- ❖ SSB 6197 – Enacts four changes to the LEOFF Plan 2 Retirement System related to death benefits, the definition of "firefighter," managing overpayments, and disability benefits.

The laws noted above represent material changes to benefit plan provisions from the 2024 Legislative Session and are not meant to be exhaustive.

Changes in Assumptions or Methods

- ❖ This valuation does not include any changes to economic or demographic assumptions since the prior valuation.
- ❖ We adjusted our methods for calculating UAAL contribution rates in PERS 1 and TRS 1 to reflect the delay between the measurement date of calculated Plan 1 rates and when the rates are collected.
- ❖ We made an adjustment to our model to reflect past inflation experience when modeling future COLAs for current annuitants in all plans except PERS 1 and TRS 1.

Please see the **Appendices** section of this report for more information and further method and assumption changes since the last valuation.

Changes in Covered Population and Plan Experience

- ❖ The actual rate of investment return on the Market Value of Assets (MVA), for all plans, was 6.96% for Fiscal Year (FY) ending June 30, 2023.
- ❖ Salaries increases were notably higher-than-expected, particularly in the public safety plans.

Detailed gain and loss information by system can be found in the **Actuarial Exhibits** section of this report.

Actuarial Liabilities

The following table summarizes key measures of actuarial liability along with the liabilities from last year's valuation. The Present Value of Fully Projected Benefits (PVFB) represents the total expected value of all future benefits payments for current members when discounted at the valuation interest rate. The Actuarial Accrued Liability identifies the portion of the PVFB that has been accrued or "earned" as of the valuation date based on the Entry Age Normal (EAN) actuarial cost method.

Actuarial Liabilities		
(Dollars in Millions)	**2023**	**2022**
All Systems		
Present Value of Fully Projected Benefits	$174,065	$160,589
Actuarial Accrued Liability	$140,437	$130,623
Valuation Interest Rate	7.00%	7.00%

See the **Actuarial Exhibits** section of this report for a summary of actuarial liabilities by system and plan. For projected benefit payments by year for each system and plan, please visit our Interactive Reports webpage. Also, see the Glossary on our website for brief explanations of the actuarial terms.

Assets

The following table shows the combined MVA and Actuarial Value of Assets (AVA) along with the approximate rates of investment returns for all the systems combined.

An AVA is used to limit the volatility in contribution rates and funded status due to annual investment earnings. We smooth (or defer recognition of) the difference between actual and expected annual investment returns over a specific period not to exceed eight years.

Assets		
(Dollars in Millions)	**2023**	**2022**
All Systems		
MVA	$144,174	$135,808*
AVA**	135,070	125,026
Member/Employer Contributions	4,901	4,246
Disbursements	(6,578)	(5,720)
Investment Return	9,411	273
Other Revenue	$632	$202
MVA Return***	6.96%	0.22%
AVA Return**	9.51%	9.71%

**Excludes adjustments made for anticipated future transfers of funds. Please see the 2022 AVR for more information.*

***The AVA is used in determining contribution rates and funded status.*

****Dollar-weighted rate of return on the MVA, net of expenses. Please note the dollar-weighted investment return may differ from the time-weighted investment return published by the WSIB for the same period.*

See the **Actuarial Exhibits** section of this report for a summary of assets by system and plan, and for the development of the AVA.

Funded Status

The following table displays a summary of combined funded status across all retirement systems included in this report. Please see the **Actuarial Exhibits** section for information on individual systems and plans.

Funded Status		
(Dollars in Millions)	**2023**	**2022**
All Systems		
a. Accrued Liability*	$140,437	$130,623
b. Market Value of Assets	144,174	136,492
c. Deferred Gains/(Losses)	9,104	11,466
d. Actuarial Value of Assets (b - c)	135,070	125,026
Unfunded Liability (a - d)	$5,368	$5,597
Funded Ratio (d / a)	96%	96%

Note: Totals may not agree due to rounding.
**Liabilities valued using Entry Age Normal cost method.*

Funded status is one of several measures that helps explain the health of a pension plan. The funded status represents the portion of the actuarial accrued liabilities covered by today's actuarial assets. This means a plan with 100% funded status has one dollar in actuarial assets for each dollar of accrued liabilities at the valuation date. A plan with funded status around 100% is generally considered to be on target with funding. However, funded status above/below 100% is not automatically considered over-funded/at-risk. The funded statuses presented in this report are not sufficient to determine whether a plan has enough assets to terminate or settle the plan obligations. Furthermore, a plan with a funded status above 100% may still require ongoing contributions.

Commentary on Risk

Actuarial Standards of Practice (ASOP) guide actuaries when performing and communicating their work. ASOP No. 51 – *Assessment and Disclosure of Risk Associated with Measuring Pension Obligations and Determining Pension Plan Contributions* is specific to communicating risk in defined benefit pension plans, particularly in how actual future measurements may differ significantly from expected future measurements.

In the course of developing our actuarial valuation we make hundreds of assumptions, such as the level of returns on future investments, rates of retirement and mortality, and the future salary growth for active members. In some cases, small changes in these assumptions or unexpected plan experience can lead to significant changes in measurements, like the calculation of a plan's contribution rates or the projection of a plan's funded status. This can affect plan risk, and these sensitivities can evolve as the plans grow and mature over time. The Legislature's response to these changes and their action governing the state's pension system also affects plan risk. To help readers better understand some of these risks and their potential impacts, we have a Commentary on Risk webpage which can be found on our website.

In the **Actuarial Exhibits** section of this report, we have also included the impact to the total retirement systems' funded status from changes in assumed rates of investment return and mortality. One such illustration shows the change to plan liabilities if the Commingled Trust Fund portfolio was invested in low-default-risk fixed income securities.

Summary of Participant Data

The following table summarizes participant data used in the actuarial valuation for the plan year ending June 30, 2023, along with information from the 2022 AVR. See the **Participant Data** section of this report for participant data summarized by system and plan.

Participant Data		
All Systems	**2023**	**2022**
Active Members		
Number	352,278	339,636
Average Annual Salary	$83,812	$78,865
Average Attained Age	45.8	46.1
Average Service	10.3	10.6
Retirees and Beneficiaries		
Number	224,021	216,729
Average Annual Benefit	$26,742	$25,741
Terminated Members		
Number Vested	71,888	70,302
Number Non-Vested*	172,849	168,695

**Members who terminated without a vested lifetime benefit but are eligible for a refund of their employee contributions with interest that currently reside in the trust.*

Key Economic Assumptions

This table shows key economic assumptions used in this actuarial valuation. There were no changes in these assumptions from our prior year's valuation. Please see our *2023 Economic Experience Study* (EES) for information on the development of these assumptions and the asset allocation policy.

Key Assumptions	
All Systems	
Valuation Interest Rate	7.00%
General Salary Growth	3.25%
Inflation	2.75%

	Total State	**0.00%**	**0.00%**	**3.77%**	**3.98%**
WSPRS	**Member**	**8.75%**	**8.61%**	**8.75%**	**8.61%**
	Employer (State)	**21.72%**	**24.10%**	**21.72%**	**24.10%**

Note: Employer rates exclude administrative expense rate.

**Plan 3 members do not contribute to the defined benefit plan.*

***2023 figures reflect ESSB 5294 (Chapter 396, Laws of 2023) which prescribes base PERS 1 and TRS 1 UAAL contribution rates through FY 2027. Figures reflect the prescribed base contribution rates for FY 2026. The prescribed base contribution rate is 1.00% lower in FY 2027 for PERS, SERS, and PSERS employers.*

TRS Plan 2 Maximum Member Contribution Rates					
Valuation Year	Prior Max	Supplemental	New Max	Description	Source
2022 - 2023	8.64%	0.01%	8.65%	Prospectively increased retirement benefits for certain annuitants.	C 410 L 23
2010 - 2021	8.63%	0.01%	8.64%	AFC protection against reduced salaries.	C 5 L 11
2007 - 2009	8.55%	0.08%	8.63%	Out-of-state service credit purchases.	C 101 L 08
2006	7.76%	0.79%	8.55%	Improved Subsidized ERFs for certain Plan 2/3 members.	C 491 L 07
2005	7.75%	0.01%	7.76%	Lowered vesting requirements for certain Plan 3 members.	C 33 L 06
1999 - 2004	6.59%	1.16%	7.75%	Subsidized ERFs for Plan 2/3 members.	C 247 L 00
1997 - 1998	N/A	N/A	6.59%		

Note: Maximum member contribution rates change each year by 50% of benefit improvements, except as stated in RCW 41.45.070.

WSPRS Plan 1/2 Maximum Member Contribution Rates					
Valuation Year	Prior Max	Supplemental	New Max	Description	Source
2023	8.74%	0.01%	8.75%	Modified the definition of "Veteran."	C 146 L 24
2022	8.61%	0.13%	8.74%	Modified the definition of "Veteran."	C 18 L 23
2019 - 2021	8.45%	0.16%	8.61%	Modified the definition of "Veteran" and leave cash-out as pensionable salary.	C 97 L 20
2017 - 2018	8.44%	0.01%	8.45%	Modified the definition of "Veteran."	C 61 L 18
2016*	7.68% 7.34%	0.76% 0.34%	8.44% 7.68%	Expanded the definition of pensionable overtime.	C 181 L 17
2014 - 2015	7.19%	0.15%	7.34%	L&I duty-related death benefits paid from pension trust fund on remarriage.	C 78 L 15
2009 - 2013	7.18%	0.01%	7.19%	Increased duty-related death benefits.	C 261 L 10
2008	6.95%	0.23%	7.18%	Survivor benefits for registered domestic partners.	C 522 L 09
2006 - 2007**	N/A	N/A	6.95%		

Note: Maximum member contribution rates change each year by 50% of benefit improvements, except as stated in RCW 41.45.070.

**This law stipulated a phased increase to the member maximum rate by applying 0.34% in FY 2018 and 0.76% in FY 2019.*

***The original maximum contribution rate of 7% was decreased by 0.05% for C 87 L 07 (raised maximum retirement age, 0.14% decrease) and C 488 L 07 (provided medical premium reimbursements for certain survivors, 0.09% increase).*

The following table compares the member and total employer contribution rates that were adopted by the PFC and the LEOFF Plan 2 Retirement Board against the rates that were calculated by OSA. Note the 2023-25 adopted rates we display include the supplemental rates charged following the 2023 and 2024 Legislative Sessions and modifications to the UAAL contribution rates for PERS 1 and TRS 1 under ESSB 5294 (Chapter 396, Laws of 2023).

Contribution Rates				
		2023-25 Adopted[1]	2025-27 Calculated[2]	2025-27 Adopted
PERS 1	Member	6.00%	6.00%	TBD
	Total Employer	8.91%	8.62%	TBD
PERS 2/3	Member[3]	6.36%	6.57%	TBD
	Total Employer	8.91%	8.62%	TBD
TRS 1	Member	6.00%	6.00%	TBD
	Total Employer	9.66%	9.82%	TBD

	Employer	5.12%	5.66%	TBD
	State	3.41%	3.77%	TBD
WSPRS 1/2	Member	8.75%	8.75%	TBD
	Employer (State)	17.80%	21.72%	TBD

Note: Employer rates exclude administrative expense rate.

[1] Adopted rates as of FY 2025 and including 2024 Session supplemental rates. Adopted rates for FY 2024 were 0.50% higher for PERS, SERS, and PSERS employers.

[2] 2025-27 Calculated figures reflect ESSB 5294 (Chapter 396, Laws of 2023) which prescribes base PERS 1 and TRS 1 UAAL contribution rates through FY 2027. Figures reflect the prescribed base contribution rates for FY 2026. The prescribed base contribution rate is 1.00% lower in FY 2027 for PERS, SERS, and PSERS employers.

[3] Plan 3 members do not contribute to the defined benefit plan.

[4] The LEOFF 2 Board adopts contribution rates for LEOFF 2.

The tables which follow show the development of the normal cost rates and the Plan 1 UAAL rates. Plan 2 members and members in WSPRS 1 pay the applicable normal cost only. Employers in each system pay the normal cost plus any applicable UAAL.

Consistent with current funding policy, the normal cost rates include minimum contribution rates to provide stable and adequate contribution rates over time. These minimum rates are a percent of the normal cost calculated under the EAN funding method. The percent is 70% for WSPRS Plans 1 and 2, 80, 90, or 100% for LEOFF Plan 2 (dependent on the funded ratio), and 80% for all other plans.

The contribution rates are based on the 7% Rate of Investment Return assumption adopted by the PFC without adjustment for any contribution rate phase-in. If the PFC elects to continue the current contribution rate phase-in, that phase-in will be reflected in the adopted rates.

**Includes 2023 Legislation effective after measurement date of June 30, 2023.*
***LEOFF 2 minimum rates vary based on the plan's funded status as of the measurement date.*
****LEOFF 2 rates adopted by LEOFF 2 Board; all others adopted by the PFC. LEOFF 2 rate: 50% Member, 30% Employer, 20% State.*

The table which follows shows the development of the Plan 1 UAAL rates. Currently no UAAL contributions are required for LEOFF 1. All employers of PERS, SERS, and PSERS members contribute toward the PERS 1 UAAL, while all employers of TRS members contribute toward the TRS 1 UAAL.

The PERS 1 and TRS 1 UAAL contribution rates are comprised of two components. Benefit improvements enacted after 2009 are amortized over a fixed ten-year period. Any remaining UAAL, the "base UAAL," is funded through a rolling ten-year amortization period with minimum contribution rates of 0.50% effective at the beginning of the 2027-29 Biennium. For the 2025-27 Biennium, this base UAAL rate is replaced by prescribed rates.

Amortization of the Plan 1 UAAL			
(Dollars in Millions)	**PERS 1**	**TRS 1**	**LEOFF 1**
a. Present Value of Fully Projected Benefits (PVFB)	$10,593	$7,691	$4,269
b. Valuation Assets	8,561	6,732	6,365

Adopted Total UAAL Rate for 2025-27	**TBD**	**TBD**	**TBD**

Note: Totals may not agree due to rounding.

[1] As stated in RCW 41.45.060, the cost of funding Plan 1 benefit improvements shall be amortized over a fixed 10-year period.

[2] Represents the present value of expected Base UAAL contributions made by employers between the measurement date of 6/30/2023 and the effective date of any contribution rate changes for the 2025-27 Biennium.

[3] Measured under the plan's amortization method.

[4] No LEOFF 1 UAAL contributions are required when the plan is fully funded under current methods and assumptions.

[5] ESSB 5294 (Chapter 396, Laws of 2023) prescribes base contribution rates for PERS 1 and TRS 1 through FY 2027. Figures represent the prescribed base contribution rates for FY 2026, plus the sum of applicable Benefit Improvement Rates. The prescribed base contribution rate for PERS 1 is 1.00% lower in FY 2027.

The following tables provide more detailed information on the fixed ten-year benefit improvement and prescribed PERS 1 and TRS 1 total UAAL rates.

Benefit Improvement Amortization Rates (Dollars in Millions)

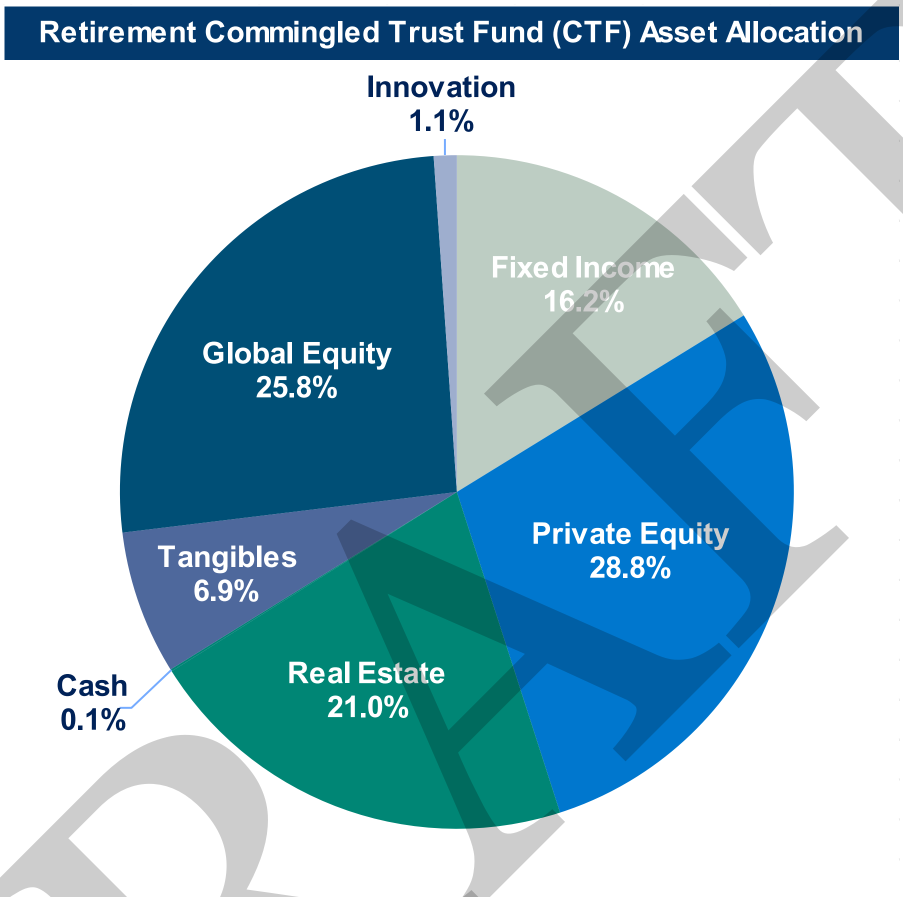
We provide additional contribution rate calculations on our Interactive Reports webpage. This interactive report calculates member and employer contribution rates that vary based on the asset valuation method and discount rate that the user selects. The state's funding policy, defined under Chapter 41.45 RCW, does not vary based on these selections.

We report the present and future value of benefit payments by year and by plan on our website. We also show how the present value of these benefit payments varies by interest rate assumptions. For more information or to view projected benefit payments, please visit our Interactive Reports webpage.

Plan Assets



Source: Washington State Investment Board June 30, 2023, Quarterly Report.

Cash: Highly liquid, very safe investments that can be easily converted into cash, such as Treasury Bills and money-market funds.
Fixed Income: Securities representing debt obligations and usually having fixed payments and maturities. Different types of fixed income securities include government and corporate bonds, mortgage-backed securities, asset-backed securities, convertible issues, and may also include money-market instruments.
Innovation: Fund that provides the ability to invest in a broad range of assets that fall outside the traditional asset classes or management style of existing asset classes.
Global Equity: Shares of U.S. and non-U.S. corporations that trade on public exchanges or "over the counter." The ownership of a corporation is represented by shares that are claimed on the corporation's earnings and assets.
Private Equity: The infusion of equity capital into a private company (one that is not available on the public markets). Private equity investments include securities that are not listed on a public exchange and are not easily accessible to most individuals. These investments range from initial capital in start-up enterprises to leveraged buyouts of mature corporations.
Real Estate: An externally managed selection of partnership investments with the majority of the partnerships invested in high-quality real estate leased to third parties.
Tangibles: The tangible asset portfolio invests in sectors such as infrastructure, timber, agriculture, natural resources, commodities, or other sectors consistent with the goals of the asset class.

Each asset class is unique in terms of expected return, standard deviation, and correlation to other asset classes. Please see page 28 of the 2023 EES for more information.

The following tables show the MVA changes from the previous valuation.

Additional information on the Retirement Commingled Trust Fund, including the asset allocation policy, can be found in the most recent EES.

Funded Status

Funded status is one of several measures that helps explain the health of a pension plan. The funded status represents the portion of the actuarial accrued liabilities covered by today's actuarial assets and provides information on the funding progress of the plan.

In our AVR, we calculate a plan's funded status by comparing the plan's current assets, determined under an asset valuation method, to the actuarial accrued liability of its members, calculated under an EAN actuarial cost method. Actuarial cost methods vary in the manner they allocate benefits to past and future time periods. We rely on an EAN actuarial cost method to better track the funding progress of accrued (or earned) benefits allocated to past service. Otherwise, the assumptions and methods used to measure funded status is consistent with the state's current funding policy and financing plan for future retirement benefits.

Funded status measures alone are not sufficient to determine whether a plan has enough assets to terminate or settle the plan obligations. Plans may have accumulated sufficient assets, at the measurement date, to satisfy the ongoing goal of having adequate assets to pay all currently earned benefits for existing members when due on an expected basis. However, ongoing contributions may still be required. The following table provides general guidance on how to interpret a plan's funded status at a point in time.

Interpretation of Plan Funded Status			
	Less than 100%	**Equals 100%**	**Greater than 100%**
Assets to Fund Earned Benefits as of the Measurement Date	Behind schedule on funding goals.	On schedule for funding goals.	Ahead of schedule on funding goals.
Contribution Rates	Typically requires higher contribution rates in the short term to raise plan's funded status to 100% over time.	Requires ongoing contribution rates for plans with members accruing future service.	Typically requires ongoing contribution rates for plans with members accruing future service. Short-term contribution rates may be lower to reduce the plan's funded status to 100% over time.

Plans with members accruing future service will typically require ongoing contributions. However, the level of actuarially determined contribution rates relative to current rates may be higher or lower depending on funded status and actual future experience.

As of the valuation date for the 2023 AVR, and under the data, assumptions, and methods used for this actuarial valuation, only LEOFF Plan 1 has sufficient assets to cease ongoing contributions.

Funded Status on an Actuarial Value Basis*

**Liabilities valued using the EAN cost method at an interest rate of 7.0%. All assets have been valued under the actuarial asset method.*

The funded status depends on numerous assumptions. Two of the most significant assumptions are the mortality rates, which estimate how long we expect members to live, and the interest rate or expected return on plan assets. A key component of the mortality assumption is the rate at which mortality is expected to improve in the future. To show this, we doubled the current mortality improvement assumption (longer lifespans than our best estimate) and assumed no future improvements (shorter lifespans than our best estimate). We also considered the impact if the expected return on assets was 1% lower or higher.

The following tables demonstrate how the funded status changes across all retirement systems if we alter these assumptions.

Sensitivity of Funded Ratios to Assumed Mortality Rates			
(Dollars in Millions)	**No Assumed Mortality Improvement**	**Best Estimate Assumed Mortality**	**Double Assumed Mortality Improvement**
Accrued Liability	$130,681	$140,437	$150,271
Valuation Assets	$135,070	$135,070	$135,070
Unfunded Liability	($4,389)	$5,368	$15,201
Funded Ratio	103%	96%	90%

Sensitivity of Funded Ratios to Assumed Interest Rates			
(Dollars in Millions)	1% Lower 6.0%	Best Estimate Assumption 7.0%	1% Higher 8.0%
Accrued Liability	$159,887	$140,437	$124,423
Valuation Assets	$135,070	$135,070	$135,070
Unfunded Liability	$24,818	$5,368	($10,647)
Funded Ratio	84%	96%	109%

Please see our Commentary on Risk webpage for individual system results or our Interactive Reports webpage for more funded status measures that vary by interest rate assumptions and asset valuation methods.

The funded status measures we share in this report may vary from those presented in the *DRS Annual Comprehensive Financial Report*. These differences occur because the assumptions and methods applied to determine contribution requirements (under a funding valuation) may not apply for financial reporting under GASB accounting standards (an accounting valuation). Put another way, these measurements are used for distinct purposes, and the results may vary between the two reports.

Low-Default-Risk Obligation Measure

When determining plan costs for the purposes of calculating required contribution rates, current funding policy prescribes an annual assumed investment return of 7.0% to discount future expected benefits to the measurement date. These expected future investment returns are based on an investment policy that aims to maximize investment returns at a prudent level of risk. This investment strategy has reduced past required contributions and is expected, but not guaranteed, to reduce future required contributions. For example, over the past 20 years across all plans, investment returns have comprised approximately 70% of the pension fund's total income, with the remaining 30% coming from employer contributions and employee contributions.

Ultimately, actual funding requirements will be determined by actual experience including actual investment performance. Actual investment performance will inevitably vary from future expectations.

To provide a sense for how much future costs are potentially reduced under the state's current funding policy, we can compare those costs to the hypothetical costs under an investment policy with less risk. This comparison also provides a sense for how much costs under current funding policy could increase if future returns from a higher risk investment portfolio are not realized.

In the table below we make such a comparison. First, we display the funded status for each plan under current funding policy with an assumed investment return of 7%. Next, we display the funded status for each plan under a hypothetical funding policy where the plans would be supported by an investment portfolio comprised solely of low-default-risk fixed income securities. The latter measurement is referred to as a Low-Default-Risk Obligation Measure (or LDROM).

For the calculation of the LDROM, and consistent with ASOP 4 – *Measuring Pension Obligations And Determining Pension Plan Costs Or Contributions*, we selected a discount rate derived from US Treasury yields whose cash flows were reasonably consistent with the pattern of benefit payments expected to be paid by the covered plans in the future. As of June 30, 2023, that discount rate was 3.9% for the state's open plans and 4% for the closed plans.

All assumptions other than the assumed rate of investment return match between the two measurements presented below.

Funded Status on an Actuarial Value Basis					
(Dollars in Millions)	PERS		TRS		SERS
	Plan 1	Plans 2/3	Plan 1	Plans 2/3	Plan 2/3
Current Funding Policy					
Discount Rate	7.0%	7.0%	7.0%	7.0%	7.0%
Accrued Liability	$10,701	$60,245	$7,807	$25,616	$9,574
Plan Funded Status	**80%**	**97%**	**86%**	**92%**	**93%**
LDROM					
Discount Rate	4.0%	3.9%	4.0%	3.9%	4.0%
Accrued Liability	$13,497	$94,525	$9,805	$42,194	$14,836
Plan Funded Status	**63%**	**62%**	**69%**	**56%**	**60%**

Funded Status on an Actuarial Value Basis *(Continued)*					
(Dollars in Millions)	PSERS	LEOFF		WSPRS	Total
	Plan 2	Plan 1	Plan 2	Plans 1/2	
Current Funding Policy					
Discount Rate	7.0%	7.0%	7.0%	7.0%	N/A
Accrued Liability	$1,427	$4,269	$19,011	$1,787	$140,437
Plan Funded Status	**96%**	**149%**	**102%**	**94%**	**96%**
LDROM					
Discount Rate	3.9%	4.0%	3.9%	3.9%	N/A
Accrued Liability	$2,573	$5,495	$30,699	$2,820	$216,445
Plan Funded Status	**53%**	**116%**	**63%**	**59%**	**62%**

For all the plans in the table above, the funded status is lower under the LDROM than under current funding policy. This measure reflects lower anticipated investment returns than under current funding policy. Lower returns would lead to higher expected contribution requirements if the hypothetical investment policy under the LDROM were the basis for determining future contribution requirements. Those higher expected future contribution requirements would come with lower investment risk than under the state's current policy. An ongoing comparison between these two measures can be helpful when evaluating the reasonableness of the risk/reward tradeoff under the state's current funding policy.

A funded status measurement, among other measures, is often used to also evaluate the health of a pension plan or security of any underlying benefit promise. As noted above, under the state's current funding policy future investment returns are expected, but not guaranteed, to cover a significant portion of future costs and serve to reduce required contributions. This same point can be extended to plan funded status. By comparing the funded status under current law funding policy to the LDROM basis, we can provide a sense for how much future accrued benefit payments rely on returns from higher risk investments. Typically, the larger the difference between assumed returns, the larger the difference you'll see between the two funded status measures. Additionally, the impact of that difference compounds over longer periods of future benefit payments. The state's open plans have longer periods of future benefit payments than the closed Plans 1. It is important to note that there are additional factors including legal protections that may impact the security of benefits for current participants.

As noted above, the LDROM is based on a hypothetical investment portfolio. Therefore, it is not appropriate to use this measurement to determine contribution requirements or evaluate funding progress under current law funding policy. We expect this measurement to change each year as interest rates change. Given the potential volatility of future interest rates, this measure may change to a larger degree, year over year, than the corresponding measure based on the state's current funding policy. We also note that if the state's funding policy were changed in the future to match the hypothetical investment policy under the LDROM, future measurements would vary from the measurements provided in this report due, in part, to the use of different measurement dates, and potentially the use of different assumptions and methods.

See the **Appendices** for additional supporting information on how we selected the discount rates for the LDROM and the rationale for selection.

Actuarial Gain/Loss

The following tables display actuarial gains and losses, expressed as funded ratio changes as directed under ASOP 4. Actuaries use gain/loss analysis to compare actual changes to assumed changes from various sources with respect to assets and liabilities. We also use this analysis to determine:

- The accuracy of our valuation model and annual processing.
- Why funded ratios changed.
- The reasonableness of the actuarial assumptions.

Actuarial gains will increase funded ratios; actuarial losses will decrease funded ratios.

Under a reasonable set of actuarial assumptions, actuarial gains and losses will offset over long-term experience periods. Generally, a reduction in funded ratio will require a period of higher contribution rates and an increase in funded ratio will require a period of lower contribution rates.

III. PARTICIPANT DATA

The Department of Retirement Systems administers nine retirement systems for state and local public employees. Retirement system membership is determined according to the participant's occupation and employer. Employees covered by each system are defined in separate chapters of the RCW.

PERS *Chapter 41.40 RCW*	State employees; employees of all counties and most cities (some exceptions are Tacoma, Seattle, and Spokane); non-teaching employees of institutions of higher learning and community colleges; employees of ports, service districts, Energy Northwest, public utility districts, and judges first elected or appointed after June 30, 1988.
TRS *Chapter 41.32 RCW*	Certificated teachers; administrators; and educational staff associates.
SERS *Chapter 41.35 RCW*	Classified school district employees and educational service district employees.
PSERS *Chapter 41.37 RCW*	Correction officers (state, state community, county, city, and local community); state park rangers; enforcement officers with the Liquor and Cannabis Board, Washington State Patrol (commercial vehicle), Gambling Commission, and the Department of Natural Resources; public safety telecommunicators; security staff and nurses working at certain state institutions and local correctional departments.
LEOFF *Chapter 41.26 RCW*	Fire fighters; emergency medical technicians; law enforcement officers including sheriffs; university, port, city police officers, and enforcement officers with the Department of Fish and Wildlife.
WSPRS *Chapter 43.43 RCW*	Commissioned officers of the Washington State Patrol.

The following tables show participant data changes from the prior valuation to this year's valuation. We divide the participant data into two main categories:

- **Actives —** Members actively employed and accruing benefits in the plan.
- **Annuitants —** Members and beneficiaries receiving post-retirement benefits from the plan.

We also provide the ratio of active to annuitant members. This is one way to track overall plan maturity, and its associated risks, with a smaller ratio indicating a more mature plan. Risks can emerge over time just by the nature of a pension plan growing or maturing. For example, as a plan matures – with fewer active, contributing members relative to the retiree population – the plan's obligations become larger relative to its source of contributions. Additional Commentary on Risk can be found on our website.

Average Salary	$147,425	$116,944	$123,685
Terminated Members			
Vested	68	105	173
Non-Vested*	11	104	115
Disability Retired**	26	0	26
Total Terminated	**105**	**209**	**314**
Annuitants			
Service Retired***	1,121	5	1,126
Survivors	200	3	203
Total Annuitants	**1,321**	**8**	**1,329**
Avg. Monthly Benefit, All Annuitants	$5,343	$2,172	$5,324
Number of New Service Retirees	36	2	38
Avg. Benefit, New Service Retirees	$6,174	$3,079	$6,011

Note: Totals may not agree due to rounding. The above figures excludes 1 legal order payee currently in receipt of benefit payments of June 30, 2023.

**Members who terminated without a vested lifetime benefit but are eligible for a refund of their employee contributions with interest that currently reside in the trust.*

***Benefits provided outside of pension funds.*

****Includes retirements from active and terminated with vested status.*

The following table provides summary statistics for Plan 3 retirees of PERS, TRS, and SERS purchasing Total Allocation Portfolio (TAP) annuities. These annuities are purchased at retirement from a member's defined contribution account. Assets and liabilities for TAP annuities are included in our actuarial measurements. Please see the [DRS website] for more information on TAP and other types of annuities offered by the retirement systems.

Summary of Members Purchasing TAP Annuities			
	PERS 3	**TRS 3**	**SERS 3**
Number	1,164	2,376	1,329
Average Age	68.6	69.3	70.5
Avg. Monthly Benefit, All Annuitants	$1,500	$1,617	$817
Number of New Purchasers in FY 2023	93	162	90
Avg. Purchase Price, New Purchasers*	$262,100	$314,400	$157,900
Avg. Monthly Benefit, New Purchasers	$1,392	$1,608	$850

**Purchased with money from the member's Plan 3 defined contribution account.*

IV. APPENDIX

Actuarial Assumptions or Methods

To calculate the contribution rates necessary to pre-fund a plan's benefits, an actuary uses an actuarial cost method, a funding policy, economic assumptions, and demographic assumptions. The actuary may also use an asset valuation method other than market value. The section below lists the methods and assumptions that change regularly or are new since the last AVR. Please see our Actuarial Methods webpage for descriptions of the actuarial cost methods and asset valuation method we use for this valuation, and please see our Actuarial Assumptions webpage for descriptions of all remaining assumptions.

Changes in Methods and Assumptions Since the Last Valuation

- We updated our valuation programming to reflect recent high levels of inflation.
  - As discussed on our webpage, annuitants in Plans 2/3 and WSPRS Plan 1 receive annual COLAs up to a cap of 3.00%. Excess inflation above 3.00% is "banked" for future use when inflation is less than 3% for those annuitants.

    The prescribed future inflation assumption is 2.75%; however, the current annuitants have experienced high levels of banked inflation with some annuitants currently banking as much as approximately 10% during Calendar Years 2021 through 2023. See link for historical inflation.

    To value the current levels of COLA "banking" we modeled all annuitants in the applicable plans, as of our measurement date, will receive a 3.00% COLA for the duration of their expected lifetime. This represents our expectation of future inflation to be 2.75% combined with the current levels of "banking". No change in valuation software programming was made for members not currently in receipt of retirement benefits since the COLA banking only applies to members in receipt of benefits.

    LEOFF 1 annuitants also receive a COLA based on inflation but are not subject to a cap. For these members, we modeled the COLA of 5.52% they received on April 1, 2024.
- We corrected a programming error in TRS 1, introduced during the 2022 AVR, regarding eligibility determination for minimum benefits.
- We modified the methodology for determining the ten-year rolling amortization rate of the PERS 1 and TRS 1 Base UAAL. When determining the remaining UAAL, we included future receivable contributions between our measurement date of June 30, 2023, and the adopted contribution rates effective date of July 1, 2025, in PERS and PSERS and September 1, 2025, in TRS and SERS.
  - To determine the present value of future Base UAAL contributions (labeled "Contributions Receivable Adjustment" in Amortization of the Plan 1 UAAL table), we projected future salary base for employers collected UAAL

forward from the valuation measurement date using our General Salary Growth and Growth in Membership assumptions. This salary was applied to the Base UAAL rates prescribed under ESSB 5294 (Chapter 396, Laws of 2023). Lastly, we found the present value of these contributions as of the valuation measurement date using our Investment Rate of Return assumption.

  - This change does not impact the fixed ten-year contribution rates for past benefit improvements nor minimum rates under the funding policy.

- We updated our valuation to reflect legislation passed during the 2023 Legislative Session.
  - SB 5350 (Chapter 397, Laws of 2023) provided PERS Plan 1 and TRS Plan 1 annuitants who are not receiving a basic minimum, alternate minimum, or temporary disability benefit with a one-time permanent 3% increase to their monthly benefit, not to exceed a maximum of $110 per month. We updated our valuation programming to reflect this legislation.
  - SHB 1056 (Chapter 410, Laws of 2023) allows 2008 Early Retirement Factors (ERF) recipients in PERS, TRS, and SERS, to return to work with a DRS employer up to 867 hours before reaching age 65 and increases benefits for recipients of the 2000 ERFs hired on or after September 1, 2008. Our valuation programming did not require changes to reflect the new return to work rules. The increases to benefit for eligible annuitants is effective during FY 2024 and will be reflected in our valuation data beginning with the June 30, 2024, measurement date. To reflect this change in our valuation, we relied on the prepared fiscal note during the 2023 Legislative Session.
  - SHB 1007 (Chapter 18, Laws of 2023) expands the definition of veteran to include individuals who received an Expeditionary medal (or badge) during any armed conflict and expands eligibility for IMSC. We study rates of IMSC during our demographic experience study with the next study scheduled to begin during FY 2025. To reflect this change in our valuation in the interim, we relied on the prepared fiscal note during the 2023 Legislative Session.
  - House Bill 1055 (Chapter 199, Laws of 2023) allows existing Public Safety Telecommunicators (PSTs) who are in PERS 2/3 the opportunity to prospectively transfer into PSERS. Newly hired PSTs will also become PSERS members instead of PERS members. The transfer window for eligible members takes place during FY 2024 and any changes will be reflected in data starting with the June 30, 2024, measurement date. To reflect this change in our valuation in the interim, we relied on the prepared fiscal note during the 2023 Legislative Session.

- We corrected our methodology for determining employer contribution rates in TRS 2/3 in the event the member calculated normal cost exceeds the member maximum contribution rate.
- We updated the minimum contribution rate calculation for LEOFF 2 to reflect changes enacted during the 2022 Legislative Session. We determined the minimum contribution rates calculated will be offset by 0.75% through the 2033 valuation. We assume the last biennium of rate offsets would be the 2035-37 Biennium.
  - SHB 1701 (Chapter 125, Laws of 2022) directed an offset to minimum contribution rates to go into effect July 1, 2025 (see Section 8) in order for the minimum contribution rates to not increase for current LEOFF 2 members as a result of the benefit improvements contained within the bill.
  - To determine the increase to the minimum contribution rates due to the benefit increases, we relied on our 2021 AVR when the new benefit improvements were first programmed. The entry age normal cost contribution rates, used to inform the LEOFF 2 minimum rates, increased by 0.75% due to the benefit improvements under this bill. Therefore, we selected a 0.75% offset to be applied to the base minimum contribution rates.
  - This offset was intended to reduce future costs for members participating in LEOFF Plan 2 at the time these benefit improvements were enacted, approximately the end of FY 2022. To determine how long this offset should be applied, we relied on the remaining average future working lifetime of these members as of our June 30, 2021, measurement date, approximately 15 years. We will include the 0.75% offset in our rate calculations used to inform contribution rate adoption through the 2035-37 Biennium. This represents 15 years of contribution rate collection from the effective date of the benefit improvement.

Other Key Considerations

- We considered but did not make changes to our model to reflect anticipated increases to salaries in PSERS, LEOFF, and WSPRS due to the 2023-25 Collective Bargaining Agreements. We will continue to monitor short-term salary increases and may make temporary, one-time assumption changes when deemed necessary.
- We considered but did not make an adjustment for SHB 2357 (Chapter 237, Laws of 2024) that enacts a non-pensionable longevity bonus for commissioned Washington State Patrol troopers. This legislation could impact retirement behavior. We will continue to monitor retirement rates and may make adjustments in the future.

LDROM Methodology

To select the discount rates for the LDROM we relied on US Treasury yields as of our measurement date. ASOP 4 directs the use of discount rates based on low-default-risk fixed income securities with cash flows that are reasonably consistent with the timing of benefits that are expected to be paid in the future. We selected US Treasury yields as the underlying basis for the discount rate for this measurement because they represent low-default fixed income securities, and we believe they are commonly understood by our readers.

To calculate discount rates that are reasonably consistent with the timing of benefits expected to be paid in the future for each plan, we projected future annual benefit payments and determined a corresponding annual discount rate based on linear interpolation of the US Treasury yield rates. We used these annual rates to discount the future payments to our measurement date of June 30, 2023. We then calculated a single discount rate applied to all future cashflows that would provide the same present value of future benefits. Under this approach, PERS 1, TRS 1, and LEOFF 1 have a LDROM discount rate of 4.0% while all other plans have a discount rate of 3.9%.

Comments on Valuation Model

As required under ASOP No. 56 – *Modeling*, we share the following comments related to our reliance on the ProVal® software developed by Winklevoss Technologies.

- We understand this software model was primarily created for use by actuaries when performing valuations and projections of pension and retiree medical plans. The use of the model for this analysis is appropriate given its intended purpose.
- To assess the general operation of the model, we reviewed the output for reasonableness. This includes comparing the results to our simplified estimates done in Microsoft Excel and examining sample lives to confirm the programming is working as intended. We are not aware of any known weaknesses or limitations of the model that have a material impact on the results.
- The PFC hires auditors to independently review and replicate the results of rate-setting valuations. This process provides an additional reasonableness check of the model output.

Additionally, we considered how the use of different inputs to the model (e.g., data/assumptions/provisions) produce different results and evaluated the relative impacts to our expectations. This allows us to gain a deeper knowledge of the model's important dependencies and major sensitivities.

Summary of Plan Provisions

The summary of key plan provisions used in the actuarial valuation are provided in two sets of tables. The following tables contain plan provisions that can change frequently while the provisions that change less frequently can be found on our Summary of General Plan Provisions webpage.

These tables and those on our website present high-level summaries and are not meant to be exhaustive lists. For complete details of plan provisions, please refer to the statutes governing the systems or contact the plan administrator (DRS). In the unlikely event that information contained in these summary tables conflicts with state law, the law takes precedence.

Summary of Frequently Changing Plan Provisions			
PERS	**Plan 1**	**Plan 2**	**Plan 3**
COLA	$2.85* per Month per YOS on 7/1/24	Lesser of CPI** or 3%	Lesser of CPI** or 3%
Minimum Benefit per Month	$75.80 per YOS on 7/1/24, $2,268.87* for Select Annuitants	N/A	N/A
Material Plan Provision Changes since Last Rate-Setting Valuation	Plan 1 COLA 3% Increase on 7/1/23 & 7/1/24 (C 397, L 23) & (C 255, L 24) Reduced Saving Fund Regular Interest (WAC 415-02-150)	Reduced Saving Fund Regular Interest (WAC 415-02-150) Reduction of Postretirement Employment Restrictions (C 410, L 23)	Reduction of Postretirement Employment Restrictions (C 410, L 23)

V. RESOURCES

The Office of the State Actuary's Website

Our website contains additional information and educational material not included in this report. The site also contains an archive of prior AVRs and other recent studies that OSA has produced. The following is a list of materials found on our website that could be useful to the reader.

Glossary

Definitions for frequently used actuarial and pension terms.

Age Distributions

Tables summarizing valuation statistics by system, plan, and member/annuitant age as of the latest rate-setting valuation.

Historical Data

Tables summarizing valuation statistics by retirement system and valuation period.

Prior Actuarial Valuation Reports

Archive of valuations over the past several years.

2023 Economic Experience Study

Report examining the long-term economic assumptions.

2023 Report on Financial Condition

Presentation examining the financial health of the retirement systems.

2013-2018 Demographic Experience Study

Most recent report examining demographic behavior within each of the retirement systems.

Risk Assessment

Information examining the effect of unexpected experience on the retirement systems.

Commentary on Risk

Educational information on the risks inherent in our actuarial measurements and how these measurements could vary under different circumstances.

Contribution Rate Projections

Forecasts for future contribution rates based on projected assets and liabilities.

Interactive Reports

Set of reports displaying funded status, projected benefit payments, and contribution rates as of the latest rate-setting valuation.

Pension Education

Educational material on Washington State pension plans and the work produced by OSA.
