer of the facility used apprenticeship programs approved by the council during facility construction.

(ii) The council (~~shall~~) must establish minimum levels of labor hours to be met through apprenticeship programs to qualify for this extra credit.

(i) A qualifying utility (~~shall be~~) is considered in compliance with an annual target in (a) of this subsection if events beyond the reasonable control of the utility that could not have been reasonably anticipated or ameliorated prevented it from meeting the renewable energy target. Such events include weather-related damage, mechanical failure, strikes, lockouts, and actions of a governmental authority that adversely affect the generation, transmission, or distribution of an eligible renewable resource under contract to a qualifying utility.

(j)(i) Beginning January 1, 2016, only a qualifying utility that owns or is directly interconnected to a qualified biomass energy facility may use qualified biomass energy to meet its compliance obligation under this subsection.

(ii) A qualifying utility may no longer use electricity and associated renewable energy credits from a qualified biomass energy facility if the associated industrial pulping or wood manufacturing facility ceases operation other than for purposes of maintenance or upgrade.

(k) An industrial facility that hosts a qualified biomass energy facility may only transfer or sell renewable energy credits associated with qualified biomass energy generated at its facility to the qualifying utility with which it is directly interconnected with facilities owned by such a qualifying utility and that are capable of carrying electricity at transmission voltage. The qualifying utility may only use an amount of renewable energy credits associated with qualified biomass energy that are equivalent to the proportionate amount of its annual targets under (a)(ii) and (iii) of this subsection that was created by the load of the industrial facility. A qualifying utility that owns a qualified biomass energy facility may not transfer or sell renewable energy credits associated with qualified biomass energy to another person, entity, or qualifying utility.

(l) Beginning January 1, 2019, a qualifying utility may use eligible renewable resources as identified under RCW 19.285.030(12) (g) and (h) to meet its compliance obligations under this subsection (2). A qualifying utility may not transfer or sell these eligible renewable resources to another utility for compliance purposes under this chapter.

(m) Renewable energy credits allocated under RCW 19.285.030(12)(h) may not be transferred or sold to another qualifying utility for compliance under this chapter.

(3) Utilities that become qualifying utilities after December 31, 2006, ~~((shall))~~ must meet the requirements in this section on a time frame comparable in length to that provided for qualifying utilities as of December 7, 2006.

**NEW SECTION. Sec. 3.** A new section is added to chapter 19.285 RCW to read as follows:

(1) Subject to sections 4 and 5 of this act, beginning January 1, 2029, each electric utility must use clean energy resources to meet any new energy or capacity need for Washington retail electric customers.

(2)(a) The requirement established under subsection (1) of this section applies, at a minimum, to: (i) Any new or increased ownership interest in a new or existing electricity generation facility or unit; and (ii) any new or increased contractual commitment that obligates or allows an electric utility to purchase a specified amount of megawatts or megawatt-hours from an electricity generation facility or unit, or a specified percentage of an electricity generation facility or unit.

(b) An electric utility may not enter into a contract for electricity generation to meet new energy or capacity needs if the contract does not specify the sources or origins of the electricity generation.

(3) Except as provided in RCW 19.285.030(15)(b), any tradable certificate of proof of a clean energy resource, including but not limited to a renewable energy credit, associated with the portion of any resource or resources used to meet new energy or capacity needs under this section must be retired for the purposes of this section and cannot be sold, transferred, or used for other purposes. An electric utility may not use a tradable certificate or proof of a clean energy resource, including but not limited to a renewable energy credit, to meet the requirements of this section if the associated energy or capacity has been sold, transferred, or otherwise used separately.

(4) Nothing in this section precludes the use of any of the following resources to meet new energy or capacity needs:

(a) Any purchase at any time by a consumer-owned qualifying utility or small utility from the Bonneville power administration up to a designated amount. The designated amount is the same as the consumer-owned qualifying utility's or small utility's contract high water mark amount identified in their Bonneville regional dialogue power sales contract on the effective date of this section. Any new public utility forming after the effective date of this section would still be eligible for this exemption based on the contract high water mark provided to them by the Bonneville power administration;

(b) Short-term spot market purchases;

(c) Renewal or extension of contracts in effect as of January 1, 2020, where the renewal or extension does not lead to any increase in the energy or capacity provided;

(d) Coal transition power;

(e) Generation resources owned as of the effective date of this section by an electric utility and used by that utility to meet the needs of its customers, until the generation resources are at the end of the facility's useful life, are retired, or cease operations;

(f) Increased megawatt-hours from a generation facility that is owned by an electric utility as of the effective date of this section where the utility uses the increased megawatt-hours to serve the utility's customers and where the utility's ownership interest in the facility does not increase;

(g) Incremental generation from a utility-scale renewable resource or distributed energy resource that results from additional generation that is achieved from increased efficiency or additions of capacity made on or after the effective date of this section; and

(h) Electricity generation that is found by the commission, in accordance with section 3 of this act, or the utility's governing board, in accordance with section 4 of this act, to be required to maintain reliable service and comply with applicable standards of the North American electric reliability corporation or its successor.

(5) An electric utility may procure one or more natural gas-fired generation units if such natural gas-fired generation is necessary to avoid potential conflicts with or compromises to the electric utility's obligation to comply with the mandatory and enforceable reliability standards of the North American electric reliability corporation.

(6) The definitions in this subsection apply throughout this section unless the context clearly requires otherwise.

(a) "Short-term spot market purchase" means: (i) The purchase of energy on the spot market for immediate delivery; or (ii) a contract for the purchase of electricity on the spot market that is for a term of one month or less.

(b) "Spot market" means a public financial market in which electricity is bought, sold, or traded for immediate delivery.

**NEW SECTION. Sec. 4.** A new section is added to chapter 19.285 RCW to read as follows:

(1) Upon its own motion or at the request of an investor-owned utility, the commission must suspend the requirements of section 3 of this act if:

(a) It is likely to result in conflicts with or compromises to the investor-owned utility's obligation to comply with the mandatory and enforceable reliability standards of the North American electric reliability corporation or compromises to the integrity of the investor-owned utility's electrical system; or

(b) The utility demonstrates that the cost of compliance with section 3 of this act would result in costs that would exceed the lowest reasonable cost resource by five percent. An investor-owned utility making a request under this subsection must submit an application to the commission that includes:

(i) An explanation of the reliability or integrity issue and how a temporary exemption from complying with the requirements of section 3 of this act will avoid the reliability or integrity issue; or

(ii) An analysis that demonstrates that the cost of compliance with section 3 of this act would exceed the lowest reasonable cost resource by five percent.

(2)(a) A suspension of the requirements of section 3 of this act must be granted at the time of the motion for such by the utility. The suspension may not be lifted until such time as the commission determines that none of the conditions for the suspension under subsection (1) of this section apply.

(b)(i) As long as a suspension of the requirements in section 3 of this act is in place, the investor-owned utility must file a progress report at least annually, or within an amount of time determined to be reasonable by the commission, on achieving full compliance with the requirements of section 3 of this act; and

(ii) Directing the investor-owned utility to take specific actions to achieve full compliance with the requirements of section 3 of this act.

(3) This section does not permanently relieve an investor-owned utility of its obligation to comply with the requirements of section 3 of this act.

**NEW SECTION. Sec. 5.** A new section is added to chapter 19.285 RCW to read as follows:

(1) Upon its own motion or at the request of a consumer-owned utility, the governing board of a consumer-owned utility must suspend the requirements of section 3 of this act if:

(a) It is likely to result in conflicts with or compromises to the consumer-owned utility's obligation to comply with the mandatory and enforceable reliability standards of the North American electric reliability corporation or compromises to the integrity of the consumer-owned utility's electrical system; or

(b) The utility demonstrates that the cost of compliance with section 3 of this act would result in costs that would exceed the lowest reasonable cost resource by five percent. A consumer-owned utility making a request under this subsection must submit an application to the governing board that includes:

(i) An explanation of the reliability or integrity issue and how a temporary exemption from complying with the requirements of section 3 of this act will avoid the reliability or integrity issue; or

(ii) An analysis that demonstrates that the cost of compliance with section 3 of this act would exceed the lowest reasonable cost resource by five percent.

(2)(a) A suspension of the requirements of section 3 of this act must be granted at the time of the motion for such by the utility. The suspension may not be lifted until such time as the governing board determines that none of the conditions for the suspension under subsection (1) of this section apply.

(b)(i) As long as a suspension of the requirements in section 3 of this act is in place, the consumer-owned utility must file a progress report at least annually, or within an amount of time determined to be reasonable by the governing board, on achieving full compliance with the requirements of section 3 of this act; and

(ii) Directing the consumer-owned utility to take specific actions to achieve full compliance with the requirements of section 3 of this act.

(3) This section does not permanently relieve a consumer-owned utility of its obligation to comply with the requirements of section 3 of this act.

**NEW SECTION. Sec. 6.** (1) This section is the tax preference performance statement for the tax preferences established in sections 7 through 12, chapter . . . , Laws of 2019 (sections 7 through 12 of this act). This performance statement is only intended to be used for subsequent evaluation of the tax preferences. It is not intended to create a private right of action by any party or be used to determine eligibility for preferential tax treatment.

(2) The legislature categorizes the tax preferences created under sections 7 through 12, chapter . . . , Laws of 2019 (sections 7 through 12 of this act) as intended to induce certain designated behavior by taxpayers, as indicated in RCW 82.32.808(2)(a).

(3) It is the legislature's specific public policy objective to reduce the cost of transitioning to electric generation sources that have very low or zero carbon dioxide emissions. It is the intent of the legislature to provide a suite of tax preferences in order to reduce the cost to ratepayers of constructing and operating new renewable energy generation capacity equal to or greater than necessary to serve projected Washington electricity load growth, as measured by projections in the most recently adopted Northwest power and conservation council power plan.

(4) The legislature does not intend to extend the expiration date of the tax preferences contained in this act.

(5) Because the tax preferences contained in this act are not for the primary purpose of creating or retaining jobs or attracting or attaining businesses, and because the legislature does not intend to extend the expiration of the tax preferences, the legislature does not intend for a review by the joint legislative audit and review committee.

**NEW SECTION. Sec. 7.** A new section is added to chapter 82.08 RCW to read as follows:

(1) A person who has paid tax under RCW 82.08.020 for personal property used for carbon reduction investments at, or to offset the greenhouse gas emissions of, an energy-intensive trade-exposed facility; tangible personal property that will be incorporated as an ingredient or component of buildings or other structures for carbon reduction investments at, or to offset the greenhouse gas emissions of, an energy-intensive trade-exposed facility; or for labor and services rendered with respect to such buildings, structures, or personal property, is eligible for an exemption from the state share of the tax in the form of a credit, as provided in this section. A person claiming an exemption must pay the

tax and then take a credit equal to the state share of retail sales tax paid under RCW 82.08.020. The person must submit information, in a form and manner prescribed by the department, specifying the amount of qualifying purchases or acquisitions for which the exemption is claimed and the amount of exempted tax.

(4) Credits may not be claimed under this section for taxable events occurring on or after January 1, 2029.

**NEW SECTION. Sec. 8.** A new section is added to chapter 82.12 RCW to read as follows:

(1) A person who is subject to tax under RCW 82.12.020 for personal property used for carbon reduction investments at, or to offset the greenhouse gas emissions of, an energy-intensive trade-exposed facility, or for tangible personal property that will be incorporated as an ingredient or component of buildings or other structures for carbon reduction investments at, or to offset the greenhouse gas emissions of, an energy-intensive trade-exposed facility, or for labor and services rendered with respect to such buildings, structures, or personal property, is eligible for an exemption from the state share of the tax in the form of a credit, as provided in this section. The amount of the credit equals the state share of use tax computed to be due under RCW 82.12.020. The person must submit information, in a form and manner prescribed by the department, specifying the amount of qualifying purchases or acquisitions for which the exemption is claimed and the amount of exempted tax.

(2) For the purposes of this section, the terms "energy-intensive trade-exposed facility," "carbon reduction investment," and "greenhouse gas" have the same meaning as provided in section 7 of this act.

(3) A person reporting under the tax rate provided in this section must file a complete annual tax performance report with the department under RCW 82.32.534.

(4) Credits may not be claimed under this section for taxable events occurring on or after January 1, 2029.

**NEW SECTION. Sec. 9.** A new section is added to chapter 82.08 RCW to read as follows:

(1) A person who has paid tax under RCW 82.08.020 for machinery and equipment used to reduce the greenhouse gas emissions associated with the transportation of gas through a gas pipeline, or to sales of or charges made for labor and services rendered in respect to installing such machinery and equipment, is eligible for an exemption from the state share of the tax in the form of a credit, as provided in this section. A person claiming an exemption must pay the tax and then take a credit equal to the state share of retail

sales tax paid under RCW 82.08.020. The person must submit information, in a form and manner prescribed by the department, specifying the amount of qualifying purchases or acquisitions for which the exemption is claimed and the amount of exempted tax.

(2) The definitions in this subsection apply throughout this section and section 10 of this act unless the context clearly requires otherwise.

(a) "Gas" means natural gas, flammable gas, or toxic or corrosive gas.

(b)(i) "Gas pipeline" means all parts of a pipeline facility through which gas moves in transportation, including, but not limited to, line pipe, valves, and other appurtenances connected to line pipe, compressor units, metering stations, regulator stations, delivery stations, holders, and fabricated assemblies.

(ii) "Gas pipeline" does not include any pipeline facilities, other than a master meter system, owned by a consumer or consumers of the gas, located exclusively on the consumer or consumers' property, and none of the gas leaves that property through a pipeline.

(c) "Greenhouse gas" includes carbon dioxide, methane, nitrogen trifluoride, nitrous oxide, sulfur hexafluoride, hydrofluorocarbons, perfluorocarbons, and other fluorinated greenhouse gases.

(d)(i) "Machinery and equipment" includes fixtures, devices, and support facilities that are integral and necessary to the transportation of gas through a gas pipeline.

(ii) "Machinery and equipment" does not include: (A) Hand-powered tools; (B) property with a useful life of less than one year; (C) repair parts required to restore machinery and equipment to normal working order; (D) replacement parts that do not increase productivity, improve efficiency, reduce greenhouse gas emissions, or extend the useful life of machinery and equipment; (E) buildings; or (F) building fixtures that are not integral and necessary to the transportation of gas that are permanently affixed to and become a physical part of a building.

(3) A person claiming the tax preference provided in this section must file a complete annual tax performance report with the department under RCW 82.32.534.

(4) Credits may not be claimed under this section for taxable events occurring on or after January 1, 2029.

**NEW SECTION. Sec. 10.** A new section is added to chapter 82.12 RCW to read as follows:

(1) A person who has paid tax under RCW 82.12.020 for machinery and equipment used to reduce the greenhouse gas emissions associated with the transportation of gas through a gas pipeline, or to sales of or charges made for labor and services rendered in respect to installing such machinery and equipment, is eligible for an exemption from the state share of the tax in the form of a credit, as provided in this section. A person claiming an exemption must pay the tax and then take a credit equal to the state share of use tax paid under RCW 82.12.020. The person must submit information, in a form and manner prescribed by the

department, specifying the amount of qualifying purchases or acquisitions for which the exemption is claimed and the amount of exempted tax.

(2) A person reporting under the tax rate provided in this section must file a complete annual tax performance report with the department under RCW 82.32.534.

(3) Credits may not be claimed under this section for taxable events occurring on or after January 1, 2029.

(4) The definitions in section 9 of this act apply to this section.

**Sec. 11.** RCW 82.16.055 and 1980 c 149 s 3 are each amended to read as follows:

(1) In computing tax under this chapter there ~~((shall be))~~ is deducted from the gross income:

(a) An amount equal to the cost of production at the plant for consumption within the state of Washington of:

(i) Electrical energy produced or generated from ~~((co)generation))~~ combined heat and power as defined in RCW ~~((82.35.020))~~ 19.280.020; and

(ii) Electrical energy or gas produced or generated from renewable ~~((energy))~~ resources ~~((such as solar energy, wind energy, hydroelectric energy, geothermal energy, wood, wood wastes, municipal wastes, agricultural products and wastes, and end use waste heat))~~ as defined in RCW 19.285.030; and

(b) Those amounts expended to improve consumers' efficiency of energy end use or to otherwise reduce the use of electrical energy or gas by the consumer.

(2) This section applies only to the following facilities:

(a) New facilities for the production or generation of energy from ~~((co)generation or renewable energy resources))~~ combined heat and power or renewable resources or measures to improve the efficiency of energy end use on which construction or installation is begun after June 12, 1980, and before January 1, 1990; and

(b) New facilities for the production or generation of electricity from renewable resources on which construction or installation is begun after January 1, 2020, and before January 1, 2028.

(3) Deductions under subsection (1)(a) of this section ~~((shall be))~~ are allowed for a period not to exceed thirty years after the project is placed in operation.

(4) Measures or projects encouraged under this section ~~((shall))~~ must be reasonably expected to save, produce, or generate energy at a total incremental system cost per unit of energy delivered to end use which is less than or equal to the incremental system cost per unit of energy delivered to end use from similarly available conventional energy resources which utilize nuclear energy or fossil fuels and which the gas or electric utility could acquire to meet energy demand in the same time period.

(5) The department of revenue, after consultation with the utilities and transportation commission in the case of investor-owned utilities and the governing bodies of locally regulated utilities, (~~shall~~) must determine the eligibility of individual projects and measures for deductions under this section.

(6) This section expires January 1, 2029.

NEW SECTION. Sec. 12. A new section is added to chapter 82.16 RCW to read as follows:

(1) The definitions in this subsection apply throughout this section unless the context clearly requires otherwise.

(a) "Carbon reduction investment" means an investment in support of eligible projects or actions that reduce, prevent, or remove from the atmosphere the emissions of greenhouse gases in the state. An eligible project or action includes, but is not limited to, investment in the following: (i) Installation of electric vehicle chargers and related infrastructure and other transportation electrification measures; (ii) demand side management of electricity consumption; (iii) energy storage technologies; and (iv) carbon sequestration programs, including forest health investments.

(b) "Greenhouse gas" means carbon dioxide, methane, nitrogen trifluoride, nitrous oxide, sulfur hexafluoride, hydrofluorocarbons, perfluorocarbons, and other fluorinated greenhouse gases.

(2) In computing the tax imposed under this chapter, a credit is authorized for persons who reduce their own greenhouse gas emissions through carbon reduction investment projects.

(3)(a) The credit is equal to the total amount of carbon reduction investment project expenditures of a person.

(b) Credit may be earned by a person for multiple carbon reduction investment projects.

(c) Credit earned under this section may equal or exceed the tax otherwise due under this chapter for the tax reporting period. Any unused credit may be accrued and carried over until it is used.

(4) No application is necessary for the tax credit. The person must keep records necessary for the department to verify eligibility under this section. The person is subject to all of the requirements of chapter 82.32 RCW. No refunds may be granted for credits under this section.

(5) If at any time the department finds that a person is not eligible for the tax credit under this section, the amount of taxes for which a credit has been claimed is immediately due. The department must assess interest, but not penalties, on the taxes for which the person is not eligible. The interest must be assessed at the rate provided for delinquent excise taxes under chapter 82.32 RCW, is retroactive to the date the tax credit was taken, and accrues until the taxes for which a credit has been used are repaid.

(6) A person claiming the credit under this section must file a complete annual report with the department under RCW 82.32.534.

(7) The total statewide amount of credit allowed under this section must not exceed fifty million dollars.

(8) This section expires January 1, 2029.

NEW SECTION. Sec. 13. A new section is added to chapter 82.04 RCW to read as follows:

(1) A person who is subject to tax under this chapter on gross income from sales of natural or manufactured gas, timber, timber products, wood products, or agricultural products, or an energy-intensive trade-exposed business, is allowed a credit against the tax due under this chapter for forest fire risk reduction activities, as provided in this section. The credit equals fifteen dollars multiplied by the forest fire risk reduction factor, as determined by this section.

(2) Credits are available on a first-in-time basis. The department must keep a running total of all credits allowed under this section and section 14 of this act during each fiscal year. The department may not allow credits that would cause the total credits taken under this section and section 14 of this act to exceed eight million three hundred thousand dollars in any fiscal year. If all or part of a claim for credit is disallowed under this subsection, the disallowed portion is carried over to the next fiscal year. However, the carryover into the next fiscal year is only permitted to the extent that the limit on total credits for the next fiscal year is not exceeded. Priority must be given to credits carried over from a previous fiscal year. The department must provide written notice to any person who has claimed tax credits in excess of the limitation in this subsection. The notice must indicate the amount of tax due and provide that the tax be paid within thirty days from the date of notice. The department may not assess penalties or interest as provided in chapter 82.32 RCW on the amount due in the initial notice if the amount due is paid by the due date specified in the notice, or any extension thereof.

(3) The credit allowed under this section may be used against any tax due under this chapter, and may be carried over until used, except as provided in subsection (2) of this section. No refunds may be granted for credits under this section.

(4) Credits earned under this section may be claimed only on returns filed electronically with the department using the department's online tax filing service or other method of electronic reporting as the department may authorize. No application is required to claim the credit, but the taxpayer must keep records necessary for the department to determine eligibility under this section.

(2) Credits are available on a first-in-time basis. The department must keep a running total of all credits allowed under this section and section 13 of this act during each fiscal year. The department may not allow credits that would cause the total credits taken under this section and section 13 of this act to exceed eight million three hundred thousand dollars in any fiscal year. If all or part of a claim for credit is disallowed under this subsection, the disallowed portion is carried over to the next fiscal year. However, the carryover into the next fiscal year is only permitted to the extent that the limit on total credits for the next fiscal year is not exceeded. Priority must be given to credits carried over from a previous fiscal year. The department must provide written notice to any person who has claimed tax credits in excess of the limitation in this subsection. The notice must indicate the amount of tax due and provide that the tax be paid within thirty days from the date of notice. The department may not assess penalties or interest as provided in chapter 82.32 RCW on the amount due in the initial notice if the amount due is paid by the due date specified in the notice, or any extension thereof.

(3) The credit allowed under this section may be used against any tax due under this chapter, and may be carried over until used, except as provided in subsection (2) of this section. No refunds may be granted for credits under this section.

(4) Credits earned under this section may be claimed only on returns filed electronically with the department using the department's online tax filing service or other method of electronic reporting as the department may authorize. No application is required to claim the credit, but the taxpayer must keep records necessary for the department to determine eligibility under this section.

(5) No person may claim a credit against taxes due under both this chapter and chapter 82.04 RCW for the same forest fire risk reduction activity.

(6) The definitions in section 13 of this act apply throughout this section.
