Governor's Messages on House Bills Vetoed or Partially Vetoed

H. VETO MSG. ON H. B. NO. 86
May 21, 1971

To the Honorable,
The House of Representatives
of the State of Washington
(Through the Secretary of State)

Ladies and Gentlemen:

I am filing herewith to be transmitted to the House of Representatives at the next session of the Legislature, without my approval as to one item, Engrossed House Bill 86 entitled:

"AN ACT Relating to education."

I am vetoing the proviso to section 2 of this bill which would require the consent of an intermediate school district prior to its elimination through consolidation by action of the State Board of Education. The intermediate school district concept is new with the adoption of the common School Code and the State Board of Education should have the power to adjust and vary school boundaries to maximize the effectiveness of our secondary school system. The proviso would hinder this needed flexibility and would detract from the ability of the State Board of Education to make necessary organizational changes as the districts gain experience through operating under the new law.

Respectfully submitted,
Daniel J. Evans
Governor

H. VETO MSG. ON H. B. NO. 144
May 21, 1971

To the Honorable,
The House of Representatives
of the State of Washington
(Through the Secretary of State)

Ladies and Gentlemen:

I am returning herewith to be transmitted to the House at the next session of the Legislature, without my approval, House Bill No. 144, entitled:

"AN ACT Relating to revenue and taxation."

The inequities of the business and occupation tax are well understood.

Because it is imposed at each stage of production and distribution, it has a pyramiding or doubling effect. This is the very essence of a gross receipts turnover tax. I have long advocated broad tax reform for this state in order to reduce or eliminate this inequitable tax. However, to provide one company an exemption from taxes commonly paid by many other businesses, would not be equitable or fair. The Department of Revenue records indicate that there are many parent and subsidiary companies which are subject to double business and occupation taxes. Although the secrecy provision in the Revenue Act prohibits the release of information on specific firms, the following are some of the typical examples in which subsidiaries are paying Washington business and occupation taxes for work performed for their parent corporations.

(1) A subsidiary of a large computer manufacturer performs services for the parent company and pays business and occupation tax at the 1 percent rate on these activities.

(2) A computer service subsidiary of a steel fabricating company performs computer services exclusively for the parent company and pays business and occupation tax at the 1 percent rate.

(3) A subsidiary which leases equipment to its parent company, a large construction firm, pays business and occupation tax at the 0.44 percent rate.

(4) A large construction company has a subsidiary firm which performs management services for the parent and is taxable at the 1 percent rate under the business and occupation tax.

(5) A large forest product firm has a subsidiary company perform certain management and accounting services, the income from which is subject to the 1 percent business and occupation tax.

In addition to the parent susidiary situation, the present law, under its wholesaling function classification, imposes a double tax on all companies in the state that distribute to two or more of their own retail outlets. This is most common in the case of large retailers in the general merchandise and grocery industry. These firms pay taxes in lieu of the wholesaling business and occupation tax, as well as a retailing business and occupation tax on the same commodities. To provide a special exemption in the case of a parent-subsidiary relationship and to continue to impose a double tax on these other single ownership companies would be highly inequitable. To exempt all of the cases of tax pyramiding without providing alternative sources of revenue, would seriously impair the state's ability to provide the necessary services. What is needed is a broad tax reform of all taxes levied on business.

It may very well be that the impact of a 1 percent business and occupation tax on computer services is excessive under circumstances existing today in Washington State.

I suggest that alternative methods of resolving these tax problems be studied and that these alternatives be presented to the 1972 Session of the Legislature.

Respectfully submitted,
Daniel J. Evans

H. VETO MSG. ON SUB. H.B. NO. 151

May 21, 1971

To the Honorable,
The House of Representatives
of the State of Washington
(Through the Secretary of State)

Ladies and Gentlemen:

I am filing herewith to be transmitted to the House of Representatives at the next session of the legislature, without my approval as to certain items Engrossed Substitute House Bill No. 151, entitled:

"AN ACT Relating to expenditures by state agencies for the fiscal biennium beginning July 1, 1971, and ending June 30, 1973; designating effective dates for certain appropriations; and declaring an emergency."

In my Budget Message to the Washington State Legislature 130 days ago, I acknowledged the difficult decisions which were included in the Budget and asked that we set aside partisan differences in order so that we might meet the fiscal crisis which is affecting all of the people of this state. In my Budget Message, I asked the legislature to avoid the fiscal extremes of placing an untimely additional burden on the taxpayers of this state or of unmindfully reducing the budgets to the point where the agencies could not properly carry out their basic responsibilities. We now have before us the record of the 41st Session of the Legislature and the record is clear that the Washington State Legislature has proposed a Budget which is out of balance by $22 million, does not adequately support some programs, is wasteful in other instances, and in other areas is drafted in such a faulty manner that the intent of the Legislature cannot be carried out by the language included in

the bill.

To some extent, it is possible to repair the Budget through the use of the executive veto power and I intend to use it on 33 occasions in this appropriations bill, as a means of removing some of the more onerous and faulty sections of the bill. I would like to make it clear that it is with a good deal of reluctance that I use the executive veto power on this or any piece of legislation. However, the legislative budget process clearly did not function adequately or in the best interests of the state. In reviewing various requests to veto sections of this bill, I have attempted to be responsive to the citizens of this state, both from the standpoint of what I have selected to veto and by rejecting other veto proposals.

I believe it is also appropriate to comment in this veto message upon those areas in the Budget which are faulty, yet cannot be repaired through the use of executive veto power. I cannot, for example, restore an adequate level of funding to the Department of Ecology. I requested a Budget for the Department which I considered to be the minimum level neccessary to maintain the state's current position with respect to environmental protection. I am convinced that the severely reduced Budget proposed by the legislature will reduce the department's ability to review and approve in a timely manner the plans and designs of waste treatment plants for existing and new industries coming into this state. There is, further, the very real and potential problem that backlogging of plans for review or reduced pollution control efforts on the part of the state may cause the federal environmental protection agency to pre-empt some of the state programs and remove the reasonable buffer of an informed and concerned state agency between local governments and state industries and replace them with a governmental unit which is less sensitive to local issues and problems. I am sure neither of these results is desired by those who have slashed unknowingly at the department Budget. In addition, the Legislature enacted eight bills placing new burdens of substantial impact on the department, with no additional appropriation, representing a questionable approach to the environmental protection of the state's resources.

The Governor's Budget for the Treatment Center for Women at Purdy amounted to $3,285,769 for the two-year period, of which $250,000 would be federal L.E.A.A. funds for excellence in treatment and $761,246 would be revenue received from the federal government and other states for the housing of individuals not capable of being placed within their own treatment system.

The appropriation bill contains only enough funds to staff administration, food services, janitorial services and custody positions; thus, precluding the provision of such treatment personnel as counselors, teachers, nursing staff, recreation leaders, staffing of the work and training release facility and similar services which are necessary to provide a treatment rather than a custodial program.

It should be further pointed out that the staff reduction included in the appropriation bill will not only reduce the program to the level of a caretaker operation but could eliminate the transfer of prisoners from federal and other states and jurisdictions to this facility and reduce to some extent the $761,246 in anticipated revenue. Initial negotiations with other states and the federal government indicated that the primary reason they were interested in transferring female prisoners to this state was the availability of a treatment program for women which is simply not available in their jurisdiction. In addition, the probability of acquiring the federal L.E.A.A. grant of $250,000 for excellence in treatment could be lost given the lack of treatment personnel. Thus, the reduction in funding may be more than offset by loss of anticipated revenue.

The $10 million reduction from the austere level of state aid to higher education which I proposed may well result in a deterioration in the quality of higher education in this state which has taken years to develop. It is equally unfortunate that the legislature did not accept, as I had proposed, the amount of tuition and fees which could be waived for needy students, particularly when they accepted the proposed increase in student tuition and fees. The result of legislative action in this area can be measured by the number of needy students from families who cannot afford to pay the higher costs and are effectively precluded from receiving a higher education in this state.

For the second consecutive biennium, certain members of the legislature in a Conference Committee have taken it upon themselves to make arbitrary changes in the Budget for the Department of Fisheries, and by placing them in line item appropriations, there by prevented use of adequate funding in Fisheries management activities, which have resulted in the large increases in fish yields.

Refusal of the legislature to act responsibly on the proposal to close several state institutions also deserves comment.

At the beginning of the legislative session, I sent each legislator a detailed position paper

which concluded, based on the current and future downward trends in average daily population at the three mental hospitals, that substantial savings could be made through the closure of Northern State Hospital. The arguments presented at that time are still valid. In response to this proposal, the legislature has included an amount of funds which are inadequate to match the provision that the Hospital is to remain in operation for the entire biennium, and has made a vague suggestion in the Budget for study of alternative uses for the facility. Such action is hardly a responsible counterproposal to such a clear issue and I intend to seek additional funding or some other course of action from the 1972 Special Session of the Legislature.

With respect to Fort Worden, the $2,500,000 Budget proposed for the continued operation of this facility is not only unnecessary, the Budget is such that it would be necessary to operate this facility with so few treatment staff that it would become a warehouse operation with little or no treatment program for the 75 youths unfortunate enough to be assigned to the facility. More importantly, Fort Worden is not needed in the juvenile rehabilitation program given the ample capacity in our other institutions and any attempt to keep it open simply means that we are reducing our efficiency at a time when our economy demands cost effectiveness in our programs. The annual cost per resident of $16,666 at Fort Worden as proposed by the legislture is a shockingly high amount and exceeds by eight times the cost of caring for these juveniles in the juvenile probation subsidy program. Because the treatment program and economic issues are so clearly evident in the case of Fort Worden, I have vetoed the provision requiring operation of the facility for two years.

Finally, I would like to comment on one of the most serious and deficient areas in the Budget--the inadequate amount of funds provided to allow the state to maintain a $365 per pupil guarantee. The legislature failed to provide the additional state funds necessary to allow the state to maintain a $365 per pupil guarantee. Primarily because of enactment of property tax relief and failure to enact other proposed legislation used to balance the Budget, the legislature should have provided approximately $15.3 million in additional state general fund appropriation to the Superintendent of Public Instruction. Unless this additional amount is added to the Budget by the 1972 Legislature for distribution to local school districts, it will be necessary to reduce the per pupil guarantee from $365 to approximately $350 during the 1972-73 fiscal year.

Of the $22 million by which the Budget is out of balance, $15 million is a result of the problem of inadequate funding to maintain support to local school districts. The only method by which I can attempt to assure that funds necessary to adequately finance the schools will be available is by vetoing the $20 million General Fund appropriation to the Teachers' Retirement System. I am making this veto with the full assurance that it will not in any way hinder the payment of pensions to retired teachers.

No one can be sure whether revenue will exceed or fall below revenue estimates made for the 1971 Legislative Session. Should sufficient revenue in excess of present estimates appear to be available when the 1972 Session convenes, they will have the option to utilize it to resolve the K-12 shortage and solve other problems in the Budget, and eliminate the impact of this veto. Should revenue be below estimates, the problem of further reduction or tax increase will be more manageable because of this veto.

The specific items which I have vetoed are as follows:

1. Higher Education

I have vetoed a specific limitation on sabbatical leaves at our colleges and universities.

The one percent of faculty restriction contained in Section One is simply a punitive measure which ignores the constructive benefits a properly administered sabbatical leave program contributes to the education process. The remaining language in the bill provides that expenditures for sabbatical leaves must be incurred on a "break even" basis in that the replacement cost and the percentage of salary awarded to the recipient of a sabbatical leave cannot exceed the annual contracted salary of the recipient of the leave. Consequently, the further limitation to one percent of professional staff produces no real monetary savings. In addition, the Council on Higher Education has recently developed through guidelines which have been reviewed by the Legislative Budget Committee which will insure that the operation of the sabbatical or professional leave program is properly supervised in institutions of higher education in the State of Washington. Prior to any further restrictions, those guidelines should have an opportunity to be used and reviewed for adequacy after some experience has been gained.

2. Secretary of State

On page 3, line 23, I have vetoed the following proviso:

"PROVIDED, That expenditures should only be used for the purpose of carrying out his statutory or constitutional duties." The provision is a gratuitous insult applied to no

other elected official and was included solely to limit the discretionary powers of a separately elected official who has, through his dedication, contributed efforts beyond those required by statute, particularly in identifying problems of youth, racial minorities and urban areas. The citizens of the State of Washington are fortunate to have concerned elected officials willing to personally devote additional time and energy to public service rather than sit back and do no more than is statutorily required. Unless such a provision is included for all officials, which would represent a step backward from responsive government, I will not approve it for a single elected official.

3. Attorney General

On page 4, I have vetoed the appropriation on lines 12 and 13, as follows:

"General Fund--Appropriation for Washington Organized Crime Intelligence System------- -0-"

The effect of a zero appropriation for the Organized Crime Intelligence System is to forbid the continuation beyond July 1, 1971, of the Washington Organized Crime Intelligence System for which the Attorney General has received $99,925 in federal funds and which are matched by "in kind" contributions by his office.

The project is designed to provide the state's governmental and criminal justice agencies information necessary to combat organized crime. Its policies are governed by a committee of eleven members, the chairman of which is the prosecuting attorney of Snohomish County, two of the members of which are from professions outside of law enforcement, while the other nine members, including the Attorney General, are either directly or indirectly connected with law enforcement as a profession.

Organized crime, as the very name implies, is a form of criminal activity which transcends normal jurisdictional boundaries, both those which separate the multitude of local governments within the state and those which separate the various criminal justice disciplines. It is systematic, continuous, based on corruption and thrives in the jurisdictional maze caused by fragmented, localized criminal justice agencies. Some central point of reference is obviously necessary to successfully prevent it. The Organized Crime Intelligence System hopes to supply just such a point. It consists of a central index file, a program of training conferences, and a small staff to provide investigatory and technical assistance to local criminal justice agencies.

In the short life of the system, a great deal has been accomplished with these rather minimal tools at no loss to local autonomy or interference with individual rights of privacy. Carefully drafted rules, debated over a number of months, safeguard against possible abuses with regard to the use of any information which may be obtained by the system. In addition, the three staff investigators, two hired directly as a result of the program, have provided vital assistance to the staff of both the federal and county grand juries now in session in Seattle in connection with their investigations of organized crime. Training sessions, attended by more than 70 personnel from local law enforcement agencies throughout the state, have had a marked impact on cooperation between those various agencies in dealing with organized crime. We hope that the success of the project will result in a control of organized crime without infringing upon the rights and responsibilities of local law enforcement agencies; in fact, it was representatives of those agencies who initially requested the creation of the system.

In order that this provision not interfere with the improvement of law enforcement capabilities in the war against crime in the State of Washington, I have vetoed this restrictive appropriation.

4. Attorney General

On page 4, I have vetoed the proviso on lines 21-26 as follows:

"PROVIDED FURTHER, That in no event shall the billings for legal services made to agencies, departments and institutions of higher learning during 1971-73 exceed a total of $5,912,936."

The effect of the second proviso is to render ineffective Section 5 of Senate Bill 648, which established a revolving fund for legal services. That section gives a needed degree of flexibility to state agencies which have unforeseen demands for legal services, allowing them to reallocate additional funds for legal services with the approval of the Office of Program Planning and Fiscal Management. The proviso would specify only the amount of funds which would be spent for legal services and no other service, thus, prohibiting either the agency of the Office of Program Planning and Fiscal Management from making transfers in budgeted items for additional legal services which are necessary and which were not foreseen at the time the Budget was prepared. The proviso will not result in any savings and could cause the state to provide inadequate legal services thereby endangering state funds. Consequently, I have vetoed this proviso.

5. Tax Appeals Board

On page 5, line 28, I have vetoed the following proviso:

"PROVIDED, That the operation of

the board is to be considered full time, except that no salary will be paid to board members except each member will receive $75 per day while sitting at the Appeals Board."

The workload of the Tax Appeals Board has increased to the point that the Board must begin full time operations or risk serious delays in reviewing property tax appeals. To meet the massive backlog, and also to insure that taxpayers will be granted timely hearings, the Board was placed on a full time basis beginning April 1, 1971.

At the same time that the Board began full time operations, the members were placed on a salary rather than a per diem basis. This was done for several reasons including:

1. At the present time, RCW 82.03.050 permits the Governor to determine whether or not the Board should be operated on a full time basis. The section, however, limits compensation to $10,000 per fiscal year if the Board members are paid on a per diem basis. The proviso in the Appropriations Act requires the continuation of the payment on a per diem basis, which has the net effect of limiting payment to Board members to $10,000 per year which would place the Board back on a part-time operational basis.
2. Because of the extremely heavy workload, the members are required to meet on a full time basis. At the present per diem rate of $75 per day plus expenses of $15, the members would be paid $23,400 if they met 260 days per year. Little or no savings would be achieved if Board members were paid on a per diem basis for full time operation.
3. Board members paid on a per diem basis do have the option of becoming members of the retirement system but they do not earn annual or sick leave. If the Board is working full time, yet being compensated on a part time basis, members would be treated quite differently from other boards such as the Liquor Control Board and Utility and Transportation Commission members.

In summary, the principal objections to paying members on a per diem basis, as set forth in the proviso are: (1) regardless of the method of payment, the workload requires full time operation of the Board; (2) no monetary savings will result from compensation for a full time Board or a per diem basis; (3) payment on a per diem basis subjects members to inequitable treatment because they cannot earn annual or sick leave as other officers and employees can; and, (4) in view of the compensation limitations in RCW 82.03.050, it would be impossible to operate the Board on a full time basis.

6. Department of General Administration

On page 6, line two, I have vetoed the following proviso:

"PROVIDED, That $707,000 shall be allocated to the Divison of Banking."

Under the state's Budget and Accounting Act, RCW 43.88, the Governor is responsible for reducing agency expenditures so as not to exceed revenues available in a fiscal period. It is clear that if this proviso were allowed to remain and if it were necessary to reduce expenditures commensurate with a decline in forecasted revenues, it would be necessary for other divisions within the Department of General Administration to absorb the additional savings which would have otherwise been assigned to this division. The potential opportunity for such preferential treatment as presented in the proviso is simply inconsistent with sound administrative procedures.

7. The Cemetery Board

Veto on page 11, line 4, the words "General Fund for."

The funds for operating the Cemetery Board are provided from a special account entitled Cemetery Account. The removal of the words "General Fund for" is intended to correct a drafting error in the bill and to clarify the source of funding for this agency.

8. Department of Social and Health Services - Division of Institutions

On page 13, beginning on line 13, I have vetoed the proviso which states:

"PROVIDED, That it is the intent that the facilities at Fort Worden shall continue to serve it [s] residents to June 30, 1973."

As I indicated in my earlier comments, given the surplus capacity in other state juvenile institutions, the strong need to restore at a future legislative session the proper funding level of the Juvenile Probation Subsidy Program so as to continue to adequately support this innovative treatment program and the shockingly high cost per resident if Fort Worden were continued in operation, I am vetoing the proviso which would require the state to continue operation of the Fort Worden facility and I have instructed the Secretary of the Department of Social and Health Services to prepare a plan for the orderly phase-out of this facility. In addition, and in order to assist the community of Port Townsend to attract new business to replace the lost state jobs, I have instructed the Director of the Department of Commerce

and Economic Development to take positive steps to assist the community to provide other employment opportunities for residents of that community.

9. Department of Social and Health Services - Division of Institutions

On page 13, beginning on line 21, I have vetoed the proviso dealing with Northern State Hospital.

The legislature has provided $9.8 million to continue operation of Northern State Hospital for the entire 1971-73 biennium. Based upon a fiscal analysis, it has been determined that the $9.8 million appropriation is inadequate to fund the operation of Northern State Hospital and provide the proper level of care for patients in that facility. I therefore, am vetoing the provisos which allocate $9.8 million to operate Northern State Hospital and require the Department of Social and Health Services to study alternative uses of the facility and submit its findings to the 43rd Session of the Legislature and am directing the Secretary of the Department of Social and Health Services to continue to operate Northern State Hospital at a level of expenditure which will insure proper patient care and to further submit to the 1972 Special Session of the Legislature, alternative plans for the use of the Northern State Hospital facilities and for providing the necessary mental health care to residents of that area together with a supplemental budget request which would provide the funds necessary to properly operate the Hospital for the entire 1971-73 biennium.

10. Department of Social and Health Services - Public Assistance

On page 15, line 8, I have vetoed that portion of the language of a proviso designating internal agency management structure. The department and I share the desire that fraud investigations be centralized in a single administrative unit. While that portion of the proviso is unnecessary, I have not vetoed it. However, the additional requirement that it "shall be directly responsible to an Assistant Secretary of the Department" imposes unnecessary constraints on the Department at a time when they are in the process of organizing to provide optimum services in all the areas of their responsibility. To direct this organizational assignment, out of context, is undesirable. Therefore, a veto of that language, "which shall be directly responsible to an Assistant Secretary of the Department of Social and Health Services:" will retain the legislative intent to centralize the fraud investigation and referral activities but allow the Secretary to place this activity in its appropriate organizational setting.

11. Department of Social and Health Services - Public ASsistance

On page 16, line 12, I have vetoed a proviso restricting the use of certain appropriated funds.

The proviso appropriating $2,836,778 for state funds to finance the "medical-only" program if the United States Department of Health, Education and Welfare does not provide a waiver to the State must be eliminated so that these funds can be utilized to achieve the flexibility necessary to correct other program deficiencies that are inherent in this Budget.

We believe that the United States Department of Health, Education and Welfare should eventually grant the waiver. However, if this is not the case, there are several options for financing the revised medical plan open to the state while this proviso is directed toward only one of those options.

12. Department of Social and Health Services - Public Assistance

On page 16, line 18, I have vetoed a proviso limiting the use of certain appropriated funds.

The appropriation of $14,058,000 restricted to the purpose of supplying money grants to certain categories of assistance recipients creates several very difficult problems for the Department. Provision for State Office exceptions on individual cases, aside from being a serious administrative problem, violates State Law under RCW 74.08.040 and violates HEW program regulations 20-7, Title 45, Chapter 11, Part 233.20 (a) (2) (V). Difference in standards within programs as proposed for AFDC-Regular versus AFDC-Employable cases is prohibited unless it can be demonstrated that bona fide differences in requirements actually exist (HEW Handbook IV 4324.28).

Additionally, the kinds of exceptions envisioned by this proviso would negate much of our efforts toward simplified program standards. Again, simplification is an essential part of our plan to reduce error and fraud in the public assistance system and the savings that I have mentioned previously cannot be attained if this proviso were to remain.

The $16.8 million contained in the immediately preceding section and this one will be held for additional caseload, or other grant problems. Veto of the restrictions will allow the department to provide the best possible response to legislative intent without jeopardizing our ability to simplify or creating problems with federal compliance.

13. Department of Social and Health Services - Public Assistance

On page 19, beginning on line 3, I have vetoed a proviso relating to day care service.

The proviso establishing demonstration projects providing 24 hour day care services is proposed at a

time when the legislature failed to provide adequate funds for on going day care services. However, because I believe that the Department should engage in innovative projects to improve child care services as an adjunct to the goal of providing employment opportunities to all persons who are public assistance recipients, I have instructed the Department to, within means available, engage in selective research projects including a 24-hour day care service project as well as to make improvements in all child care programs.

A veto of the proviso will allow the use of the funds contained in it to help continue ongoing day care services and provide some funds for demonstration projects of the kind intended in the proviso.

14. Department of Social and Health Services

On page 19, beginning on line 7, I have vetoed a proviso establishing an advisory group to the State Public Assistance Advisory Commission. It is inconsistent with SHB 417 which abolished the Public Assistance Advisory Commission as well as other advisory groups to the Department of Social and Health Services and allows the Department to appoint new advisory groups as necessary to carry out the realigned responsibilities of the Department. I have been assured by the department that they plan to include recipients in advisory committees that will conform to the reorganized structure of the department and I have directed the Secretary to assure that adequate recipient representation is provided.

15. Department of Social and Health Services - Public Assistance

On page 20, beginning on line 28, I have vetoed a proviso prohibiting certain uses of Urban, Racial and Rural Disadvantaged appropriation funds.

In the first instance, I have been advised by a number of legislators that the proviso in question was not in the draft copies of the appropriation nor the explanatory material made available to legislators on May 7 and which most legislators reviewed over the weekend prior to the vote on the Budget on May 10. While I am uncertain as to exactly how the proviso became inserted into the final conference version of the report, I am certain that many legislators were not aware of its existence when they voted on the Budget.

Secondly, the Superintendent of Public Instruction and the State Board of Education, as well as a number of local school district superintendents have urged me to veto the proviso because of its possible impact on the total school transportation system in this state.

One of the reasons the Urban, Racial and Rural Disadvantaged student program was shifted to the Department of Social and Health Services was to allow the state to obtain federal matching funds as a means of paying for the cost of the program. I am gravely concerned that if the proviso were allowed to remain, it would conflict with the recent United States Supreme Court decision giving school boards the discretion of bussing to desegregate schools and could result in total inability to use the appropriation to obtain federal matching funds. This would result in the need to provide additional state tax resources to make up for those federal resources which would be lost because of the conflict.

Finally, I believe this decision should be left to local school districts who best know their own needs and problems. For these reasons, I have vetoed the proviso.

16. Planning and Community Affairs Agency

On page 22, beginning on line 15, I have vetoed the phrase "of law enforcement agencies of municipal governments."

I am vetoing those words of the proviso which would allocate the additional $100,000 to meet the problems of drug abuse solely to law enforcement agencies.

The need for additional assistance to many drug abuse programs is evident. These funds will be withheld until the second year of the biennium to be utilized as newly required state matching funds for federal law and justice grants. Flexibility should be maintained to assure that they can be used to meet the highest priority local programs, whether they be in the prevention, rehabilitation or enforcement area, and which will satisfy the federal matching requirements. The vetoed language does not assure that flexibility.

17. Parks and Recreation Commission

On page 23, beginning on line 32, I have vetoed the proviso requiring reopening of two specific parks.

Because of the decline in revenues below estimates and in order to maintain a balance between revenues and expenditures during 1970, each state agency was requested to reduce expenditures. In order to meet the assigned savings goal, the Parks and Recreation Commission ceased operating five state parks. Given the need for continuing austerity, funds were not included in the budget for the Commission to resume operating these five parks during the 1971-73 biennium. The 1971 Legislature not only reduced the total amount of funds available for operating parks by $193,898, the Legislature, through the proviso, would divert an additional $47,000 from operating funds for other parks, to reopen two of the five parks which were closed. Given the critical shortage of funds for park operations, I am vetoing

the proviso which would reopen two of the closed parks at the expense of closing or reducing the operations of parks in other parts of the state. In addition, I am requesting the Parks and Recreation Commission to work with other units of government to determine if they could assist in providing needed recreational facilities by reopening, even on a limited basis, parks in their jurisdiction.

18. Department of Commerce and Economic Development

On page 24, beginning on line 20, I have vetoed a proviso requiring use of general funds to operate certain tourist information centers.

The 1971 Legislature directed that 50% of the cost of the Tourism Promotion Program be financed from the Motor Vehicle Fund. In addition, the Legislature directed through the proviso that the state continue to operate five tourist information centers in the state. The purpose of this veto is to allow for the operation of these tourist information centers, but from the Motor Vehicle Fund appropriation rather than the General Fund appropriation as would be required by the proviso directing the agency to continue operating tourist information centers. Because each of the five tourist information centers is located adjacent to an interstate highway, the majority, if not all, of tourists who stop to seek information at these centers are motorists. It seems more appropriate that the operating costs of these centers, because of their relationship to highway travel, be financed from the Motor Vehicle Fund rather than the General Fund appropriation.

19. Colleges and Universities

I have vetoed similar provisos contained in the appropriations act for each of the state colleges and universities, as follows:

a. University of Washington, page 27, line 28 to page 28, line 15;
b. Washington State University, page 30, line 20 to page 31, line 7;
c. Eastern Washington State College, page 33, line 3 to 23;
d. Central Washington State College, page 35, line 13 to 33;
e. The Evergreen State College, page 37, line 22 to page 38, line 9;
f. Western Washington State College, line 27, to page 39, line 14.

Each proviso would set aside a portion of the operating funds for the college to be held in a reserve status until such time as it can be determined whether or not the number of students actually enrolled during fall of 1971 and forecasted to be enrolled during fall of 1972 are consistent with the number of students for which funds were provided for in the Budget. I wish to make it clear that while I am vetoing this proviso, I endorse the concept of reserving funds as expressed by the proviso until a more accurate determination of enrollment can be made. However, I believe the redistribution of funds between schools is a significant decision which should be made by the entire Legislature, unless timing makes that impossible. Inasmuch as the Legislature will meet in special session in January, 1972, only a few days after the date specified in the proviso, we will have an opportunity to bring this and other fiscal matters before the whole Legislature. Consequently, there is no reason for this procedure to remain in effect. Pursuant to the provisions of Senate Bill 208, (Ch. 40, Laws of 1971, Ex. Sess.) the legislative intent is clear, I concur with it, and will direct the colleges and universities to place the sums contained in the vetoed provisos into reserve. In the event I am satisfied that the criteria relating to enrollment estimates have been met, the funds will be allocated. Otherwise, the entire Legislature will be requested to redistribute these amounts among the schools, or to other programs.

20. Colleges and Universities

The budgets of five of the colleges and universities contain a proviso which states, "That the increase in tuition and fees shall be phased over a two-year period of time or until a degree is granted to those out-of-state students enrolled during spring quarter of the 1970-71 academic year."

The language of these provisos may be somewhat unclear. While I have not vetoed any portion of the language, I wish to clarify it by indicating what I believe to be clear legislative intent, based upon revenue assumptions contained in the Budget, and communications with legislative committees. It is intended that the increase in tuition for out-of-state (non-resident) students be phased in two steps with approximately one-half the increase in the 1971-72 academic year, and the entire increase to the maximum level established by the 1972-73 academic year. The qualifying language "or until a degree is granted" was intended to shorten the period of phasing for a non-resident student who completes a degree program, and chooses to begin another, and was not intended to lengthen the period of phasing for non-resident students who take more than two years to complete a degree program.

21. Community Colleges

I have vetoed a proviso contained in the appropriation to the community colleges on page 47, line 8,

which limits the allocation of certain funds for the second year of the biennium, based on a study of vocational education weighting formulas.

During the 1971 Legislative Session, information was presented indicating that the weighting which provides 1.5 times the funding for costs of vocational technical enrollment than for academic transfer enrollment did not accurately reflect the actual cost to the community college system. As a result, $3,129,620 representing the cost of additional weighting was placed into a contingent status for allocation by the Governor, by January 1, 1972, subject to approval of the Legislative Budget Committee, based upon a staff study by the Legislative Budget Committee, utilizing procedures and definitions specified by the Council on Higher Education. Based upon my allotment authority, I will direct the community college system to place this amount into reserve, pending further allocation. My reasons for vetoing this section are similar to the veto of provisions in the budgets of the four-year colleges and universities. I concur with the need for the study, and believe the procedures established by the study are appropriate. If the study shows that the weighting assumed by the Legislature is appropriate, I will allocate the funds. Because the time for allocation is nearly coincident to the 1972 Special Session, if the study indicates that some alternation should be made in the allocation weighting, I will propose a redistribution of funds for the approval of the entire legislature.

22. Community Colleges

On page 50, beginning on line 29, I have vetoed the words "academic general education and."

The general purpose of the proviso is to establish a higher priority for academic transfer, vocational training courses, and adult basic education, than for lower priority courses in allocating available funds and student spaces. If insufficient spaces are available to serve all students, the proviso requires that "academic general education" and "community service" courses either be discontinued, or continued on a self-supported basis.

The "academic general education" category includes courses which are generally remedial in nature and are not specifically designed for students who will transfer to a four-year institution, for students who want to complete high school, or for adults who want a basic education. These courses do, however, serve to develop the competencies of individuals so that they may effectively participate in future academic transfer courses and perhaps even more importantly assist individuals in gaining the skills necessary so that they may participate in the vocational technical occupational programs of the community colleges. Many of these individuals are referred under such state programs as Vocational Rehabilitation and WIN (Work Incentive, administered by the Department of Employment Security). A listing of the courses shows such titles as elementary algebra, human relations, writing skills development, basic mathematics, fundamental of business mathematics, patterns of writing, English fundamentals, and effective studies. To eliminate such courses from the community college curriculum or to require that they be supported entirely by the students is to strike at the heart of the program desperately needed by those citizens of the state who have only the community colleges to serve their educational needs; consequently, at the request of both the Council on Higher Education and the State Board for Community Colleges, I am vetoing their inclusion in the category of programs to be either discontinued or made self-supporting. However, I have approved the remainder of the proviso as it relates to "community service" programs.

It is clear that some courses identified as "academic general education" more properly fit within the "community service" designation, and that this designation varies from college to college. While the answer to this is not to immediately require that all "academic general education" courses be treated as "community service" courses, I will specifically ask the Community College Board to control any redesignation of courses now categorized as "community service" and to provide necessary recommendations and information to the Council on Higher Education to meet the requirements of HCR 7 and to assure that uniform standards for categorizing courses on a uniform basis at all schools is achieved by the 1972 Legislative Session.

23. Special Appropriations

On page 53, line 7, I have vetoed the wording which would require me to distribute the funds provided to partially compensate for the employer contributions to the Public Employees' Retirement Fund. While the funds may ultimately be distributed on a pro rata basis, further time is needed to determine whether special problems exist requiring some other method of distribution. My veto of this section is designed to provide flexibility to distribute the funds in the most desirable manner after we have had the opportunity for further analysis.

24. Teachers' Retirement System

On page 55, beginning on line 25, I have vetoed the entire section appropriating $20 million for

contributions to the Teachers' Retirement System.

The Budget as passed by the 1971 Legislature is in excess of $22 million out of balance. A preliminary analysis indicates that of this amount, approximately $15 million is needed to maintain the state $365 per pupil guarantee for students in kindergarten through the twelfth grade during the 1972-73 fiscal year. It is equally clear that unless the 1972 Special Session of the Legislature adds approximately $15 million to the Common School Apportionment appropriation, local school districts will either have to reduce the quality of their education programs or increase special levies to supplement the inadequate amount of state funds provided in the Appropriations bill. Because I do not believe it is desirable to reduce the quality of education and because I am opposed to increasing special levies to make up for an inadequate amount of state support, I am vetoing the General Fund appropriation of $20 million and will ask the 1972 Special Session of the Legislature to make a supplemental appropriation to the Superintendent of Public Instruction to assure that the $365 per pupil guarantee can be maintained for both years of the 1971-73 biennium. I would like to point out that by vetoing the appropriation to the Teachers' Retirement Fund, it is with complete assurance that pensions payments to retired teachers will be made.

I recognize that the veto of the appropriation to the Teachers' Retirement System also deletes state funds used to pay one-half of the administrative cost of the system. The appropriation for administration has been left intact. In order to meet the formula for payment of administrative costs contemplated by RCW 41.32.410 and insure that the members of the system will not have to bear an inequitable share of the administrative costs, funds from my emergency fund appropriation will be made available to pay one-half of administrative costs until a supplemental appropriation can be provided by the 1972 Legislature.

25. Unanticipated Receipts

On page 60, line 26, I have vetoed a portion of the section dealing with unanticipated receipts.

During the 1971-73 biennium, the state will receive into its general and other funds from which the Legislature makes appropriations, over $900 million in federal matching grants and contracts. These funds represent a major source of support to Public Assistance and other Human Resources programs, public school through education grants, highway construction, and many other programs of state government. Each state agency in their budget request clearly identifies the amount and the purpose of each federal grant that is anticipated to be received by the agency during the biennium. Because the federal appropriations are for only a one-year duration, whereas the state budget is for a two-year period, it is necessary for each agency to estimate the amount of federal funds they will receive. During the course of the biennium as federal appropriations are established, all agencies go through a procedure of reducing or increasing their estimate of federal revenues to reflect final federal grant allocations. Section 109 in its present form would require each state agency to receive the approval of the Legislature, if it is in session, or the Legislative Budget Committee, if the Legislature is not in session, in the event that federal grants are in excess of the amounts anticipated in the budget.

It is clear that the Legislature wants to assure that whenever not specifically precluded by the terms or the nature of the grant the receiving state agency will utilize federal grant funds in excess of amounts estimated in the Budget to support regular state programs, so as to save state tax funds. I am in full agreement with the desirability of using any available federal funds in lieu of state tax resources and have approved that portion of the section which places this requirement on state agencies.

However, the requirement that approval of either the Legislature or the Legislative Budget Committee must be obtained prior to expenditure is unworkable. While I am in agreement with the fundamental principle of government that the Legislature appropriate all funds to be expended, the State of Washington is at a distinct disadvantage compared to those states who have a full time Legislature responding to changes in federal laws, new federal programs or changes in the amount of federal revenues to be allocated to state programs. In order for this state to be able to respond to changing federal conditions, it must have a mechanism whereby federal funds can be utilized in a timely manner. Such a procedure already exists as set forth in RCW 43.79.250-.280 which designates the Governor as the state's agent to receive and deposit in the Treasury, federal funds not anticipated in the Budget and further allows him to authorize the expenditure of these funds. It is, in essence, this procedure which the state has been following since 1945. The process of determining whether a particular grant is in excess of those estimated in the budget, requiring compliance with this provision is a time consuming process and would result in large numbers of small grants or contract charges being processed through the Legislative Budget Committee. Normal federal allocations to the Department of Public

Assistance, which may be in excess of earlier estimates, because of frequent changes in federal regulations and, which must be expended immediately to avoid cash flow problems, could be delayed unnecessarily by requiring committee approval. I see no compelling need to involve a legislative interim committee in the routine bookkeeping task of adjusting revenue estimates to final federal grant allocations and the potential delays and administrative burdens seem highly desirable. Therefore, I have vetoed a portion of Section 98 requiring such prior approval.

I have approved the provision in Section 47 which requires quarterly review by the Legislative Budget Committee of allocations of the Law and Justice Committee, which represents the most significant new federal program. I have also directed the Office of Program Planning and Fiscal Management to develop improved information for both the 1972 and 1973 Session of the Legislature on new federal programs, and I believe these two procedures will provide more meaningful information to the Legislature than the controls in Section 98.

26. Salaries

On page 63, line 16, I have vetoed Section 107 which was intended by the Legislature to preclude those state employees who are not under the jurisdiction of either the State Department of Personnel or the Higher Education Personnel Board from receiving a salary increase as long as they remain in the same job classification. Employees which would presumably be affected by this section include college and university faculty members and employees exempt from Civil Service status in state agencies. Based upon informal advice from the Attorney General, it is clear that the language of the section is so defective as to accomplish the exact opposite of that intended by the Legislature. The essence of the advice from the Attorney General is that the only state employees in a job classification are those employees in the classified service, as classified by the Department of Personnel or the Higher Education Personnel Board and that faculty members and exempt personnel are not in the category which can be construed to be a job classification. If the section were allowed to remain, it would result in the withholding of regular merit salary increases to employees in the classified service, a result specifically rejected by vote in the Senate, while not prohibiting a salary increase for non-classified personnel.

Because this section so clearly has the opposite effect from that intended and because it is so discriminatory in its application to some employees and not others and finally because if implemented, it would create chaos in salary administration for classified employees, I am vetoing the entire section.

27. Travel

On page 67, line 29, I have vetoed a portion of the section which establishes procedure dealing with out-of-state travel.

While I concur with the legislative intent of Section 109 to reduce the amount of state funds expended for out-of-state travel, I do not concur with the Legislature's intent to apply these restrictions to executive branch agencies or the method expressed in the section for controlling out-of-state travel. I believe it is equally desirable to reduce the out-of-state travel for all agencies of state government and not just those agencies which are part of the executive branch of government. The control procedure set forth in the act would require the Director of the Office of Program Planning and Fiscal Management to become unduly preoccupied in reviewing and approving each request for out-of-state travel to the extent that it will be necessary to sacrifice more important and economically beneficial activities. From another standpoint, it is an absurdity to expect someone from the Budget Office to determine the priority of individual trips related to scholarly and research pursuits in our colleges and universities. I expect each agency head to manage the internal affairs of the agency for which he is responsible, and to take the steps necessary to reduce the amount of out-of-state travel in his agency so that it is unnecessary to establish a centralized approval procedure. I have allowed to remain in this section the requirement that each agency submit a monthly out-of-state travel report to the Office of Program Planning and Fiscal Management which will be forwarded to the 1973 Session of the Legislature and the Legislative Budget Committee. I believe that by making agency heads responsible for the control of out-of-state travel and by allowing the reporting requirements to remain in the section, agency heads will be able to achieve a more effective utilization of out-of-state travel than could possibly be achieved through a centralized control procedure.

28. Internships

I have vetoed Section 112 which prohibits expenditure of state funds for student internships in state government. The Legislature during the past session utilized a large number of student interns. The Conference Committee which dealt with the Budget inserted this proviso which had been in no other version of the Budget, and it was not discussed on the Floor. Apparently, the members of the

Conference Committee take the position that what is good for the Legislature is not good for the Executive Branch. I do not agree. Intern programs have played an essential role in the entire educational process, providing relevant experience for the student with substantial return to the state at minimal state cost. Work study programs, which play a growingly important role in educational programs would be eliminated. While emphasis is placed on opportunities which can be funded entirely with non-state funds, in many instances some state participation is essential. For example, the state participates in a program with the American Industrial Development Council and the Economic Development Administration to train an American Indian for subsequent work in industrial development on Indian Reservations. The state is required to pay one-half of the salary of the intern, receives valuable service from him during his period with state government, and will receive substantial long-term benefit from his training. This proviso would require breaching our commitment to the participants in this program without completing it. Additionally, it would require breaching a commitment with other interns already hired, with little financial savings. This proviso represents unwise policy, inserted at the last minute by the Conference Committee, and has therefore been vetoed.

29. Salaries

I have vetoed Section 113, which was intended by the Legislature to preclude the payment of salary increases to those state employees paid from appropriated funds who earn in excess of $15,000 a year. Based upon informal advice received from the Attorney General, it is clear that this section, like Section 107, has some effects which were not anticipated by the Legislature. In essence, this section would not apply uniformly to all state employees. For example, employees paid from such non-appropriated funds as the Central Stores Revolving Fund, the Printing Revolving Fund, Horticultural District Funds, Agricultural Local Funds, Commodity Commission Funds, Farm Revolving Fund, all college and university Local Plant Funds, all college and university grant and contract funds, Washington State Historical Association Local Museum Fund, the Eastern Washington Historical Society Local Museum Fund, the Forest Insect Disease Control Fund, the Clark-McNary Fund, the Forest Assessment Fund, the Log Patrol Revolving Fund, the State Forest Nursery Fund, the Slash Clearance Fund, and the Forest Access Revolving Fund would not be affected because these employees are not paid from funds contained in this bill.

While there are sufficient technical errors alone in the section to warrant its veto, I am equally concerned about the effect that the section would have on the quality of leadership in state government if such a section were allowed to remain. During the past six years, this administration has diligently worked to attract fresh leadership, people with innovative ideas who are willing to make the effort necessary to make state government more responsive to the public. This fresh leadership has resulted in a whole new way of caring for those who are retarded, for those who are affected with mental illness, for those juveniles and adults who have violated the law. It has resulted in increasing relevance in the instructional programs of the state colleges and universities. It has resulted in more vigorous efforts to clean up this state's air and water. I believe the citizens of this state can be justifiably proud of these and the many other changes which this new leadership has accomplished in response to an era marked by unprecedented economic growth and an equally unprecendented decline in employment and by social disorder and unrest. I am simply unwilling to follow the legislative suggestion that we reward the hard work and dedication of these employees by limiting their opportunity to continue to receive any merit adjustments which other employees would continue to receive.

Therefore, I have vetoed Section 113 in its entirety.

With the exception of the items described above, the remainder of the bill is approved.

Respectfully submitted,
Daniel J. Evans
Governor

H. VETO MSG. ON SUB. H.B. NO. 152

May 21, 1971

To the Honorable,
The House of Representatives
of the State of Washington
(Through the Secretary of State)

Ladies and Gentlemen:

I am filing herewith to be transmitted to the House of Representatives at the next session of the Legislature, without my approval as to certain items, Substitute House Bill No. 152, entitled:

"AN ACT Adopting the capital budget; making appropriations for capital improvements; authorizing certain projects; and declaring an emergency."

This capital budget contains only $6.8 million in new state General Fund appropriations, a sharp reduction from previous biennia. However, at the last minute certain projects were added by the Senate from the General Fund, with no discussion, and totally

ignoring higher priority and urgent projects which should be funded if state General Fund money were available. Because of the lack of time, the Capital Budget returned by the Senate was not discussed in the House. This does not represent a responsible method of allocation of state resources, and I have therefore vetoed appropriations for several projects.

The specific items I have vetoed are as follows:

1. Washington State University
On page 26, lines 28-30, I have vetoed the following appropriation:

	From the General Fund
Laboratory Animal Resource Facility Planning & Design	$31,020

The Laboratory Animal Resource Facility project consists of a holding facility for livestock under veterinarian care at the University. While it is a project that will eventually have high priority, it has not been accorded a sufficiently high priority by the University this coming biennium to warrant funding it from the state General Fund.

2. Eastern Washington State College
On page 30, beginning on line 26 through line 1 on page 31, I have vetoed the following appropriations:

	From the General Fund
Instruction and Computer Center Building, Design and Planning	$91,642
Plant Services - Phase II and III Maintenance Building Plant Storage Building	$20,278

The Instruction and Computer Center Building is basically an instructional classroom and faculty office space facility with a small area set aside for housing the computer operations. Given the slowdown in enrollment growth at the college, it will be several years before enrollments reach a level where additional space of this type will be required, according to the college's own space utilization standards.

The Plant Services, Phase II and III, project at Eastern Washington State College is another structure that cannot be justified at this time on the basis of needed space. Currently the college stores supplies and other plant articles in a variety of places, which the college administrators indicate will be adequate now that there is a slowdown in college growth.

While I am sure that both of these projects will materialize in a future biennium, they do not warrant funding at this time from the state General Fund.

3. For the State Board of Community College Education
On page 43, lines 15 through 21, I have vetoed the following appropriations:

	From the Community College Capital Projects Account
Language Research Center (correctly identified as Learning Resource Center) Phase II - Everett Community College	$728,900
Science Building - Edmonds Community College	$4,400,554

My capital budget for community colleges was based upon fully utilizing the unused bonding capacity of the Community College System of $13.9 million. The amendment by the Legislature to the Tuition and Fee Bill (HB 740) which excluded Vietnam veterans from paying the increase in tuition and fees will further reduce this unused bonding capacity by $2.6 million. As a result of this amendment, there are not sufficient funds available for those projects initially included in the Capital Budget, let alone the two additional projects added by the Legislature.

For the Legislature to add two more projects, for an additional $5.1 million may be a popular political approach, but not a responsible method of handling community college facility requirements.

I am certain that the Learning Resource Center at Everett Community College and the Science Building at Edmonds Community College will receive additional consideration by the next session of the legislature, at the same time additional financing is considered.

With the exception of the items described above, the remainder of the bill is approved.

April 12, 1971

To the Honorable,
The House of Representatives
of the State of Washington
Ladies and Gentlemen:

I return herewith without may approval as to one item, Engrossed House Bill No. 166, entitled:

"AN ACT Relating to revenue and taxation; and adding a new section to chapter 4, Laws of 1963 and to chapter 36.21 RCW."

This bill adopts qualifications for persons engaged in the assessment of real property for purposes of taxation. The bill as originally drafted granted an exemption from the qualification provisions for persons

who had attended and satisfactorily completed an assessor's school operated jointly by the Department of Personnel and the Washington State Assessor's Association. In fact, this school is operated jointly by the Assessor's Association and the Department of Revenue.

I have vetoed from the bill that language relating to the assessor's school in this erroneous fashion. I urge the Legislature to cure this defect in the language of the bill by adopting new legislation which would exempt from the qualification provisions imposed by this bill persons who have completed the assessor's school operated jointly by the Department of Revenue and the Washington State Assessor's Association.

With the exception of the item referred to above, the remainder of the bill is approved.

Respectfully submitted,
Daniel J. Evans

H. VETO MSG. ON H. B. NO. 172
May 20, 1971

To the Honorable,
The House of Representatives
of the State of Washington
(Through the Secretary of State)

Ladies and Gentlemen:

I am returning herewith to be transmitted to the House of Representatives at the next session of the legislature without my approval as to four items, Engrossed House Bill No. 172, entitled:

"AN ACT Relating to Revenue and Taxation."

The general purpose of this bill is to remove from various provisions of our tax law references to chapter 262, Laws of 1969, ex. sess., the tax reform "package" which did not become effective by reason of the failure of the voters to approve HJR 42 in the 1970 general election.

Sections 13 and 14 of Engrossed House Bill No. 172 remove these references from RCW 84.36.128 and from RCW 84.36.129, respectively, both statutory provisions relating to the present $50.00 property tax exemption for low income elderly home owners.

Engrossed Substitute House Bill No. 283, which I have signed today, provides for a new system of property tax relief for low income elderly home owners, and repeals, in section 27(2) and (3) these very same provisions which are amended by sections 13 and 14 of Engrossed House Bill No. 172. In order to avoid any inconsistency between the provisions mentioned above, and specifically in order to avoid any uncertainties as to the effect of the repealers contained in Engrossed Substitute House Bill No. 283, I have vetoed sections 13 and 14 of Engrossed House Bill No. 172.

Sections 15 and 16 of Engrossed House Bill No. 172 consist of Senate amendments purporting to continue the "2 mill shift" in the state property tax to be levied for support of the common schools in 1971 and 1972. However, section 15 does not raise the aggregate millage limitation to 22 mills for levies made in these two years. Such a raise in the aggregate limitation is necessary in order to continue the 2 mill shift and to continue, at the same time, the present levying authority of other taxing districts.

Sections 24 and 25 of Engrossed Substitute Senate Bill No. 897 are identical to sections 15 and 16 of Engrossed House Bill No. 172, with the exception that section 24 of Engrossed Substitute Senate Bill No. 897 does raise the aggregate millage limitation for 1971 and 1972. Relying upon the corresponding provisions of Engrossed Substitute Senate Bill No. 897, which correct the technical deficiency in these provisions of Engrossed House Bill No. 172, accordingly I have vetoed sections 15 and 16 of Engrossed House Bill No. 172.

With the exception of the four items discussed above, Engrossed House Bill No. 172 is approved.

Respectfully submitted,

H. VETO MSG. ON SUB. H.B. NO. 283
May 21, 1971

To the Honorable,
The House of Representatives
of the State of Washington
(Through the Secretary of State)

Ladies and Gentlemen:

I am returning herewith to be transmitted to the House of Representatives at the next session of the legislature, without my approval as to five items, Engrossed Substitute House Bill No. 283, entitled:

"AN ACT Relating to Revenue and Taxation."

This bill deals with a number of aspects of the property tax, and stems from various problems which, although existing prior to the present state-wide revaluation program, have been highlighted by reason of that program. It is, in general, a comprehensive and well thought-out bill, and will substantially aid in solving these problems, while allowing the revaluation program to continue. However, there are certain provisions of the bill which will create more problems than they solve, for taxpayers and tax administrators alike.

Section 1 purports to establish a new statutory standard to be used in the determination of true and fair value for property tax purposes. It strikes the old statutory criteria for determining true and fair value. Since, in my opinion, the stricken

language does no more than spell out those criteria in determining true and fair value which would be used in accordance with normal appraisal practices, and since the standard of "true and fair value in money" is still retained, I believe that the elimination of the old statutory language, by itself, makes no substantive change and can therefore stand.

However, in the new statutory language there are both legal and administrative problems. The language in subsection (1)(a) relating to adjustments by appropriate discounts for sale conditions other than for cash is being vetoed because of its legal uncertainty. It is standard appraisal practice, in the use of comparable sales, either to adjust contract sales where the contract price is inflated by a low down payment or an unreasonably low interest rate, or to reject such comparables entirely. It is not clear whether the new language is simply an expression of an intent to continue this practice, or whether it requires in addition a discount based upon discounts taken in selling, for example, a vendor's interest in a real estate contract. If the latter be the intent, this is not in conformity with standard appraisal practices, will cause serious administrative problems, and will result in substantial lack of uniformity in results.

The second item vetoed is the language in the same subsection relating to standards for determining "similar sales". Again, it is not clear whether the intent here is simply to continue present appraisal practices with respect to the use of comparable sales, or is to use some other standard. If the intent is the latter, the effect of this would be to discriminate against that vast majority of property which is appraised on the basis of its actual use, in favor of those properties in which highest and best use is not actual use, i.e., in favor of properties being held primarily for speculative investment, and against the typical residential property. Accordingly, this language is being stricken because it is either useless or it is discriminatory in effect.

With these vetoes the sole change from standard appraisal practices is the requirement of adjustments for direct selling costs. It is clear that the percentage discount or adjustment to be made in accordance with this subsection for direct costs of sale is to be established by the Department of Revenue after appropriate studies, and that the amount of brokerage fees are to be included in this percentage. Since uniform administrative practice in determining that discount is assured, I have allowed this provision to stand.

The successful continuation of the present state-wide revaluation program necessitates, I believe, as much clarity as possible and the least amount of administrative and legal confusion in the standards to be applied in the appraisal of real property for tax purposes. The item vetoes discussed above have been made with full cognizance of these requirements, and after consultation with the Department of Revenue and representatives of the county assessors. With these item vetoes, I believe that subsection (1) is workable.

I have also vetoed the provisions of subsection (2) of section 1. This new section is a radical departure in the United States from standard appraisal practices, in that it allows self-assessment by the taxpayer for property tax purposes. While the proposal may have substantial merit, its risks are such that I do not believe it should be put into effect without further careful consideration. See, for example, the discussion of such a system in "An Evaluation of Self-assessment under a Property Tax" in The Property Tax and Its Administration, Lynn, Editor, University of Wisconsin Press, Madison (1969), pages 79-118. I trust that this method of self-assessment is one which will be intensively studied by the committee established under section 18 of the bill.

The last two sentences of section 2 (2) substantially parallel a provision which has already been enacted into law as section 3, chapter 42, Laws of 1971, Extraordinary Session. These last sentences of subsection (2) are apparently intended to have exactly the same effect as the provision already enacted into law; but the different language may well cause legal confusion, and for this reason, is vetoed.

I have also vetoed the provisos contained in section 7 of the bill. The reason for this veto is that they appear to be in conflict with the provisions of section 8, the intracounty equalization provisions. The conflict arises on two points. The first proviso states that properties revalued in 1970 pursuant to a cyclical revaluation program approved by the Department of Revenue may be adjusted downward only in order to reflect actual decreases in true and fair values or to reflect new valuation criteria. However, section 8 contemplates that there will be an adjustment downward for such properties simply by reason of the fact that the true and fair values determined for other properties in the county are lower than actual market values.

A second source of conflict would arise even if the first source of

conflict were eliminated. Section 8 contemplates that there will be a percentage reduction for such properties for purposes of 1971 assessments, and that there will also be a reduction for purposes of 1972 assessments, both reductions to be made from the 1970 valuations. However, in all probability the reductions to be made in 1972 will be less than those made in 1971. The provisos in section 7 would appear to prevent what, in effect, would be a raise in 1972 true and fair values from the 1971 true and fair values.

I have been assured by the Department of Revenue that it will not permit assessors, using the multiple regression techniques contemplated by section 7 of this bill, to raise true and fair values, in order to reflect actual increases in market price of properties already revalued under the revaluation program until the whole program is completed.

With the exception of the items discussed above, I have approved Engrossed Substitute House Bill No. 283.

H. VETO MSG. ON H. B. NO. 291

May 21,1971

To the Honorable,
The House of Representatives
of the State of Washington
(Through the Secretary of State)

Ladies and Gentlemen:

I am filing herewith to be transmitted to the House of Representatives at the next session of the Legislature, without my approval as to certain items and sections, House Bill 291, entitled:

"AN ACT Relating to gambling."

House Bill 291 as originally introduced represented a comprehensive regulatory scheme for all types of gambling activity which distinguished between professional and non-professional gambling in terms of the type of sanction imposed. Professional gambling was penalized through the criminal process while non-professional gambling would incur civil penalties only.

Establishing this distinction recognizes that certain types of gambling are widespread yet relatively harmless from a law enforcement standpoint and receive little or no condemnation from society. Unfortunately, the bill as presented to me by the legislature muddies this distinction, and in the opinion of numerous law enforcement officials dangerously opens the door to professional gambling in Washington.

The genesis of House Bill 291 was the recognition that bingo games and raffles and amusement games when conducted by non-profit organizations on an occasional basis were properly classified as relatively harmless and non-professional, not deserving criminal sanction but only civil prohibitions coupled with stringent regulation. The constitutionality of this act under Article II, Section 24 of the State Constitution is dependent on maintenance of this classification scheme with its hierarchy of sanctions free from tampering or inclusion of other forms of gambling not properly categorized as non-professional either because they are profit making or because they are easily subjected to abuse.

My action on this bill restores the distinction between professional and profit seeking activities and those which are social, casual and non-professional.

Therefore, I have vetoed those sections and items conceptually inconsistent with these aims -- punchboards, gambling pinballs and cardrooms. I have also vetoed section 26 as I do not believe that the cause of harmless bingo, raffles and amusement games should be tied to the passage of SJR 5.

I have vetoed several other sections of the bill to cure various technical difficulties. Thus, for example, I have vetoed the section dealing with immunity for witnesses in gambling prosecutions at the suggestion of key law enforcement officials, in light of the new grand jury law.

H. VETO MSG. ON SUB. H.B. NO. 309

May 21,1971

To the Honorable,
The House of Representatives
of the State of Washington
(Through the Secretary of State)

Ladies and Gentlemen:

I am returning herewith to be transmitted to the House at the next session of the Legislature, without my approval as to three sections, Engrossed Substitute House Bill No. 309, entitled:

"AN ACT Relating to Age Qualifications for Certain Purposes."

This bill adopts a comprehensive modification of provisions throughout our law which establish age requirements and qualifications for certain purposes. The effect of this bill is to lower the legal age of majority in most instances from twenty-one to eighteen years of age. In a bill of this scope it is not surprising that certain inconsistencies occur with respect to bills already passed during this session.

Section 40 of this bill purports to lower the age below which service must be made upon guardians of minor owners of real property in certain condemnation actions. This section was

repealed by House Bill 211 (Chapter 76, Laws of 1971). I am therefore vetoing section 40 to conform to the prior enactment.

Likewise section 59 of ESHB 309 lowers the age below which service must be made on guardians in certain instances. This section was also repealed by House Bill 211. I have vetoed section 59 of this bill.

House Bill 416 amended RCW 74.16.030 to eliminate any age requirements as a condition to eligibility for Aid to the Blind assistance. Section 67 of ESHB 309 reduces this age requirement from twenty-one to eighteen. Accordingly I have vetoed section 67 of this bill to conform to the specific legislative intent as to eligibility for Aid to the Blind.

With the exception of sections 40, 59 and 67, the remainder of the bill is approved.

H. VETO MSG. ON H. B. NO. 313
May 21, 1971

To the Honorable,
The House of Representatives
of the State of Washington
(Through the Secretary of State)

Ladies and Gentlemen:

I am filing herewith to be transmitted to the House of Representatives at the next session of the legislature, without my approval as to certain items House Bill No. 313 entitled:

"AN ACT Relating to the public health; authorizing the creation of tuberculosis and respiratory disease hospital districts; implementing the law relating to county infirmaries."

This bill establishes a hospital district in Eastern Washington to operate a tuberculosis hospital for that area and in Western Washington authorizes operation and control of tuberculosis hospitals in the State Department of Social and Health Services. As passed, the bill establishes a major distinction in types of services available between the hospital district and the rest of the state in that the district can treat respiratory disease as well as tuberculosis. In view of the obvious inequities and legal problems created by this distinction I have vetoed all references to respiratory disease in the bill in order that the concept of establishing necessary and effective treatment of tuberculosis throughout the state may be more equitably implemented.

Section 18 of the bill purports to transfer certain county millage to the state general fund to be used for tuberculosis hospitalization. Because it was the apparent and expressed intent of the drafters of this legislation to have the revenue available to the Department of Social and Health Services without further legislative action, all references to the general fund in section 18 are inappropriate and in fact prevent implementation of the legislation.

For the foregoing reasons, I have vetoed those references in Section 18.

Section 26 of the bill is an emergency clause which would bring about implementation of this legislation immediately. Because there is more than sufficient time to do what is necessary to implement this act without an emergency clause, and because immediate implementation would put a strain on the resources of the state, I have vetoed section 26.

Section 12 of the bill, in part provides that the eastern district will be prohibited from receiving any payments from the local county funds after the effective date of the act. Because section 14 provides that the counties will continue to make payments in the eastern district until January 1, 1972, and because these payments are necessary for the operation of the eastern district, I have vetoed the first sentence of section 12. This resolves the conflict between sections 12 and 14 and preserves the fiscal viability of the legislation.

Section 25 provides that certain laws shall not apply to any facilities operated by the Department of Social and Health Services after January 1, 1972. It was the intent of the drafters to create a complete tuberculosis program under the new enactments, including control programs as well as hospitalization. Because the reference to facilities in section 25 may confuse the application of that section, I have vetoed reference to facilities. This veto does not change the substance of the section but clarifies the legislative intent to create a new and complete program and substitute it for the previous one.

In section 18 provision is made for utilization of income to the hospital facility. However, there is non-hospitalization related income for which no provision was made. Because it is necessary to utilize all income available to the facility, and because there is language in section 18 which limits its utilization, I have vetoed that language which is so limiting. This veto allows the facility effectively to utilize all available income, and is in keeping with the intent of the drafters.

Section 23 requiring tuberculosis hospitals to report to the county of the patient's residence his medical condition, is limited to counties outside the eastern district. Since this information is equally important to all counties whether or

not within the eastern district, I have vetoed that language limiting the applicability of that section in order that all counties shall receive reports on the condition of patients who are residents of their counties.

In section 18 and section 24 provision is made for counties to levy taxes and language is included which would have the levy commence January 1, 1972. Because this would postpone realization of that income until the first quarter of 1973, I have vetoed that language establishing January 1, 1972 as the commencement date of the levy. This veto allows realization of the levy income in the first quarter of 1972 as was intended by the legislature.

Section 8 of the bill establishes the superintendent of the eastern district hospital as the tuberculosis control officer for the district. I question the wisdom of the provision because tuberculosis control outside of a hospital is appropriately and has successfully been a local county function. However, the legislature, in setting up a program for tuberculosis control and treatment, determined that this structure is appropriate for the eastern district. Therefore, although with some misgivings, I have determined not to veto that language making the superintendent of the eastern district hospital the tuberculosis control officer for the district.

Ladies and Gentlemen:

I am filing herewith to be transmitted to the House of Representatives at the next session of the legislature, without my approval as to one section, Engrossed Substitute House Bill No. 321 entitled:

"AN ACT Relating to motor vehicles."

Section 15 of the bill permits a driver whose license has been suspended or revoked for offenses involving the use of a motor vehicle to be eligible to receive an occupational driver's license. By its terms persons whose license has been suspended or revoked by the operation of Washington's Implied Consent law may again obtain the privilege of driving on the highways of our state. RCW 46.20.308 was adopted by an overwhelming vote of the people only a short time ago. I believe that this serious erosion of the people's determination is unwarranted and unwise. I have therefore vetoed this section of the bill.

Except as to this section the remainder of the bill is approved.

Ladies and Gentlemen:

I am returning herewith to be transmitted to the House of Representatives at the next session of the Legislature without my approval as to two items, Engrossed House Bill No. 373, entitled:

"AN ACT Relating to retirement pensions."

This bill amends the State Patrol Retirement System to increase the prior service annuity for retired state patrolmen from 1 1/2% of the member's average final salary multiplied by the number of years of prior service to 2% of such salary figure.

During consideration of this bill in the legislative process an amendment was added which excluded those persons from the benefits of this increase who are employed by the United States, the State or any agency or instrumentality or political subdivision thereof.

Pensions are earned upon the basis of past service and should not be conditioned upon the category of employment a person eligible for a pension undertakes after termination of his service. Excluding persons employed by a government agency from the benefit increase while granting such increases to persons employed with a private employer is patently discriminatory and there is no justification for this distinction.

I have accordingly vetoed two items in section 1. The remainder of the bill is approved.

Ladies and Gentlemen:

I am filing herewith to be transmitted to the House of Representatives at the next session of the legislature, without my approval as to one section, Engrossed House Bill No. 491 entitled:

"AN ACT Relating to education."

I have vetoed section 2 of this bill. Under present law, school directors of districts within each

congressional district cast votes to elect members of the State Board of Education which are weighted to reflect the enrollment of the various districts. This section substitutes for that procedure a new system which is weighted in favor of the smaller districts within the congressional boundaries. I believe this system fails to take into account the concept of proportional representation and would seriously weaken the integrity of the State Board of Education as a representative governing body. Its effect is to violate the spirit of the "one man one vote" doctrine which has become an integral part of our law.

I approve of the remainder of this bill.

I have vetoed section 15 and section 16 of the bill for the same reasons that similar sections were vetoed in the general budget bill, Substitute House Bill No. 151. In addition to the reasons set forth in my veto message on Substitute House Bill No. 151, employees of agencies included in this bill would not be treated equally with other state employees if these sections were allowed to remain in the bill.

H. VETO MSG. ON SUB. H.B. NO. 584

May 21, 1971

To the Honorable,
The House of Representatives
of the State of Washington
(Through the Secretary of State)

Ladies and Gentlemen:

I am filing herewith to be transmitted to the House of Representatives at the next session of the Legislature, without my approval as to one item, Engrossed Substitute House Bill No. 584, entitled:

"AN ACT Relating to shoreline areas."

Substitute House Bill 584 is one of the most significant pieces of legislation ever passed by the state legislature. It is a clear indication of the commitment of the people of the state, acting through the legislative process to assure the future environmental quality of this state. With the passage of Substitute House Bill 584 and with what I hope will be the approval of the people at the next general election this state will lead the nation in its care and concern for its waterfront areas.

This bill is the product of extensive legislative hearings, both during the 1970 and 1971 sessions and the interim. It successfully provides for a maximum of input at the local level with appropriate safeguards at the state level to protect the general public interest.

With regard to the general public interest, while the bill should provide for a diversity of participation on the part of local governments in the planning process, the authority at the state level should be confined to a single agency so that a uniform state policy can be developed. Furthermore, as a general principle an agency should not be in the position of both preparing and approving plans for land which it owns or controls.

The proviso in section 3(c) which declares that the Department of Natural Resources "shall have the powers, duties, and obligations as local government has as to other lands covered by the provisions of this chapter" places more than one agency of state government in a policy making position and in effect allows a large land owner both to make and approve its own plans. While I have the highest respect for the Department of Natural Resources and the Commissioner of Public Lands I believe the proviso in section 3(c) is contrary to sound public policy and should be vetoed.

The remainder of Substitute House Bill No. 584 is approved.

H. VETO MSG. ON H. B. NO. 687

May 21, 1971

To the Honorable,
The House of Representatives
of the State of Washington
(Through the Secretary of State)

Ladies and Gentlemen:

I am filing herewith to be transmitted to the House of Representatives at the next session of the Legislature, without my approval as to a section and item, Engrossed House Bill 687 entitled:

"AN ACT Relating to commercial fisheries."

Certain sections of HB 687 are in conflict with the provision of SHB 152, the capital appropriation act, and should be vetoed in order for the Department of Fisheries to carry out their capital development program.

This act provides for increases in all commercial fishing license fees. These funds would normally go to the General Fund from which the Department's operating and capital appropriations are made. However, Section 11 of this act provides for creation of a Department of Fisheries Building Account into which fifty percent of the total license revenue is to be deposited to be used for capital outlays by the Department for salmon propagation facilties. There are no appropriations made from the newly created account and while revenues would be deposited to the account, they could not be used for the purposes for which the account was created.

Further, creation of the account would negate the capital appropriation made to the Department in SHB 152. The capital appropriation in SHB 152 is made from the General Fund and contains a proviso to the effect that the major portion of it is available only to the extent increased revenues are generated to offset the amount.

Because HB 687 would require that fifty percent of all license revenue be deposited to the new account, there would be no increased amount to the General Fund to offset the appropriation; in fact, there would be a reduction. The total effect would be that the Department's capital program would be reduced by not only the $665,000 tied to the proviso but also by $637,000 of Federal matching funds which would be lost because of the lack of state matching. Under these circumstances, there would be no expansion of the Department's production facilities during the 1971-73 biennium.

I have vetoed section 11 and an item in section 16 of the bill to cure this defect. The veto of this item in section 16 serves a dual purpose. It will allow the immediate implementation of section 13 of the bill by the Department of Fisheries in its effort to manage properly what appears to be a massive migration of Sockeye Salmon into lower Puget Sound early this summer.

With these exceptions, the remainder of EHB 687 is approved.

H. VETO MSG. ON H. B. NO. 735
May 21, 1971

To the Honorable,
The House of Representatives
of the State of Washington
(Through the Secretary of State)

Ladies and Gentlemen:

I am returning herewith to be transmitted to the House of Representatives at the next session of the legislature, without my approval as to seven items, Engrossed House Bill No. 735, entitled:

"AN ACT Relating to industrial insurance."

This bill makes major and far-reaching revisions in the industrial insurance program administered by the Department of Labor and Industries. Upon my review of this complex bill, I have found it advisable to veto a number of items.

Section 3 requires that the $150 earnings requirement to qualify an agricultural laborer for mandatory coverage would expire at the end of 1972. Elimination of this earnings requirement would thus result in no difference between workers who are only temporarily and casually attached to an agricultural employer's work force and those workmen who are regularly a part of such work force. It is important that this minimum qualifying requirement remain in existence because of the uniquely transitory nature of much agricultural labor. Without continuation of this earnings requirement past 1972, an unduly harsh financial burden may be placed on the agricultural industry. Accordingly, I have vetoed the expiration of this qualification.

Section 13 requires, in part, the Department of Labor and Industries to pay, out of the fund contributed to by employers other than self-insurers, for traveling expenses of a workman to a medical examination requested by his employer as a self-insurer. Since this would be unjust to non-self-insuring employers, I have vetoed this item in Section 13.

In the new second paragraph of Section 13, the reference to Subsection (3) of RCW 51.32.090 was clearly erroneous and should have referred to Subsection (4). I have accordingly vetoed a portion of this new paragraph, and the remaining language does not appear to create any conflict with the provisions of any subsections of RCW 51.32.090.

Section 15 appears to require a rather complicated formula which would create administrative difficulties for the Department of Labor and Industries in determining the statewide average wage for purposes of the workmen's compensation laws. There presently exists a requirement that the Employment Security Department determine the statewide average wage under the Unemployment Compensation Law, and in view of the virtual universal workmen's compensation coverage provided by this bill, the statewide average wage of employees under workmen's compensation will be quite similar to the statewide average wage under the Unemployment Compensation Law. I see no substantial reason for two departments of state government to be independently calculating this figure, and have accordingly vetoed a large portion of Section 15 so that the Department of

Labor and Industries may utilize the calculations made by the Employment Security Department.

In Section 21 the imposition of a penalty on an "employee" was not the legislative intent, because it was meant to impose a penalty on the "employer." Therefore, the entire section has been vetoed.

Section 59 requires the Department to assess self-insurers for their proportionate shares of the Department's administrative costs on the basis of the size of each self-insurer's payroll. This does not appear to be equitable. The director should, pursuant to rule-making authority, develop a formula for fairly apportioning the costs of the Department's administration among self-insurers, instead of simply using a system by which the self-insurer with the largest payroll automatically pays the largest assessment. Accordingly, I have vetoed a portion of Section 59 to enable the director to do this.

Section 89, Subsection (4) would repeal RCW 51.16.050. Said statute was the subject of a bill, Senate Bill No. 472, which amended RCW 51.16.050 to provide for an industrial insurance dividend and premium program specifically applicable to the building industry. Senate Bill No. 472 passed the House on May 3, 1971, and passed the Senate on May 4, 1971. Presumably it was the legislative intent to establish by that bill a statutory system of premiums and dividends for the building industry, and there does not appear to be any valid reason why Engrossed House Bill No. 735 should contradict that previously expressed legislative intent. Failure to veto this repealer of RCW 51.16.050 would result in confusion as to the status of that particular statute. I have accordingly vetoed Subsection (4) of Section 89.

With the exception of the items set forth above, Engrossed House Bill No. 735 is approved.

H. VETO MSG. ON SUB. H.B. NO. 740

May 21, 1971

To the Honorable,
The House of Representatives
of the State of Washington
(Through the Secretary of State)

Ladies and Gentlemen:

I am filing herewith to be transmitted to the House of Representatives at the next session of the Legislature, without my approval as to one item, Engrossed Substitute House Bill No. 740, entitled:

"AN ACT Relating to institutions of higher education."

Substitute House Bill No. 740, as passed by the Legislature, provided for fee increases for students attending institutions of higher education. Several other provisions relating to education were also contained within the bill.

I have signed Engrossed Substitute House Bill 740 with the following exception:

On page 10, section 12, lines 30 through 33, I have vetoed the following item:

"In addition to the authority above, community college districts may contract with school districts to provide such courses of study. School districts are also authorized to claim such students for attendance purposes."

Section 12, as initially included within Substitute House Bill 740, was an amendatory section changing references to classifications of student fees at community colleges. The above language was added as a House floor amendment to the substitute bill. It allows community colleges to contract with school districts to provide educational opportunities for those individuals who previously did not complete high school. Although the basic purpose of this amendment has merit, it does present several administrative problems for the amendment also allows school districts to claim such students for attendance purposes.

School districts and community colleges presently have authority to perform these educational services. Present statutes also allow intergovernmental agreements between the community colleges and school districts. The amended language does not define clearly the relationships between the K-12 and community college program areas. The budgetary impact is potentially significant, but no fiscal review of the procedure was conducted nor additional appropriation made. The language allows both community colleges and common schools to count these students for funding purposes.

The Superintendent of Public Instruction has requested that this section be vetoed for the following reasons:

"1. There are currently adequate procedures available for school districts to enter into such agreements.
2. School districts could enter into interdistrict agreements with other school districts to provide special dropout rehabilitation programs.
3. Leaving this language in ESHB 740 would tend to encourage the fragmentation of the high school program as it now operates.
4. High schools should be challenged to provide programs for their students

rather than "contracting" them to a community college.

5. Probably the most important monetary angle of this language would allow such students to be counted as FTE's for community colleges as well as their attendance being claimed by school districts."

While the concept may be meritorious, the potential impact, apparently unrecognized by the legislature, is too great to allow this provision to become law without adequate study.

I am forwarding a copy of this veto message to the Superintendent of Public Instruction and to the State Board for Community College Education requesting them to review this matter and make recommendations where appropriate to me and to the next legislative session to insure that adequate educational opportunities exist for students desiring to acquire their high school diploma.

Respectfully submitted,

H. VETO. MSG. ON H. B. NO. 759
May 21, 1971

To the Honorable,
The House of Representatives
of the State of Washington
(Through the Secretary of State)

Ladies and Gentlemen:

I am returning herewith to be transmitted to the House of Representatives at the next session of the Legislature, without my approval as to one section, House Bill 759, entitled:

"AN ACT Relating to the urban arterial board and the urban arterial trust acccount."

Section 4 of this bill was added as a floor amendment. This section authorizes the use of 1/8 of 1 cent of motor vehicle fuel taxes to pay debt service on county-city urban arterial bonds. Presently 5/8 of 1 cent of motor vehicle fuel taxes are available for debt service on up to $200,000,000 of urban arterial bonds.

As worded, the section authorizes "not to exceed one-eighth of one cent tax from the seven cents excise tax specified by RCW 82.36.020 to be distributed to the state, cities and counties . . ." for bond retirement purposes. This language could be construed as limiting the amount of motor vehicle fuel taxes available for debt service of urban arterial bonds to the original 5/8 of 1 cent plus the additional 1/8 of 1 cent or a total of 3/4 of 1 cent of taxes. As in the case of all motor vehicle fund bonds, the entire motor vehicle fuel taxes are pledged to pay these bonds by existing statute. Conservative bond counsel would be concerned that the section would reduce the tax revenues pledged to pay debt service from that produced by the 9 cents of motor vehicle fuel taxes to a mere 3/4 of 1 cent. Accordingly, I have vetoed Section 4.

With the exception of Section 4, House Bill 759 is approved.

Respectfully submitted,

H. VETO MSG. ON H. B. NO. 865
May 21, 1971

To the Honorable,
The House of Representatives
of the State of Washington
(Through the Secretary of State)

Ladies and Gentlemen:

I am filing herewith to be transmitted to the House of Representatives at the next session of the Legislature, without my approval as to an item, House Bill 865 entitled:

"AN ACT Relating to creating a state land planning commission."

In its original version HB 865 provided for a fifteen member commission with four legislators and eleven persons to be appointed by the governor from the general public. Amendments to the bill increased the number of legislators to eight, while the number of persons to be appointed by the governor remained at eleven. In increasing the number of legislators, however, the legislature neglected to increase the size of the commission from fifteen to nineteen. I believe the legislature intended to have a committee of nineteen composed of eight legislators and eleven members of the general public. In order to accomplish this purpose, I am vetoing the word "fifteen" and approving the rest of the bill.

Respectfully submitted,
Daniel J. Evans
