(A) Results in the creation of significant private sector jobs or significant private sector capital investment as determined by the board;

(B) Is part of a local economic development plan consistent with applicable state planning requirements;

(C) Can demonstrate project feasibility using standard economic principles; and

(D) Is located in a rural community as defined by the board, or a rural county;

(c) The board must develop guidelines for local participation and allowable match and activities.

(d) An application must demonstrate local match and local participation, in accordance with guidelines developed by the board.

(e) An application must be approved by the local government and supported by the local associate development organization or local workforce development council or approved by the governing body of the federally recognized Indian tribe.

(f) The board may allow de minimis general system improvements to be funded
if they are critically linked to the viability of the project.

(g) An application must demonstrate convincing evidence that the median hourly wage of the private sector jobs created after the project is completed will exceed the countywide median hourly wage.

(h) The board must prioritize each proposed project according to:

(i) The relative benefits provided to the community by the jobs the project would create, not just the total number of jobs it would create after the project is completed, but also giving consideration to the unemployment rate in the area in which the jobs would be located;

(ii) The rate of return of the state’s investment, including, but not limited to, the leveraging of private sector investment, anticipated job creation and retention, and expected increases in state and local tax revenues associated with the project;

(iii) Whether the proposed project offers a health insurance plan for employees that includes an option for dependents of employees;

(iv) Whether the public facility investment will increase existing capacity necessary to accommodate projected population and employment growth in a manner that supports infill and redevelopment of existing urban or industrial areas that are served by adequate public facilities. Projects should maximize the use of existing infrastructure and provide for adequate funding of necessary transportation improvements;

(v) Whether the applicant’s permitting process has been certified as streamlined by the office of regulatory assistance; and

(vi) Whether the applicant has developed and adhered to guidelines regarding its permitting process for those applying for development permits consistent with section 1(2), chapter 231, Laws of 2007.

(i) A responsible official of the local government or the federally recognized Indian tribe must be present during board deliberations and provide information that the board requests.

(5) Before any financial assistance application is approved, the local government or the federally recognized Indian tribe seeking the assistance must demonstrate to the community economic revitalization board that no other timely source of funding is available to it at costs reasonably similar to financing available from the community economic revitalization board.

The appropriation in this section is subject to the following conditions and limitations:

The office of financial management, in consultation with the state parks and recreation commission, shall develop a study of the commission’s capital budget process. The study shall be contracted to an independent third-party consultant with expertise in the state capital budget development process, capital project cost estimating, value engineering, and related professional fields. The study must be provided to the fiscal committees of the legislature by September 1, 2018. The purpose of the study is to evaluate commission practices in comparison with best practices in public sector capital program design and execution.

The study must include an assessment of:

(1) The commission's capital budget development process for its 2019-2021 biennial budget and ten-year capital plan, including analysis of:

(a) Project identification and scoping processes;

(b) Project cost estimation methods and tools; and
(c) Project prioritization criteria and methods.

(2) State parks capital budget staffing compared to other public and private industry standards, including the percent of project funding that is used for staff FTEs and the number and function of:

(a) Design professionals (including engineers and landscape architects);

(b) Construction and Design project managers; and

(c) Other staff supported by capital funds.

(3) Historical capital project funding including, at a minimum:

(a) 2013-2015 and 2015-2017 capital budgets and expenditures;

(b) An analysis of actual project costs in comparison to budgeted costs including the percentage that projects were over and under the construction cost estimate and the total project cost estimate, both individually and in aggregate; and

(c) Percentage of reappropriations.

(4) The basis for cabin and comfort station project costs to include:

(a) Project objectives and customer requirements;

(b) Project elements (scale, materials, utilities, location, aesthetics, and other considerations significantly affecting project costs); and

(c) Operational fiscal analysis including projected operating costs and revenue from cabins; and

(d) Detailed cost estimates of previous and future cabin and comfort station projects.

(5) Costs compared to at least two other states with similar state parks and two other Washington state or local governments.

(6) An analysis of development costs associated with state park projects that differ from other public works projects and commercial private sector projects.

Higher Education and State Facility Financing Study ($20000021)

The appropriation in this section is subject to the following conditions and limitations:

(1) The office of financial management shall submit a higher education capital facility study to the governor and the appropriate legislative fiscal committees by October 1, 2018. In designing and conducting the study, the office of financial management shall consult with legislative and fiscal committee leadership, the department of revenue, the state investment board, the student achievement council, the state board for community and technical colleges, and the public four-year institutions of higher education. The study must include:

(a) A review of the methods that are used to fund higher education facility expansion and improvements in other states and the relative portions of such expenditures that are borne by students, state taxpayers, federal grants, and private contributions;

(b) An examination of alternatives for reducing facility construction and maintenance expenditures per student through strategies such as expansion of distance learning opportunities, increased scheduling of classes during evenings and weekends, the establishment of expected cost benchmarks by facility type, and other means;

(c) An assessment of the strengths and weaknesses of potential new revenue sources that might be applied to the funding of higher education facilities. These alternative sources must include, but not be limited to, adjusting student fees to support a larger share of the cost of such facilities, bonding against student fee revenues, utilizing local tax revenues to support local higher education capital needs, promoting business participation in the financing of programs strongly linked to area economic development, and other means;
(d) Learning space utilization standards for higher education facilities. The standards may include, but are not limited to:

(i) Percentage of hours utilized per scheduling window;
(ii) Percentage of seats utilized;
(iii) Square feet per seat; and
(iv) Type of technology utilized in learning spaces;

(e) Reasonableness of cost standards for higher education capital facilities. The standards may include, but are not limited to:

(i) Costs per square feet per type of facility; and
(ii) Expected life-cycle costs; and

(f) A criteria scoring and weighting tool for use by four-year higher education institutions and other decision makers that measures two components:

(i) A measure of achievement of higher education capital projects criteria; and
(ii) A measure to weigh the importance of those criteria.

(2) The office of financial management shall submit a state capital facility financing study to the governor and the appropriate legislative fiscal committees by December 1, 2018. In designing and conducting the study, the office of financial management shall consult with legislative and fiscal committee leadership. The appropriation in this section is subject to the following conditions and limitations: The appropriation is provided solely for grants to well-managed, publicly-owned group A water utilities for the repair and consolidation of group A and B water systems under the following conditions:

(1) A grant can be provided when a water system has been voluntarily transferred to a publicly owned water utility within the last three years. The grant may be used for repair and consolidation costs.

(2) The grant applicant must provide the department of health with an accounting of rehabilitation costs and the value of the system. The grant must be used primarily to cover project design and construction costs, and only in limited cases to cover the cost of system acquisitions, as determined by the department of health in evaluating grant applications.

(3) Grants must primarily be used to cover project construction costs that customers benefiting from the project cannot afford to repay through loans, as determined by the department of health and the publicly owned utility receiving the grant to complete the project.

(4) Applicants must provide a plan demonstrating that project completion will occur within three years of the grant contract execution.

(5) Each grant must be less than twenty-five percent of the total appropriation.

(6) The primary purpose of this appropriation is to fund water system repair and consolidation construction costs. However, the department may use a limited amount of funds under this section for grants for feasibility review of water system repair and consolidation projects that would meet the objectives of this section and RCW 70.119A.190.

Dairy Distillation Grants (92000010)

The appropriation in this section is subject to the following conditions and limitations:

(1) The appropriation is provided solely for the commission to make competitive grants available for dairy nutrient projects assisting dairy owners to address impacts to soil, water, or air. The purpose of the funding is to test the technologies that can solve the potential environmental problems associated with the disposal of manure that is in excess of what can be effectively used in the growing of crops. The technology must:

(a) Pose no risk of pollution to soil, water, or air;

(b) Be cost effective; and

(c) Produce clean water that can be effectively used on dairy farms and/or solids which can either be marketed or disposed of without risk of the environment.

(2) The grants must fund at least one dairy nutrient management innovation project east of the crest of the Cascade mountains and one west of the crest of the Cascade mountains. The commission shall report about the challenges and opportunities of the granted projects to the appropriate committees of the legislature at the conclusion of the last project or at least by December 1, 2020. The report should cover the acquisition, maintenance, and operating costs for the technology; how costs can be mitigated by any marketable byproducts, such as nitrogen, phosphorous, electricity, etc.; the cost of processing remaining materials to avoid contamination of soil, water, or air; and the ability to adapt the equipment for various size of dairies.

(3) When providing funding for specific technologies, the commission shall enter into appropriate agreements to support the state's interest in advancing innovation solutions to environmental issues while ensuring compliance with Article VIII, section 5 and Article XII, section 9 of the state Constitution.

Watershed Plan Implementation and Flow Achievement (30000714)

The appropriation in this section is subject to the following conditions and limitations:

(1) Surface or ground water storage projects. The department shall consult with the departments of agriculture and fish and wildlife before issuing water storage grants.

(2) Infrastructure or water management projects that resolve conflicts among water needs for municipal, agricultural, rural, and fish restoration purposes.

(3) Agricultural water supply projects that improve water conservation and water use efficiency.

(4) Purchase and installation of water measuring devices in water-short basins, salmon critical basins, other basins participating in the department of fish and wildlife fish screening and cooperative compliance program, and basins where watershed plans call for additional water use measurement.

(5) Acquisition of water to achieve instream flows or to establish water banks. The department must give priority to acquisitions in water short basins. The department must place acquired water into the state's trust water rights program pursuant to chapters 90.38 and 90.42 RCW.

Water Irrigation Efficiencies Program (30000740)
The appropriation in this section is subject to the following conditions and limitations:

(1) The appropriation is provided solely for technical assistance and grants to conservation districts for the purpose of implementing water conservation measures and irrigation efficiencies. The department and the state conservation commission shall give preference to projects located in the 16 fish critical basins, other water-short or drought impacted basins, and basins with significant water resource and instream flow issues. Projects that are not within the basins described in this subsection are also eligible to receive funding.

(2) Conservation districts statewide are eligible for grants listed in subsection (1) of this section. A conservation district receiving funds shall manage each grant to ensure that a portion of the water saved by the water conservation measure or irrigation efficiency will be placed as a purchase or a lease in the trust water rights program to enhance instream flows. The proportion of saved water placed in the trust water rights program must be equal to the percentage of the public investment in the conservation measure or irrigation efficiency. The percentage of the public investment may not exceed eighty-five percent of the total cost of the conservation measure or irrigation efficiency.

(3) Up to $300,000 of the appropriation in this section may be allocated for the purchase and installation of flow meters that are implemented in cooperation with the Washington state department of fish and wildlife fish screening program authorized under RCW 77.57.070.

NEW SECTION. Sec. 3180. FOR THE DEPARTMENT OF ECOLOGY

VW Settlement Funded Projects (40000018)

The appropriation in this section is subject to the following conditions and limitations:

(1) The legislature finds that it is appropriate to provide a framework for the administration of mitigation funds provided to the state as a beneficiary under the terms of the consent decrees entered into by the United States, Volkswagen AG, and other participating parties that settle emissions-related claims for 2.0 and 3.0 liter diesel vehicles of certain models and years. The legislature deems the department of ecology the responsible agency for the administration and expenditure of funds provided by the trustee under the terms of the consent decrees, including the development of a mitigation plan to guide the use of the funds, whether or not the department receives funds directly for projects included in the plan.

(2)(a) The department of ecology shall develop the mitigation plan through an open, transparent public process consistent with direction in the consent decrees. The department shall provide ample opportunity using a variety of engagement options, as appropriate, for stakeholders and the public to shape, review, and comment throughout the development of the mitigation plan, including at least two meetings of the legislative advisory group as described in (c) of this subsection.

(b) The department of ecology shall work collaboratively with other agencies to develop and implement the elements of the mitigation plan that address categories of projects for which other agencies have already developed programs or expertise. In doing so, the department of ecology must consider and utilize, where appropriate and to the extent possible, the following existing programs for alternative fuels and zero emission vehicles:

(i) The department of transportation's electric vehicle infrastructure bank program;

(ii) The state alternative fuel commercial vehicle tax credit;
(iii) The state sales and use tax exemption for clean vehicles; and
(iv) Public transportation grant programs administered by the department of transportation.

(c)(i) For the purposes of providing legislative input and gathering public feedback on the development of the mitigation plan, a legislative advisory group is established. The advisory group is comprised of eight legislators, including the chairs and ranking members, or designees of the chairs and ranking members, of the transportation and capital budget committees in the House and in the Senate; the director of the department of ecology; and the secretary of the department of transportation.

(ii) The advisory group must select a chair from among its membership. Meetings of the advisory group must be open to the public and allow for public comment.

(iii) The advisory group must meet at least twice, once immediately prior to the date that the draft mitigation plan is released publicly, and again after public comment has been incorporated but before the department submits the plan to the trustee.

(iv) The office of program research and the senate committee services must provide staff support to the advisory group. The department of ecology staff must provide technical support, as needed. Legislative members of the advisory group are reimbursed for travel expenses in accordance with RCW 44.04.120. Nonlegislative members are not entitled to be reimbursed for travel expenses if they are elected officials or are participating on behalf of an employer, government entity, or other organization. Any reimbursement for other nonlegislative members is subject to chapter 43.03 RCW. Advisory group expenditures are subject to approval by the senate facilities and operations committee and the house of representatives executive rules committee, or their successor committees.

(3) The mitigation plan and the stewardship of project implementation must adhere to the following principles:

(a) Maximize air quality and public health benefits relating to the reduction of nitrogen oxides emissions;

(b) Give priority to projects that improve air quality relating to the reduction of nitrogen oxides emissions in areas that bear a disproportionate share of the burden from nitrogen oxides emissions;

(c) Achieve substantial additional air quality benefits relating to the reduction of nitrogen oxides emissions beyond that which would already occur, absent trust funding;

(d) Investments in clean vehicles or investments in clean engine replacements must be shown to be cost-effective. For the purposes of leveraging funding, investments in clean vehicles may not exceed the incremental cost of the clean vehicle, relative to the cost of a similar conventionally fueled vehicle. To incentivize the replacement of standard engines, investments may be made up to the full cost of the clean engine replacement;

(e) Consideration must be given to investments across a range of fueling technologies and emissions reduction technologies; and

(f) Priority must be given to projects that have the highest benefit-cost ratios, in terms of the amount of nitrogen oxides emissions reduced per dollar invested.

(4) Funding must be allocated to eligible projects under the terms of the consent decrees in the following manner:

(a)(i) No more than thirty percent of funding provided during the 2017-2019 biennium for commercial vehicle class four through eight transit buses, shuttle buses, and school buses;

(ii) No more than thirty percent of funding provided during the 2017-2019 biennium for commercial vehicle class eight local freight trucks and port drayage trucks;

(iii) No more than twenty percent of funding provided during the 2017-2019 biennium for airport ground support equipment;

(iv) No more than twenty percent of funding provided during the 2017-2019 biennium for ocean-going vessels' shore power;

(v) No more than twenty percent of funding provided during the 2017-2019 biennium for light duty, zero emission vehicle supply equipment;
(vii) No more than twenty percent of funding provided during the 2017-2019 biennium for nonfederal matching funds for projects eligible under the diesel emission reduction act option; and

(viii) For each of the other categories of mitigation actions that are eligible under the consent decrees but not otherwise specified under this subsection (4)(a), no more than ten percent of funding provided during the 2017-2019 biennium.

(b) Projects that receive funding under subsection (4)(a)(ii) and (iii) of this section and ocean-going vessels shorepower projects that receive funding under subsection (4)(a)(viii) of this section must include electric technologies, if practicable.

(5) To the extent this section conflicts with the consent decrees, the consent decrees supersede it.

(6) The department of ecology may modify the mitigation plan as needed to comply with trustee requirements, including to the extent these modifications conflict with this section. In making any adjustments, the department of ecology shall consult with the department of transportation and the office of the superintendent of public instruction and provide notice to the steering committee of any significant changes to the plan submitted.

(7) The department of ecology shall provide a report to the governor and the appropriate committees of the legislature by January 1, 2018, and each year thereafter, on any plans or efforts to change the mitigation plan, its progress in implementing the mitigation plan, and the specific projects funded through these mitigation funds for the previous fiscal year.

(8) For the purposes of this section:

(a) "Project" means an eligible mitigation action under the terms of the consent decrees entered into by the United States, Volkswagen AG, and other participating parties that settle emissions-related claims for 2.0 and 3.0 liter diesel vehicles of certain models and years.

(b) "Trustee" means the entity selected under the terms of the consent decrees to administer the disbursement of funds to eligible projects for the purposes of mitigating nitrogen oxides emission pollution.

Water Availability (91000343)

The appropriation in this section is subject to the following conditions and limitations:

(1)(a) $450,000 of the appropriation is provided solely to retain a qualified consultant or consultants to develop technical water resources studies needed to support negotiation of a basin-wide water management solution in Whatcom county that includes the following elements:

(i) Instream flow;
(ii) Water quality;
(iii) Habitat restoration;
(iv) Water supply;
(v) Accountability.

(b) The amounts provided in this subsection must be used to accomplish three primary tasks related to the instream flow and water supply elements. Of the amounts provided in this subsection:
(i) $50,000 is provided solely for an analysis of existing water rights, including but not limited to water rights relinquishment and mitigated water rights;

(ii) $100,000 is provided solely for an analysis of water conservation and efficiency measures to be utilized by out-of-stream water users; and

(iii) $300,000 is provided solely for an analysis of potential new or modified water infrastructure to supply water for out-of-stream and instream uses, including but not limited to storage, pipelines, aquifer recharge, reclaimed water, and other projects.

(c) The resulting planning-level analysis are subject to review through a series of public workshops, where workshop participants must develop project screening criteria and select alternatives for further evaluation.

(d) Overall, this work must be designed to meet water resource needs for both instream and out-of-stream needs, must be capable of supporting future water resource agreements protective of senior water rights holders, and must be methodical and transparent.

(e) The department must establish a steering committee to develop the scope of work for the various analyses, which must include major water resource stakeholders and federally recognized tribes.

(2) $2,500,000 of the appropriation is provided solely for Dungeness off-channel reservoir.

NEW SECTION. Sec. 3264. FOR THE DEPARTMENT OF NATURAL RESOURCES

Trust Land Transfer Program (30000269)

The appropriation in this section is subject to the following conditions and limitations:

(1) The appropriation is provided solely to the department of natural resources to transfer from trust status certain trust lands of statewide significance deemed appropriate for state parks, fish and wildlife habitats, natural area preserves, natural resources conservation areas, department of natural resources community forest open spaces, or recreation purposes. The approved property for transfer is identified in the LEAP capital document no. 2017-2H, developed June 30, 2017.

(2) Property transferred under this section must be appraised and transferred at fair market value. By September 30, 2018, the department must deposit in the common school construction account the portion of the appropriation in this section that represents the estimated value of the timber on the transferred properties. This transfer must be made in the same manner as timber revenues from other common school trust lands. No deduction may be made for the resource management cost account under RCW 79.64.040. The portion of the appropriation in this section that represents the value of the land transferred must be deposited in the natural resources real property replacement account.

(3) All reasonable costs incurred by the department to implement this section are authorized to be paid out of the appropriations. Authorized costs include the actual cost of appraisals, staff time, environmental reviews, surveys, and other similar costs, and may not exceed one and nine-tenths percent of the appropriation.
(4) By June 30, 2018, land within the common school trust shall be exchanged for land of equal value held for other trust beneficiaries of the property identified in subsection (1) of this section. 

(5) Prior to or concurrent with conveyance of these properties, the department shall execute and record a real property instrument that dedicates the transferred properties to the purposes identified in subsection (1) of this section. Fee transfer agreements for properties identified in subsection (1) of this section must include terms that perpetually restrict the use of the property to the intended purpose. Transfer agreements may include provisions for receiving agencies to request alternative uses of the property, provided the alternative uses are compatible with the originally intended public purpose and the department and legislature approves such uses.

(6) The department shall work in good faith to carry out the intent of this section.

(7) By June 30, 2019, the state treasurer shall transfer to the common school construction account any unexpended balance of the appropriation in this section.

Appropriation:

State Building Construction Account—State $10,000,000
Prior Biennia (Expenditures) $0
Future Biennia (Projected Costs) $0
TOTAL $10,000,000

NEW SECTION. Sec. 3265. FOR THE DEPARTMENT OF NATURAL RESOURCES

State Forest Land Replacement (30000277)

The appropriation in this section is subject to the following conditions and limitations:

(1) $60,000 of the appropriation is provided solely for the department to assess options to replace timber trust revenues for counties with populations of twenty-five thousand or fewer that are subject to timber harvest deferrals greater than thirty years due to the presence of wildlife species listed as endangered or threatened under the federal endangered species act. The department must consult with the qualifying counties and other stakeholders in conducting the assessment. The department shall report the findings of its assessment, including recommendations for addressing decreased revenues from state forestlands and improving the forest products economy in the qualifying counties, by December 15, 2017.

(2) (a) The remaining portion of the appropriation is provided solely to the department to transfer from state forestland status to natural resources conservation area status certain state forestlands in counties:

(i) With a population of twenty-five thousand or fewer; and

(ii) With risks of timber harvest deferrals greater than thirty years due to the presence of wildlife species listed as endangered or threatened under the federal endangered species act.

(b) This appropriation must be used equally for the transfer of qualifying state forestlands in the qualifying counties.

(3) Property transferred under this section must be appraised and transferred at fair market value, without consideration of management or regulatory encumbrances associated with wildlife species listed under the federal endangered species act. The value of the timber and other valuable materials transferred must be distributed as provided in RCW 79.64.110. The value of the land transferred must be deposited in the park land trust revolving account and be used solely to buy replacement state forestland, consistent with RCW 79.22.060.

(4) Prior to or concurrent with conveyance of these properties, the department shall execute and record a real property instrument that dedicates the transferred properties to the purposes identified in subsection (2) of this section. Transfer agreements for properties identified in subsection (2) of this section must include terms that restrict the use of the property to the intended purpose.

(5) The department and applicable counties shall work in good faith to carry out the intent of this section. The department will identify eligible properties for transfer, consistent with subsections (2) and (3) of this section, in consultation with the applicable counties, and will not execute any property transfers that are not in the statewide interest of either the state
forest trust or the natural resources conservation area program.

Forest Hazard Reduction (30000290)
The appropriation in this section is subject to the following conditions and limitations:

(1) Pursuant to chapter 248, Laws of 2017 (E2SHB 1711) (forest health treatments) and chapter 95, Laws of 2017 (2SSB 5546) (forest health assessment and treatment framework), $450,000 of the appropriation is provided solely for planning and analysis to support a prioritized list of forest health treatments, and that is the maximum amount the department may expend for this purpose.

(2) $6,400,000 is provided solely to reduce hazards to public safety, establish new firewise communities, and implement thinning and fuels reduction activities on state trust lands and high-risk private lands. The department shall work in conjunction with communities, counties, fire districts, and conservation districts in implementing firewise activities, including through grants to these entities for project implementation. The following areas are eligible:

(a) Republic to Wauconda;
(b) North Spokane;
(c) Kittitas to Manastash; and
(d) Klickitat to Goldendale.

(3) $453,000 is provided solely to implement controlled burning treatments on one thousand acres of state trust land in
southeast Stevens and northwest Spokane county.

(4) $500,000 is provided solely for the forest collaborative infrastructure pilot, which will provide contract services, such as technical analysis, facilitation, and logistical support.

(5) $2,500,000 is provided solely for the "good neighbor" cross-boundary competitive grants for projects on federal land that support existing and planned state and local hazard reduction investments, of which $1,600,000 is provided solely for the north central Washington forest health collaborative, and $650,000 is provided solely for the Tapash sustainable forests collaborative.

(6) $1,700,000 is provided solely for state trust land reforestation in wildfire-damaged areas.

(7) $997,000 is provided solely to perform tree thinning, pruning, and brush disposal. The department must contract with the Washington conservation corps and national student conservation association programs, including the veterans fire corps program, to perform the work.

Public School Seismic Safety Assessment (91000091)

The appropriation in this section is subject to the following conditions and limitations:

(1) The department, in consultation with the office of emergency management, the office of the superintendent of public instruction, and the state board of education, shall develop a prioritized seismic risk assessment that includes seismic safety surveys of public facilities that are subject to high seismic risk as a consequence of high earthquake hazard and soils that amplify that hazard. The seismic safety surveys must be conducted for the following types of public facilities in the following order:

(a) Facilities that have a capacity of two hundred fifty or more persons and are routinely used for student activities by kindergarten through twelfth grade public schools; and

(b) Fire stations located within a one-mile radius of a facility described in subsection (1)(a) of this section.

(2) The initial phase of the prioritized seismic needs assessment of the facilities specified in subsections (1)(a) and (b) shall include, but is not limited to, the following:

(a) An on-site assessment, under the supervision of licensed geologists, of the seismic site class of the soils at the facilities;
(b) An on-site inspection of the facility buildings, including structural systems using structural plans where available, condition, maintenance, and nonstructural seismic hazards following standardized methods by licensed structural engineers;

(c) An estimate of costs to retrofit facilities specified in subsection (1)(a) of this section to life safety standards as defined by the American society of civil engineers; and

(d) An estimate of costs to retrofit facilities specified in subsection (1)(b) of this section to immediate occupancy standards as defined by the American society of civil engineers.

(3) The department shall develop geographic information system databases of survey data and must share that data with the governor, the superintendent of public instruction, and the appropriate legislative committees.

(4) The statewide seismic needs assessment specified in this section shall be submitted to the office of financial management and the appropriate committees of the legislature by October 1, 2018.

Aviation Revitalization Loans (92000003)

The appropriation in this section is subject to the following conditions and limitations:

(1) This appropriation is provided solely for deposit into the public use general aviation airport loan revolving account created in section 7029 of this act for direct loans to political subdivisions of the state and privately owned airports for the purpose of improvements at public use airports that primarily support general aviation activities.

(2) The department must convene a community aviation revitalization board to develop criteria for selecting loan recipients, to develop a process for evaluating applications, and to make decisions. The board must consist of the capital budget chair and ranking minority member of the capital budget committee of the house of representatives and the senate ways and means committee, and a representative from both the department of transportation's aviation division and the department of commerce. The board must also consist of the following members appointed by the secretary of transportation: One port district official, one county official, one city official, one representative of airport managers, and one representative of pilots. The chair of the board must be selected by the secretary of transportation. The members of the board must elect one of their members to serve as vice chair. The director of commerce and the secretary of transportation must serve as nonvoting advisory members of the board.

(3) The board may provide loans to privately owned airports for the purpose of airport improvements only if the state is receiving commensurate public benefit, such as guaranteed long-term public access to the airport as a condition of the loan. For purposes of this subsection, “public use airports that primarily support general aviation activities” means all public use airports not listed as having more than fifty thousand annual commercial air service passenger enplanements as published by the federal aviation administration.

(4) An application for loan funds under this section must be made in the form and manner as the board may prescribe. When evaluating loan applications, the board must prioritize applications that provide conclusive justification that completion of the loan application project will create revenue-generating opportunities. The board is not limited to, but must also use, the following expected outcome conditions when evaluating loan applications:

(a) A specific private development or expansion is ready to occur and will occur only if the aviation facility improvement is made;

(b) The loan application project results in the creation of jobs or private sector capital investment as determined by the board;

(c) The loan application project improves opportunities for the successful maintenance, operation, or expansion of an airport or adjacent airport business park;

(d) The loan application project results in the creation or retention of long-term economic opportunities; and

(e) The loan application project results in leveraging additional federal funding for an airport.

(5) The repayment of any loan made from the public use general aviation airport loan revolving account under the contracts for aviation loans must be paid into the public use general aviation airport loan revolving account.

Emergency Repairs and Equal Access Grants for K-12 Public Schools (30000182)

The appropriations in this section are subject to the following conditions and limitations:

(1) $2,000,000 of the common school construction account—state appropriation is provided solely for emergency repair grants to address unexpected and imminent health and safety hazards at K-12 public schools, including skill centers, that will impact the day-to-day operations of the school facility, and this is the maximum amount that may be spent for this purpose. For emergency repair grants only, an emergency declaration must be signed by the school district board of directors and submitted to the superintendent of public instruction for consideration. The emergency declaration must include a description of the imminent health and safety hazard, the possible cause, the proposed scope of emergency repair work and related cost estimate, and identification of local funding to be applied to the project. Grants of emergency repair moneys must be conditioned upon the written commitment and plan of the school district board of directors to repay the grant with any insurance payments or other judgments that may be awarded, if applicable.

(2) $3,000,000 of the state building construction account—state appropriation is provided solely for urgent repair grants to address non-reoccurring urgent small repair projects at K-12 public schools, excluding skill centers, that could impact the health and safety of students and staff if not completed, and this is the maximum amount that may be spent for this purpose. The office of the superintendent of public instruction, after consulting with maintenance and operations administrators of school districts, shall develop criteria and assurances for providing funding for specific projects through a competitive grant program. The criteria and assurances must include, but are not limited to, the following: (a) Limiting school districts to one grant, not to exceed $200,000, per three-year period; (b) prioritizing applications based on limited school district financial resources for the project; and (c) requiring any district

receiving funding provided in this section to demonstrate a consistent commitment to addressing school facility needs. The grant applications must include a comprehensive description of the health and safety issues to be addressed, a detailed description of the remedy including a detailed cost estimate of the repair or replacement work to be performed, and identification of local funding, if any, which will be applied to the project. Grants may be used for, but are not limited to: Repair or replacement of failing building systems; abatement of potentially hazardous materials; and safety-related structural improvements.

(3) $1,000,000 of the state building construction account—state appropriation is provided solely for equal access grants for facility repairs and alterations at K-12 public schools, including skills centers, to improve compliance with the Americans with disabilities act and individuals with disabilities education act, and this is the maximum amount that may be spent for this purpose. The superintendent of public instruction shall develop criteria and assurances for providing funding for specific projects through a competitive grant program. The criteria and assurances must include, but are not limited to, the following: (a) Limiting districts to one grant, not to exceed $100,000, per three-year period; (b) prioritizing applications based on limited school district financial resources for the project; and (c) requiring recipient districts to demonstrate a consistent commitment to addressing school facility needs. The grant applications must include a description of the Americans with disabilities act or individuals with disabilities education act compliance deficiency, a comprehensive description of the facility accessibility issues to be addressed, a detailed description of the remedy including a detailed cost estimate of the repair or replacement work to be performed, and identification of local funding, if any, which will be applied to the project. Priority for grant funding must be given to school districts that demonstrate a lack of capital resources to address the compliance deficiencies outlined in the grant application.

(4) The superintendent of public instruction must notify the office of financial management, the legislative evaluation and accountability program committee, the house capital budget committee, and the senate ways and means committee as projects described in subsection (1) of this section are approved for funding.

NEW SECTION. Sec. 5077. FOR THE SUPERINTENDENT OF PUBLIC INSTRUCTION

Healthy Kids/Healthy Schools (30000184)

The appropriation in this section is subject to the following conditions and limitations:

(1) The office of the superintendent of public instruction, after consulting with maintenance and operations administrators of school districts and the department of health, shall develop criteria for providing funding for specific projects that are consistent with the healthiest next generation priorities. The criteria must include, but are not limited to, the following:

(a) Districts or schools may apply for grants but no single district may receive more than $200,000 of the appropriation;

(b) Any district receiving funding provided in this section must demonstrate a consistent commitment to addressing school facilities’ needs; and

(c) Applicants with a high percentage of students who are eligible and enrolled in the free and reduced-price meals program must be prioritized.

(2) A maximum of $1,000,000 of the appropriation may be used for the replacement of lead-contaminated drinking water fixtures.

(3) A maximum of $1,000,000 of the appropriation may be used to purchase equipment or make repairs related to improving children’s physical health and may include, but is not limited to: Fitness playground equipment, covered play areas, and physical education equipment or related structures or renovation.
(4) A maximum of $250,000 of the appropriation may be used to purchase equipment or make repairs related to improving children's awareness and participation in sustaining efficient schools and may include, but is not limited to: Dashboards that display energy savings, composting systems, and recycling stations.

(5) The remaining portion of the appropriation is provided solely to purchase equipment or make repairs related to improving children's nutrition and may include, but is not limited to: Garden related structures and greenhouses to provide students access to fresh produce, and kitchen equipment or upgrades.

STEM Classrooms and Labs (30000203)

The appropriation in this section is subject to the following conditions and limitations:

(1) $2,800,000 of the appropriation is provided solely for the Federal Way school district to merge STEM facilities.

(2) $200,000 of the appropriation is provided solely for the contract with the statewide STEM organization described in subsection (5) of this section.

(3) The remaining portion of the appropriation in this section is provided solely for the superintendent of public instruction to provide STEM classrooms and labs grants to school districts for public school facilities serving students in grades nine through twelve, or any combination thereof, to construct classrooms, or labs, as additions to existing school buildings or to modernize specialized STEM facilities.

(4) The superintendent shall award grants to school districts under the following conditions:

(a) Districts eligible to receive STEM classrooms and labs grants include:

(i) Districts that demonstrate a lack of sufficient space of STEM classrooms or labs to provide opportunities for students to meet statutory graduation requirements;

(ii) Districts that demonstrate that their current STEM classrooms or labs are insufficient to provide opportunities for students to meet statutory graduation requirements;

(iii) Districts that have not received state capital funding assistance in the previous ten years for the STEM classrooms or labs project proposals; and

(iv) Districts that have secured private donations of cash, like-kind, or equipment in a value of no less than $100,000. Prior to receiving grant funding, the district must provide verification of the donation to the
superintendent within ninety days of notification of grant award.

(b) Allowable project costs under the grant program include design, renovation, or modernization of existing science labs or classrooms; project management costs; furnishings, fixtures, and equipment; and necessary utility and information technology systems upgrades to support specialized STEM facilities.

(c) At least one grant award is made to school districts located in southwest Washington;

(d) At least one grant award is made to school districts located in the Puget Sound region; and

(e) At least two grant awards are made to school districts located east of the crest of the Cascade mountain range.

(5) The STEM classrooms and labs grants program must be administered by the superintendent of public instruction in consultation with the STEM education innovation alliance specified in RCW 28A.188.030 and the statewide STEM organization specified in RCW 28A.188.050. The superintendent of public instruction must develop grant application materials and criteria in consultation with the statewide STEM organization, must review applications for accuracy and financial reasonableness, and must administer awarded grants. With funding specifically appropriated for this purpose, the superintendent of public instruction must contract with the statewide STEM organization specified in RCW 28A.188.050 to evaluate applications against the criteria developed for the program and develop a single prioritized list. The superintendent of public instruction must award grants within the appropriated funding and may depart from the recommended prioritized list only after consulting with the office of financial management and the appropriate committees of the legislature. The criteria must include, but are not limited to, the following:

(a) Priority for school districts that have experienced decreased enrollments of more than ten percent over the previous five year period due to interdistrict transfers to schools with STEM facilities constructed or modernized in that same period of time;

(b) Priority for applicants with a high percentage of students who are eligible and enrolled in the free and reduced-price meals program;

(c) Economic conditions within the school district that limits their ability to finance the modernization of STEM classrooms and labs from local funding sources;

(d) Educational benefits of proposed projects;

(e) Age and condition of existing STEM classroom and lab space, if applicable;

(f) The extent that existing STEM facilities are inadequate including the lack of adequate STEM facilities to meet graduation requirements in RCW 28A.150.220;

(g) Financial reasonableness based on total project cost per square foot; and

(h) Demonstration of readiness to proceed that may include, but is not limited to:

(i) A demonstration that existing STEM faculty are in place and are qualified to deliver an interactive, project-based STEM curriculum in the proposed specialized STEM facilities; or

(ii) A plan and budget in place to recruit or train such STEM faculty.

(6) For purposes of grant applications made in the 2017-2019 biennium, additional square footage funded through this grant program is excluded from the school district's inventory of available educational space for determining eligibility for state assistance for new construction until the earlier of:

(a) Five years following acceptance of the project by the school district board of directors; or

(b) The date of the final review of the latest study and survey of the affected school district following acceptance of the project by the school district board of directors.

(7) Each school district is limited to one grant award, which may be used for more than one school facility within the district, of no more than $2,000,000.

(8) The office of the superintendent of public instruction may charge fees consistent with capital budget guidelines established by the office of financial management for administering the grants.

(9) The superintendent of public instruction must report to the appropriate
committees of the legislature and the office of financial management on the timing and use of the funds by the end of each fiscal year, until the funds are fully expended.

Career and Technical Education Equipment Grants (91000408)
The appropriation in this section is subject to the following conditions and limitations:
(1) $72,000 of the appropriation is provided solely for the Bellevue school district for career and technical education equipment.
(2) $50,000 of the appropriation is provided solely for the Issaquah school district for career and technical education equipment.
(3) $30,000 of the appropriation is provided solely for the Elma school district for career and technical education equipment.
(4) The remaining portion of the appropriation in this section is provided solely for the superintendent of public instruction to provide career and technical education equipment grants to school districts. The office of the superintendent of public instruction, after consulting with school districts and the workforce training and education coordinating board, shall develop criteria for providing funding and outcomes for specific projects to stay within the appropriation level provided in this section consistent with the following priorities. The criteria must include, but are not limited to, the following:
(a) Districts or schools must demonstrate that the request provides necessary equipment to deliver career and technical education;
(b) Districts or schools must demonstrate a consistent commitment to maintaining school facilities and equipment by participating in the asset preservation program administered by the office of the superintendent of public instruction; and
(c) Prioritizing applicants with a high percentage of students who are eligible and enrolled in the free and reduced-price meals program.
(5) The superintendent must award grants to applicants on a first-come, first-serve basis if the district or
school demonstrates that the request meets the criteria set by the office of superintendent of public instruction as described in subsection (4) of this section and the site is prepared to receive the equipment.

(6) No single district may receive more than $100,000 of the appropriation.

(5) The department may not obligate or expend any of the amounts provided in this section on new projects that involve the Snohomish county public utilities district or its subcontractors until the executive ethics board responds to the department's June 17, 2015, request for an advisory opinion on poststate employment.

(6)(a) (($10,000,000)) $13,650,000 of the state taxable building construction account is provided solely to create a revolving loan fund to support the widespread use of proven energy efficiency and renewable energy, and transportation
Inhibited by lack of access to capital.

(b) The department shall provide grant funds to one or more competitively selected nonprofit lenders that will provide matching private capital and will administer the loan fund. The department must select the loan fund administrator or administrators through a competitive process, with scoring conducted by a group of qualified experts, applying criteria specified by the department.

(c) The department must establish guidelines that specify applicant eligibility, the screening process, and evaluation and selection criteria. The guidelines must be used by the nonprofit lenders.

(d) Loan applications must disclose all sources of public funds invested in the project. The nonprofit lender must make loans available to the following types of projects that include, but are not limited to: Residential, commercial, industrial, and agricultural energy retrofits; residential and community-scale solar installations; anaerobic digesters to treat dairy and organic waste; combined heat and power projects using woody biomass as a fuel source; electric vehicle charging infrastructure and equipment for cars, trucks, and buses; upgrades to facilitate such equipment and infrastructure; and acquisition of zero-emission buses and class 4-8 vehicles, including but not limited to trucks and passenger shuttles.

(e) State funds may not exceed fifty percent of the estimated cost of a project, and funding preference must be provided to projects that offer a higher percentage of nonstate match funds.

(7) ($6,600,000) $100,000 of the state taxable building construction account is provided solely for credit enhancements of advanced solar and renewable energy manufacturing within Washington state. The department shall develop an application process to competitively select projects.

(8) (a) $13,000,000 of the state building construction account is provided solely for grants to advance clean and renewable energy technologies and advance transmission and distribution control system improvements for increased reliability, resiliency, and enabling integration of distributed and renewable resources and technology by public and private electrical utilities that serve retail customers in the state. Eligible utilities may partner with other public and private sector research organizations and businesses in applying for funding.

(b) The department shall develop a grant application process to competitively select projects for grant awards, to include scoring conducted by a group of qualified experts with application of criteria specified by the department. In development of the application criteria, the department shall, to the extent possible, allow smaller utilities or consortia of small utilities to apply for funding.

(c) The department shall convene an advisory panel of electric utility representatives to identify program objectives, near term priorities and long term goals.

(d) Applications for grants must disclose all sources of public funds invested in a project.

(e) Grant funds must be used for research, development, or demonstration projects that integrate intermittent renewables through energy storage, information technology or other smart grid technologies, dispatch energy storage resources from utility control rooms, use demand response, transactive control, or the thermal properties and electric load of commercial buildings and district energy systems to store energy, reduce transmission congestion or otherwise improve system reliability and resiliency and enable integration of distributed and renewable energy sources.

(9) (a) $10,000,000 of the state building construction account is provided solely for grants to match federal funds or other nonstate funding sources used to research, develop, and demonstrate clean energy technologies.

(b) The department shall consult with the University of Washington, Washington State University, the Pacific Northwest national laboratory and other clean energy organizations to design the program. The program shall offer matching funds for competitively selected clean energy projects including, but not limited to: Advancing energy storage and solar technologies, advancing bioenergy, developing new lightweight materials, and advancing renewable energy and energy efficiency technologies.

(10) $400,000 of the state building construction account–state is provided
solely for capital funding of competitively selected wood energy conversion projects at public facilities.

(11) The department must report on number and results of projects that receive grants or loans through the clean energy fund, including the number of job hours created and the number of jobs maintained and created, to the governor and the legislature, by November 1, 2016.

(12) The department shall develop metrics that indicate the performance of energy efficiency efforts and provide a report of the metrics, including at a minimum the current energy used by the building, the energy use after efficiencies are completed, and cost of energy saved, to the house of representatives technology & economic development committee and the senate energy, environment & telecommunications committee. The report must include these metrics from other states.

(13) $3,250,000 of the state building construction account—state appropriation is provided solely for the Pacific Northwest national laboratory to use demand side management and analyze electricity use by the department of corrections. After the analysis is performed any remaining funds may be used for reducing energy use of the department of corrections. The department must make energy records available.

FOR THE DEPARTMENT OF COMMERCE

Projects for Jobs and Economic Development (92000151)

The appropriations in this section are subject to the following conditions and limitations:

(1) Except as directed otherwise prior to the effective date of this section, the department shall not expend the appropriations in this section unless and until the nonstate share of project costs have been either expended, or firmly committed, or both, in an amount sufficient to complete the project or a distinct phase of the project that is useable to the public for the purpose intended by the legislature. This requirement does not apply to projects where a share of the appropriations are released for design costs only.

(2) Prior to receiving funds, project recipients must demonstrate that the project site is under control for a minimum of ten years, either through ownership or a long-term lease. This requirement does not apply to appropriations for preconstruction activities or appropriations whose sole purpose is to purchase real property that does not include a construction or renovation component.
(3) Projects funded in this section may be required to comply with Washington's high performance building standards as required by chapter 39.35D RCW.

(4) Project funds are available on a reimbursement basis only, and shall not be advanced under any circumstances.

(5) Projects funded in this section must be held by the recipient for a minimum of ten years and used for the same purpose or purposes intended by the legislature as required in RCW 43.63A.125(6).

(6) Projects funded in this section, including those that are owned and operated by nonprofit organizations, are generally required to pay state prevailing wages.

FOR THE OFFICE OF FINANCIAL MANAGEMENT

Construction Contingency Pool (90000300)

The appropriation in this section is subject to the following conditions and limitations:

(1) The appropriation in this section is provided solely for construction projects that confront emergent and unavoidable costs in excess of the construction contingency included in the project appropriation. For requests occurring during a legislative session, an agency must notify the legislative fiscal committees before requesting contingency funds from the office of financial management. Eligible agencies that may apply to the pool include higher education institutions, the department of corrections, the department of social and health services, the department of enterprise services, the department of veterans affairs, the parks and recreation commission, and the department of fish and wildlife. Eligible construction projects are only projects that had cost reductions as kept on file with the office of financial management, and the Carver academic renovation project funded in section 5084, chapter 3, laws of 2015 3rd sp.s. The office of financial management must notify the legislative evaluation and accountability program committee, the house capital budget committee, and senate ways and means committee as projects are approved for funding.

(2)(a) The legislature intends to use the 1063 Block building development project as a model of efficient space and energy use for both owned and leased state office buildings.

(b) To achieve this intent, the office of financial management must reconsider tenants for the building, including consideration of the utilities and transportation commission, all current tenants of the general administration building with operations compatible with a high density office building, and other possible tenants. The measure of achieving a higher space efficiency is measured by the average square feet per housed employee.

(c) The office of financial management must provide a report to the appropriate committees of the legislature on the redesign and the increase space efficiency by October 15, 2015.

The appropriation in this section is subject to the following conditions and limitations: Emergency repair funding is provided solely to address unexpected building or grounds failures that will impact public health and safety and the day-to-day operations of the facility. To be eligible for funds from the emergency
repair pool, an emergency declaration signed by the affected agency director must be submitted to the office of financial management and the appropriate legislative fiscal committees. The emergency declaration must include a description of the health and safety hazard, the possible cause, the proposed scope of emergency repair work and related cost estimate, and identification of other funding that may be applied to the project. For emergencies occurring during a legislative session, an agency must notify the legislative fiscal committees before requesting emergency funds from the office of financial management. The office of financial management must notify the legislative evaluation and accountability program committee, the house capital budget committee, and senate ways and means committee as emergency projects are approved for funding.

(3) School districts receiving funding through the 2015-17 school construction assistance program must map the design of new facilities and remap the design of facilities to be remodeled.

(4) The office of the superintendent of public instruction must weight and prioritize grant requests on the following criteria and in the following order: (a) Will provide facility capacity needs to reduce kindergarten through third grade class sizes at high poverty schools; (b) will provide facility capacity needs to reduce kindergarten through third grade class sizes in remaining schools.

(5) The office of the superintendent of public instruction must expedite allocation and distribution of any eligible funds under the school construction assistance grant program for the appropriations provided to the superintendent of public instruction in this act for distressed schools, STEM pilot projects, or skill centers. For purposes of determining state funding assistance, eligible area must be calculated as follows: (a) Eligible area for STEM pilot projects is 1,440 square feet per science lab or classroom combination, or both; and 1,040 square feet per science classroom. Total eligible area per STEM pilot project must not exceed 15,840 square feet, and total eligible area of all STEM pilot projects from this section must not exceed 36,880 square feet; (b) eligible area for skill centers is gross square feet of the proposed project as submitted to the office of financial management as requested by the superintendent for consideration in the 2015-2017 capital budget. Eligible area for the Spokane Valley technical skills center must not exceed 5,400 square feet, and; (c) eligible area for replacement of the cafeteria at Marysville-Pilchuck high school is 13,500 square feet.

Sec. 6023. RCW 70.340.130 and 2016 c 161 s 21 are each amended to read as follows:

(1) On July 1, 2016, if the cash balance amount in the pollution liability insurance program trust account exceeds seven million five hundred thousand dollars after excluding the reserves under RCW 70.148.020(2), the state treasurer shall transfer the amount exceeding seven million five hundred thousand dollars, up to a transfer of ten million dollars, from the pollution liability insurance program trust account into the pollution liability insurance agency underground storage tank revolving account. If twenty million dollars is not available to be transferred at the beginning of the first fiscal year of the biennium, (on July 1st) by the end of the subsequent fiscal year, if the cash balance amount in the pollution liability insurance program trust account exceeds seven million five hundred thousand dollars after excluding the reserves under RCW 70.148.020(2), the state treasurer shall transfer the amount exceeding seven million five hundred thousand dollars from the pollution liability insurance program trust account into the pollution liability insurance agency underground storage tank revolving account. The total amount transferred in a biennium from the pollution liability insurance program trust account into the pollution liability insurance agency underground storage tank revolving account may not exceed twenty million dollars.

Sec. 6024. 2016 sp.s. c 35 s 6015 (uncodified) is amended to read as follows:

STATE TREASURER TRANSFER AUTHORITY

State toxics control account: For transfer to the environmental legacy stewardship account $24,000,000
Local toxics control account: For transfer to the environmental legacy stewardship account $30,000,000

(1) As directed by the department of ecology in consultation with the office of financial management, the state treasurer shall transfer amounts among the state toxics control account, the local toxics control account, and the environmental legacy stewardship account as needed during the 2015-2017 fiscal biennium to maintain positive account balances in all three accounts.

(2) As directed by the department of ecology in consultation with the office of financial management, the state treasurer shall transfer amounts from the cleanup settlement account established in RCW 70.105D.130 to the state toxics control account, the local toxics control account, or the environmental legacy stewardship account to maintain positive account balances up to an amount not to exceed
$13,000,000 that must be considered an interfund loan that must be repaid with interest to the cleanup settlement account in three equal repayments in fiscal years 2019, 2020, and 2021.

(3) If, after using the interfund transfer authority granted in this section, the department of ecology determines that further reductions are needed to maintain positive account balances in the state toxics control account, the local toxics control account, and the environmental legacy stewardship account, the department is authorized to delay the start of clean-up projects based on acuity of need, readiness to proceed, cost-efficiency, or need to ensure geographic distribution.

(4) By June 30, 2017, the department must submit a list of projects that were delayed to the office of financial management and the appropriate fiscal committees of the legislature.

PART 7
MISCELLANEOUS PROVISIONS

NEW SECTION. Sec. 7001. RCW 43.88.031 requires the disclosure of the estimated debt service costs associated with new capital bond appropriations. The estimated debt service costs for the appropriations contained in this act are forty two million four hundred eighty-six thousand dollars for the 2017-2019 biennium, two hundred sixty-eight million six thousand dollars for the 2019-2021 biennium, and three hundred seventy-four million seven hundred eight thousand dollars for the 2021-2023 biennium.

NEW SECTION. Sec. 7002. ACQUISITION OF PROPERTIES AND FACILITIES THROUGH FINANCIAL CONTRACTS. (1) The following agencies may enter into financial contracts, paid from any funds of an agency, appropriated or nonappropriated, for the purposes indicated and in not more than the principal amounts indicated, plus financing expenses and required reserves pursuant to chapter 39.94 RCW. When securing properties under this section, agencies shall use the most economical financial contract option available, including long-term leases, lease-purchase agreements, lease-development with option to purchase agreements or financial contracts using certificates of participation. Expenditures made by an agency for one of the indicated purposes before the issue date of the authorized financial contract and any certificates of participation therein are intended to be reimbursed from proceeds of the financial contract and any certificates of participation therein to the extent provided in the agency's financing plan approved by the state finance committee.

(2) Those noninstructional facilities of higher education institutions authorized in this section to enter into financial contracts are not eligible for state funded maintenance and operations. Instructional space that is available for regularly scheduled classes for academic transfer, basic skills, and workforce training programs may be eligible for state funded maintenance and operations.

(3) Department of enterprise services:
(a) Enter into a financing contract for up to $5,323,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to repair the east plaza garage in Olympia.
(b) Enter into a financing contract for up to $2,000,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW for Tacoma Rhodes elevators.

(4) Washington state patrol:
(a) Enter into a financing contract for up to $7,450,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to construct a burn building for live fire training.
(b) Enter into a financing contract for up to $2,700,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW for furnishings and equipment at the 1063 building.

(5) Department of labor and industries: Enter into a financing contract for up to $12,700,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to modernize a lab and training facility.

(6) Community and technical colleges:
(a) Enter into a financing contract on behalf of Cascadia College for up to $29,500,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to build a parking structure.
(b) Enter into a financing contract on behalf of Renton Community College for up to $2,000,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to acquire property in Renton.
(c) Enter into a financing contract on behalf of South Seattle College for up to
$10,000,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to build a student wellness and fitness center.

(d) Enter into a financing contract on behalf of Shoreline Community College for up to $31,100,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to build student housing.

(e) Enter into a financing contract on behalf of Clark College for up to $35,000,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to build a student recreation center.

(f) Enter into a financing contract on behalf of Lower Columbia College for up to $3,000,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to renovate the main building.

(g) Enter into a financing contract on behalf of Clover Park Technical College for up to $32,288,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to construct a center for advanced manufacturing technologies.

NEW SECTION. Sec. 7003. To ensure that major construction projects are carried out in accordance with legislative and executive intent, appropriations in this act in excess of $5,000,000, or $10,000,000 for higher education institutions, may not be expended or encumbered until the office of financial management has reviewed and approved the agency's predesign. The predesign document must include, but not be limited to, program, site, and cost analysis, and an analysis of the life-cycle costs of the alternatives explored, in accordance with the predesign manual adopted by the office of financial management. The results of life-cycle cost analysis must be a primary consideration in the selection of a building design. Construction may proceed only upon providing to the office of financial management the life-cycle costs.

To improve monitoring of major construction projects, progress reports must be submitted by the agency administering the project to the office of financial management and to the fiscal committees of the house of representatives and senate. Reports must be submitted on July 1st and December 31st each year in a format to be determined by the office of financial management.

NEW SECTION. Sec. 7004. (1) The legislature finds that use of life-cycle cost analysis will aid public entities, architects, engineers, and contractors in making design and construction decisions that positively impact both the initial construction cost and the ongoing operating and maintenance cost of a project. To ensure that the total cost of a project is accounted for and the most reasonable and cost efficient design is used, agencies shall develop life-cycle costs for any construction project over $10,000,000. The life-cycle costs must represent the present value sum of capital costs, installation costs, operating costs, and maintenance costs over the life expectancy of the project. The legislature further finds the most effective approach to the life-cycle cost analysis is to integrate it into the early part of the design process.

(2) Agencies shall develop a minimum of three project alternatives for use in the life-cycle cost analysis. These alternatives must be both distinctly different and viable solutions to the issue being addressed. The chosen alternative must be the most reasonable and cost-effective solution. A brief description of each project alternative and why it was chosen must be included in the life-cycle cost analysis section of the predesign.

(3) The office of financial management shall: (a) Make available a life-cycle cost model to be used for analysis; (b) in consultation with the department of enterprise services, provide assistance in using the life-cycle cost model; and (c) update the life-cycle cost model annually including assumptions for inflation rates, discount rates, and energy rates.

(4) Agencies shall consider architectural and engineering firms' and general contractors' experience using life-cycle costs, operating costs, and energy efficiency measures when selecting an architectural and engineering firm, or when selecting contractors using alternative contracting methods.

NEW SECTION. Sec. 7005. To improve monitoring of major construction projects, progress reports must be submitted by the agency administering the project to the office of financial management and to the fiscal committees of the house of representatives and senate. Reports must be submitted on July 1st and December 31st each year in a format to be determined by the office of financial management.
provided in accordance with the capital project review requirements adopted by the office of financial management and in compliance with RCW 43.88.110. Projects that will be employing alternative public works construction procedures under chapter 39.10 RCW are subject to the allotment procedures defined in this section and RCW 43.88.110.

(2) Each project is defined as proposed in the legislative budget notes or in the governor's budget document.

NEW SECTION. Sec. 7007. (1) The office of financial management may authorize a transfer of appropriation authority provided for a capital project that is in excess of the amount required for the completion of such project to another capital project for which the appropriation is insufficient. No such transfer may be used to expand the capacity of any facility beyond that intended in making the appropriation. Such transfers may be effected only between capital appropriations to a specific department, commission, agency, or institution of higher education and only between capital projects that are funded from the same fund or account. No transfers may occur between projects to local government agencies except where the grants are provided within a single omnibus appropriation and where such transfers are specifically authorized by the implementing statutes that govern the grants.

(2) The office of financial management may find that an amount is in excess of the amount required for the completion of a project only if: (a) The project as defined in the notes to the budget document is substantially complete and there are funds remaining; or (b) bids have been let on a project and it appears to a substantial certainty that the project as defined in the notes to the budget document can be completed within the biennium for less than the amount appropriated in this act.

(3) For the purposes of this section, the intent is that each project be defined as proposed to the legislature in the governor's budget document, unless it clearly appears from the legislative history that the legislature intended to define the scope of a project in a different way.

(4) A report of any transfer effected under this section, except emergency projects or any transfer under $250,000, shall be filed with the legislative fiscal committees of the senate and house of representatives by the office of financial management at least thirty days before the date the transfer is effected. The office of financial management shall report all emergency or smaller transfers within thirty days from the date of transfer.

(5) The transfer authority granted in this section does not apply to appropriations for projects for the state parks and recreation commission. Appropriations for commission projects may be spent only for the specified projects, and funding may not be transferred from one commission project to another or from other sources to a commission project.

NEW SECTION. Sec. 7008. (1) It is expected that projects be ready to proceed in a timely manner depending on the type or phase of the project or program that is the subject of the appropriation in this act. Except for major projects that customarily may take more than two biennia to complete from predesign to the end of construction, or large infrastructure grant or loan programs supporting projects that often take more than two biennia to complete, the legislature generally does not intend to reappropriate funds more than once, particularly for smaller grant programs, local/community projects, and minor works.

(2) Agencies shall expedite the expenditure of reappropriations and appropriations in this act in order to: (a) Rehabilitate infrastructure resources; (b) accelerate environmental rehabilitation and restoration projects for the improvement of the state's natural environment; (c) reduce additional costs associated with acquisition and construction inflationary pressures; and (d) provide additional employment opportunities associated with capital expenditures.

(3) To the extent feasible, agencies are directed to accelerate expenditure rates at their current level of permanent employees and shall use contracted design and construction services wherever necessary to meet the goals of this section.

NEW SECTION. Sec. 7009. (1) Any building project that receives over $10,000,000 in funding from the capital budget must be built to sustainable standards. "Sustainable building" means a building that integrates and optimizes all major high-performance building
attributes, including energy efficiency, durability, life-cycle performance, and occupant productivity. The following design and construction attributes must be integrated into the building project:

(a) **Employ integrated design principles:** Use a collaborative, integrated planning and design process that initiates and maintains an integrated project team in all stages of a project's planning and delivery. Establish performance goals for siting, energy, water, materials, and indoor environmental quality along with other comprehensive design goals and ensures incorporation of these goals throughout the design and life-cycle of the building. Considers all stages of the building's life-cycle, including deconstruction.

(b) **Commissioning:** Employ commissioning practices tailored to the size and complexity of the building and its system components in order to verify performance of building components and systems and help ensure that design requirements are met. This should include an experienced commissioning provider, inclusion of commissioning requirements in construction documents, a commissioning plan, verification of the installation and performance of systems to be commissioned, and a commissioning report.

(c) **Optimize energy performance:** Establish a whole building performance target that takes into account the intended use, occupancy, operations, plug loads, other energy demands, and design to earn the ENERGY STAR targets for new construction and major renovation where applicable. For new construction target low energy use index. For major renovations, reduce the energy use by fifty percent below prerenovations baseline.

(d) **On-site renewable energy:** Meet at least thirty percent of the hot water demand through the installation of solar hot water heaters, when life-cycle cost effective. Implement renewable energy generation projects on agency property for agency use, when life-cycle cost effective.

(e) **Measurement and verification:** Install building level electricity meters in new major construction and renovation projects to track and continuously optimize performance. Include equivalent meters for natural gas and steam, where natural gas and steam are used. Install dashboards inside buildings to display and incentivize occupants on energy use.

(f) **Benchmarking:** Compare actual performance data from the first year of operation with the energy design target. Verify that the building performance meets or exceeds the design target. For other building and space types, use an equivalent benchmarking tool for laboratory buildings. Web-based data collection and dashboards must also be provided.

NEW SECTION. Sec. 7010. State agencies, including institutions of higher education, shall allot and report full-time equivalent staff for capital projects in a manner comparable to staff reporting for operating expenditures.

NEW SECTION. Sec. 7011. Executive Order No. 05-05, archaeological and cultural resources, was issued effective November 10, 2005. Agencies shall comply with the requirements set forth in this executive order.

NEW SECTION. Sec. 7012. FOR THE ARTS COMMISSION—ART WORK ALLOWANCE. (1) One-half of one percent of moneys appropriated in this act for original construction of school plant facilities is provided solely for the purposes of RCW 28A.335.210.

(2) One-half of one percent of moneys appropriated in this act for original construction or any major renovation or remodel work exceeding $200,000 by colleges or universities is provided solely for the purposes of RCW 28B.10.027.

(3) One-half of one percent of moneys appropriated in this act for original construction of any public building by a state agency identified in RCW 43.17.020 is provided solely for the purposes of RCW 43.17.200.

(4) At least eighty-five percent of the moneys spent by the Washington state arts commission during the 2017-2019 biennium for the purposes of RCW 28A.335.210, 28B.10.027, and 43.17.200 must be expended solely for direct acquisition of works of art. Art allocations not expended within the ensuing two biennia will lapse. The commission may use up to $150,000 of this amount to conserve or maintain existing pieces in the state art collection pursuant to RCW 28A.335.210.

(5) The executive director of the arts commission shall appoint a study group to review the operations of the one-half of one percent for works of art purchased or
commissioned as required by RCW 28A.335.210, 28B.10.027, and 43.17.200. The findings of the review must be reported annually to the office of financial management and the fiscal committees of the legislature by September 15th. The review must include, but is not limited to, the following: (a) Projects purchased or commissioned per biennium; (b) partner agencies; (c) funding sources by fiscal year; (d) artwork costs; (e) administrative costs; (f) collection care costs; and (g) project status.

Sec. 7013. RCW 28B.10.027 and 2016 sp.s. c 35 s 6008 are each amended to read as follows:

(1) All universities and colleges shall allocate as a nondeductible item, out of any moneys appropriated for the original construction or any major renovation or remodel work exceeding two hundred thousand dollars of any building, an amount of one-half of one percent of the appropriation to be expended by the Washington state arts commission with the approval of the board of regents or trustees for the acquisition of works of art.

(2) For projects funded in the 2015-2017 capital budget and the 2017-2019 capital budget, an institution of higher education, working with the Washington arts commission, may expend up to ten percent of the projected art allocation for a project during the design phase in order to select an artist and design art to be integrated in the building design. The one-half of one percent to be expended by the Washington arts commission must be adjusted downward by the amount expended by a university or college during the design phase of the capital project.

(3) The works of art may be placed on public lands of institutions of higher education, integral to or attached to a public building or structure of institutions of higher education, detached within or outside a public building or structure of institutions of higher education, part of a portable exhibition or collection, part of a temporary exhibition, or loaned or exhibited in other public facilities.

(4) In addition to the cost of the works of art, the one-half of one percent of the appropriation shall be used to provide for the administration of the visual arts program, including conservation of the state art collection, by the Washington state arts commission and all costs for installation of the work of art. For the purpose of this section building shall not include sheds, warehouses, and other buildings of a temporary nature.

NEW SECTION. Sec. 7014. To carry out the provisions of this act, the governor may assign responsibility for predesign, design, construction, and other related activities to any appropriate agency.

NEW SECTION. Sec. 7015. If any federal moneys appropriated by this act for capital projects are not received by the state, the department or agency to which the moneys were appropriated may replace the federal moneys with funds available from private or local sources. No replacement may occur under this section without the prior approval of the director of financial management in consultation with the senate ways and means committee and the house of representatives capital budget committee.

NEW SECTION. Sec. 7016. (1) Unless otherwise stated, for all appropriations under this act that require a match of nonstate money or in-kind contributions, the following requirement, consistent with RCW 43.88.150, shall apply: Expenditures of state money shall be timed so that the state share of project expenditures never exceeds the intended state share of total project costs.

(2) Provision of the full amount of required matching funds is not required to permit the expenditure of capital budget appropriations for phased projects if a proportional amount of the required matching funds is provided for each distinct, identifiable phase of the project.

NEW SECTION. Sec. 7017. NONTAXABLE AND TAXABLE BOND PROCEEDS. Portions of the appropriation authority granted by this act from the state building construction account, or any other account receiving bond proceeds, may be transferred to the state taxable building construction account as deemed necessary by the state finance committee to comply with the federal internal revenue service rules and regulations pertaining to the use of nontaxable bond proceeds. Portions of the general obligation bond proceeds authorized by chapter . . . Laws of 2017 (Substitute House Bill No. 1080, the general obligation bond bill) for deposit into the state taxable building construction account that are in excess of amounts required to comply with the federal internal revenue service rules and
regulations shall be deposited into the state building construction account. The state treasurer shall submit written notification to the director of financial management if it is determined that a shift of appropriation authority between the state building construction account, or any other account receiving bond proceeds, and the state taxable building construction account is necessary, or that a shift of appropriation authority from the state taxable building construction account to the state building construction account may be made.

NEW SECTION. Sec. 7018. COLUMBIA RIVER BASIN NONTAXABLE AND TAXABLE BOND PROCEEDS. Portions of the appropriation authority granted by this act from the Columbia river basin water supply development account may be transferred to the Columbia river basin taxable bond water supply development account as deemed necessary by the state finance committee to comply with the federal internal revenue service rules and regulations pertaining to the use of nontaxable bond proceeds. The state treasurer shall submit written notification to the director of financial management if it is determined that a shift of appropriation authority between the Columbia river basin water supply development account and the Columbia river basin taxable bond water supply development account is necessary, or that a shift of appropriation authority from the Columbia river basin taxable bond water supply development account to the Columbia river basin water supply development account may be made.

Sec. 7019. RCW 28B.20.725 and 2015 3rd sp.s. c 3 s 7025 are each amended to read as follows:

The board is hereby empowered:

(1) To reserve the right to issue bonds later on a parity with any bonds being issued;

(2) To authorize the investing of moneys in the bond retirement fund and any reserve account therein;

(3) To authorize the transfer of money from the University of Washington building account to the bond retirement fund when necessary to prevent a default in the payments required to be made out of such fund;

(4) To create a reserve account or accounts in the bond retirement fund to secure the payment of the principal of and interest on any bonds;

(5) To authorize the transfer to the University of Washington building account of any money on deposit in the bond retirement fund in excess of debt service for a period of three years from the date of such transfer on all outstanding bonds payable out of such fund. However, during the 2013-2015 fiscal biennium, the legislature may transfer to the University of Washington building account moneys that are in excess of the debt service due within the 2013-2015 fiscal biennium from the date of such transfer on all outstanding bonds payable out of the bond retirement fund. However, during the 2015-2017 fiscal biennium, the legislature may transfer to the University of Washington building account moneys that are in excess of the debt service due within the 2015-2017 fiscal biennium from the date of such transfer on all outstanding bonds payable out of the bond retirement fund. However, during the 2017-2019 fiscal biennium, the legislature may transfer to the University of Washington building account moneys that are in excess of the debt service due within the 2017-2019 fiscal biennium from the date of such transfer on all outstanding bonds payable out of the bond retirement fund.

Sec. 7020. RCW 28B.30.750 and 2015 3rd sp.s. c 3 s 7028 are each amended to read as follows:

The board is hereby empowered:

(1) To reserve the right to issue bonds later on a parity with any bonds being issued;

(2) To authorize the investing of moneys in the bond retirement fund and any reserve account therein;

(3) To authorize the transfer of money from the Washington State University building account to the bond retirement fund when necessary to prevent a default in the payments required to be made out of such fund;

(4) To create a reserve account or accounts in the bond retirement fund to secure the payment of the principal of and interest on any bonds;

(5) To authorize the transfer to the Washington State University building account of any money on deposit in the bond retirement fund in excess of debt service for a period of three years from the date of such transfer on all outstanding bonds payable out of such fund. However, during the 2013-2015 fiscal biennium, the legislature may

transfer to the Washington State University building account moneys that are in excess of the debt service due within the 2013-2015 fiscal biennium from the date of such transfer on all outstanding bonds payable out of the bond retirement fund.) However, during the 2015-2017 fiscal biennium, the legislature may transfer to the Washington State University building account moneys that are in excess of the debt service due within the 2015-2017 fiscal biennium from the date of such transfer on all outstanding bonds payable out of the bond retirement fund. However, during the 2017-2019 fiscal biennium, the legislature may transfer to the Washington State University building account moneys that are in excess of the debt service due within the 2017-2019 fiscal biennium from the date of such transfer on all outstanding bonds payable out of the bond retirement fund.

NEW SECTION. Sec. 7021. (1) Funds appropriated in this act for minor works may not be allotted until final project lists are submitted to the office of financial management. Revisions to the project lists are allowed for projects not anticipated at the time of budget development but must be submitted to the office of financial management, the house of representatives capital budget committee, and the senate ways and means committee for review and comment and must include an explanation of variances from the prior lists before funds may be expended on the revisions. Any project list revision must be approved by the office of financial management before funds may be expended from the minor works appropriation.

(2)(a) Minor works project lists are single line appropriations that include multiple projects of a similar nature and that are valued between $25,000 and $1,000,000 each, with the exception of higher education minor works projects that may be valued up to $2,000,000. All projects must meet the criteria included in this subsection (2)(a). These projects should be completed within two years of the appropriation with the funding provided. Agencies are prohibited from including projects on their minor works lists that are a phase of a larger project, and that if combined over a continuous period of time, would exceed $1,000,000, or $2,000,000 for higher education minor works projects. Improvements for accessibility in compliance with the Americans with disabilities act may be included in any of the minor works categories.

(b) Minor works appropriations may not be used for the following: Studies, except for technical or engineering reviews or designs that lead directly to and support a project on the same minor works list; planning; design outside the scope of work on a minor works list; movable, temporary, and traditionally funded operating equipment not in compliance with the equipment criteria established by the office of financial management; software not dedicated to control of a specialized system; moving expenses; land or facility acquisition; rolling stock; computers; or to supplement funding for projects with funding shortfalls unless expressly authorized. The office of financial management may make an exception to the limitations described in this subsection (2)(b) for exigent circumstances after notifying the legislative fiscal committees and waiting ten days for comments by the legislature regarding the proposed exception.

(c) Minor works preservation projects may include program improvements of no more than twenty-five percent of the individual minor works preservation project cost.

NEW SECTION. Sec. 7022. STATE TREASURER TRANSFER AUTHORITY

State Toxics Control Account: For transfer to the environmental legacy stewardship account, $17,625,000 for fiscal year 2018 and $17,625,000 for fiscal year 2019 $35,250,000

Local Toxics Control Account: For transfer to the environmental legacy stewardship account, $10,500,000 in fiscal year 2018 and $10,500,000 in fiscal year 2019 $21,000,000

(1)(a) As directed by the department of ecology in consultation with the office of financial management, the state treasurer shall transfer amounts among the state toxics control account, the local toxics control account, and the environmental legacy stewardship account as needed during the 2017-2019 fiscal biennium to maintain positive account balances in all three accounts.

(b) If, after using the interfund transfer authority granted in this
section, the department of ecology determines that further reductions are needed to maintain positive account balances in the state toxics control account, the local toxics control account, and the environmental legacy stewardship account, the department is authorized to delay the start of stormwater and clean-up projects based on acuity of need, readiness to proceed, cost-efficiency, purposes of increasing affordable housing, or need to ensure geographic distribution. If the department uses this authority, the department must submit a prioritized list of projects that may be delayed to the office of financial management and the appropriate fiscal committees of the legislature.

(2) As directed by the pollution liability insurance agency in consultation with the office of financial management, the state treasurer shall transfer from the pollution liability insurance program trust account to the underground storage tank revolving account the lesser of $20,000,000 or the balance of the fund exceeding $7,500,000 after excluding the reserves during the 2017-2019 fiscal biennium.

NEW SECTION. Sec. 7023. To the extent that any appropriation authorizes expenditures of state funds from the state building construction account, or from any other capital project account in the state treasury, for a capital project or program that is specified to be funded with proceeds from the sale of bonds, the legislature declares that any such expenditures for that project or program made prior to the issue date of the applicable bonds are intended to be reimbursed from proceeds of those bonds in a maximum amount equal to the amount of such appropriation.

NEW SECTION. Sec. 7024. The energy efficiency account is hereby created in the state treasury. The sums deposited in the energy recovery act account shall be appropriated and expended for loans, loan guarantees, and grants for projects that encourage the establishment and use of innovative and sustainable industries for renewable energy and energy efficiency technology. The balance of state funds, federal funds, and loan repayments, from the energy recovery act account, are deposited in this account.

NEW SECTION. Sec. 7025. The department of enterprise services must sell the property known as Tacoma Rhodes complex for at least fair market value. The property consists of the Broadway building, the market building, and the parking garage. The department must use the surplus property operations requirements for the sale process in RCW 43.17.400. The department must retain federal obligations and may retain appraisal costs, debt service, and closing costs. The remaining net proceeds from the sale must be deposited into the Thurston county capital facilities account.

NEW SECTION. Sec. 7026. JOINT LEGISLATIVE TASK FORCE ON IMPROVING STATE FUNDING FOR SCHOOL CONSTRUCTION. (1)(a) A joint legislative task force on improving state funding for school construction is established, with members as provided in this subsection.

(i) The president of the senate shall appoint one member from each of the two largest caucuses of the senate from the senate committees on ways and means and early learning and K-12 education.

(ii) The speaker of the house of representatives shall appoint one member from each of the two largest caucuses of the house of representatives from the house of representatives committees on capital budget and education.

(iii) The president of the senate and the speaker of the house of representatives jointly shall ensure that at least three of the eight members appointed pursuant to (a)(i) and (ii) of this subsection serve legislative districts located east of the crest of the Cascade mountains.

(iv) The chair of the task force selected pursuant to (b) of this subsection may appoint one additional member representing large school districts and one additional member representing small, rural school districts as voting members of the task force.

(b) The task force shall choose its chair from among its membership. The chair of the house of representatives committee on capital budget shall convene the initial meeting of the task force. All meetings of the task force must be scheduled and conducted in accordance with the requirements of both the senate and the house of representatives.

(2) The task force shall review the following issues:

(a) Improvements to state financial assistance for K-12 school construction to
be implemented over several fiscal biennia;

(b) Utilization of school spaces for multiple purposes;

(c) School design and construction approaches that support effective teaching and learning by delivering education through innovative, sustainable, cost-effective, and enduring design and construction methods; and

(d) Recent reports on school construction, including but not limited to the school construction cost study from the educational service district 112 and the efforts of collecting inventory and condition of schools data by the Washington state university extension energy office.

(3) In consideration of the findings pursuant to subsection (2) of this section, the task force must recommend a state school construction financial assistance program that:

(a) Supports the construction and preservation of schools; and

(b) Balances the state and local share of school construction and preservation costs considering local school districts' financial capacity, based on measures of relative wealth recommended pursuant to subsection (4)(b) of this section, and the state's limited bond capacity and common school trust land revenue.

(4) In making recommendations pursuant to subsection (3) of this section, the task force must, at a minimum, also recommend:

(a) A methodology to project needs for state financial assistance for school construction and preservation over a ten-year period;

(b) Measures of relative wealth of a school district, including but not limited to assessed land value per student, eligible free and reduced price meal enrollments, income per capita per school district, and costs of construction;

(c) Education specifications recognized by the state for the purpose of providing guidance to school districts when designing school construction projects;

(d) A capital asset model for K-12 school construction that considers space and usage needs to calculate construction assistance for:

(i) New schools to accommodate enrollment growth;

(ii) Major modernization projects to address aging facilities;

(iii) Replacement and renewal of major building systems based on achieving lowest life-cycle building costs, provided that standards of routine maintenance are achieved by local districts; and

(iv) Specialized facility improvements including but not limited to STEM facilities, career and technical education facilities, skills centers, and computer labs; and

(e) Alternative means to fund and accommodate increased classroom capacity to meet K-3 class-size reduction objectives.

(5)(a) Staff support for the task force must be provided by the senate committee services and the house of representatives office of program research.

(b) The office of the superintendent of public instruction and the office of financial management shall cooperate with the task force and maintain liaison representatives, who are nonvoting members.

(c) The task force, where appropriate, may consult with individuals from public schools or related organizations or ask the individuals to establish a committee for technical advice and assistance. Members of such an advisory committee are not entitled to expense reimbursement.

(6) Legislative members of the task force are reimbursed for travel expenses in accordance with RCW 44.04.120. Nonlegislative members are not entitled to be reimbursed for travel expenses if they are elected officials or are participating on behalf of an employer, governmental entity, or other organization. Any reimbursement for other nonlegislative members is subject to chapter 43.03 RCW.

(7) The expenses of the task force must be paid jointly by the senate and the house of representatives. Task force expenditures and meetings are subject to approval by the senate facilities and operations committee and the house of representatives executive rules committee, or their successor committees.

(8) The task force must report its preliminary findings and recommendations to the appropriate committees of the legislature by December 1, 2017. The task
force must report its final findings and recommendations to the governor, the superintendent of public instruction, and the appropriate committees of the legislature by October 1, 2018.

(9) This section expires June 30, 2019.

Sec. 7027. RCW 43.19.501 and 2016 c 202 s 58 are each reenacted and amended to read as follows:

The Thurston county capital facilities account is created in the state treasury. The account is subject to the appropriation and allotment procedures under chapter 43.88 RCW. Moneys in the account may be expended for capital projects in facilities owned and managed by the department in Thurston county. (For the 2007-2009 biennium, moneys in the account may be used to predesign projects identified in section 1037, chapter 328, Laws of 2008.) For the 2015-2017 biennium, moneys in the account may be used for studies related to real estate.

((During the 2009-2011 and 2011-2013 fiscal biennia, the legislature may transfer from the Thurston county capital facilities account to the state general fund such amounts as reflect the excess fund balance of the account.)) During the 2017-2019 fiscal biennium, the Thurston county capital facilities account may be appropriated for costs associated with staffing to support capital budget and project activities and lease and facility oversight activities.

NEW SECTION. Sec. 7028. The public use general aviation airport loan revolving account is created in the custody of the state treasurer. All receipts from moneys collected under this chapter must be deposited into the account. Expenditures from the account may be used only for the purposes described in section 4004 of this act. Only the community aviation revitalization board or the board's designee may authorize expenditures from the account. The account is subject to allotment procedures under chapter 43.88 RCW, but an appropriation is not required for expenditures.

NEW SECTION. Sec. 7029. The Washington state parks and recreation commission, with guidance and instruction from the office of financial management, must create a reporting structure to track the success and progress of addressing the maintenance backlog of state parks facilities. The reporting structure must provide a forecast of new project proposals, the status of current funded projects and a list of completed projects. The report must also include a facilities condition index that illustrates changes to the overall quality of facilities of state parks. The legislature intends to receive future biennia capital budget requests that address facility maintenance backlog from the commission in the form of this new report structure as additional information to the current format for agency budget submittal requests.

NEW SECTION. Sec. 7030. If any provision of this act or its application to any person or circumstance is held invalid, the remainder of the act or the application of the provision to other persons or circumstances is not affected.

NEW SECTION. Sec. 7031. This act is necessary for the immediate preservation of the public peace, health, or safety, or support of the state government and its existing public institutions, and takes effect immediately.

MESSAGES FROM THE GOVERNOR

PARTIAL VETO

July 6, 2017

To the Honorable Speaker and Members,
The House of Representatives of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval as to Section 3, Engrossed Substitute House Bill No. 1677 entitled:

"AN ACT Relating to local government infrastructure funding."

This bill provides targeted reforms to the Public Works Assistance Account and directs the Public Works Board (Board) to study new and innovative financing tools. This bill will help local governments in need of financial support and provide additional tools to pay for basic infrastructure needs.

I am, however, vetoing Section 3, which modifies the composition of the Board. Section 3 adds four legislators. Changes to the Board's composition should be based on a member's skill set, rather than organizational representation. I would support the addition of legislators to the Board as ex-officio and non-voting members.

For these reasons I have vetoed Section 3 of Engrossed Substitute House Bill No. 1677.

With the exception of Section 3, Engrossed Substitute House Bill No. 1677 is approved.

Respectfully submitted,
Jay Inslee, Governor

PARTIAL VETO

July 6, 2017

To the Honorable Speaker and Members,
The House of Representatives of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval as to Sections 106, 607, 819, and 1003, Engrossed House Bill No. 2242 entitled:

"AN ACT Relating to funding fully the state's program of basic education by providing equitable education opportunities through reform of state and local education contributions.'

Section 106 limits school districts' use of late start and early release days to seven occurrences each school year. Educators use this time to develop new competencies, collaborate with other educators, receive mentoring from senior teachers, and analyze student data to inform instructional practices. Research shows that this time for job-embedded professional learning and collaboration is linked to student success. Limiting practices that improve student achievement goes against the intent of this bill and our goals.

Section 607 requires the Caseload Forecast Council (Council) to convene a technical working group to determine the feasibility of developing a model to aid in school district four-year budget plans. Timely data does not exist to predict school district-level enrollments that factor in business growth and other local factors. The work required in this section is outside the scope of expertise for the Council. No funding is provided in the 2017-19 omnibus appropriations act; therefore, the Council is unable to contract for this work.

Section 819 ends reporting requirements for school employee health insurance benefits, effective December 1, 2018. House Bill 1042, which I am signing today, removes these reporting requirements. Moreover, funding to support these requirements was not included in the budget, so the Office of the Insurance Commissioner will be unable to produce the report.

Section 1003 repeals, among other things, the statutes that govern approved training and continuing education clock hours for the purpose of credit on the salary schedule, effective for the 2017-18 school year. These statutes are essential to compensation in the upcoming school year.

For these reasons I have vetoed Sections 106, 607, 819, and 1003 of Engrossed House Bill No. 2242.
With the exception of Sections 106, 607, 819, and 1003, Engrossed House Bill No. 2242 is approved.

Respectfully submitted,
Jay Inslee, Governor

PARTIAL VETO

July 7, 2017

To the Honorable Speaker and Members,
The House of Representatives of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval as to Section 5, Engrossed Second Substitute House Bill No. 1341 entitled:

"AN ACT Relating to professional certification for teachers and school administrators."

Section 5 requires the formation of a collaborative of at least 12 members, monthly meetings, and an extensive contracted study. But the 2017-19 omnibus appropriations act does not provide funding for the Professional Educator Standards Board to contract for this work.

For these reasons I have vetoed Section 5 of Engrossed Second Substitute House Bill No. 1341.

With the exception of Section 5, Engrossed Second Substitute House Bill No. 1341 is approved.

Respectfully submitted,
Jay Inslee, Governor

To the Honorable Speaker and Members,
The House of Representatives of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval as to Section 1, Engrossed Substitute House Bill No. 1017 entitled:

“AN ACT Relating to the siting of schools and school facilities.”

Engrossed Substitute House Bill 1017 seeks to address the important and complicated subject of siting schools outside of Urban Growth Areas. While this bill adequately addresses many aspects of the issue, I remained concerned about three items that I would like to resolve with the legislature during the special session.

First, any extension of urban services to serve a rural school must be limited to the size and scale needed to support the long-term needs of the school. Second, the land surrounding a new rural school must maintain its rural character and housing density as specified in RCW 36.70A.070(5). Finally, in order for schools to be sited outside the Urban Growth Boundary Line, school districts must demonstrate that there is no suitable land available within the Urban Growth Area.

For these reasons I have vetoed Section 1 of Engrossed Substitute House Bill No. 1017.

With the exception of Section 1, Engrossed Substitute House Bill No. 1017 is approved.

Respectfully submitted,

Jay Inslee
Governor

To the Honorable Speaker and Members,
The House of Representatives of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval as to Section 18, Engrossed Substitute House Bill No. 1115 entitled:

“AN ACT Relating to paraeducators.”

This measure is an outgrowth of nearly five years of discussion and consideration of the Paraeducator Work Group.

It is also one of the late Senator Andy Hill’s many legacies.

The bill creates the nine-member Paraeducator Board to provide professional development for this group of education employees who assist teachers in the classroom. It requires paraeducators to meet certain minimum employment standards, among other things. This will provide an opportunity for the state's 36,000 paraeducators to develop in their profession and become a teacher through alternative routes, if they so choose.

However, I am vetoing Section 18, which modifies a section of statute that was repealed by another bill this session.

Thanks to the sponsor, Representative Bergquist, and the members of the work group whose great work led to this legislation.

For these reasons I have vetoed Section 18 of Engrossed Substitute House Bill No. 1115.

With the exception of Section 18, Engrossed Substitute House Bill No. 1115 is approved.

Respectfully submitted,

Jay Inslee
Governor

To the Honorable Speaker and Members,
The House of Representatives of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval, House Bill No. 1150 entitled:

“AN ACT Relating to clarifying procedures for appointment to the Chehalis board created by chapter 194, Laws of 2016.”

House Bill No. 1150 removes the requirement that tribal appointments to the Chehalis Board be confirmed by the Senate and clarifies the terms of initial appointments to that Board. This new Board and the Office of Chehalis Basin represent another example of citizens, governments and tribal nations coming together to solve problems that benefit both people and fish.

However, House Bill No. 1150 is identical to Engrossed Senate Bill No. 5097 that was presented to me as a five-day bill, and I signed into law on April 17, 2017. It is not necessary to enact duplicate legislation.

For these reasons I have vetoed House Bill No. 1150 in its entirety.

Respectfully submitted,

Jay Inslee

To the Honorable Speaker and Members,
The House of Representatives of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval, Engrossed Substitute House Bill No. 1504 entitled:

“AN ACT Relating to rail dependent uses for purposes of the growth management act and related development regulations.”

I am committed to supporting economic development across Washington State so all areas and communities thrive. This commitment includes working with legislators and stakeholders on how we better develop rural and other underserved areas.

At the same time, I remain committed to fully supporting the Growth Management Act, which has created the framework for thoughtful growth and comprehensive development plans while protecting vital resource lands.

While this bill might help rural counties to develop adjacent to short line railroads in designated counties, it would undermine our longstanding commitment to preserve working farms and promote agricultural economy.

The Growth Management Act provides for a process to redesignate resource lands and convert the use of those lands. As part of a broader review of the Growth Management Act, it would be appropriate to reexamine how we provide additional flexibility for encouraging economic development in rural areas. It is my understanding that such a review is proposed in the Senate and House budgets, and I would support that review.

For these reasons I have vetoed Engrossed Substitute House Bill No. 1504 in its entirety.

Respectfully submitted,

To the Honorable Speaker and Members,
The House of Representatives of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval, House Bill No. 1578 entitled:

“AN ACT Relating to irrigation district authority.”

This bill provides new opportunities to develop infrastructure projects that support the economy in Eastern Washington and encourages investments in hydroelectric facilities. However, this bill is identical to Senate Bill 5261, which I signed into law on April 19, 2017. This duplicate bill is therefore unnecessary.

For these reasons I have vetoed House Bill No. 1578 in its entirety.

Respectfully submitted,

Jay Inslee

To the Honorable Speaker and Members,
The House of Representatives of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval as to Section Sec. 6, Engrossed Second Substitute House Bill No. 1612 entitled:

“AN ACT Relating to a public health educational platform for suicide prevention and strategies to reduce access to lethal means.”

This section is the same as the language in Section 2 of Engrossed Substitute Senate Bill 5552. Because SB 5552 also includes a couple of additional changes unrelated to the language in this bill, the Code Reviser advises this action so the RCW is clear. I support the policy and am glad that is fully contained in the other bill.

For these reasons I have vetoed Section Sec. 6 of Engrossed Second Substitute House Bill No. 1612.

With the exception of Section Sec. 6, Engrossed Second Substitute House Bill No. 1612 is approved.

Respectfully submitted,

Jay Inslee
Governor

To the Honorable Speaker and Members,
The House of Representatives of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval, Substitute House Bill No. 1877 entitled:

“AN ACT Relating to the release of driving record abstract information affecting registered tow truck operators.”

This bill prohibits actions committed by registered tow truck operators while fulfilling their occupational duties from being included in the driver record abstract requested by and submitted to insurance carriers, provided the operator has not been issued a citation. The intent and policy of this bill is identical to Section 2 of Substitute Senate Bill 5343, which I previously signed into law on April 17, 2017. This bill creates a duplication in the law and is therefore unnecessary.

For these reasons I have vetoed Substitute House Bill No. 1877 in its entirety.

Respectfully submitted,

Jay Inslee
Governor

To the Honorable Speaker and Members,
The House of Representatives of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval, Substitute House Bill No. 1905 entitled:

“AN ACT Relating to the volume limitation for certain vessels exempt from the pilotage act.”

Substitute House Bill 1905 increases the maximum vessel volume that can be exempt from the mandatory use of licensed pilotage within most of the Puget Sound and Grays Harbor. This measure would allow more modern and fuel-efficient passenger vessels to enjoy Washington's waterways. However, Substitute House Bill 1905 is identical to Substitute Senate Bill 5262, which I signed into law on April 20, 2017. It is not necessary to enact duplicate legislation.

For these reasons I have vetoed Substitute House Bill No. 1905 in its entirety.

Respectfully submitted,

Jay Inslee
