A comprehensive plan shall be adopted and amended with public participation as provided in RCW 36.70A.140. Each comprehensive plan shall include a plan, scheme, or design for each of the following:

(1) A land use element designating the proposed general distribution and general location and extent of the uses of land, where appropriate, for agriculture, timber production, housing, commerce, industry, recreation, open spaces, general aviation airports, public utilities, public facilities, and other land uses. The land use element shall include population densities, building intensities, and estimates of future population growth. The land use element shall provide for protection of the quality and quantity of groundwater used for public water supplies. Wherever possible, the land use element should consider utilizing urban planning approaches that promote physical activity. Where applicable, the land use element shall review drainage, flooding, and stormwater runoff in the area and nearby jurisdictions and provide guidance for corrective actions to mitigate or cleanse those discharges that pollute waters of the state, including Puget Sound or waters entering Puget Sound.

(2) A housing element ensuring the vitality and character of established residential neighborhoods that:

(a) Includes an inventory and analysis of existing and projected housing needs that identifies the number of housing units necessary to manage projected growth, as provided by the department of commerce, including:

(i) Units for moderate, low, very low, and extremely low-income households; and

(ii) Emergency housing, emergency shelters, and permanent supportive housing;

(b) Includes a statement of goals, policies, objectives, and mandatory provisions for the preservation, improvement, and development of housing, including single-family residences, and within an urban growth area boundary, moderate density housing options including ~~((+))~~, but not limited to, duplexes, triplexes, and townhomes;

(i) Incorporating consideration for low, very low, extremely low, and moderate-income households;

(ii) Documenting programs and actions needed to achieve housing availability including gaps in local funding, barriers such as development regulations, and other limitations;

(iii) Consideration of housing locations in relation to employment location; and

(iv) Consideration ~~((of the role))~~ and utilization of accessory dwelling units in meeting housing needs in compliance with RCW 36.70A.698;

(i) Zoning that may have a discriminatory effect;

(ii) Disinvestment; and

(iii) Infrastructure availability;

(f) Identifies and implements policies and regulations to address and begin to undo racially disparate impacts, displacement, and exclusion in housing caused by local policies, plans, and actions;

(g) Identifies areas that may be at higher risk of displacement from market forces that occur with changes to zoning development regulations and capital investments; and

(h) Establishes antidisplacement policies, with consideration given to the preservation of historical and cultural communities as well as investments in low, very low, extremely low, and moderate-income housing; equitable development initiatives; inclusionary zoning; community planning requirements; tenant protections; land disposition policies; and consideration of land that may be used for affordable housing.

In counties and cities subject to the review and evaluation requirements of RCW 36.70A.215, any revision to the housing element shall include consideration of

prior review and evaluation reports and any reasonable measures identified. The housing element should link jurisdictional goals with overall county goals to ensure that the housing element goals are met.

(3) A capital facilities plan element consisting of: (a) An inventory of existing capital facilities owned by public entities, showing the locations and capacities of the capital facilities; (b) a forecast of the future needs for such capital facilities; (c) the proposed locations and capacities of expanded or new capital facilities; (d) at least a six-year plan that will finance such capital facilities within projected funding capacities and clearly identifies sources of public money for such purposes; and (e) a requirement to reassess the land use element if probable funding falls short of meeting existing needs and to ensure that the land use element, capital facilities plan element, and financing plan within the capital facilities plan element are coordinated and consistent. Park and recreation facilities shall be included in the capital facilities plan element.

(4) A utilities element consisting of the general location, proposed location, and capacity of all existing and proposed utilities, including, but not limited to, electrical lines, telecommunication lines, and natural gas lines.

(5) Rural element. Counties shall include a rural element including lands that are not designated for urban growth, agriculture, forest, or mineral resources. The following provisions shall apply to the rural element:

(a) Growth management act goals and local circumstances. Because circumstances vary from county to county, in establishing patterns of rural densities and uses, a county may consider local circumstances, but shall develop a written record explaining how the rural element harmonizes the planning goals in RCW 36.70A.020 and meets the requirements of this chapter.

(b) Rural development. The rural element shall permit rural development, forestry, and agriculture in rural areas. The rural element shall provide for a variety of rural densities, uses, essential public facilities, and rural governmental services needed to serve the permitted densities and uses. To achieve a variety of rural densities and uses,

counties may provide for clustering, density transfer, design guidelines, conservation easements, and other innovative techniques that will accommodate appropriate rural economic advancement, densities, and uses that are not characterized by urban growth and that are consistent with rural character.

(c) Measures governing rural development. The rural element shall include measures that apply to rural development and protect the rural character of the area, as established by the county, by:

(i) Containing or otherwise controlling rural development;

(ii) Assuring visual compatibility of rural development with the surrounding rural area;

(iii) Reducing the inappropriate conversion of undeveloped land into sprawling, low-density development in the rural area;

(iv) Protecting critical areas, as provided in RCW 36.70A.060, and surface water and groundwater resources; and

(v) Protecting against conflicts with the use of agricultural, forest, and mineral resource lands designated under RCW 36.70A.170.

(d) Limited areas of more intensive rural development. Subject to the requirements of this subsection and except as otherwise specifically provided in this subsection (5)(d), the rural element may allow for limited areas of more intensive rural development, including necessary public facilities and public services to serve the limited area as follows:

(i) Rural development consisting of the infill, development, or redevelopment of existing commercial, industrial, residential, or mixed-use areas, whether characterized as shoreline development, villages, hamlets, rural activity centers, or crossroads developments.

(A) A commercial, industrial, residential, shoreline, or mixed-use area are subject to the requirements of (d)(iv) of this subsection, but are not subject to the requirements of (c)(ii) and (iii) of this subsection.

(B) Any development or redevelopment other than an industrial area or an industrial use within a mixed-use area or

an industrial area under this subsection (5)(d)(i) must be principally designed to serve the existing and projected rural population.

(C) Any development or redevelopment in terms of building size, scale, use, or intensity shall be consistent with the character of the existing areas. Development and redevelopment may include changes in use from vacant land or a previously existing use so long as the new use conforms to the requirements of this subsection (5);

(ii) The intensification of development on lots containing, or new development of, small-scale recreational or tourist uses, including commercial facilities to serve those recreational or tourist uses, that rely on a rural location and setting, but that do not include new residential development. A small-scale recreation or tourist use is not required to be principally designed to serve the existing and projected rural population. Public services and public facilities shall be limited to those necessary to serve the recreation or tourist use and shall be provided in a manner that does not permit low-density sprawl;

(iii) The intensification of development on lots containing isolated nonresidential uses or new development of isolated cottage industries and isolated small-scale businesses that are not principally designed to serve the existing and projected rural population and nonresidential uses, but do provide job opportunities for rural residents. Rural counties may allow the expansion of small-scale businesses as long as those small-scale businesses conform with the rural character of the area as defined by the local government according to RCW 36.70A.030(23). Rural counties may also allow new small-scale businesses to utilize a site previously occupied by an existing business as long as the new small-scale business conforms to the rural character of the area as defined by the local government according to RCW 36.70A.030(23). Public services and public facilities shall be limited to those necessary to serve the isolated nonresidential use and shall be provided in a manner that does not permit low-density sprawl;

(iv) A county shall adopt measures to minimize and contain the existing areas or uses of more intensive rural development, as appropriate, authorized

under this subsection. Lands included in such existing areas or uses shall not extend beyond the logical outer boundary of the existing area or use, thereby allowing a new pattern of low-density sprawl. Existing areas are those that are clearly identifiable and contained and where there is a logical boundary delineated predominately by the built environment, but that may also include undeveloped lands if limited as provided in this subsection. The county shall establish the logical outer boundary of an area of more intensive rural development. In establishing the logical outer boundary, the county shall address (A) the need to preserve the character of existing natural neighborhoods and communities, (B) physical boundaries, such as bodies of water, streets and highways, and land forms and contours, (C) the prevention of abnormally irregular boundaries, and (D) the ability to provide public facilities and public services in a manner that does not permit low-density sprawl;

(v) For purposes of (d) of this subsection, an existing area or existing use is one that was in existence:

(A) On July 1, 1990, in a county that was initially required to plan under all of the provisions of this chapter;

(B) On the date the county adopted a resolution under RCW 36.70A.040(2), in a county that is planning under all of the provisions of this chapter under RCW 36.70A.040(2); or

(C) On the date the office of financial management certifies the county's population as provided in RCW 36.70A.040(5), in a county that is planning under all of the provisions of this chapter pursuant to RCW 36.70A.040(5).

(e) Exception. This subsection shall not be interpreted to permit in the rural area a major industrial development or a master planned resort unless otherwise specifically permitted under RCW 36.70A.360 and 36.70A.365.

(6) A transportation element that implements, and is consistent with, the land use element.

(a) The transportation element shall include the following subelements:

(i) Land use assumptions used in estimating travel;

(ii) Estimated traffic impacts to state-owned transportation facilities resulting from land use assumptions to assist the department of transportation in monitoring the performance of state facilities, to plan improvements for the facilities, and to assess the impact of land-use decisions on state-owned transportation facilities;

(iii) Facilities and services needs, including:

(A) An inventory of air, water, and ground transportation facilities and services, including transit alignments and general aviation airport facilities, to define existing capital facilities and travel levels as a basis for future planning. This inventory must include state-owned transportation facilities within the city or county's jurisdictional boundaries;

(B) Level of service standards for all locally owned arterials and transit routes to serve as a gauge to judge performance of the system. These standards should be regionally coordinated;

(C) For state-owned transportation facilities, level of service standards for highways, as prescribed in chapters 47.06 and 47.80 RCW, to gauge the performance of the system. The purposes of reflecting level of service standards for state highways in the local comprehensive plan are to monitor the performance of the system, to evaluate improvement strategies, and to facilitate coordination between the county's or city's six-year street, road, or transit program and the office of financial management's ten-year investment program. The concurrency requirements of (b) of this subsection do not apply to transportation facilities and services of statewide significance except for counties consisting of islands whose only connection to the mainland are state highways or ferry routes. In these island counties, state highways and ferry route capacity must be a factor in meeting the concurrency requirements in (b) of this subsection;

(D) Specific actions and requirements for bringing into compliance locally owned transportation facilities or services that are below an established level of service standard;

(E) Forecasts of traffic for at least ~~(ten)~~ 10 years based on the adopted land use plan to provide information on

the location, timing, and capacity needs of future growth;

(F) Identification of state and local system needs to meet current and future demands. Identified needs on state-owned transportation facilities must be consistent with the statewide multimodal transportation plan required under chapter 47.06 RCW;

(iv) Finance, including:

(A) An analysis of funding capability to judge needs against probable funding resources;

(B) A multiyear financing plan based on the needs identified in the comprehensive plan, the appropriate parts of which shall serve as the basis for the six-year street, road, or transit program required by RCW 35.77.010 for cities, RCW 36.81.121 for counties, and RCW 35.58.2795 for public transportation systems. The multiyear financing plan should be coordinated with the (~~ten-year~~) 10-year investment program developed by the office of financial management as required by RCW 47.05.030;

(C) If probable funding falls short of meeting identified needs, a discussion of how additional funding will be raised, or how land use assumptions will be reassessed to ensure that level of service standards will be met;

(v) Intergovernmental coordination efforts, including an assessment of the impacts of the transportation plan and land use assumptions on the transportation systems of adjacent jurisdictions;

(vi) Demand-management strategies;

(vii) Pedestrian and bicycle component to include collaborative efforts to identify and designate planned improvements for pedestrian and bicycle facilities and corridors that address and encourage enhanced community access and promote healthy lifestyles.

(b) After adoption of the comprehensive plan by jurisdictions required to plan or who choose to plan under RCW 36.70A.040, local jurisdictions must adopt and enforce ordinances which prohibit development approval if the development causes the level of service on a locally owned transportation facility to decline below the standards adopted in the transportation element of the comprehensive plan, unless

transportation improvements or strategies to accommodate the impacts of development are made concurrent with the development. These strategies may include increased public transportation service, ride-sharing programs, demand management, and other transportation systems management strategies. For the purposes of this subsection (6), "concurrent with the development" means that improvements or strategies are in place at the time of development, or that a financial commitment is in place to complete the improvements or strategies within six years. If the collection of impact fees is delayed under RCW 82.02.050(3), the six-year period required by this subsection (6)(b) must begin after full payment of all impact fees is due to the county or city.

(c) The transportation element described in this subsection (6), the six-year plans required by RCW 35.77.010 for cities, RCW 36.81.121 for counties, and RCW 35.58.2795 for public transportation systems, and the ten-year investment program required by RCW 47.05.030 for the state, must be consistent.

(7) An economic development element establishing local goals, policies, objectives, and provisions for economic growth and vitality and a high quality of life. A city that has chosen to be a residential community is exempt from the economic development element requirement of this subsection.

(8) A park and recreation element that implements, and is consistent with, the capital facilities plan element as it relates to park and recreation facilities. The element shall include: (a) Estimates of park and recreation demand for at least a (~~ten-year~~) 10-year period; (b) an evaluation of facilities and service needs; and (c) an evaluation of intergovernmental coordination opportunities to provide regional approaches for meeting park and recreational demand.

(9) It is the intent that new or amended elements required after January 1, 2002, be adopted concurrent with the scheduled update provided in RCW 36.70A.130. Requirements to incorporate any such new or amended elements shall be null and void until funds sufficient to cover applicable local government costs are appropriated and distributed by the state at least two years before local

government must update comprehensive plans as required in RCW 36.70A.130.

Sec. 2. RCW 36.70A.697 and 2020 c 217 s 3 are each amended to read as follows:

(1) Cities and counties must adopt or amend by ordinance, and incorporate into their development regulations, zoning regulations, and other official controls the requirements of RCW 36.70A.698 to take effect by the time of the city's or county's next comprehensive plan update after July 1, 2021.

(2) Beginning (~~July 1, 2021~~) after the deadline in subsection (1) of this section, the requirements of RCW 36.70A.698:

(a) Apply and take effect in any city or county that has not adopted or amended ordinances, regulations, or other official controls as required under this section; and

(b) Supersede, preempt, and invalidate any local development regulations that conflict with RCW 36.70A.698.

Sec. 3. RCW 36.70A.698 and 2020 c 217 s 4 are each amended to read as follows:

(1) (~~Except as provided in subsection[s] (2) and (3) of this section, through ordinances, development regulations, zoning regulations, and other official controls as required under RCW 36.70A.697, cities~~) Cities and counties may not (~~require~~) prohibit the construction of accessory dwelling units within urban growth areas.

(2) When regulating accessory dwelling units, cities and counties may not:

(a) Impose a maximum floor area limit on the size of an accessory dwelling unit of less than:

(i) Eight hundred fifty square feet for an accessory dwelling unit on a lot with a total square footage of less than 4,500 square feet; or

(ii) One thousand three hundred fifty square feet combined between attached and detached accessory dwelling units on a lot with a total square footage of more than 4,500 square feet, except that an attached accessory dwelling unit may be limited to half of the square footage of the principal unit and a county or city may require that public health, safety, building code, and environmental permitting requirements that would be applicable to the principal unit are met

prior to the construction of the accessory dwelling unit;

(b) Impose any impact fees on the construction or development of an accessory dwelling unit that are greater than 50 percent of the impact fees that would be imposed on a similarly sized principal unit;

(c) Impose a limit on accessory dwelling units of fewer than one attached and one detached accessory dwelling unit on a lot zoned for residential use with a total square footage of more than 4,500 square feet, unless the lot is otherwise zoned to allow at least three dwelling units;

(d) Impose any prohibition of the sale or other conveyance of a condominium unit independently of a principal unit that is based solely on the grounds that the condominium unit was originally built as an accessory dwelling unit, provided that the condominium unit is served by utilities that are independent of the principal unit;

(e) Impose any owner occupancy requirements on any housing or dwelling unit on a lot containing an accessory dwelling unit. A city or county may retain an owner occupancy requirement if:

(i) An accessory dwelling unit on the lot is offered or used for short-term rental as defined in RCW 36.70A.696; or

(ii) The owner of the accessory dwelling unit accepts an offer from the city or county for the reduction or waiver of the costs or fees that would have normally been imposed on the construction of the accessory dwelling unit. In order to utilize this provision, a city or county must have a general program offering the waiver or reduction of fees and costs associated with accessory dwelling unit construction, with specific additional waiver provisions for units offered at or below 80 percent of the area median income;

(f) Require the provision of off-street parking for accessory dwelling units within one-quarter mile of a major transit stop.

(~~(2) A city may require the provision of off street parking for an accessory dwelling unit located within one quarter mile of a major transit stop if the city has determined that the accessory dwelling unit is in an area with a lack of access to street parking capacity,~~

~~physical space impediments, or other reasons supported by evidence that would make on-street parking infeasible for the accessory dwelling unit.~~

~~(3) A city that has adopted or substantively amended accessory dwelling unit regulations within the four years previous to June 11, 2020, is not subject to the requirements of this section.)~~

(3) Cities and counties may apply generally applicable development regulations to the construction of accessory dwelling units.

On page 6, after line 38, insert the following:

"Sec. 3. RCW 28A.655.260 and 2021 c 144 s 3 are each amended to read as follows:

(1) The superintendent of public instruction shall collect the following information from school districts: Which of the graduation pathways under RCW 28A.655.250 are available to students at each of the school districts; and the number of students using each graduation pathway for graduation purposes. This information shall be reported annually to the education committees of the legislature beginning January 10, 2021. To the extent feasible, data on student participation in each of the graduation pathways shall be disaggregated by race, ethnicity, gender, and receipt of free or reduced-price lunch.

(2) Beginning August 1, 2019, the state board of education shall survey interested parties regarding what additional graduation pathways should be added to the existing graduation pathways identified in RCW 28A.655.250 and whether modifications should be made to any of the existing pathways. Interested parties shall include at a minimum: High school students; recent high school graduates; representatives from the state board for community and technical colleges and four-year higher education institutions; representatives from the apprenticeship and training council; associations representing business; members of the educational opportunity gap oversight and accountability committee; and associations representing educators, school board members, school administrators, superintendents, and parents. The state board of education shall provide reports to the education committees of the legislature by August 1, 2020, and December 10, 2022, summarizing the information collected in the surveys.

(3) Using the data reported by the superintendent of public instruction under subsection (1) of this section, the state board of education shall survey a sampling of the school districts unable to provide all of the graduation pathways under RCW 28A.655.250 in order to identify the types of barriers to implementation school districts have. Using the survey results from this subsection and the survey results collected under subsection (2) of this section, the state board of education shall review the existing graduation pathways, suggested changes to those

graduation pathways, and the options for additional graduation pathways, and shall provide a report to the education committees of the legislature by December 10, 2022, on the following:

(a) Recommendations on whether changes to the existing pathways should be made and what those changes should be;

(b) The barriers school districts have to offering all of the graduation pathways and recommendations for ways to eliminate or reduce those barriers for school districts;

(c) Whether all students have equitable access to all of the graduation pathways and, if not, recommendations for reducing the barriers students may have to accessing all of the graduation pathways; and

(d) Whether additional graduation pathways should be included and recommendations for what those pathways should be.

(4) In order to ensure that school districts offering the graduation pathway established in RCW 28A.655.250(1)(b)(ix) are complying with requirements of RCW 28A.655.250(1)(b)(ix), the state board of education shall review and monitor the implementation of the graduation pathway at least once every 5 years. The reviews and monitoring required by this subsection may be conducted concurrently with other program reviews and monitoring conducted by the state board of education."

Representatives Ybarra and Santos spoke in favor of the adoption of the amendment.

Amendment (1011) was adopted.

Representative Ybarra moved the adoption of amendment (1124):

On page 3, beginning on line 33, strike all of section 2

On page 6, after line 38, insert the following:

"**Sec. 2.** RCW 28A.655.250 and 2021 c 7 s 3 are each amended to read as follows:

(1)(a) Beginning with the class of 2020, except as provided in RCW 28A.230.320, graduation from a public high school and the earning of a high school diploma must include the following:

(i) Satisfying the graduation requirements established by the state board of education under RCW 28A.230.090 and any graduation requirements established by the applicable public high school or school district;

(ii) Satisfying credit requirements for graduation;

(iii) Demonstrating career and college readiness through completion of the high school and beyond plan as required by RCW 28A.230.090; and

(iv) Meeting the requirements of at least one graduation pathway option established in this section. The pathway options established in this section are intended to provide a student with multiple pathways to graduating with a meaningful high school diploma that are tailored to the goals of the student. A student may choose to pursue one or more of the pathway options under (b) of this subsection, but any pathway option used by a student to demonstrate career and college readiness must be in alignment with the student's high school and beyond plan.

(b) The following graduation pathway options may be used to demonstrate career and college readiness in accordance with (a)(iv) of this subsection:

(i) Meet or exceed the graduation standard established by the state board of education under RCW 28A.305.130 on the statewide high school assessments in English language arts and mathematics as provided for under RCW 28A.655.070;

(ii) Complete and qualify for college credit in dual credit courses in English language arts and mathematics. For the purposes of this subsection, "dual credit course" means a course in which a student qualifies for college and high school credit in English language arts or mathematics upon successfully completing the course;

(iii) Earn high school credit in a high school transition course in English language arts and mathematics, an example of which includes a bridge to college course. For the purposes of this subsection (1)(b)(iii), "high school

transition course" means an English language arts or mathematics course offered in high school where successful completion by a high school student ensures the student college-level placement at participating institutions of higher education as defined in RCW 28B.10.016. High school transition courses must satisfy core or elective credit graduation requirements established by the state board of education. A student's successful completion of a high school transition course does not entitle the student to be admitted to an institution of higher education as defined in RCW 28B.10.016;

(iv) Earn high school credit, with a C+ grade, or receiving a three or higher on the AP exam, or equivalent, in AP, international baccalaureate, or Cambridge international courses in English language arts and mathematics; or receiving a four or higher on international baccalaureate exams. For English language arts, successfully completing any of the following courses meets the standard: AP English language and composition literature, macroeconomics, microeconomics, psychology, United States history, world history, United States government and politics, or comparative government and politics; or any of the international baccalaureate individuals and societies courses. For mathematics, successfully completing any of the following courses meets the standard: AP statistics, computer science, computer science principles, or calculus; or any of the international baccalaureate mathematics courses;

(v) Meet or exceed the scores established by the state board of education for the mathematics portion and the reading, English, or writing portion of the SAT or ACT;

(vi)(A) Meet any combination of at least one English language arts option and at least one mathematics option established in (b) (i) through (v) of this subsection (1); or

(B) Complete a performance exhibition demonstrating authentic evidence that the student meets or exceeds the graduation standard established by the state board of education under RCW 28A.305.130 in either English language arts, mathematics, or both. Prior to offering the performance exhibition option to students, the board of directors of the school district shall

adopt a written policy in conformity with applicable state requirements that describes the school district's processes for evaluating student performance exhibitions;

(vii) Meet standard in the armed services vocational aptitude battery; and

(viii) Complete a sequence of career and technical education courses that are relevant to a student's postsecondary pathway, including those leading to workforce entry, state or nationally approved apprenticeships, or postsecondary education, and that meet either: The curriculum requirements of core plus programs for aerospace, maritime, health care, information technology, or construction and manufacturing; or the minimum criteria identified in RCW 28A.700.030. Nothing in this subsection (1)(b)(viii) requires a student to enroll in a preparatory course that is approved under RCW 28A.700.030 for the purposes of demonstrating career and college readiness under this section.

(2) While the legislature encourages school districts to make all pathway options established in this section available to their high school students, and to expand their pathway options until that goal is met, school districts have discretion in determining which pathway options under this section they will offer to students. School districts, however, must annually provide students in grades 9 through 12 and their parents or legal guardians with comprehensive information about the graduation pathway options offered by the district.

(3) School districts shall determine if there is disproportionality among student subgroups participating in and completing each graduation pathway option offered by the school district and, if so, take appropriate corrective actions to ensure the pathway options are equitable. At a minimum, the subgroups to be examined must include those referenced in RCW 28A.300.042(3). If further disaggregation of subgroups is available, the school district shall also examine those subgroups.

(4) The state board of education shall adopt rules to implement the graduation pathway options established in this section."
